NOTE.—'Special' means in the case of Imports; 'Imports for Home Consumption,' in case of Exports, Exports of Domestic Produce and Manufacture. α The figures for Mexico include coin and bullion.

*Figures are for the years 1903, 1904 and 1905.

COMMERCIAL AGENCIES

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, etc., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

Canadian Commercial Agents.

Australasia.....	J. S. Larke,* The Exchange, Sydney, agent for New South Wales, Queensland and New Zealand.
	D. H. Ross, P.O. Box 140, Melbourne, agent for Victoria, South Australia, Western Australia and Tasmania.
China.....	H. J. Craig, 18 Szechuen Road, Shanghai.
France.....	A. Poindron, 101, Rue Réaumur, Paris.
Great Britain.....	P. B. Ball, Room 39 and 40, Central House Birmingham.
	J. B. Jackson, cor. of E. Parade and Greek Street, Leeds, agent for Leeds and Hull.
	P. B. McNamara, Canada Chambers, 36 Spring Gardens, Manchester.
	W. A. McKinnon, Sun Buildings, Clare Street, Bristol.
Japan.....	Alex. MacLean, No. 14 Bund, Room B., Yokohama.
Mexico.....	A. W. Donly, Apartado 2029, Mexico, D.F., Mexico.
Newfoundland.....	E. D. Arnaud, Gazette Building, Water St., St. John's.
Norway.....	C. E. Sontum, Grubbegd, No. 4, Christiana, Norway, agent for Denmark, also.
South Africa.....	C. M. Kittson, Rhodes Building, Cape Town, Cape Colony.
West Indies.....	G. Eustace Burke, Kingston, Jamaica.
	R. Bryson, St. John, Antigua, agent for Antigua, Montserrat and Dominica.
	S. L. Horsford, St. Kitts, agent for St. Kitts, Nevis and the Virgin Islands.
	Edgar Tripp, Port of Spain, Trinidad, agent for Trinidad and Tobago.

Canadian High Commissioner's Office.

	W. L. Griffith, Secretary, 17 Victoria Street, London, S.W., England.
Great Britain.....	Harrison Watson, Canadian representative, City Trade Branch, 73 Basinghall Street, London, E.C., England.

Canadian Immigration Agents.

Belgium.....	D. Tréau De Cœli, 29 Rue de Souci, Antwerp.
France.....	Paul Wiallard, 10 Rue de Rome, Paris.
Great Britain.....	G. H. Mitchell, Newton Chambers, 43 Cannon Street, Birmingham, England.
	Alfred Jury, Old Castle Buildings, Preeeson's Row, Liverpool, Eng.
	Bruce Walker, 52 St. Enoch Square, Glasgow, Scotland.
	John Webster, 14 Westmoreland Street, Dublin, Ireland.
	Edward O'Kelly, 13 Queen's Square, Belfast, Ireland.
	H. M. Murray, Western Mail Building, Cardiff, Wales.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA,
AND TASMANIA.

(Mr. D. H. Ross.)

STOCK EXCHANGE BUILDING, MELBOURNE, July 9, 1906.

THE COMMONWEALTH REVENUE 1905-1906.

The preliminary figures relating to the Commonwealth financial year 1905-06 were recently made available. The sources of revenue were as follows:—

Customs and excise.. . . .	£ 8,921,642
Special Western Australian tariff.. . . .	77,681
Post and telegraph offices.. . . .	2,823,768
Defence.. . . .	8,462
Miscellaneous.. . . .	2,819
Patent fees, &c.. . . .	23,937
New revenue.. . . .	9,879
Refunds.. . . .	11,000

Total revenue 1905-06.. . . .	£11,879,188
Revenue 1904-05.. . . .	11,460,315

Increase 1905-06 over 1904-05.. . . . £ 418,873

The actual receipts exceeded the estimates by £491,583. The Customs returns were over £264,000 above the figures of the previous year, and the receipts from the post and telegraph offices showed an increase of £192,863.

SUMMARY OF REVENUE AND EXPENDITURE 1905-06.

The following is a brief summary of the revenue and expenditure of the Commonwealth for the financial year which closed on June 30:—

Total revenue 1905-06.. . . .	£11,879,188
Total expenditure 1905-06.. . . .	4,497,177

	£ 7,382,011
Balances unadjusted.. . . .	3,718

Returned to States.. . . . £ 7,385,729

The federal treasurer paid to the various Australian states last year £827,870 more than the three-fourths net customs and excise revenue as provided by section 87 (Braddon clause) of the Commonwealth constitution.

AUSTRALASIAN WOOL STATISTICS 1905-06.

The exports of wool from each Australian state and New Zealand for the season 1905-06, as closely as can be adjusted from the Customs returns, are given as follows:—

	Bales.
New South Wales.. . . .	816,000
Victoria.. . . .	267,500
Queensland.. . . .	176,000
South Australia.. . . .	119,000
Western Australia.. . . .	42,500
Tasmania.. . . .	33,500
New Zealand.. . . .	415,000

Total.. . . . 1,869,500

The value per bale is averaged at £13 10s. 3d. (\$65.73), giving an aggregate of about £20,761,011, showing a net gain of £568,327 over the previous season. The sales in the Australasian markets amounted to 1,354,865 bales, showing an increase of 262,214 bales. In regard to local sales, 28 per cent went to the United Kingdom, 57 per cent to the continent, and 6 per cent (83,676 bales) to the United States and Canada. It is estimated that 93,000,000 sheep were shorn last season, as against 120,000,000 before the prolonged drought. Growers take an optimistic view of the future, and the mail closes with the wool situation being regarded as firm, and with the belief that, this year at least, values will not depreciate.

AUSTRALIAN BUTTER EXPORTS, 1905-06

The Australian butter export season for 1905-1906 has closed, so far as shipments to the United Kingdom are concerned, and it is now possible to compare the approximate shipments. The following comparisons show the progress made:—

	Shipments to United Kingdom. Tons.
1903-1904.....	19,855
1904-1905.....	24,368
1905-1906.....	26,450

Since October last the reduced freights have been in operation to the United Kingdom. What this has meant to the dairy farmer may be seen from the following comparison:—

1904-1905.....	24,368 tons at £7 0 0 =	£170,576
1905-1906.....	26,450 tons at 3 10 0 =	92,575

Had the old 0½d. per lb. freight been in force this season, the freight bill would have been £185,150, instead of \$92,575. The season was marked by relatively high prices for butter, and it is satisfactory to note that London private cables regard the outlook for the new season as excellent.

GROWTH OF LINUM FLAX IN VICTORIA.

It has for some years been demonstrated that linum flax can be successfully grown in the state of Victoria. In favoured districts an acre of land will produce three tons of flax and seed. The State Department of Agriculture has encouraged its growth by a system of bonuses for the cultivation and extraction of the fibres. The profitable nature of the New Zealand crop—though of quite a different variety—has drawn the attention of growers to the remunerative results which should be attained in this state. Hitherto, the chief difficulty to overcome was the absence of a process by which the flax straw could be quickly treated, and the tedious methods in the preparation of the fibre in a marketable condition.

AN AUSTRALIAN INVENTION FOR TREATING FLAX.

As Canada produces a considerable quantity of flax, growers will naturally be interested in any improved methods in treating their crops. To overcome all difficulties heretofore experienced, a Melbourne firm are now obtaining patents throughout the world for a process that is said to produce a much larger yield of fibre, of greater strength, and of an unstained or natural colour, which, for the purpose of manufacturing such lines as linen, damask, canvas, &c., requires no chemical bleaching in the finishing operations.

The state expert strongly favours this new process, after exhaustive trials, on account of its expedition in producing fibre of exceptionally fine quality.

THE IMPROVED PROCESS OF TREATING FLAX.

The flax in its rough condition is passed through a machine consisting of three pairs of rollers, after which it is immersed for an hour in a bath of hot water—contain-

ing added ingredients (not chemicals). Then the material is drained and dried, put through the breaking machine and finally through the scutcher. To make a superfine quality it is washed twice, by which means the fibre is made pure white. In addition to the great saving of time, the inventors claim there is little or no waste (tow) and thereby much greater quantities of finished flax are produced of a stronger quality than by any process hitherto followed.

AN AUSTRALIAN MILKING MACHINE.

In my report of January 13 last (Monthly Report for January, 1906, page 1204), I referred to the market available in Australasia for a milking machine of satisfactory mechanism. A few days ago I inspected the practical application of a recently invented Australian milking machine, which is now undergoing exhaustive tests at the Victorian Agricultural College. Thousands of dairy farmers have followed with great interest the attempts made to evolve a milking machine that would displace hand-milking with its drudgery, lack of cleanliness and cost. It was apparently demonstrated that the secret of squeezing the cow's teat and drawing the milk at one and the same operation has been discovered, whereas other machines milk by suction only. This process has been patented in Canada, and full particulars are being forwarded by the inventors to a Canadian firm interested in dairying requisites, with a view of having the machines manufactured and sold in the Dominion.

PRINCIPAL POINTS IN NEW AUSTRALIAN MILKING MACHINE.

It is claimed that simplicity is the keynote of the new Australian milking machine, as it can be taken to pieces and put in order by any ordinary farm hand. The cups which cling to the cow's udder when the vacuum is turned on—in other machines—remain in that position until the vacuum is turned off; and so long as the pulsator is at work the teats are being operated upon, whether the cow is giving milk or not. The automatic releaser is a valuable adjunct, by which—when the cow ceases to give milk—the cups fall from the udder automatically, and hang clear of the ground and cow, being suspended by a light chain. The milk receiver has a double compartment, and the top portion (containing the automatic apparatus) when the milk ceases to flow, gently shuts off the vacuum. All risk of over-milking is thus done away with. Each cow is milked independently of the others, the action continuing on each until milked. Judging from the high estimate formed by dairy experts at the demonstration, the new milking machine will be a boon to dairymen to whom paid labour has given poor results.

THE AUSTRALIAN COMMERCE ACT.

The regulations affecting imports under the Commonwealth Commerce Act have not been completed, and will not come into operation until six months after they are gazetted. The additional time granted has given satisfaction to importers, thus enabling business arrangements to be modified. When the regulations are finally completed and gazetted copies will be forwarded by first mail to the Department of Trade and Commerce, Ottawa.

FAILURE OF MOTOR BUSES.

The experiment made by the Victorian government in using motor buses as feeders for the suburban railways has not proved successful. The trial extended over six months, and the motor service has been discontinued owing to frequent breakdowns and not being a productive source of revenue. On the other hand, large motor cars—of a different type to those built by the government—are being successfully maintained in the public service, by private enterprise, in other parts of this state.

AUSTRALIAN CANNED MEATS.

Recent Chicago disclosures, which may be exaggerated to some extent, have caused many inquiries for Australian canned meats, which, in the various states, are

packed under rigid veterinary inspection. The necessity of strict state supervision of all foodstuffs, whether for local consumption or export, is at the present time a marked feature in proposed Australian legislation.

WIRE NETTING MADE BY PRISON LABOUR.

It is the intention of the Premier of Victoria to have the £100,000 set apart for the purchase of wire netting spent in the state. In view of representations, which have been made to him, he has decided to call for tenders for the supply of six machines for the manufacture of wire netting.

It has been suggested that with these machines wire netting could be made by prison labour, but beyond the decision to call for tenders for machines nothing has been definitely decided. The netting is required to cope with the rabbit pest.

AUSTRALIAN TRADE CONDITIONS.

Prospects continue excellent throughout these states, and it appears certain that a further expansion in Australian commerce will be recorded during the second half of the year. Nearly all branches report trade conditions sound and satisfactory.

CANADIAN TRADE NOTES.

Indents, of increased volume, are being sent to Canadian sources of supply by this mail for a variety of goods. Some special lines of hardware and wood pulleys are receiving attention. Canadian cattle foods are due here shortly, and a new breakfast food is being exploited by an energetic agency firm. The volume of correspondence received at this commercial agency continues large. Special reports, some of an exhaustive nature, are going direct from this office to Canadian manufacturers by this mail.

D. H. ROSS

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(*Mr. J. S. Larke.*)

THE EXCHANGE, SYDNEY, AUSTRALIA, July 9, 1906.

NEW ZEALAND TRADE FOR 1905.

The returns of trade of 1905 of New Zealand have not yet been published, but some figures in connection with it have been received through newspapers. The importations show a reduction of £451,000 in 1905, as compared with those of 1904, the figures being: 1904, £12,728,079; 1905, £12,277,079.

The decrease in importations is very general, there being but a few lines in which there were increases. Amongst these are boots and shoes, an increase of over £26,000; bicycles and materials, £20,000.

There are indications that the preferential tariff of New Zealand is having some effect. In the case of boots and shoes covered by this tariff, the importations from the United Kingdom in 1902 were £97,461; 1905, £182,882.

From the United States they were:—

1902.....	£ 81,111
1903.....	102,054
1905.....	56,660

The figures of the importations from Canada are not given, but I think, when obtainable, they will show a very considerable increase during the same years.

In bicycles there were imported in 1902, 7,752 machines; 1905, 12,172 machines. These mainly came as follows:—

	United Kingdom.	United States.
1902..	3,355	2,934
1905..	10,829	677

In paper the effect of the duty has not yet been fully felt, as existing contracts were exempt from duty, but the preferential tariff is telling, as the following figures will show:—

	Total Imports.	United Kingdom.	Canada.	U.S. America.	Germany.
	£	£	£	£	£
Paperhangings, 1905	36,982	29,406	1,774	2,163	3,356
" 1902	33,327	27,329	351	4,645	614
	Cwt.	Cwt.	Cwt.	Cwt.	Cwt.
Printing, 1905.....	157,436	54,093	31,685	44,618	2,681
" 1902.....	117,128	44,916	1,781	61,107	2,208

CROP RETURNS.

The agricultural returns of New Zealand for the last year show a very material reduction in all the agricultural crops. The following statement of the returns for 1904 and 1905 will illustrate this:—

	Wheat.	Oats.	Barley.	Potatoes.
	Bush.	Bush.	Bush.	Bush.
1904.....	9,123,673	14,553,611	1,128,164	134,608
1905.....	6,798,934	12,707,982	1,024,045	123,402

Notwithstanding this shortage in wheat it is estimated that there will be enough for home consumption and a surplus of a million and three-quarters.

POTATOES.

The crop of potatoes in 1905 was not only less than 1904, but still much less than that of the year 1903, which yielded 208,787 tons. Under normal conditions the consumption of potatoes in New Zealand would be 225,000 tons. As a consequence prices have gone up very materially, and in Wellington good potatoes are quoted at £12 per ton. Australia, as I have reported, has a small crop, and prices are very high. Nevertheless, some small quantities have been sent to New Zealand. The high price will reduce the consumption in New Zealand materially, but there will be a demand for any surplus Canada can supply next October at good prices.

FREIGHTS.

Some time ago the New Zealand government subsidized a line of steamers to run to the west coast of the United Kingdom. The trade had been controlled by the New Zealand Shipping Company and the Shaw Savill Company, which have also now put on steamers for the west coast ports. Freight rates from New Zealand are indefinite, running from 10s. to 20s. per ton. As it is probable that the rate war will be carried on on exports from the United Kingdom to New Zealand at similar rates, Canadian exporters will need to study the opportunities that may offer before shipping to New Zealand. In all probability for a little time, at least, the best freight rates will be obtained by shipping via Liverpool and Bristol.

TRADE CONDITIONS.

The conditions of trade throughout Australia are excellent. The exports of products for the first half of the present year are in the main lines from thirty to seventy per cent in excess of the similar period of the previous year. The frozen meat trade has been renewed and is assuming its old proportions. The figures for the first six months of 1905 and 1906 are as follows:—

	1905.	1906.
Frozen mutton, carcases.	120,097	375,563
Frozen beef, pieces of.	3,808	19,002

Frozen rabbits and hares have now become an important item, over four millions were exported during the first six months of this year, of which more than one-half were shipped in June. In addition to those frozen, there is now shipped nearly 150 tons of skins per month. This industry is giving profitable work to many who have complained of being unemployed. The prices being good, the value of the exports have increased even in a greater ratio than the quantity.

The Customs returns of New South Wales for the first six months of the year show an increase of £142,078, being an increase of only 10 per cent. The exports are, therefore, increasing very much more rapidly than the imports.

WOOL SEASON.

The wool season closed on June 30 last. The total exports from Australia for the twelve months are 1,454,820 bales, as against 1,218,960 bales for the previous year. This is the largest export of this staple since the year 1896-7. Nearly 80 per cent of the exports had been sold previously at the auction sales held in Sydney and elsewhere, the average price realized at these sales being £13 11s. 4d. per bale, as against £12 15s. 0d. per bale for the previous year. When the wool unsold but shipped to London and Europe is disposed of, it is likely to make a return of nearly one hundred million dollars to Australia for the clip of 1905-6. Of the wool shipped, 816,462 bales were the product of New South Wales, showing an increase of 155,136 bales for the year. This is an increase of 23·6 per cent in the wool clip, while the increase in the number of sheep shorn is only 14 $\frac{1}{10}$ per cent, indicating an increased yield per sheep as there was also an increase in the price per pound of the wool.

The output of wool for New Zealand was 413,633 bales as against 376,765 for the previous year. This makes a total increase of 273,721 bales of Australasian wool. The prospects for this season are that there will be a further increase of from 200,000 to 250,000 bales of wool in first class condition, which will be a record for Australasia. If prices continue firm this would mean one hundred and ten million dollars for the clip.

ANNUAL SHEEP EXHIBITION AND SALES.

In view of the future possibilities of Canadian sheep-breeders finding a market in this country for highly bred sheep, it may be of interest to note the annual exhibition under the Sheep Breeders' Association, held in Sydney, and the sales connected therewith during the previous two weeks. Australia is pre-eminently a fine wool country, and meat has been secondary to wool. The Merino is especially adapted to the climate and country, and in no country in the world has so much attention been paid to the breeding of this animal as here. The Merino, therefore, takes a prominent position. The success of New Zealand in shipping frozen lambs to the English market is leading pastoralists to regard that trade with increasing favour. The Merino is not suited for this purpose and crossbreds between a ram of what is termed the British breeds and the Merino promises to enter more largely into the flocks of Australia than heretofore. While the Merino occupied the greater attention at the exhibition, yet the British breeds had their share. Southdowns were not shown but were offered at the sales. Shropshires, Leicesters, Romney Marsh and Lincolns were shown in some numbers. The Southdown, while highly valued in New Zealand, carries too light a fleece to be

greatly in favour here, and the offerings of this breed at the sales did not find a large market. Hitherto there have been importations of Vermont Merinos offered at the same time. This breed has largely entered into some of the most famous flocks of this state. They have produced a sheep with a dense wool and a skin much folded, but it is claimed that there is a danger that these folds will produce a fibre approaching to hair, and it is believed that breeders have gone far enough in this direction and the tendency in the future will be to cultivate plainer-bodied sheep.

At the sales about 7,000 sheep were offered, 3,000 being British breeds and 4,000 Merinos. One firm is credited with having sold 1,600 Merinos in a day. These were what is known as 'flock sheep,' as such rapidity was impossible with the higher bred stud sheep. The fancy prices that have characterized the sales of previous years were not obtained. There was no sheep that brought 1,600 or even 1,000 guineas. The highest price given for a Merino was 475 guineas. Twenty-three rams offered by the same breeder averaged £147 12s. 11d. each. Another consignment brought an average of £115 10s. 0d., while sales from 100 to 400 guineas were numerous. British breeds did not bring so high a figure, the highest price reached being 185 guineas for a Shropshire ram bred in Tasmania. One shipment of 11 ewes brought an average of £35 2s. 6d. A shipment of 58 brought £29 9s. 6d.; a shipment of 10 rams, mainly yearlings, brought an average of £24 19s. 1d.; a similar shipment brought an average of £27 6s. 8d. Lincolns did not bring quite so high a figure, well-bred and registered sheep bringing from 30 to 100 guineas each.

The arrangement of the sales created some unpleasantness, and it is believed affected the prices obtained, as they were lower than those of last year. Canadian breeders would have to face the breeders from New Zealand and Tasmania, and men like A. E. Mansell, whose Shropshires are well known to Canadian importers, have settled in that country and have made the breeding of these sheep a speciality and with very great success. The importation of Canadian sheep would have this advantage that it is felt that the introduction of new blood into Australian flocks is a necessity, and while this necessity is met by importations from New Zealand and Tasmania, it would be advisable sometimes to go further afield, as the breeders of Merinos have done, in seeking new blood. Though Australia is pre-eminently the producer of fine wool, it is admitted that there is a tendency, unless new blood is introduced, of the wool becoming coarser, and in the efforts to retain fine wool without the introduction of new blood, the constitutions of the sheep are undermined. I think it would be worth the attention of the Sheep-Breeders' Association of Canada to experiment in this market, and believe that the effort would be welcomed.

A BRITISH AGENT.

The British Board of Trade has had a Commissioner for some time in Australia looking into the conditions of trade between Australia and New Zealand and the United Kingdom. He has now returned to England to make his report. He has obtained a voluminous record of the trade, divided into a number of classes, for twenty-five years. It will be, when published, a valuable history of the trend of trade. He finds, as is well known here, that many of the lines once obtained from Great Britain are now locally made. In the case of mining machinery, 75 to 80 per cent is now produced by the engineering shops of Australia. He is suggesting a uniform system of statistics for the Empire in order that a more accurate knowledge of the importations and exportations may be arrived at. He has also found, as I have reported, that the statistics of Australia respecting imports fail to give, with any degree of accuracy, the countries of origin of the products.

FISH.

I have circulated the pamphlet containing the report of Mr. Cowie upon the herring fisheries of British Columbia, amongst the trade, who have received it with pleasure. There is no evidence that the fish of Mr. Cowie's cure have been received here, but I am advised that the last shipment of salt herring was very satisfactory.

Though received too late for the Lenten season, they are selling very well under the circumstances. The trouble with the kippered herring and bloaters appears not to be in the cure, but on the uncertainty as to the kind of fish sent.

BRITISH COLUMBIA SHIPMENTS.

The largest establishment in Australia states that some of the fish that have been received from British Columbia have been equal to anything received from any part of the world, but other shipments have been almost worthless. There can be no question that in the one case fulls, and in the other case emaciated spent fish have been sent. If such a course is pursued it will be impossible for British Columbia herring to secure a reputation that will ensure the best prices.

PACKING OF SALMON.

The alleged revelations respecting the methods of canning meat in Chicago have, of course, been published in Australia, and as is naturally to be expected there have also been occasional statements respecting the packing of salmon on the Pacific coast. One or two dealers have expressed the opinion that it would affect the sale of canned salmon in Australia. As the result of inquiries amongst the trade I did not find that this opinion is generally held. It is now the season when little tinned fish is sold, but so far there is no indication of any diminution in the demand. The destruction of the stock held in San Francisco, the probability of a short pack next year, and the general high character of the fish received from British Columbia will insure next year a demand at higher prices, which may not be fully supplied.

GROATS.

The high price of oats in this market has made a demand for groats for the purpose of making oatmeal. Unfortunately the Canadian market was also bare, and replies to inquiries show that no shipments could be made for three months. The oatmeal season is during the winter months in Australia, and before supplies could be had from Canada, the trade will be wellnigh over, though there will be some little demand which may warrant importations before the new crop of Australia is reaped.

CARRIAGES.

Some vehicles recently from Canada have been pronounced by the trade 'unsuitable to this market.' Apparently they were specially made to suit a presumed demand here, but they are heavier than any used here and will probably have to be sold below cost. Other vehicles in the same shipment promise very much better results. This indicates the necessity of a study of the local conditions before any large shipments can be made.

TIMBER.

Douglas fir commonly known as Oregon, is exceedingly high. Sales are reported at 110s. per thousand feet. Upon a freight basis of 40s. this would make the price \$17 at the mills. This is by no means a record price, but it is a very exceptional one. British Columbia mills seem to be fully occupied, as but two cargoes are now under weight to Australia.

SLATES.

Nearly five million roofing slates are imported into Australia and New Zealand annually. More than half come from the state of Vermont. It is claimed that British Columbia possesses quarries of slate of excellent quality. It ought to be able to compete in this market if the quarries were worked, as in connection with the timber

trade, it ought to secure moderate rates of freight. There is a market here of about \$200,000, sufficient to induce an effort being made to secure it.

PAPER.

In response to inquiries I have had to express the opinion that it is exceedingly difficult for a mill to find a market for paper in this country without having a representative on the spot. There are a number of British, European and United States firms represented, and at a distance of ten thousand miles negotiations would be too slow to accomplish much. The contracts are usually for three years and the terms vary. The prices are to be quoted delivered at the stores of the newspaper companies, the shipper is asked to suffer the loss of all damage in transportation, and payment is made for only workable paper. In some cases, too, the mill is asked to hold in store a supply equal to two months at the disposal of the newspaper company, to guarantee regular deliveries. These terms are not demanded by all, but they are often exacted and complied with in an agreement.

PRICES.

The prices of Australian products in which Canada is interested have shown a decline. Hides are reported easier in price. The Queensland meat works have been fairly busy and have consequently put a number of hides upon the market. Sheep skins, too, have declined $\frac{1}{2}$ d. per lb. Rabbit skins are lower in price by 1d. In fur skins of the kangaroo class, the demand is strong and prices are firm. Bear skins are higher, but opossum skins, in harmony with the London market, have declined from 10 to 15 per cent.

J. S. LARKE.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. M. Kittson.*)

RHODES BUILDING, CAPE TOWN, July 9, 1906.

CHICAGO MEAT PACKING SCANDALS.

Recent statements in the press regarding the methods of meat packing in Chicago had the effect of seriously injuring the sale of United States of America tinned meats in South Africa, to the great benefit of Australian canners who have not been slow to take advantage of the opportunity.

The new tariff is also favourable to the latter, allowing a rebate of $\frac{1}{2}$ cent per pound on canned meats of Canadian and Australian origin. Canadian canners would do well at the present juncture to take more interest in the South African market.

THE NEW TARIFF.

The various parties forming the South African Customs Union have now adopted the new tariff framed by the Customs Convention held at Maritzburg, Natal, several months ago, the point chiefly of interest to Canadian manufacturers is the extension of the customs preference to certain articles of Canadian produce which hitherto did not receive preferential treatment, and in the case of the ad valorem rates the rebate granted to articles of Canadian origin has been increased from two and one-half per cent to three per cent.

C. M. KITTSON.

TRINIDAD AND TOBAGO.

REPORT OF COMMERCIAL AGENT.

(Mr. Edgar E. Tripp.)

PORT OF SPAIN, TRINIDAD, July 4, 1906.

TRINIDAD AND CANNED MEATS.

In view of the exposures of the conditions under which food products have been canned at Chicago, the government introduced at the last meeting of the Legislative Council an ordinance to provide for the examination of all such products on importation.

NEW ORDINANCE RESPECTING CANNED FOODS.

The ordinance, which was read a first time, will, no doubt, become law very shortly.

In part it is as follows :—

The term 'food' means every article intended for the food or drink of man, and includes food imported in tins, cans or other coverings and whether fresh or preserved.

On the importation of any food into this colony it shall be lawful for the Collector of Customs:—

- (a) To detain the same for purposes of examination;
- (b) To cause a sufficient number of samples to be examined by chemical analysis or otherwise ;
- (c) To destroy or cause to be destroyed any food which upon analytical or other examination is found to be unsound, deleterious or injurious to health. Provided that the power of destruction shall not be exercised except on the authority of the Governor in Executive Council after due notice to the importer or his agent.

No compensation shall be payable to any person in respect of any food destroyed under the provisions of the last preceding section, nor shall the Collector of Customs or any person acting under his authority be liable to any action at law in respect of such destruction.

The importer or consignee of any food shall not be entitled to claim the value of any samples which may be rendered unfit for sale or use in consequence of being taken for examination under this ordinance.

EDGAR TRIPP.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. MacNamara.)

MANCHESTER, ENG., August 9, 1906.

STOCK OF PROVISIONS AT LIVERPOOL.

Estimate of the stock of provisions, &c., in the port of Liverpool, on July 31, 1906, together with the figures at the corresponding date last year, and also of last month:—

	July 31, 1906.	June 30, 1906.	July 31, 1905.
Bacon.....Boxes.	18,101*	17,250	20,289
Hams....."	2,374	1,476	6,068
Shoulders....."	1,846	888	7,190
Butter.....Cwts.	9,825	3,404	4,918
Cheese.....Boxes.	65,649	47,517	41,772
Lard (prime steam western).....Tierces	5,162	3,431	7,820
" (imported pure refined lard) in tierces, firkins or other packages.....Tons.	2,532	2,480	2,474
Lardine and compound....."	89	176	200

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(Mr. W. A. MacKinnon.)

BRISTOL, ENG., July 31, 1906.

CANADIAN DELEGATES VISIT BRISTOL.

Arrangements were made by the London Chamber of Commerce in co-operation with various other chambers, for a provincial tour of the Colonial Delegates to the Congress of the Chambers of Commerce of the Empire, which met in London from the 10th to the 14th of this month. Unfortunately, the entire programme for the Provincial tour fell through, with the exception of the visit to Bristol. I was able to second the efforts of the President of the Bristol Chamber to secure a party to visit this port, particularly with a view to inspecting the new and old dock accommodation at Avonmouth. This visit should be productive of much good, for the facilities of the port of Bristol, as I have often pointed out, are of the very best for accommodating traffic between Canada and the West, the South and the Midlands of England.

SHORT LINE TO LONDON.

It is very interesting, in this connection, to note that the Great Western Railway will soon complete their short line from Avonmouth, to connect that port with the main line to London, the result being that passengers and mails landed at Avonmouth, can be transferred to London in the remarkably short time of two hours. What this means to a future possible fast mail service between Canada and Avonmouth can readily be estimated.

A CONGRESS IN SEPTEMBER.

As indicative of the progressive spirit now animating the mercantile community of Bristol it may be mentioned that they have secured for September a Congress of Associated Chambers of Commerce of Great Britain. This meeting lasts four days, and has been planned on the broadest possible lines, with the primary object of making more widely known to the business men of Great Britain the commercial advantages of this port.

CONTRADICTIONARY BRANDS.

A lot of cheese which arrived here recently contained some boxes stamped on one side 'Canadian Produce', and on the other side of the same boxes 'Produce of the United States of America'. The receiver is of the opinion that this cheese was of American origin; this importer, and others, state that such a practice as has been followed in this case will prove absolutely fatal to the advantageous position held by genuine Canadian cheese in British markets. It is hopeless to expect buyers to pay Canadian prices if they even suspect that they are obtaining American cheese under the name of 'Canadian'; much more hopeless when the evidence of substitution or of 'transformation' is deliberately placed under their eyes.

A VARIATION.

Another lot of cheese which was landed last week contained numbers 1, and 3 of the same brand. The No. 1 and No. 2 lots were stamped 'Canadian' while the boxes numbered 3 had the word 'Canadian' erased more or less completely, and the brand 'Produce of the United States of America' appeared instead. These practices, whether they indicate anything improper or not, do most certainly tend to excite suspicion on this side, and I have no hesitation in saying that they should be absolutely discontinued.

IMPORTS OF PROVISIONS.

The direct imports of provisions into Bristol for the year 1905 show an increase on the previous year, and were as follows:—

Cheese.	17,529 tons.
Bacon and hams.	9,454 "
Butter.	4,678 "
Lard	5,813 "
Total.	37,474 tons.

THE APPLE CROP.

Reports on apple prospects continue to vary according to the district, but on the whole I should say that we shall have a very fair supply of home grown fruit of the

earlier varieties, which will therefore provide somewhat severe competition for the early exports from Canada.

PEARS.

The best varieties appear to be very scarce, but the commoner sorts will be very plentiful. This means that the best samples of Canadian fruit, if carefully packed, should find a good market here, as they have done more than once in the past.

PLUMS.

The plum crop seems to have been given up on all hands. The latest reports contain such expressions as: 'Its almost total failure is a great disaster'; and, 'the almost complete destruction of the plum crop for the second year in succession will bring ruin upon many small growers.' One cause of this trouble is reported as 'the smothering of the plum trees with aphids.' In any case, the fact is clear that home grown plums will not be sufficient to supply the demands of the market. It is to be hoped that Canadian exporters will gain some advantage from this unfortunate situation.

W. A. MACKINNON.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. E. Sontum.*)

CHRISTIANIA, NORWAY, August 12, 1906.

INCREASE OF THE CELLULOSE INDUSTRY.

The cellulose mills now building in Norway and the enlargement of existing mills will cause an increase in the Norwegian output of about 50,000 tons per year. It is not known how much the mills now building or planned in Sweden are calculated to produce, but it is considered that the manufacturers reckon on a total increase of production in Norway and Sweden of about 130,000 tons in the two years 1907 and 1908.

The Norwegian and Swedish cellulose production has grown in the last 7 years (including 1905) by some 240,000 tons, that is to say, from about 150,000 tons in 1898 to 394,000 tons in 1905.

Norwegian country communities buy forest lands in order to prevent too extensive felling of trees.

NORWEGIAN SALTPETRE.

Under the firm-name of 'Nordische Salpetergesellschaft', there is formed a stock company with head office in Hamburg, Germany, and with a capital of 1 million mark German to carry on the export of saltpetre from Norway.

WOOD-FLLOUR.

In my report of July 4 (Monthly Report for June, 1906, page 2133), I mentioned the increasing manufacture of wood-flour. Since then I have had inquiry from Can-

ada about this article from firms who wanted to purchase. Upon investigation, however, I learn that the Norwegian wood-flour mills have contracted their output even for several years ahead, at least the largest of them. It thus seems to be a large demand for this article.

CANADIAN LUMBER TO NORWAY.

A seldom if not quite singular occurrence happened a week ago, viz., the arrival to Norway of a direct cargo of lumber from Canada. The lumber is intended for sawing up to barrel-staves.

INTERNATIONAL FISHERY EXHIBITION IN DENMARK.

An international fishery exhibition is to be held in Denmark in 1909.

C. E. SONTUM.

JAMAICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. G. Eustace Burke.*)

KINGSTON, JAMAICA, August 1, 1906.

DEVELOPMENT OF LOGWOOD EXTRACT FACTORIES.

As a considerable quantity of logwood extract is exported from hence to the Dominion it will interest a good many handlers to learn that a third factory is now in course of erection. This will mean a factory each for the parishes of St. Catherine, Westermorland, and St. Elizabet. As a result of competition the raw material, both in straights and roots, have gone up in price considerably.

PROPOSED RUM SYNDICATE.

With a view of controlling the sale of Jamaica rum in the United Kingdom markets a wealthy gentleman representing English capitalists recently arrived from the mother country, accompanied by Mr. Nolan, the Jamaican Commissioner in London for the prosecution of distributors of adulterated or fraudulent Jamaica rum. The representative in question has had several interviews with the principal producers, and it is understood that everything is proceeding satisfactorily, pointing to the consummation of the end in view.

PIMENTO.

A meeting of Pimento growers and others interested in the export of the product was held about a fortnight ago in Kingston with a view of controlling the price of the commodity. It is claimed that manipulating speculators in the foreign markets by their methods, through local agents and otherwise, deprive the producers of the fair value of the article, hence the movement to protect their interest. The syndicate has been duly formed, and directors and the other necessary officers appointed. While opinions are certainly divided, the verdict of the majority of those whose opinions

should carry some weight, is, that the producers will derive some benefit by the movement.

ORANGE AND GRAPE FRUIT CROP.

This year's crops of the above fruits will be both very late and very short. A redeeming feature, however, will be that the respective fruits will be of a decidedly higher grade and in advance of the quality of many seasons. No really choice fruit should be looked for however before September.

THE COMING APPLE IMPORTATIONS.

Commenting on last year's apple imports, I reported that good prices were obtained for all arrivals up to the middle of December, but I had also to chronicle the fact, that this remark referred only to the United States product, as that from Canadian sources were conspicuous by their absence on the market, in any quantities worth noticing.

I repeat again, that I see no reason why the Canadian apple should not make itself felt in this area. But I must impress, that while such varieties as large and high coloured 'Kings,' 'Gravenstien,' 'Ben Davis,' &c., arriving in prime condition, and packed in the ordinary size flour barrels, will always realize encouraging remunerative returns, indifferent grades 'facing,' and scamp packing generally, will be only too sure to reap its reward.

A SHIPPING BASIS TO DEVELOP TRADE.

I am aware that in this, as in other lines of produce and manufactures, Canadian growers, producers and exporters prefer to ship on order rather than on a consignment basis. There are also handlers here who probably prefer to import outright, but then, it is only fair to expect that before they assume this risk they must be tolerably certain (based on some previous practical knowledge) that their venture is a fair one with the prospect of their importations being in line and grade with other sources of supply which answers local demand and with which they are already familiar. To meet this condition then, the only avenue open, is for such producers and exporters interested in finding new outlets for their products to consign, in at least first instances.

This suggestion is clearly not unusual, as it is always up to the seller to employ methods to induce buyers to divert their custom to their benefit.

POTATOES AND ONIONS.

Potatoes and onions should be put up, as in the case of apples, that is, in the ordinary size flour barrels. Arrivals to the end of December ought always to pay. But the same conditions must obtain as observed under the previous heading.

BUTTER AND CHEESE.

It is much to be desired, that the point I directed attention to in a recent report when referring to butter and cheese regarding provisions for railway cold storage transportation of smaller quantities under 5,000-lb. lots during the warm months from Montreal, and other upper centres to the sea-board, should receive some consideration, as those who are handling imports will certainly not be content to do so satisfactorily only during the fall and winter months.

I am again pleased to bring to notice that very determined and persevering efforts are being brought to bear in certain directions to place permanently on the market

Canadian farm products from Montreal via Halifax, or in the alternative, New York, but some encouragement and co-operation from the Canadian end must be forthcoming.

UNITED STATES TINNED AND CURED MEATS.

An energetic effort is being made locally to induce reliable pork packers in the Dominion to pay some special attention to the needs of this market in United States tinned and cured meats.

No more opportune moment can manifest itself. While, of course, from the point of view of price, United States cured hog and beef products, and tinned goods, will always have some outlet in this area, there is no room for contrary argument, that the recent 'disclosures' in the methods of the majority of the largest packers in the United States have had a most damaging effect on consumption. Importers are exercising the greatest caution, and while no Government statistics are available at this stage, it can confidently be stated, that imports into the island for the period since the disclosures will show an alarming falling off as compared with similar previous periods of former years. I, therefore, do not hesitate to emphasize, that it is a case of now or never for Canadian packers and canners to make their goods felt in this area.

There is no doubt whatever that the general body of consumers, particularly those belonging to the better class, are indeed very partial to Canadian farm products, and if the Dominion growers, producers and exporters will only seriously meet the island importers and commission houses in an equitable business-like spirit, but little time will elapse in seeing Canadian cheese, butter, hams, bacon and tinned goods (including canned fruits and vegetables) occupying a position on this market which their grade and quality undoubtedly warrant

G. EUSTACE BURKE.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. MacNamara.*)

CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., August 15, 1906.

CANNED MEAT DISCLOSURES.

The onslaught made by the English press on American canned meat, has had a reactionary effect upon canned meat from all countries, and to some extent on canned fruit and vegetables. The consumption has fallen off almost entirely in the case of meats, and the stocks of same held by the merchants prior to the disclosures, are still in store awaiting more favourable times. This district, representing as it does a very large population employed in mills, offers a very fair index of the effect on the use of canned meats, and regrettably so to the dealers.

Cheese is now more extensively used by the mill workers, and probably will be until the cold weather induces them to resort to foods with greater caloric properties. Fortunately the public memory is not long lived, and the revulsion that now possesses it in this matter, caused by a much exaggerated recital of conditions, will pass away.

I have obtained from the Trade and Navigation returns the importations of preserved meats into Great Britain in the years 1903-4-5, and also their values as follows:—

	Quantity.			Value.		
	1903.	1904.	1905.	1903.	1904.	1905.
	Cwt.	Cwt.	Cwt.	£	£	£
Beef	472,615	596,918	598,124	1,511,846	1,611,693	1,790,596
Mutton	49,154	35,877	30,111	106,328	85,458	77,113
Other kinds	345,794	220,223	204,794	917,603	761,440	779,481

One of the large Chicago packing firms is now advertising extensively in the English press, that its food products are eminently wholesome, and that their cleanly mode of packing was never questioned, in order to offset the very strong prejudices at present existing. It has been suggested that canned meat packages should bear the date at which packed, but the adoption of that would, it is said, seriously interfere with the sale, and is strongly condemned by all the large dealers here. The use of these foods cannot be forced at the present time, the warm weather adding its weight as against their use, but when the cold weather sets in, Canadian canned meats will experience a boom, as there is an abiding faith in its superior quality, in the minds of the great consuming public of this Manchester district.

APPLE CROP IN UNITED KINGDOM.

I am indebted to a Liverpool firm of fruit brokers, who deal very largely in Canadian apples, for the comparative figures of the apple crop in the United Kingdom, from which it will be seen that it is about half a crop as against an almost entire failure last year.

	Over.	Average.	Under.	Total Receipts.
1906	40	109	104	253
1905	3	44	223	270
1904	128	109	15	252
1903	2	17	248	267
1902	12	98	184	297

APPLE CROPS IN EUROPE.

The reports from Holland, Belgium and Germany all indicate the crops to be good average. The total imports from the United States and Canada into the United Kingdom during the past season were 1,877,000 barrels, as compared with 2,140,000 barrels in the previous season, and 3,053,000 in 1903-4, and 2,330,000 in 1902-3. The

supplies after the holidays were rather meagre, the bulk being from Canada, and the demand excellent and well maintained, and very satisfactory prices were realized. As regards the prospects for the coming season, it is evident that a large proportion of the English crop will be marketed early, and will thus come into direct competition with fall fruit from Canada. On the other hand, crops of pears and plums are exceedingly light, which will doubtless help the demand for apples, but if the domestic half crop is gathered, it will go a long way to supply the demand in the early part of the season, and probably will thus militate against a high range of prices prevailing.

BRITAIN'S TOBACCO CONSUMPTION.

Statistics recently compiled show a steady growth in the quantity of tobacco consumed per head of the population. The total number of licenses issued in 1901 was 346,323; in 1902, 352,243; in 1903, 359,289; in 1904, 365,899, and in 1905, 367,772. It will be noted that these figures show a steady growth. Fewer cigarettes are imported now than formerly, but that is because more are manufactured in this country. The import of leaf tobacco has accordingly increased.

The quantity of tobacco retained in the United Kingdom for home consumption in 1880 was 47,990,489 pounds, giving an average of 1.411 lb. per head of the population. In 1890 the quantity had risen to 58,595,920 lb., and the ratio per head to 1.611 lb. In 1900 the figures were respectively, 74,990,215 and 1.891 lb., and in 1904, the last year for which figures are available, the quantity of manufactured tobacco retained in the United Kingdom for home consumption was 80,867,485 lb., and the quantity consumed per head of the population, 1.951 lb. The total annual value of the trade is over £20,000,000.

BRITISH TRADE RETURNS.

A striking, all-round increase in the British trade is exhibited by the Board of Trade returns for July.

The total imports are £48,609,704, an increase of £3,800,000 over the figures for July, 1905, which exceeded that for the previous July by an almost similar amount. Total exports were £39,502,287, being no less than £9,400,000 in excess of the exports during July, 1905.

Taking the figures for the seven months of 1906 up to date, imports are £31,300,000 above 1905, and £35,160,000 above 1904. The exports for seven months of 1906 show an increase of £29,890,000 above same period 1905.

P. B. MACNAMARA.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(*Mr. J. B. Jackson.*)

NORTH BRITISH AND MERCANTILE BUILDINGS,
EAST PARADE, LEEDS, ENG., August 16, 1906.

CANADIAN WHEAT IN DEMAND.

Canadian wheat is very much sought after by millers in the north of England, and I am of the opinion that Canadian exporters do not realize the immense possibilities of the north England ports in this regard. Exceedingly large flour mills are located at

Hull, Grimsby and York, and one firm of importers at Hull, last year, imported over 8 million bushels, one of the mills above referred to, buys in the neighbourhood 50,000 bushels of wheat per week. Firms similar to these should make most valuable customers, not only to individual Canadian firms, but to the Dominion itself. The principal draw-back, is the want of direct transportation from Canada to Hull, and for that reason, the principal wheats brought into Hull, are from Argentine, India and the Black Sea ports.

CANADIAN WHEAT 'DOCTORED.'

I have met with many complaints that Canadian wheat, or so-called Canadian wheat, shipped from New York to Hull, appear to be 'doctored,' and for that reason the Hull importers will only buy on sample.

One large merchant at present interested in importing wheat from South Russia, makes the statement :—

'Canadian wheat does not come up to the quality it is stated to be when it arrives in this port, and, therefore, causes dissatisfaction to the buyer. This could be prevented, if we could have our Canadian wheat shipped direct from Canadian ports.'

HULL WHEAT IMPORTS.

The latest available statistics show that the imports of wheat into Hull since January 1, 1906, to June 30, 1906, were a little over 12 million bushels.

CANADIAN APPLES IN DEMAND.

Although the English apple crop is better than last year, still, as I have often stated before, Canadian apples will always bring good prices in this market, when properly packed and graded. The desire for Canadian apples is so keen in the north part of England, that I have no doubt a much larger quantity will be shipped from Canada, than in any former year.

WILL NOT SHIP APPLES ON COMMISSION.

I am told by the large dealers in the inland cities, that they find they have great difficulty in making arrangements with Canadian exporters to get the goods shipped here on commission. They say that the Canadian exporters will ship the goods to Liverpool and London on commission, and why they will not do it to firms of well-known standing in the interior towns, is unexplainable.

The large firms here desire in the long-run to get their apples direct, and thus save the commission, which is paid at the auction rooms, and to the 'middle men' at the ports; and if Canadian exporters would realize this, it would mean the building up of an immense inland business, which would increase from year to year. The firms making inquiries are quite prepared and willing to give the best references as to their financial standing.

CANADIAN HAY ALWAYS IN DEMAND.

A large quantity of Canadian hay has reached the northern district this summer; a much larger quantity than heretofore. There is always a good market for all classes of Canadian hay in the cities in this district.

COMPLAINTS AGAINST PACKERS.

I have met with a great number of complaints with regard to the packing of Canadian hay. The buyers say that the outside of the bales look all right, but, apparently,

the hay has been packed in too damp a condition, and in many cases the interior of the bales is so 'mouldy,' and in such a bad condition, that trade is very much injured.

MAPLE BLOCKS.

The large Keighley washing machine manufacturers generally purchase their annual supply of maple blocks for wood rollers in November of each year. The four principal sizes are :—

- | | |
|---------------------|---------------------|
| (a) 26 x 6½ inches. | (c) 26 x 5½ inches. |
| (b) 22 x 6½ " " | (d) 22 x 5½ " " |

Birch wood for bobbin making, is also in large demand, both in Keighley and Hull. These supplies have hitherto principally come from Maine, U.S.A., and measure from 1 inch to 2 inches square, and 2 inches to 4½ inches long, and are shipped in bundles of 20 in each bundle. A leading Hull timber merchant remarked to me that Canadian supplies of these squares would be particularly welcome, as there is an enormous demand in all parts of England. Canadian lumber, doors, building timber, broom, pick and spade handles, and all kinds of turned goods, are particularly asked for in Hull and district.

BRITISH MANUFACTURERS INTERESTED IN CANADA.

Manufacturers here are beginning to fully realize the future possibilities of Canada as a market for their goods, and the result is seen in the vast increase in the number of British inquiries, and should result in much increased business from England to Canada.

WOOLLENS AND WORSTEDS.

Canadian trade in these goods is expanding by 'leaps and bounds,' and this trade is very much appreciated by the woollen and worsted men in this district.

A great many Canadian firms are now buying from the British manufacturer, who, formerly, were only supplied through commission agents, either in Canada or in Bradford; in fact, one of the largest firms of woollen and worsted merchants in this district told me, that Canada was becoming too well known here, and although this was in the interests of trade, still, it was a draw-back to the large merchant firms, who for many years have kept this trade entirely in their own hands.

PAPER.

Owing to the keen competition which exists in paper circles in England at the present time, it is practically impossible to conduct a direct trade in paper from Canada. England is the home of the 'middle man,' for the present, and for the purpose of introducing a new commodity, an English agent is a vital necessity, and wherever possible the agent should be a well-known stationery firm, having travellers covering the country. English paper manufacturers will not permit an outside competitor to enter without a struggle. This fact was made quite apparent recently, when a large United States paper trust had to withdraw, after having tried to flood the British market with American-made paper.

WANT SAMPLES OF PAPER.

It is impossible to get prices from English buyers, as the invariable answer is :—

'Let Canadians send us samples of their goods and quotations, the same as others do, and we will then consider them all, and buy in the cheapest market.'

The English manufacturers and buyers will not divulge their trade terms, and those having catalogues, take good care that they do not get into the hands of their competitors, or if these catalogues are sent out to the public, they do not show the discount which the manufacturer gives to the buyer.

For the above reasons, to appoint an English agent and fully equip him with prices, discounts and samples, is a condition precedent to doing business, and it is only by doing this, and by regular canvassing of English buyers, that Canadian mills can hope to get their share of this trade. Without doubt, a great field exists in the north of England for Canadian paper, as in Yorkshire alone, there are over 100 paper merchants and manufacturers, (and these do not include the numerous newspapers, who make the best customers), but it is only by working on the lines above set out and by prompt delivery equal to sample, that success can be achieved.

JNO. B. JACKSON.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(*Mr. E. D. Arnaud.*)

GAZETTE BUILDINGS, ST. JOHN'S, August 20, 1906.

CATCH OF CODFISH, 1906.

While the fishing industry remains the staple harvest, and the principal source of wealth to the colony, the success or otherwise of each season's operations naturally absorbs the greatest interest and attention of the people. The returns now coming in of the present year's catch of fish, a word which in this country means codfish only, from the Labrador, Straits, and shore fisheries, seem to indicate that on the whole the total amount will be a fair one, estimated at 600,000 quintals, about 200,000 less than that of last year, and that enough is known to make it reasonably certain that the prosperous condition of trade, which so largely depends upon this industry, is assured at least for another year.

CODFISH PRICES.

The prices that are now being obtained for the new fish are regarded as highly satisfactory, and will, to a very great extent, make up for the deficiency of the total catch as compared with that of last year, and that under all the circumstances the smaller catch will, on the whole, prove to be more beneficial to the country.

The prices now quoted are as follows:—

Large merchantable, per qtl.	\$6 00
Small merchantable, per qtl.	5 00
Large Maderia, per qtl.	6 00
Small Maderia, per qtl.	5 00
Large West India, per qtl.	3 50
Small West India, per qtl.	3 00
Labrador, per qtl.	\$3 to 3 50

The deficiency above noted in the total catch may be accounted for in the fact that a very severe storm occurred early in June, which destroyed a large quantity of

fishing nets and gear, and caused a loss of nearly three weeks in the very best part of the fishing season.

E. D. ARNAUD.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. M. Kittson.*)

RHODES BUILDING, CAPE TOWN, July 30, 1906.

SOUTH AFRICAN TRADE.

During the six months ended December 31, 1905, the exports showed a balance over the imports of about £611,000, the figures being £18,313,738 and £17,691,962, respectively. In the ensuing six months the exports have gone ahead, while the importations declined to a very slight extent. The figures for the year ended June 30, 1906, are: Exports, £38,627,826; imports, £34,367,114.

GOLD, SILVER AND DIAMOND OUTPUT.

Government Mines Department statistics for June show that the coal output was 246,769 tons, of value £71,019; silver, 36,310 ounces, value £6,880; diamonds, 79,242 carats, value £118,154. The total value of the gold output for the six months in 1906 was £113,162,246, and diamonds, £583,480; and the grand total of gold, silver, coal and diamonds in the same period was £12,347,504, which is an increase as compared with July-December, 1905, of £726,094, of which the latter amount in gold represented £537,490, in diamonds, £198,731, and in silver, £2,453, whereas coal showed a decrease of £12,580. At the end of June last the total number of employees in the mining industry in the Transvaal was 19,329 whites, 108,980 kafirs and 52,362 Chinese. A comparison with the labour totals on December 31 last shows a decrease of 468 whites and 2,162 kafirs, but an increase of Chinese by 5,085. On June 30 last, 350 less whites were employed in the gold mines than the number employed on May 31.

COMMERCIAL DEPRESSION.

The depression in business continues general and shows no signs of lessening, many firms hitherto considered to have been excellent marks, have either gone to the wall or are liquidating, and most of the New York export houses interested in the South African trade have suffered severely from giving extended credit in their anxiety to get business. Canadian exporters are advised that the present conditions in South Africa are such that extreme caution should be exercised in all transactions on a credit basis.

FLOUR DUTY.

It is understood that the colonies of Natal and Transvaal will probably either radically reduce or entirely remove the duties on flour and grain.

NOTE—'Special' means in the case of Imports; 'Imports for Home Consumption,' in case of Exports, Exports of Domestic Produce and Manufacture. a The figures for Mexico include coin and bullion.

COMMERCIAL AGENCIES

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, etc., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

Canadian Commercial Agents.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B., YOKOHOMA, Aug. 17, 1906.

EXHIBITIONS AND BAZAARS IN JAPAN.

Japan has many schemes under contemplation to expand her trade and commerce and to build up her industries, as well as to get the cost of the late war recouped. Amongst them the presently most interesting is in the form of demonstrative advertising of her manufactures, productions, &c. The enterprises of this character now under consideration are the following: The Sixth Grand Exposition, the Tokio Prefectural Exhibition, the Ship Travelling Exhibition, the Manchurian Bazaar, and the Competitive Bazaars. An International Exposition is also advocated by many from the standpoint of both official and private interests. The prevailing idea is commemorative of the late war, but the necessary delay is likely to divest it of the commemorative quality. However, as to the fact of the exhibition, the Japanese government, it is announced, will include in the next budget an appropriation of ten million yen for the forthcoming Sixth Industrial Exhibition to be held in 1912; this is to be on a scale half international and half national, which is about as definite a description as translation will admit of, and therefore on a scale considerably more extensive than the several preceding industrial exhibitions, and inviting as many nations as possible to exhibit their specialties. Not authoritatively determined, the site of this exhibition is so far unknown, but will doubtless be at Tokio.

The Tokio Prefectural Exhibition, which is to be opened in Tokio in March next, will assume something of the commemorative form, since it is declared to take advantage of the opportunity presented by the ending of the great war to at once signalize the event of victory and to give inspiration to commercial and industrial enterprise. Foreign consuls and leading foreign merchants have expressed their wish to have a building for foreign occupation, which wish has been conceded. The foreign section will thus be similar in character to that usual in a national exhibition. This exhibition will extend from March 20 to June 20 of next year.

The Ship Travelling Exhibition is understood to be a public or national undertaking, and mention of it is apropos of the announcement of the 'British Trade Tour,' which the London newspapers describe as having taken definite shape as a 'Floating Exhibition of British Manufactures,' to visit ports of commercial importance in various parts of the world. The promoters of the 'Ship Travelling Exhibition' are the Tokio Industrial Agency. All the Chambers of Commerce in Japan have been conferred with as to procedure and plan, and their opinions invited because of this scheme being new and without data upon which to base calculations, yet proceeded with upon the intention, in the event of success, of converting it into a permanent establishment. The route that at present suggests itself as the more convenient is *via* Canada, United States, Hawaii, New Zealand, Australia, the South Pacific and the Far East generally. The itinerary will involve 27,600 miles of navigation in 170 days; and calling at 33 ports, 135 days. The preliminary draft of detail is on record, but does not become important until later.

The Manchurian Bazaar is projected by the Manchurian Association, which has just been established at Osaka, with the view of promoting trade with Manchuria and Mongolia. The association handles the exhibits at the bazaar, attends to the ship-

ment of goods, and collects the proceeds of merchandise sold, &c. This exhibition opens March 1.

The competitive bazaars which are to be held are as follows: The Gonikai Competitive Bazaar at Tokio, from August, 1906; the Hokkaido Competitive Bazaar at Sapporo, from September, 1906; the Foreign Trade Merchandise Show Room at Yokohama; the Seoul Bazaar, under consideration by Japanese and Koreans; and the 'Go-around Fair,' by railway train on the plan of that of the Sanyo Railway under the auspices of the 'Osaka Jiji Shimpō' newspaper, and which proved a great success.

THE WHEAT CROP.

Up to the harvesting, this year's wheat crop in Japan promised an exceptionally high return. Investigations more lately made by the Department of Agriculture and Commerce result in an estimate of 98,000,000 bushels, which would be 15 per cent above the yearly average. Rainy weather, however, set in whilst harvesting operations were in progress, with such prevalence as to cause a wide range of damage, it is feared. The *Japan Times* inclines to the opinion that the damage will be inconsiderable as to quantity, and more in respect of colour, and perhaps in the way of sprouting.

IRON SAND DEPOSITS.

The Hokkaido Colliery and Railway Co., having had their railway capital set free by the nationalizing of their road, are going into the production of iron. The company owns extensive iron sand deposits along the coast of Hokkaido. The iron sand has been proved good in quality, and the company are about to commence operations.

Great stretches of the shore line of Japan are said to have unlimited quantities of this quality of iron sand, and it is matter of common remark that the time is not far distant when the production of iron from it will become a great industry and source of wealth.

TRADE RETURNS.

Exports and imports entered at the Japanese customs for June, 1906, and for the six months ending with June, 1904, 1905 and 1906, are in value as follows:—

EXPORTS.				IMPORTS.			
June Exports.	Six months ended June 30.			June Imports.	Six months ended June 30.		
	1906.	1905.	1904.		1906.	1905.	1904.
\$	\$	\$	\$	\$	\$	\$	\$
15,097,257	88,335,359	71,383,977	68,732,852	16,728,335	111,524,781	143,231,431	91,317,436

The increasing tendency of both the export and import elements of trade is regarded as normal and satisfactory. It is to be explained that the exceptional increase in imports for 1905 was on war account. A considerable quantity of this excess, remaining in the country upon the close of the war, served to curtail the importation of the present year, and doubtless bore fruit in the general dullness of trade felt by the importing houses. The business of the country, taken as a whole, is holding up in a remarkable manner, after the irregularities caused by military and naval requirements during the war, with the embarrassing sudden check to importation that came with peace.

JAPAN'S AVERAGE TARIFF.

The average ad valorem duty, collected under the Japanese customs tariff, for the last three years unaffected by the war increases, was 9·77 per cent. For the twelve months of the war tariff, from July, 1905, to July, 1906, inclusive, the average ad valorem duty was 13·20. It is thought that the further war tariff, to go into effect on October 1, will average up possibly 18 per cent.

FLOUR MILLS IN JAPAN.

In Japan the demand for flour, although limited in proportion to the great and ever-increasing population, has to depend mainly, as is well known, upon foreign supply; the annual importation amounting to some 10 million yen. The Japanese home way of grinding is primitive, mostly by stone-mortar and water wheel.

The mills which have adopted foreign style are roughly as follows:—

	Bushels per day (24 hrs.)
Japan flour mill, Tokyo.. . . .	2,000
Nagoya flour mill, Nagoya.. . . .	500
Utsunomiya flour mill, Utsunomiya.. . . .	500
Hiroshima flour mill, Hiroshima.. . . .	500
Nagasaki flour mill, Nagasaki.. . . .	500
Hokkaido flour mill, Sapporo.. . . .	500
Yamagata flour mill, Yamagata.. . . .	500
Sendai flour mill, Sendai.. . . .	500
Tatebayshi flour mill, Gunma.. . . .	250
Kumagaya flour mill, Saikama.. . . .	250
Tsuchiura flour mill, Saikama.. . . .	125
Matsudo flour mill, Chiba.. . . .	125
	<hr/>
	6,250

In view of the revised duty to be imposed on foreign flour after October 1, the flour merchants and millers in Japan are considering the milling industry with much interest. A decided impulse seems to have been given to the milling business. The patriotic sentiment of the Japanese people has not been exaggerated by commentators. But special interests in the Orient are animated by the like natural tendencies of Occidentals. The sense of self-preservation, or of opportunity, is not regarded as being inconsistent with the sense of patriotism hence the legitimacy of shifting the burden. This means the importing of wheat, and the milling at home; an outcome that is incidental, although as a matter of policy not to be complained of by protectionist nations. Under these circumstances the following new flouring concerns are to be started, and many more are being schemed:—

	Bushels per day (24 hrs.)
Japan flour mill branch, Kobe.. . . .	2,500
Japan rice refinery flour department, Kobe.. . . .	2,500
Masudaya flour mill, Kobe.. . . .	2,500
Osaka flour mill, Osaka.. . . .	2,500
Two flour mills in Tokyo.. . . . each 500	1,000
Four local flour mills in country.. . . . each 100	400

DEMAND FOR FLOUR.

The demand for flour in Japan is chiefly for the *Somen* and *Udon*, which are fine and coarse vermicelli, or substitutes for it. The next important item is the *Fio*, a light friable biscuit, which is a product of the gluten in the flour, the starch being used for the sizing of silk, or other fine fabrics. The demand for bread amongst the

Japanese masses is yet in the stage of infancy. The chief consumers are of course foreign-style restaurants and hotels; the foreign population; army and navy officers are said to call for it, also the student class. The bluejackets are becoming a most important consuming class, it having been preferred to rice by the navy, for twenty years past; as it lessens the prevalence of beri-beri, which was common among sailors before this dietic change.

THE SEAL FISHERIES.

According to the *Financial and Economic Annual* for the present year, a government publication, the deep sea fishery is attracting attention from Japanese capital more than ever before, and the industry on the whole gives promise of rapid development. Japan, with possessions obtained by the late war, should by virtue of her favoured position derive much larger revenue and commercial profit than is at present the case from her deep sea fisheries.

The Japanese government has done everything to encourage deep sea fishery, which includes sealing, and since 1898, when the Pelagic Fishery Encouragement Law came into force, both sealing and whaling vessels have greatly increased in number. Upon this subject the native press is saying in substance that it is claimed that the results of the restrictive laws of the United States have been to drive the sealing industry from American waters to those of Japan; and in this connection it is worthy of note that sealing schooners leaving Japanese ports have yearly increased, as have their catches, though no statistics are published of the profits of this branch of the fishing industry.

THE MINERALS.

The report of the Mining Bureau shows a notable increase in the output of the principal productions of the country. The total value for 1905 is given at 76,000,000 yen, or an increase of about 20,000,000 compared with that of the preceding year.

The value of mineral productions exported amounted to 31,860,000, an increase of 2,000,000 yen compared with the year before. Japan is now raised from the sixth to the fourth in rank among the copper producing countries of the world, and supplies five per cent of the world's demand.

JAPANESE COAL OUTPUT.

With respect to the output of coal, Japan holds the sixth place among coal producing countries. As a petroleum producing country, Japan takes the fifth place, being almost equal to India. In sulphur and antimony, Japan takes second and third place respectively. The fact is commented upon, however, that while the home mineral production is thus increasing, the mineral importation is also largely on the increase. This is evidence of activity, commercial and industrial, at any rate.

RAILWAY TIES.

It is current in the press here that the Southern Pacific Railway Company have contracted for a large supply of sleepers from Japan, at the price of 56 cents (gold) each, delivered at a Mexican port. The quantity is stated at 1,500,000. There used to be an impression that British Columbia could beat all comers for ties on the American continent. This looks like a lost opportunity, distance from the Mexican port (Guaymas), and abundance of raw material being in her favour.

COTTON YARNS AND PIECE GOODS.

For the first six months of the current year the imports of cotton yarn into Japan from Great Britain show a remarkable increase. Great Britain is rated as doing ex-

ceedingly well with Japan in this branch at the moment, the figures showing an increase for the six months of not far short of 4,000,000 pounds. This is the more remarkable since the same article has had a heavy falling off in China. The imports to Japan of cotton piece goods show an increase for the six months amounting to over 62,000,000 yards.

Another satisfactory feature of Japan's import trade is seen in the growing importation of woollen and worsted tissues, the figures showing very substantial increases for both the month and six months. It is significant that in certain classes of manufactures Japan is beginning to take rather less, indicating, no doubt, that she is resorting more to the product of her home industries.

OVERCROWDING COMPANY ENTERPRISES.

There has been a boom in the organization and liberal capitalizing of industrial and commercial enterprises for some time, and it does not shown signs of weakening. Some of them are remarkably successful, too, in getting their shares taken up, even to the extent of being over subscribed largely in some cases. Sound enterprises are serving very well to show that there is a good deal of readily available money distributed amongst the wealthy and well-to-do Japanese.

ALEX. MACLEAN.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(*Mr. J. B. Jackson.*)

NORTH BRITISH AND MERCANTILE BUILDINGS,
EAST PARADE, LEEDS, ENG., August 27, 1906.

PEARS.

The full confidence in the packing and quality of Canadian apples shown by local importers should be of material advantage in assisting Canadian fruit-growers to cultivate a valuable export trade in pears, and numerous inquiries are being made in this direction by Leeds and Hull fruit merchants.

FOREIGN METHODS OF PACKING.

After having carefully gone into details as to the methods of packing adopted by foreign shippers, I find the best system in vogue is that used by French growers in the export of 'French William Pears,' the main points of which are as follows:—

(a) Forty-eight pears are packed in one box.

(b) These are put up in two layers with about two inches of wood shavings between the top and bottom layer.

(c) A sheet of doubled notepaper is placed at the top and bottom of each layer of fruit, prior to nailing down the box.

(d) An average size of this box is 15 inches long by 10 inches wide, and the thickness of the wood is about $\frac{3}{8}$ inch.

(e) These forty-eight pears average about 12 pounds, in the box, and the price asked by the English wholesaler on the day of writing, is from 3s. to 3s. 9d. (70c. to 90c.) per box.

The prospects for this trade are extremely bright, but to create a ready demand, Canadian growers should carefully note that the two most important points on the English market are the appearance of the fruit, and also the weight. The fruit should be as uniform as possible and well coloured.

Yorkshire fruit merchants declare, that, providing Canadian pears come up to the same standard that Canadian apples do, they could obtain higher prices than those at present asked for French and other foreign varieties. It is also suggested that in the interests of each individual packer, and in the interests of developing this branch of Canada's fruit trade, each box should be stencilled 'Canadian Pears' in letters of not less than two inches in length.

I shall, on request, be pleased to refer any Canadian growers to Leeds and Hull firms who are making inquiries for this fruit at the present time.

EFFECTIVENESS OF THE WEEKLY REPORT.

With the fruit season now approaching a great deal of correspondence is taking place between north of England fruit importers and Canadian apple shippers, which is attributed solely to the numerous inquiries which have appeared in the Weekly Report during the last few months. The effectiveness of this medium in bringing the importer and exporter into touch, is highly praised on this side; and as a direct result of its utility, the imports of Canadian fruit into the north of England this season will surpass all previous records.

BRITISH APPLE MARKET.

English apples are already on the market, but prices are low, 'Lord Derbys' fetching from 2s. 6d. to 3s., a basket of 28 pounds, with the prospect of the price rising to 3s. 6d. Inquiries made in the most influential quarters as to the prospect of 'Early Canadians' obtaining a sale here, show that at this time, and, in fact, for the next month or so, the market will be glutted with early English apples, and big supplies of these which are forthcoming are ample without outside supplies. Local jam manufacturing firms and fruit preservers, would, however, be prepared to consider shipments of these early stock, which they would use in their industry.

The English farmer in this district has no fruit farms which can at all compare with the Canadian, the fruit trees are old, gnarled and out of date; the fruit with few exceptions are no better, either in flavour nor appearance, than the culls of the Canadian orchards. The apples are badly packed and no attempt is made to grade them. They are marketed long before they are fit for human food, simply because the demand is so urgent for this class of fruit, they are only a stop gap used to fill in between the times when the Australian and New Zealand fruit are over, and before the Canadian and American fruit arrives. If Canadian fruit men will grasp their opportunity, they can quite easily double their exports to this market at remunerative prices.

PRINCIPAL MARKETS FOR CANADIAN FRUIT.

The four principal markets for Canadian fruit in the north, are Sheffield, Leeds, Newcastle-on-Tyne, and Hull. Hull's fine geographical position as an importing centre for supplying the huge industrial classes of the woollen districts of Yorkshire, makes it superior to others, and it is to this port that Canadian exporters should look upon as the best market. Close on fifty wholesale houses are engaged in importing all kinds of fruit, many of whom have facilities for disposing of from 800 to 1,000 barrels of apples per week, and representatives of the leading Hull firms have already left for Canada to make arrangements for the first shipments in November.

Newcastle-on-Tyne, with the smaller towns roundabout it, makes another valuable market for Canadian exporters who will have facilities for shipping their fruit direct into this port by the Thomson Line, the agents for which are the Robert Reford Com-

pany of Montreal. A keen desire is expressed by fruit merchants of this city who form the Newcastle Fruit Association, Limited, to obtain Canadian fruit into their own port direct from the actual grower or shipper in Canada, and substantial shipments could be arranged for by Canadian growers, corresponding with this association.

BARRELS AND BOXES USED IN PACKING.

Barrel-packed apples are required in every city, 99 per cent of the foreign fruit sold in this district, being packed in this manner, but in some cases, fruit importers catering to the highest class trade, prefer to deal in apples packed in boxes. The general inside packing and the appearance should be suitable for the class of people they are intended for, and the last season's prices ranged from 7s. 6d. to 8s. 6d. per box of 56 pounds in the gross, and 40 pounds in the net. Many shippers also prefer this class of packing, as it does not occupy so much room as the barrel-packed fruit.

In the packing of apples in barrels, a thin layer of cardboard should be inserted both at the top and bottom of the fruit as a preservative to the dust and grit finding an entrance in transit and eating into the fruit, thereby causing 'freckles.'

DIRECTIONS IN CABLING.

In cabling English buyers, Canadian exporters should specify the 'code' used, as no end of trouble has been caused in trying to decipher some messages which came during this month, and in some cases without avail. The 'codes' used by Canadian commercial agents was published in Weekly Report No. 96.

SPRING MATTRESSES.

Canadian spring mattress manufacturers are doing a particularly large trade in Yorkshire, and in the north of England, at the present time; and the advent of this new competition is causing no small excitement amongst local firms making the same goods, and especially are they becoming alarmed at the aggressive spirit displayed by Canadian manufacturers in securing orders in this district.

Several old Yorkshire manufacturers I have interviewed, assert that no matter how prices have been reduced, Canadians, apparently, can always undersell them. Perhaps the reason, however, is due to the conduct of the British manufacturers themselves, who, in order to protect their profits in this line of business, some time ago formed themselves into an association binding each member of the association to charge equal prices for their goods, and now the individual firms find themselves handicapped by Canadian competition.

A member of an old-established firm gives his opinion of this, as follows:—

'The Canadian wire mattress is, of course, not of the same substantial quality as ours. It is made out of cheap tinware, and is intended solely for the cheap trade, which is fully proven by the huge business which Canadians are now doing amongst shops selling furniture on the "Hire System." Again, the timber required for the wooden part of the mattress, is right at their own doors, which they can obtain at 50 per cent cheaper than we can possibly do.'

From what I have learned of the state of the trade in this district, and especially on account of the binding character of the agreement entered into by the association, I consider there is an immense opportunity for Canadian manufacturers of this class of goods throughout the whole of north England, but I should also suggest, that although the cheap spring mattress, at present manufactured, is quite in order for the hire system shops, still, I think that they might equally compete with the manufacturers here, who make the best quality of these goods.

BOOTS AND SHOES.

Leeds is one of the principal centres of the leather trade in England, and the Yorkshire manufacturers of boots and shoes are fully alive to the advantages of Cana-

dian trade; and very many local firms are now making inquiries, so as to compete in the Canadian market. A well-known Leeds manufacturer is about to open up an agency in Montreal, and other firms are seeking the interest of leading wholesale houses and pushing their 'specialties' in Canada.

CANADIAN VERSUS ENGLISH STYLES.

The difference between the Canadian and English styles in boots and shoes, is, of course, a matter fully recognized, but they contend that the English leather is quite superior, both to the American and Canadian leathers, and, therefore, they are quite satisfied, that given definite instructions, they can meet any Canadian requirements, both as to style and price.

In this district, each manufacturing firm invariably devotes its attention to one specialty; for instance, one firm may make a specialty of boots and shoes of cheap or medium quality for mens' wear only, another firm may manufacture ladies' footwear of the same class, whilst a third will turn their attention to a higher class specialty; but they claim, by each firm devoting its full attention to one specialty, they can turn out their goods at less cost, and a more uniform article.

BRITISH MARKET FOR PEAS.

The first arrival of Canadian peas in this district, was a shipment of 'White Canadians,' which recently came to hand at Hull, and easily sold at 33s. 6d. at the Hull Exchange. It is to be hoped that this trade will be continued permanently, and Canadian growers should not overlook Hull's position as a market, that 575,000 bushels passed through this port last year, fully proving to them its importance as an import-centre.

ENGINEERING.

There has been quite a revival in the Yorkshire engineering trade with Canada during the last few weeks, and many substantial orders have come to hand; now, this is due to the new railroad building, and other large undertakings in Canada, which are benefiting both the Canadian and the English engineering trades. A permanent revival in this trade would be of immense advantage to the iron and steel firms in Yorkshire and the north of England; still, rails and machine tools in particular, are finding an excellent market, and this week a Yorkshire firm has secured a large contract for rails for shipment to Montreal during the summer. Another Yorkshire firm is also quite busy at present on a large order for textile machinery for Canada, and several other firms are in negotiation with Canadian mills for the same class of goods.

FLAX SEED.

The Hull importers of flax seed are closely watching the Canadian crops this year, and would gladly welcome Canadian competition with the Argentina, Indian and foreign supplies which are now arriving. I see it is stated that a very large crop of flax seed is sown in Manitoba and the western provinces, and the exporters from that district would do well to overlook Hull as a market for this seed. Hull is the largest seed-crushing port in Great Britain, and the total imports into Hull for the last year of this class of seed was over two and a half million bushels. These figures show that an extensive trade is being done by foreign shippers, and it lies solely with the Canadian exporters to assert their capabilities of competing in this trade.

CHEESE.

A very much larger amount of cheese is being consumed by the industrial classes in Yorkshire this year than heretofore. The Chicago meat canning disclosures are in-

directly responsible for this, and cheese is now used in substitution for corned beef and other canned meats; but it is a regrettable fact, that this cheese is not Canadian, but is inferior, and is the cheaper class of American and English cheese.

PRICES FOR CHEESE AND BUTTER TOO HIGH.

I am informed by one of the largest produce importers in Leeds, who makes a specialty of catering to the wants of the small shopkeepers in Yorkshire, that the present prices for Canadian cheese are such, that all thoughts of buying it for this class of trade is 'off' for the present. This is also applied to Canadian butter. The same gentleman also said that Canadian shippers are simply killing their trade at the present time by the extortionate prices that are asked for prime Canadian bacon and hams.

One Ontario packing firm has not increased its prices to any great extent, and their foresight in this regard, at this particular moment, has resulted in their receiving an immense amount of the Yorkshire orders. At the moment when American goods are so discredited in the eyes of the English public, the Canadian exporters should do all in their power to supply the English market with Canadian bacon and hams at reasonable prices, and firmly establish Canadian trade in these products

WHITE ASH BLOCKS.

There is quite a demand amongst the better-class hardware stores in Yorkshire for white ash planks, measuring from 24 inches to 30 inches, and from 4 inches to 6 inches thick, which are used as chopping blocks by butchers. It is scarcely necessary to say that the blocks should be thoroughly seasoned and in sound condition; and Canadian firms who have agents calling upon English hardware stores could build up a very profitable trade in these blocks.

BRADFORD TRADE.

The returns of the consul for the United States in Bradford, show a decline in July as compared with July of last year of over \$500,000. Dress goods have fallen from \$2,880,000 in the first seven months of last year to \$1,020,000 in the corresponding period of this year.

JNO. B. JACKSON.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(*Mr. J. S. Larke.*)

THE EXCHANGE, SYDNEY, AUSTRALIA, August 7, 1906.

STATE OF TRADE.

The importations and exportations into New South Wales continue to increase. For the first six months of the year, the returns show an increase of imports amounting to £2,505,951. The increase for June was £130,000 less than the increase in May, but it was very much beyond the other months. The exports show an increase of £4,293,-

966. The increase for June was only £487,328, being a good deal below either of the other months.

POPULATION.

The population of both New South Wales and Queensland are increasing, somewhat at the expense of the other states. There has been a considerable gain from New Zealand, mainly of returned Australians who went there during the drought. During the last three months the returns show a loss of 312 to Canada. Forty years ago the population of New South Wales and Queensland was less than 34 per cent of the population of the Commonwealth, but in June the two states contained more than half of the population of the federation.

INDUSTRIES.

The statistician of the government of New South Wales reports the primary production of the state in 1905 at £36,094,000, being an increase of £6,612,000 over that of the previous year. He also estimates that the increased value given to production by manufactures in the state at £10,598,000, being an increase of £698,000 over the previous year. The total production was, therefore, £46,692,000, as against £39,382,000 of the preceding year. The increase in primary production is relatively three times greater than that of manufactures. There was no great development of manufactures in this state during the year. The following figures which he supplied may be of interest in Canada:—

Year.	HANDS EMPLOYED.			Wages Paid.	Average Wage.
	Male.	Female.	Total.		
				£	£ s. d.
1900.....	50,516	10,263	60,779	4,974,216	81 16 0
1901.....	54,556	11,674	66,230	4,945,079	74 13 0
1902.....	54,226	11,943	66,269	5,080,740	76 13 6
1903.....	52,453	13,180	65,633	4,839,557	73 15 0
1904.....	53,457	14,579	68,036	5,012,758	73 13 0
1905.....	56,117	16,958	72,175	5,191,350	71 18 0

It will be seen from these figures that since the establishment of the Commonwealth the number of males employed in factories have increased by slightly over 11 per cent, while that of females has increased by 56½ per cent, or an increase together of slightly over 20 per cent, but the wages have increased under 4½ per cent. It would seem, therefore, that the tendency of the industrial system has been to increase the number of cheap labourers and also to somewhat diminish the steadiness of employment. The Arbitration Act has not satisfied either employers or employed and amendments will be proposed during the present parliament

C. I. E.

A case of interest to exporters of Canadian produce to Australia was recently tried in a superior court here. It arose out of the purchase by a produce firm of this city of some hundred tons of onions in Japan. The onions arrived in bad condition, were refused by the buyer, and the result was that the seller entered an action against the buyer to recover the value of the onions shipped, and the buyer a counter action for damages suffered from the non-delivery of the onions bought in good condition. The evidence showed that the onions were in good condition when shipped but also that they arrived in bad condition in Sydney.

The point at issue was the meaning of the term 'C.I.F.' under which the onions had been purchased. The jury rendered a verdict in favour of the buyer for over \$15,000, upon the ground that while the rule of the Chamber of Commerce of Sydney was that under a C.I.F. purchase the buyer has to take the risk of carriage, the seller's responsibility ending when he delivered the goods at the ship's side in good condition, the produce merchants of Sydney have a rule of their own which is the reverse of that named above and requires that the seller shall take the risks of carriage. The case was appealed to the Supreme Court of the state and may be carried to the court of last resort.

Canadian shippers should meet all contingencies by having in their contract a clause defining the meaning of C.I.F. and clearly affixing the risks which the seller takes.

COMMISSION CHARGES.

I have seen a letter published in two Vancouver papers in which a firm in that city complains of the excessive charges upon a shipment of salt salmon sent to an Australian firm. I am unaware to what city the fish were shipped, as firms in Sydney who have done business with this Vancouver firm, state that the account sales were not rendered by them. It is unwise to comment upon a statement of this kind until all the facts are known, but upon the face of it the account is absurd and apparently double charges have been made in some of the items of it.

It would have been better if the account had been sent to Mr. Ross or myself, when we could have gone into it with the firm in question, and if mistakes had been made, could have had them righted. Firms here handling fish pronounce the charges to be excessive. A mistake I have found has been made in shipping fish to firms who have no experience in the trade, nor any intention of making it a part of their business. In such cases the probability is that the cost of handling it by such firms would be greater than that if a firm in the trade and the prices obtained not as satisfactory. Both instances confirm the recommendations that I have more than once made in my reports—that consignment accounts are precarious and should be made with the utmost caution.

BANK EXCHANGE.

The Australian banks have renewed an agreement as to the rates of exchange which expired some time ago. This involves some increase in the rate, amounting to about one-quarter of one per cent, upon the average. Canadian trade will be affected to a small extent by this increase.

CATALOGUES.

In selling to the wholesale trade, samples are necessary, but the traveller who takes orders for these goods in the country, when they are for lines samples of which it would be practically impossible to carry, requires catalogues which give a good description of the merits of the article, and in the case where it can be done, well printed cuts giving a clear picture of it. Complaints have been made that in some instances Canadian catalogues are inferior to those obtained from other countries. The fact that excellent catalogues printed in Canada have come here is an indication that good work can be done when the right firms are employed. I have had an instance called to my attention, where a traveller is using a catalogue of a foreign firm to illustrate Canadian goods. This is selling under difficulties, even where a buyer may accept the statement that the Canadian article is exactly like the illustration shown.

OBSERVE EXISTING TRADE CONDITIONS.

Incidents occur which impress the necessity, so often alluded to, of absolutely conforming to all the conditions of shipping goods to Australia, which include promptly

sending invoices and shipping receipts. The Canadian exporters are observing right methods much more generally than in the past, but I have recently had instances in which drafts have been presented before the buyer had any information by invoice or shipping receipt that the goods had been forwarded, and in one instance the goods had to lie in bond for over three months through failure to send the proper documents.

PENNY POSTAGE.

The government of the Commonwealth have announced the introduction of a Bill providing for penny postage between Australia and the other portions of the empire, and if the Bill be carried, it will come into effect on the 1st October next.

TIMBER BY STEAMER.

A steamer carrying two million feet of Oregon timber arrived here a few days ago from a Puget Sound port. It is complained that Vancouver and more particularly New Westminster, are at a disadvantage in shipping timber to this market as compared with Puget Sound ports, owing to the charges for towage of sailing craft which the mills there are compelled to pay. Should it be found that the steamers can economically carry timber, the change should be an advantage to the lumber exporters of British Columbia.

CHANGE IN RAILWAY MANAGEMENT.

The railways and tramways of this state have been heretofore managed by three commissioners. Unfortunately disagreements have latterly become so open that a commission of investigation was appointed. As the result the government is introducing a Bill for changing the system of control and proposes that in future there shall be one chief commissioner with two assistants, one assistant having special charge over the tramways and the other over the railways. This is in harmony with the management in the other states, though in Victoria there are three commissioners, yet the opinion of the chief commissioner is dominant and in the other states there is but one. The premier has announced that applications will be invited for the position of chief commissioner, and the best applicant, from any country, would be appointed.

AINING LAND SETTLEMENT.

New South Wales, like nearly all the other portions of Australia, was originally settled as a pastoral and not an agricultural country. The consequence was the creation of very large estates, many of which were adapted to agriculture. The increasing population demands land for farms. Hitherto the government has pursued the policy, to a limited extent, of purchasing large estates and throwing them open to settlement either upon long leases or direct purchase. This policy has involved expense and occasional charges of fraud. It is now announced that the government will assist co-operative bodies of farmers, who will purchase the whole or part of an estate, provided the price paid is approved of by the government, as liberally as they would if the purchase had been made from the government. It is hoped that this will avoid the troubles and expense involved in the government intermediation and yet assist men of very limited means to obtain farms.

NEW ZEALAND TRADE.

The returns upon the trade of New Zealand are favourable without there being any special feature respecting it. The returns for the year ending June 30 show an increase in both imports and exports, the increase in exports being nearly four times

that of imports. The exports for the year amounted to £17,663,000, against £15,351,000 for the previous twelve months. There was an increase of £2,312,000 in wool, and sheepskins increased 41·2 per cent in quantity and £1,360,000, or 23 per cent in value. Dairy produce shows a trifling increase in quantity, but £242,000 or 15 per cent in value. Frozen meat increased 10 per cent in quantity, and £168,000, or 6 per cent in value. Kauri gum increased 7 per cent in quantity and £82,000, or 17 per cent in value. Gold shows an increase of £179,000, or 9 per cent in value. Imports for the twelve months amounted to £12,855,000, against £12,199,000 during the preceding twelve months.

DUTY ON SPIRITS.

The duty on spirits has been increased from 14s. to 15s. per proof gallon. Spirits in cases of two gallons and under are to be charged as two gallons; over two and not exceeding three, as three gallons; over three and not exceeding four, as four gallons, and so on.

COMMERCE ACT.

Exporters will need to watch keenly the labelling of their product. Numerous decisions are being made by the customs authorities under the new Act, and shortly they will no doubt be issued as a guide. The essential thing is that the labels, where they represent the article, must be absolutely true and in addition must give the country of production or manufacture of the article. A recent decision is of interest to exporters of jewellery. Rolled gold can bear the label, but it must also specifically state what percentage of gold was put into the article. In the case of gilt goods it is sufficient that it states they are gilt goods.

APPLES BY AUCTION.

It has been advertised that the *Sonoma*, from San Francisco, due here in three weeks, will bring three thousand cases of apples for Sydney, which will be offered at auction on arrival. This is unusually early for the introduction of apples into this market, but is due to the high prices which now prevail for this fruit, and which are likely to increase. The experiment of selling by auction will be of interest to British Columbia growers.

PRICES.

The tendency of prices of Australian products used in Canada is downwards. The best quality of hides are yet firm, but the poorer sorts have fallen in price. Pelts are also lower, as are rabbit, kangaroo and wallaby skins. Opossums have not yet followed the downward course. The market is somewhat uncertain, but in view of the high prices that have prevailed for some time for these articles, a reduction can be expected.

J. S. LARKE.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA
AND TASMANIA.

(*Mr. D. H. Ross.*)

STOCK EXCHANGE BUILDING, MELBOURNE, August 11, 1906.

TREATMENT OF ZINC-LEAD-SILVER TAILINGS.

Considerable interest has been aroused throughout Canada and the United States by my report of March 19 last—Weekly Report No. 118—upon the successful treatment (discovered by a Melbourne metallurgist) of enormous quantities of zinciferous tailings which had accumulated around the zinc-lead-silver mines in Australia. At the request of the Department of Trade and Commerce further details are sent herewith.

THE 'POTTER' PROCESS.

The process discovered by Mr. Potter consists of immersing the tailings in a hot solution of sulphuric acid—containing from one-half to one per cent of strength—which raises the sulphides to the surface whilst the gangue sinks to the bottom. The sulphides can be skimmed—or floated—off from the top of the spitzkasten whilst the gangue is drawn off from the bottom of the vessel.

OPERATION OF THE 'POTTER' PROCESS.

In supplementing my previous report (see Monthly Report, March, 1906, page 1572, which should be referred to in conjunction with these notes), it may be stated that the practical operation of the Potter process is carried out in a spitzkasten, the ore being fed into the hot solution of acid—varying in temperature from 160 to 190 degrees Fahrenheit—in such a manner that the ore enters the solution at a point one-third of the depth of the vessel from the top. The sulphuric acid solution is kept heated in a separate vat and is run into the spitzkasten by a pipe to nearly the bottom of the vessel, and in sufficient quantity to overflow the spitz as well as to wash away the gangue, which is carried away from the bottom on a travelling belt. The overflow from the spitzkasten, which carries away the sulphides, is run into vats where the sulphides settle and the solution is pumped up, made up to strength, and used again. The vat in which the concentrates are settled should be provided with a filter bed so as to permit of the superfluous acid being washed from the concentrates.

WHERE THE 'POTTER' PROCESS IS OF GREATEST SERVICE.

The 'Potter' process is of the greatest service in cases where the sulphides and the gangue (the worthless material) have somewhere near the same specific gravity so as to render it difficult or impossible to effect a separation by the ordinary methods of concentration. In Australia this process is mainly used for the recovery of zinc sulphides which are associated with rhodonite and garnet, which are nearly the same specific gravity as the blende. That the process has been most successful is undisputable. Every month many thousands of tons of clean concentrates, containing from 40

to 48 per cent of zinc with very low lead contents, are being shipped from Australia, which had it not been for Mr. Potter's discovery would yet be deposited in huge dumps of apparently valueless refuse.

EASY LABORATORY TEST OF THE 'POTTER' PROCESS.

The efficacy of the process as regards any particular ore may be easily tested in the laboratory by placing a small portion of the ore in a large test tube, and adding about three or four times its bulk of a solution of sulphuric acid in water (containing say $2\frac{1}{2}$ per cent of the acid) and heating the mixture to about 190 degrees Fahrenheit. The sulphides will be seen to rise to the surface of the liquid as a scum whilst the gangue will be left at the bottom of the test tube.

ANALYSIS OF BROKEN HILL TAILINGS

A typical analysis of Broken Hill tailings (known as 'True Vanner' middlings), which are being treated by the Potter process, is as follows:—

Silicia	25·0
Lead	6·0
Zinc	34·5
Sulphur	19·3
Manganese	8·3
Iron and aluminium	6·4
Water	0·1
	<hr/>
	99·9

If the tailings are finely ground before being treated by the Potter process the recovery is about 95 per cent of the zinc, but when the tailings are coarse about 85 per cent is obtained.

CHEAP SULPHURIC ACID ESSENTIAL.

It is obvious, in dealing with large quantities of tailings, that cheap sulphuric acid is necessary. At Broken Hill the acid is made alongside the works of the various companies using the Potter process from the sulphur fumes given off in roasting the concentrates.

THE PROPRIETORS OF THE 'POTTER' PROCESS.

Correspondents are reminded that it is advisable to communicate with the company interested for any additional particulars required. Communications should be addressed to the manager of Potter's Sulphide Ore Treatment, Ltd., 369 Collins St., Melbourne, as the company has not yet disposed of any patent rights. The Canadian patent is No. 76,621 of 1902, and the United States patent is No. 776,145, of 1904, both patents being issued in the name of Charles Vincent Potter.

INCREASED AUSTRALIAN CUSTOMS DUTIES.

In anticipation of increased customs duties being imposed by the Commonwealth government, few orders have recently gone forward for agricultural implements and machinery, except from Australian branches of oversea manufacturing houses. Yesterday, on account of premature and unauthorized disclosures, the government hastily determined to immediately increase the duties from $7\frac{1}{2}$ to $12\frac{1}{2}$ per cent above the rates hitherto ruling upon nearly every leading line of agricultural implements and machinery. In some instances, minor lines hitherto free have been made dutiable at from 20 to 25 per cent. These duties were at once enforced, but may be modified, as they must necessarily be confirmed by parliament. The report of the Tariff Commission is finally completed, but beyond implements the only other changes which have been made in the

tariff are connected with the customs and excise duties upon wines and spirits. The duty upon spirits has been increased from 14s. to 15s. (\$3.40 to \$3.65) per gallon, but this line is of little interest to Canadian distillers.

ALTERATION IN DUTIES ON AGRICULTURAL MACHINERY.

The new customs duties upon agricultural machinery and implements imported into Australia, in comparison with the rates hitherto ruling, are given as follows:—

	Old rates. per cent.	New rates. per cent.
Stripper harvesters, stump jump ploughs, strippers, disc cultivators, winnowers, horse and other power. . .	12½	25
Ploughs, other, plough shares, harrows, chaff cutters and horse gear, cultivators other than disc, scarifiers, malleable and other castings for agricultural implements	12½	20
Combined corn sheller, husker and bagger and combined corn sheller and husker	Various	25
Plough mould boards.	Free	25
Corn shellers and corn huskers.	Free	20
Handworked rakes and ploughs, combined haytedders, maize harvesters, maize binders, maize planters, mould board plates in the rough and not cut into shape, potato sorters, potato raisers or diggers. . .	Free	Free

The net amount of the duty payable is more than is superficially expressed, for the reason that 10 per cent is added to the invoice value of the goods before the duty is computed thereon. Thus a duty of 20 per cent works out at 22 per cent net and a duty of 25 per cent actually means 27½ per cent net.

CHANGE IN CUSTOMS DUTIES 'CABLED' TO OTTAWA.

Immediately the Australian government announced the alteration in the customs duties upon agricultural implements, the Superintendent of Commercial Agencies, Ottawa, was notified by cable of the increases made. This information would have been available in Canada yesterday a few hours after the question had been introduced into the Commonwealth parliament.

EFFECT OF INCREASED DUTIES ON IMPLEMENTS.

Canada has hitherto supplied the bulk of the agricultural implements and machinery imported into Australia. It is premature, at this juncture, to express an opinion upon what effect the increased duties will have upon these lines, but until the trade is settled upon the new basis of duties, it will be hard to interest importers in new makes of implements unknown to the trade.

CANADIAN TRADE NOTES.

Quite a number of orders have come under my observation for the usual lines of Canadian manufactures, which are going forward by this mail. Hardware supplies and heavy goods have received the greater portion of this business. Manufacturers' agents report that the uncertainty regarding the revision of the Australian customs tariff, and also the impending general elections, has prevented the closing of some indents of considerable value. Orders, in some instances, are subject to cabled confirmation, and business in heavy lines is now nearly always arranged by cable.

D. H. ROSS

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(Mr. J. S. Larke.)

THE EXCHANGE, SYDNEY, AUSTRALIA, August 7, 1906.

AUSTRALIAN TRADE, 1905.

The trade of Australia for 1905, is given as follows:—

Imports..	£38,346,731
Exports..	56,841,035

The chief trade was with the following countries:—

	<i>Imports.</i>	<i>Exports.</i>
United Kingdom..	£23,074,717	£26,702,390
Canada..	230,981	43,288
Cape Colony..	11,105	1,752,944
Ceylon..	693,616	3,893,436
India..	1,311,427	2,935,094
New Zealand..	2,333,516	1,595,368
Total British countries..	£28,458,867	£39,221,709
Belgium..	£ 551,984	£3,212,869
France..	510,950	5,762,904
Germany..	2,643,412	3,888,170
Japan..	371,761	581,155
United States..	4,486,604	1,049,773
Total foreign countries.... . .	£9,887,864	£17,619,326

It will be seen that Australian trade differs from the Canadian in so large a percentage of the exports going to foreign countries.

ORIGIN OF AUSTRALIAN IMPORTS.

The Australian Department of Trade and Commerce has made strenuous efforts to get at the origin of the goods imported into Australia and with some degree of success. The figures given are the returns as ordinarily entered, but the figures under the 'country of origin' are widely different. Thus in the case of Canada, which is affected perhaps relatively more than any other country, the following instances will illustrate this:—

<i>Article.</i>	<i>As entered.</i>	<i>Country of origin.</i>
Furniture..	£ 1,870	£ 4,331
Grain and pulse..	5,258	8,834
Agricultural machinery..	9,460	35,260
Harvesters....	27,079	43,950
“	31,084	65,014
Reapers and binders..	2,785	13,623
Printing paper..	4,829	86,111
Bicycles..	4,779	9,048

In a few instances the amounts credited to Canada are in excess of the amounts that actually should have been credited, owing to the fact of these goods having been brought here through the Canadian steamers from Vancouver. With the exception of boots and shoes and apparel, the amount is not material. It is impossible to give the total imports of Canada according to the returns under the column 'place of origin,' as in many lines the origin of the goods is not given. In some cases the amounts under the place of origin approximate very closely with the Canadian export returns, but there are instances in which the two widely differ. For example:—

Furniture: The amount credited to Canada is..	£1,870
“ As place of origin the amount is given as.. . . .	4,331
But the export figures of Canada for furniture shipped to Australia are..	9,172

Again, Canada is credited in the Australian returns with 11 organs, while the Canadian returns show an export of 112.

In lubricating oil the amount credited to Canada is £33; amount credited to Canada as place of origin is £313, and the Canadian export returns show more than six times the amount having been shipped from Canada; and so it is in many of the other lines.

As the fiscal years of the two countries do not end with the same month, it is impossible that the two should actually coincide, but owing to the time required in shipping goods from Canada to Australia and the character of the trade for the past two or three years they should not widely differ. Taking the years 1900 to 1905 (both years inclusive) and the Australian returns show an importation from Canada of \$8,375,724, but the Canadian export returns for same years show \$14,271,240. Ten years ago, when the trade of Canada consisted mainly of timber and fish, the returns of Australia and Canada nearly coincided, but with the wider variety of imports from Canada and the fact that so many of these imports are received through New York or ports of the United Kingdom, the returns have widely varied. The export returns of Canada do not give the accurate amount of the trade done with Australia, and it is, I presume, impossible to get it correctly. Canadian goods are shipped to export agents in New York and London and transhipped here. Of the ultimate destination of the goods the Canadian manufacturer often has no knowledge. His trade begins and ends with the agent at the export points.

THE TREND OF AUSTRALIAN TRADE.

It may be of interest to know the variation in the importations of Australia in ten years. The total imports of Australia were:—

1896..	£29,658,197
1905..	38,346,731

These imports came mainly as follows:—

	1896.	1905.
United Kingdom	£20,252,561	£23,074,717
Canada..	113,790	230,951
Other British possessions	3,070,739	5,153,199
Total British countries.. . . .	£23,437,090	£28,458,867
Foreign countries—		
Belgium	£ 285,728	£ 551,984
France..	350,063	510,950
Germany..	1,574,624	2,643,414
Sweden and Norway	179,488	302,397
United States..	2,845,903	4,486,602

Total from all foreign countries..	£6,221,107	£9,887,864	..
------------------------------------	------------	------------	----

It will thus be seen that the increase of the imports from British countries is slightly over five million pounds sterling in the nine years and the increase from foreign countries was £3,666,757. In amount the largest increase was in the imports from the United Kingdom, but the largest proportionate increase was from foreign countries. Proportionately the increase in imports from Canada was greater than that of any other country, except those producing tea and one or two countries like Austria, from whence the imports are small in amount.

In exports there was an increase of nearly twenty-four million pounds, of which the United Kingdom took five millions, British possessions not quite ten millions and foreign countries slightly over nine millions.

As compared with 1904 the imports of 1905 show increases from the United Kingdom and France and decreases from Belgium, Germany, Sweden and Norway and the United States. The decrease from Belgium and the increase from France were not so great as that shown, as owing to a maritime strike in Marseilles a good many French goods were shipped through Belgium and were credited to that country in the Australian returns.

The returns are so arranged that the principal imports are shown for five years since the formation of the Commonwealth, with the country from which they come. The trade with its development in the articles in which Canada does some business, is as follows:—

ACIDS.

The importations of acids decreased until 1903, when they amounted to £44,428, but increased to £59,356 last year. The whole of the increase went to France, but the total imports from that country are still much below those of 1901-2.

The British and German trade is nearly stationary and that of the United States was less in 1905 than in any preceding year. In acids a trifle is credited as coming from Canada.

ALE AND BEER.

The importations of ale and beer are steadily declining owing mainly to local brewing and slightly less consumption. Last year the importations amounted to £351,129, of which £316,948 came from the United Kingdom and £31,194 from Germany, both countries sharing in the decrease. The importations from the United States are a bagatelle, and though trade from Canada was attempted three years ago, it has not been followed up.

ALKALIES.

Alkalies consist almost wholly of soda-alkalies. Canada has not attempted this trade and probably is not likely to do so for some time. It is principally from the United Kingdom and Chile. The United States has the third place, its trade amounting to £4,161, being slightly above that for the year 1904, but only one half that of 1903.

APPAREL AND TEXTILES.

The imports of apparel and textiles declined until 1903, and increased at once upon the return of better times with the cessation of the drought. Last year the total imports amounted to £9,530,374. Of this amount, £21,150 is credited to Canada. As compared with 1903, the importations from the United Kingdom show large increases, from Canada, relatively an increase of over 30 per cent, Belgium shows an equally large increase; France a reduction of 10 per cent, Germany an increase of 10 per cent, Japan an increase of 75 per cent. The importations from the United States were less in 1905 than in 1903.

ARMS AND AMMUNITION.

The trade in arms and ammunition is increasing. Last year the total importations were £751,302. Of this amount, £1,294 is credited to Canada, being the importations of rifle cartridges of one calibre only and one rifle. The imports are mainly from Great Britain. The United States' share in 1905, was almost double as compared with 1904, but is still slightly below the importations from that country in 1902.

BLACKING AND LEATHER DRESSING.

The importations in blacking and leather dressing have steadily increased. Last year they amounted to £56,372. Canada has just begun to experiment with the trade and she is credited with £74. The importations mainly come from the United Kingdom and the United States, those of the former amounting to £41,495 and those from the United States to £12,658. The importations from Germany and the United States are decreasing, the whole of the increase in the trade going to the United Kingdom.

BOOKS AND PERIODICALS.

The trade in books and periodicals has been almost stationary for five years. Of the £445,286 imported last year £409,920 came from Great Britain. The importations from Canada were very small, amounting to £97. The United States' trade of 1905 was £5,319 above that of the previous year, but is still much below the trade of 1901-2-3.

BOOTS AND SHOES.

The importations in boots and shoes steadily diminished since the Federation. Last year they amounted to £266,493, being less than half the importations for 1901. Canada is credited with £8,135 of this amount, which is more than originated there, as a good many United States boots and shoes come via Vancouver and are credited in the returns to Canada. Apparently the Canadian trade has rapidly increased; as a matter of fact, it has made little progress in Australia, though it has done better in New Zealand. Ten years ago the United States trade increased rapidly and threatened to drive out the English production altogether, but the reverse is the case now. In 1901 the importations from the United States amounted to £245,272; last year it had fallen to £47,194. The English production has diminished, but not with so much rapidity. The imports from Germany amounted to £12,615, which was a little more than half that of 1901.

BRUSHWARE.

The imports last year in brushware were £122,851. The importations have varied little during the five years. The countries from which the bulk of the trade emanated last year are as follows:—

United Kingdom..	£87,767
Germany..	18,512
Japan....	5,693
United States...	6,304

The British trade has increased in five years; the German trade remains very much the same; the United States shows on the whole, a slight increase. Canada has taken no part in the trade, although backs for brushes might have been sent with advantage.

CANVAS.

The importations of canvas last year were £196,012, of which £77,806 came from the United Kingdom, £113,598 from India, and £4,005 from the United States. The importations materially declined to 1903, since which they have steadily increased. Some canvas came from Canadian factories through New York exporters a few years ago, but none is now credited to the Dominion.

CARPETS AND CARPETING.

The importations of carpets and carpeting for 1905 were £123,720, a decrease of over £11,000 below that of last year. The bulk of the imports came as follows:—

United Kingdom..	£115,167
Germany..	3,142
United States..	2,737

The proportions of the trade have not varied materially for the five years. Canada shipped at one time a few carpets here, but the trade has not been prosecuted.

CEMENT.

Importations in cement are declining owing to local production. Last year they amounted to £64,831, of which £26,241 came from the United Kingdom and £36,313 close to the seaboard, affording good shipping facilities, it will be impossible for her to do so.

CHEESE.

The importations in cheese for 1904 and 1905 were very much below those of previous years. They amounted to £12,494 last year, of which £337 is credited as coming from Canada. New Zealand, Germany, the United Kingdom and Belgium furnished the bulk of the trade. The Canadian share of the trade has fallen very materially. It ought to be increased and should be with careful provision for safe carriage.

CONFECTIONERY.

The importations in confectionery have slightly increased, but not materially. Last year they amounted to £99,490, of which £82,151 came from the United Kingdom and £12,595 from the United States. The United States trade has slightly increased. A little has occasionally come from Canada and £4 is credited as having come last year. At present there is no probability of an increase in the trade with Canada, prices being too low.

CORDAGE AND TWINES.

The importations of cordage and twines last year were £100,011 as against £194,412 during the previous year. Of this amount

Great Britain furnished..	£81,215
New Zealand..	4,946
Germany..	3,773
United States..	4,984

In 1904 Canada is credited with having sent £4,970, but last year nothing. The trade varies very much, depending upon an unexpected large demand for binder-twine in Australia and surpluses in Canada and the United States.

DRUGS AND CHEMICALS.

The drug and chemical business is not large, the importations being £904,781, coming chiefly from the following countries:—

United Kingdom..	£576,226
France.....	118,465
Germany..	102,781
United States.....	82,103

Canada is credited with £1,068 as against \$12,789 in 1904. The importations from France, United States and Germany have increased somewhat during the last five years, the trade of Great Britain remaining almost stationary.

ELECTRICAL MATERIALS.

The total importation of electrical materials last year was £205,726, of which the

United Kingdom furnished..	£141,484
Germany..	39,657
United States..	18,844

The business from the United States varies very much. Last year was only one-third of the exports of that country in 1902 and half that in 1903. The exports from Germany show increases, but not to any large amount. Canada is credited with £170. There seems to be arrangements whereby Canadian companies, able to export, cannot compete in this market.

FISH.

The importations of fish preserved in tins last year was £288,371. The countries furnishing the chief amounts were:—

United Kingdom..	£94,134
Canada..	51,779
France..	7,412
Norway.....	6,461
Portugal....	5,774
United States.....	102,845

The Canadian trade last year was much larger than that of any year of the Commonwealth records. The United States was larger than any year except 1901. The importations from Great Britain have declined. New Zealand is furnishing an increasing amount of such food products and last year supplied £7,427. The trade with Portugal and Norway is also increasing. The Canadian shipments were almost wholly of salmon and it can be materially increased by the preservation of other fish, such as herring and mackerel, in the forms in which they are put up in Europe. The trade in fresh fish is very variable, and has not become of the extent it once was hoped for.

APPLES.

This is the one fresh fruit for which an attempt has been made to get into the market from Canada, but with no great amount of success. Of the £4,180 worth of apples imported last year, Canada is credited with \$719, and the United States with £3,443. As a matter of fact, the quantity of apples of Canadian origin was much smaller than the amount named. The demand for fruit in the Northwest provinces has so largely absorbed the British Columbia crop that there seems to be at present not much hope of the Australian demand being supplied. British Columbia apples would be preferred if there was assurance that they could be obtained and shipped in such manner as to ensure their safe carriage.

PRESERVED FRUIT.

Notwithstanding that Tasmania is now successfully competing in this market for tinned fruits, there was an importation of £22,570 of fruit put up in tin and glass last year. The United Kingdom furnished the largest amount, but £5,325 is credited to the United States. A trifle came from Canada, mainly ordered for Canadians resident in Australia. California, from its nearness and therefore cheaper transportation, has great advantages over the canneries or Eastern Canada in shipping to this market. There appears to be little or no surplus at present in Canada, but should the production there in berries grow beyond the needs of the home market, there is a demand which would take a limited quantity, in Australia.

FURNITURE.

The importations last year were £219,003. Notwithstanding the duties, the improved times have increased the importation. The following figures will give the imports from the principal suppliers for the years 1903 and 1905:—

	1903.	1905.
United Kingdom....	£69,020	£83,131
Canada....	1,735	1,870
Austria....	3,683	2,269
Belgium..	1,923	1,585
Germany..	31,185	51,101
United States.....	42,993	57,843

Canada is not doing the trade that it ought to do, but the prospects are for an improvement in the future. Some early attempts were not successful, as goods were sent here that were not suitable for the market and in a way, which I have repeatedly advised could not be productive of good results. There is now an established trade in chairs, tables, office furniture and some case goods. The trade is very much larger than the figures given above. In tracing the origin of the goods, the Australian returns credit Canada with £4,331, but as shown in an earlier part of this report, the Canadian export returns are double these figures. The trade can still be materially increased and as the Canadian factories are specialising, there are good prospects that it will be.

GLASSWARE.

In glassware Canada is credited with £31 in a total importation of £159,148. The countries from which the major portion of this class of goods come are:—

United Kingdom....	£57,073
Belgium.....	9,362
Germany.....	61,809
United States....	28,050

The proportion of the trade between these countries has not fluctuated much during the last four years. Canada at one time had a prospect of doing a large trade in lamp-chimneys and lamp-ware, but the exportation was stopped some years ago.

GRAINS.

There was an importation last year of 246,908 bushels of grain valued at £19,672, of which 40,830 came from New Zealand and 82,560 from the United States. This is very much below the importation of the previous year.

MALT.

The importations of malt were much larger, being 170,713 bushels valued at £53,247, nearly the whole of which came from the United Kingdom. Every now and then a Canadian firm intimates its intention of trying this trade, but so far it has not yet gone beyond the intimation.

OATS.

The importation of oats depends very much upon the season. Last year they amounted to 365,823 bushels valued at £45,460. During the drought year the importations were over two million bushels, of which Canada furnished but 83,551. There is some demand for Canadian oats in the shape of groats for the manufacturing of oatmeal, but this year it has been unobtainable.

WHEAT.

Wheat, like oats, come during the drought season. The last two years there was practically no importation except for seed purposes. During the drought year of 1903 there was an importation of over nine million bushels, of which Canada supplied only 57,110 owing to insufficient transportation facilities. There is a small demand for No. 1 Hard Manitoba for seed purposes. This grain must be clean, but it seems to be impossible to get the clean grain required.

FLOUR.

The importations of flour last year amounted to 1,109 tons valued at £10,979. Of this, £2,489 is credited to the United Kingdom, £5,258 to Canada and £3,033 to the United States. This is by no means a true statement of affairs, as nearly the whole of it originated in Canada, and in the table giving the country of origin of the goods, £8,834 is credited to Canadian production. The high duty prevents much increase in the trade just now.

HOPS.

In 1905 the imports of hops were valued at £62,763, coming from :

United Kingdom.....	£14,738
New Zealand.....	18,518
Germany.....	11,810
United States.....	17,123

The importations have been increasing for the last five years. Those from the United Kingdom have slightly increased, but not to the same extent as those from New Zealand and the United States. Canada is credited with sending hops to the value of £146. There appears to be a little surplus to export from British Columbia, from whence the Canadian exports come.

AGRICULTURAL IMPLEMENTS AND MACHINERY.

The importations of agricultural implements for 1905 amounted to £361,439. For the previous year they were £578,361. The trade varies with the season. There having been some stock carried over from 1904, it lessened the imports of 1905. The importations last year came from:—

United Kingdom.....	£58,530
Canada.....	43,329
New Zealand.....	2,505
Germany.....	3,020
United States.....	253,519

Upon turning to the report of the country of origin, it will be seen that these figures are of very small value.

The imports from Canada were there increased to £78,897 and those from the United States reduced to £192,895. Even this change does not do justice to Canada, as the Canadian returns show the exports to Australia to have been £147,350. The United States shipped £21,155 of implements and machinery which are free of duty, consisting specially of hand tools, in which Canada does not very largely share.

INDIA RUBBER AND MANUFACTURES.

The importations of india rubber and manufactures are steadily increasing. Last year, according to the returns, there came from the

United Kingdom.....	£224,289
Germany.....	20,647
United States.....	24,321

Canada is only credited with £150. The Canadian trade is altogether underestimated, though it does not include in these figures, india rubber boots and shoes, which is a large item of the Canadian trade. The imports from the United Kingdom show the largest increase. Those from Germany are very variable, being the same in 1903 and 1905, though very much greater in 1904 and still more than in 1902. The imports from the United States have increased steadily, but slowly.

MUSICAL INSTRUMENTS.

In 1905 the importations of musical instruments were in number 9,141, valued at £184,490, which shows the low valuation of about £20 each. With such a valuation it will be readily understood that Germany furnishes an enormous proportion, the figures being:—

	<i>Number.</i>	<i>Value.</i>
United Kingdom....	778	£ 18,961
Germany.....	8,004	155,583
United States....	224	6,574

Canada is credited with only 50 in this return, valued at £1,046, but in the table of origin the value of the importations is increased to £1,275. It is exceedingly difficult for Canada to greatly increase the trade against German competition. The importations are steadily increasing, though there are some pianos made in Australia.

CABINET ORGANS.

The number of cabinet organs imported in 1905 is given as 1,423, valued at £14,687. Of this number, 1,239 are credited to the United States and 160 to the United Kingdom. Canada is credited with but 11, a figure which, as shown in an earlier part of the report, is but one-tenth of the number which the Canadian returns show to have been exported to this country. As will be seen from the price, the organ imported, as in the case of pianos, was a very cheap one. The trade has been a declining one for some years, but it is now reported to be looking up.

LEATHER.

In spite of the improvement in Australian tonnage, the importation of leather did not show a very great change in amount. Last year the value of the imports is given at £252,371, coming chiefly from the following countries:—

United Kingdom..	£140,726
Belgium..	19,912
France..	8,527
Germany..	16,271
United States..	57,197

Canada is credited with £175, increased in the column giving the origin of the imports to £290. This is somewhat below the Canadian returns of exports to Australia. The imports from England show increases, as also do those from Belgium and France. Those from Germany have been variable and from the United States they have steadily and largely fallen away. The importation from Canada at one time consisted of sole and harness leather, for which now there is a lessened demand owing to local production. England has increased her share, as the demand is for oak-tanned leather rather than for leathers of dark colours.

LEATHER MANUFACTURES.

The importations of manufactures of leather for 1905 were £109,197, and came chiefly from the following countries:—

United Kingdom..	£95,515
Germany..	2,722
United States..	9,443

Canada is credited with £116, being almost wholly of whips. Some little attempt has been made to introduce harness, but the Canadian manufacturers have not been in a position to push the trade.

MACHINES AND MACHINERY.

Under this wide item the importations last year were £1,735,859, which came chiefly from the following countries:—

United Kingdom..	£1,044,541
Canada..	14,375
Belgium..	20,425
Germany..	128,568
United States..	500,410

The importations have been fairly steady for five years, those from the United Kingdom showing increases and those from Germany, on the whole, a decrease. The principal importations from the United States were cash registers, gas, oil, portable and traction engines, boilers, pumps, electrical, mining and printing machinery, sewing machines, typewriters and machine tools. The imports from Canada consisted of one oil engine, boilers, pumps, saw-mills, printing machinery, sewing machines, typewriters and a few machine tools. Some portable and traction engines were sent out a few years ago, and with modifications, they promised to secure a very fair share of the market of £58,000, but owing to the increasing home demand the trade has not been followed up.

METAL MANUFACTURES.

Exclusive of nails, pipes, tubes, wire and wire-netting, the importations of metal manufactures last year amounted to £1,024,540. Of this amount the

United Kingdom furnished..	£752,236
Belgium..	18,862
Germany..	86,791
United States..	159,485

Canada is credited with £915, a very considerable decrease compared with that of previous years. The principal articles exported from Canada were steel ceilings and shingles. In these lines there are now a number of local manufacturers, who have secured the great bulk of an increasing trade.

PAINTS AND COLOURS.

The importations of paints and colours are increasing, amounting to £293,376 in 1905. The bulk of these imports, amounting to £236,055, came from the United Kingdom, and £42,081 from the United States. The United States last year increased its share of the trade, though in previous years it had made little progress and it yet remains to be seen whether it can hold its own against British manufactures. Canadian factories have made efforts to get into this market, but they had to compete against large concerns who have branches under expert management, frequently carrying stocks or supplying large houses upon the consignment basis. Under such conditions Canadian manufacturers did not feel it would be advisable to push the trade.

PRINTING PAPER.

The importations of uncoated printing paper are increasing. Last year they amounted to £475,230, being credited to the following countries:—

United Kingdom.....	£199,690
Canada.....	4,829
Belgium.....	4,697
Germany.....	61,897
United States.....	203,176

with small amounts from a few other countries. These figures, as has been shown earlier in the report, are not of the slightest value. In tracing the origin of the imports, the report credits £86,111 as having come from Canada, with decreased importations from the United Kingdom and the United States. Canada has made a fair entry into this market and should continue to increase its proportion of the trade.

ORDINARY PAPER

The importations of ordinary paper amounted to £463,053, coming chiefly as follows:—

United Kingdom.....	£256,318
Belgium.....	16,356
Germany.....	106,751
United States.....	75,423

In some of these lines, Canada ought to have a share of the trade, but as yet has scarcely made any attempt to secure it. In bags the United States shipped £5,532 in value; in browns and other tinted bag paper, Germany supplies the bulk, £32,669 out of a total of £42,509; in cartridge and blotting paper, the United Kingdom supplies £5,878 out of a total of £7,541; in millboard, cardboard, leatherboard and woodboard, the United Kingdom supplies £3,448 and Germany £4,707 out of a total of £9,429; in strawboard, out of a total importation of £19,632, the

United Kingdom sent.....	£10,319
Germany.....	6,836
Netherlands.....	6,125

In other general lines, out of a total of £365,863, Canada is credited with £228.

PAPERHANGINGS.

The paperhanging trade has not shown any increase for some years, the total importations being £42,251 in 1905, obtained mainly from the following countries:—

United Kingdom.....	£33,861
Germany.....	5,556
United States.....	2,080

Canada is credited with £280 in the general returns, increased to £1,057 in the column devoted to country of origin. This is considerably below the amount of the exports from Canada. The Canadian share of the trade has increased slightly and promises to increase more rapidly, as British widths and patterns have been adopted. The trade of the United States, which has adhered to French widths and patterns, has steadily declined.

PICKLES AND SAUCES.

The pickles and sauces trade has been increasing for a number of years, though not to any great extent. Last year the importations amounted to £95,012. Outside of the specialties from China and India, the importations were mainly from the United Kingdom, amounting to £86,002; £2,786 came from the United States. A manufacturer from the United States has gone to special expense in introducing his pickles and sauces and though the trade has not become very large as yet, there is every indication that if his efforts are followed up the trade will increase. Canada has made no effort to share in the trade, but from the quality of the vegetables which it can produce, there is no reason why it should not do so.

PLATEDWARE.

The importations of platedware in 1905 amounted to £153,760. There has been a steady increase during the last three years. The bulk of the trade belongs to the United Kingdom. Her supplies amounted to £129,099 as against £4,152 from Germany and £17,381 from the United States. Canada, in the returns, is credited with £256, which, as shown in the table of origin, is much below the amount actually sent. Canadian manufacturers have made persistent efforts to get into the market, but they have been confronted with two difficulties. Large manufacturers of Great Britain and the United States have their direct representatives in this country in some cases carrying stocks of goods. The Canadian designs largely follow those of the United States, which are not popular in this country, and in spite of the persistent efforts of United States manufacturers, they have made but small growth. As compared with 1903, the imports from the United Kingdom increased by over £33,000, while those from the United States increased by £1,000, and those from Germany slightly declined. With their present patterns, there is not much probability of a large increase in the trade.

SPIRITS.

The importations of whisky spirits last year amounted to £513,513, the trade being practically monopolized by the distillers of the United Kingdom, who sent to the value of £511,663. Canada comes next with a credit of £790, which is again below the trade from Canada. The United States is credited only with £370, which in reality belongs to Canada, as also a portion of the liquor sent from the United Kingdom. Australians do not like whisky produced from corn and hence the Canadian article has not made very great progress. It is possible that the Commonwealth Government may pass an Act, requiring that no whisky shall be sold unless it is at least two years old in wood. It is possible that this may help the Canadian trade in this article a little.

STATIONERY.

The total imports of stationery in 1905 amounted to £233,669, which is slightly below the average of the imports for five years. The United Kingdom sent to the value of £181,450; Germany, £27,682, and the United States, £17,499. Canada is credited with £268 in this return, which is one half the amount credited to it in the column 'country of origin.' The share of the trade secured by the United Kingdom remains steady; Germany shows a slight increase at the expense, apparently, of the trade of the United States, which shows a fairly steady decrease.

DRESSED TIMBER.

The importations of dressed timber amounted to £264,843. Norway secured £228,306; Sweden, £11,965 and the United States, £23,181. Canada's share is put down at £67. At one time there appeared to be a probability that the Canadian millers would make a serious attempt to get at the trade in shelving and weatherboards, but from some circumstances the effort has been abandoned. During the last three years the duty began to take effect. As a consequence the trade has decreased to a considerable extent. The United States did a considerable business in doors, but the duty has almost put an end to the trade.

UNDRESSED TIMBER.

The total importations of undressed timber amounted to 163,976,501 feet valued at £750,286, coming mainly from

New Zealand.....	£329,327
United States.....	308,479
Canada.....	52,119

This does not appear to include the imports of laths and pickets, amounting to £2,476. The Canadian share is relatively better than that of dressed timber, but appears to be a long way below what it ought to be, and what it has been in past years. It was anticipated that the duties would tell against the volume of the importations from abroad, leading to a larger use of colonial timbers, but the amount imported has not materially changed. The exports of Canada have been, almost wholly, of Douglas fir, known here as Oregon. The United States had, in addition to the Oregon of Puget Sound, shipped quantities of redwood and silver pine from California. The imports from New Zealand are composed almost wholly of New Zealand pine, which is free of duty.

VEHICLES.

The importations of vehicles last year amounted to £263,626. The great bulk of the trade came from the United Kingdom, in value, £176,310. The other principal imports were from

Canada.....	£ 4,795
Belgium.....	21,887
France.....	10,440
Germany.....	17,367
United States...	31,229

The importations from Belgium should have been credited to France, owing to the bulk of the French motors having been shipped through that country. The trade of Canada was mainly in bicycles and has fallen away very materially in the past five years. In 1901 they amounted to £45,367, so that last year the importations were just over one-tenth of the amount credited to Canada five years ago. The returns, however, are not guides as to the volume of the trade, which was nearly double that stated.

The trade of the United States has also declined, though not as rapidly, as that of Canada. Germany has increased its share though it is not entitled to all that the figures give it. The share of the trade of the United Kingdom has been steadily increasing for the last five years. She now has nearly all the trade in bicycles and half the trade in cycle parts, and she is rapidly increasing her share of the motor trade, having now secured half of it. The trade in motors has made rapid growth, the imports last year being four times that of 1903.

CARRIAGES.

Canada has not made any very serious effort until recently to share in the carriage trade, although there has been very considerable correspondence. The importations have been reduced to small proportions and consist largely of buggies. Last year the vehicles imported numbered 588 valued at £10,193. They came principally from:—

United Kingdom (No. 78) valued at.....	£2,745
Canada (No. 30) valued at.....	620
United States (No. 471) valued at.....	6,698

The amount credited to Canada is perhaps rather over the trade actually done. The United States has had the advantage of the trade in buggies for many years and it will take more serious efforts than the Canadian carriage men have put forth in the last two years to make an impression upon the trade, though it materially improved its position last year. The carriages which have been sold from Canada have given excellent satisfaction, and there is a probability that the trade will be extended. There is in addition, an important importation of vehicle materials, consisting of bodies in the white, undergears, wheels, springs, axles, and tops. Of the buggy parts nearly the whole trade is in the hands of the United States, Canada doing a little. Correspondence has been initiated, which, if the Canadian manufacturers can meet the conditions of the trade here, should result in giving Canada a larger share of the business than she now has.

WOODWORK.

Under the head of woodwork are included axe and other tool handles imported to the value of \$39,342, and other manufactures of wood to the value of £74,100. The United States monopolize nearly the whole of the trade in handles, being credited with £37,210 of the total, and has also a large share in the trade of manufactures of wood, being credited with £43,277. Canada's share is £56 in handles and \$402 in general wooden manufactures. At one time there was a promise that Canada would secure a share in the trade in tool handles, but for some reason the handles did not give satisfaction, and there seems to be no desire on the part of any Canadian manufacturer to push the trade. The freight, which is an important item in such low priced goods, has been in favour of the United States and that, with the disinclination on the part of the Canadian manufacturers to push the trade, has limited our share of the business to so small proportions.

Separate articles will be dealt with in a subsequent report.

J. S. LARKE.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(Mr. W. A. MacKinnon.)

BRISTOL, ENG., August 31, 1906.

COLONIAL DAIRY PRODUCE.

The Annual 'Colonial Dairy Produce Review' gives some interesting particulars regarding colonial trade with Great Britain.

AUSTRALIAN BUTTER.

This Review states that the supplies of butter from Australia continue to increase. For the twelve months ending June, 1906, the total imports amounted to 26,950 tons, as against 23,368 tons in the previous year, and this in spite of a partial drought in Queensland and New South Wales in the early part of the season.

NEW ZEALAND BUTTER AND CHEESE.

The exports from New Zealand for the same year were 15,177 tons, a reduction of 490 tons as compared with the previous twelve months. High prices for cheese apparently caused New Zealanders to make more of that product and less butter, the exports of cheese having increased by nearly 30 per cent, the total being 5,870 tons.

CANADIAN BUTTER.

The quantity of butter exported from Canada is also affected, if not governed, by the profit to be made on cheese. The exports of butter from Canada amounted to 15,145 tons, an increase on the previous year's output of 2,298 tons, making a record so far as Canada is concerned, the previous highest amount having been 13,238 tons in 1903.

CHEESE FROM CANADA.

Out of a total import of 130,062 tons of cheese into the United Kingdom for the year ending 30th of June, 1906, Canada supplied 95,864 tons—over eight times the quantity received from the next largest exporting country, namely, Holland.

CHEESE VERSUS MEAT.

There is a noticeable change in the dietary of the working classes of this country, cheese being to some extent replaced by the cheap and excellent qualities of frozen mutton and beef, which are now regularly found on the tables of the artisans. Since the beginning of the year a large and unusually heavy consumption of cheese has been noticed; this is attributed to the tinned meat scare, and is one of the unexpected results of the Chicago scandals.

PROSPECTS FOR THE COMING SEASON.

It would appear likely that, owing to the trying spring and hot summer, the production of butter and cheese in the United Kingdom will be much smaller than last year. There has been a marked abatement of the supply of milk recently, and there is little prospect that it will be made good this season. But, quoting the Review, 'the increased demand for milk in its raw state to supply the wants of the large towns has rendered the sale of new milk a more profitable method of dairy farming than the making of butter or cheese.' The general outlook for Australian butter is considered most favourable, and it is stated that already sales of New Zealand butter have been noted for October-March shipment at higher prices than ruled last season. The Canadian trade have every reason to look forward to successful operations, as a result of an increasing demand at excellent prices.

TINNED MEATS.

It has already been pointed out by some of my colleagues that there is at present a good opening for Canadian brands of tinned meats. Supplementing what has been published in the 'Weekly Report,' I would in the first place confirm the expectation that Canadian goods should succeed eventually in securing a good place on this market; but certain conditions precedent must be observed.

GOVERNMENT INSPECTION.

The entire trade in all classes of canned goods is practically at a standstill, confidence having been utterly destroyed, even in some of the best brands of British and foreign goods. To remove suspicion and restore confidence, a certificate of government inspection is what the trade here stipulates as a first requisite.

DATE LABELS.

In addition to the label showing that the contents have been inspected at the time of packing, the *date of packing* should be clearly stamped on every tin. The principal object of dating new goods would be to show that they had been put up subsequent to the American investigations, since every one believes that these inquiries will result in a vast improvement in the conditions attending the manufacture of canned goods.

'CANADIAN PRODUCE.'

Finally, I cannot too strongly urge upon shippers of these and other goods to make the word 'Canada' or the label 'Canadian Produce' most prominent. As an importer put it to me, 'Canada' should be all over the goods.'

DEVELOPMENT WILL BE SLOW.

Exporters of canned goods who think of doing business with Great Britain must be on their guard against promises of immediate or rapid extension of trade here. The Americans built up their trade gradually, and expended much time and patience in the early work of advertising and placing their goods. Canadians must expect to do the same, even with the advantage given them by the present situation. It must be borne in mind that the canned goods trade in Great Britain just now is absolutely dead; that stocks, of fish, tongues, vegetables and other products, which have stood various critical tests and been pronounced perfectly wholesome in every way, are standing in warehouses to the amount of thousands of cases, utterly unsaleable. Opinions differ

as to how long it will take before public confidence is restored and buying is recommenced; some very good judges place this period at eighteen months or more. I therefore repeat that even Canadian makers of the very finest goods must not look for immediate returns, and must be patient while quality and salesmen do their work.

IMPORTANT VISIT TO CANADA.

Another link in the chain of Bristol's commercial relations with Canada will be forged by the visit to all important Canadian centres of Mr. F. B. Girdlestone, secretary and general manager of the Bristol Docks Estate. The object of Mr. Girdlestone's visit is to confer with boards of trade and other organizations, with a view to bringing about a larger traffic between Bristol and Canada. Any improvements in the facilities offered at Avonmouth for such transatlantic trade which may be suggested to Mr. Girdlestone will receive careful consideration by the Bristol authorities.

A REMEDY FOR DUST ON ROADS.

A correspondent writing in the 'Times' of the 29th instant, states that if calcium chloride, which can be purchased at 30s. per ton at the works at Northwich, be used for heavy watering of the streets, at a strength of 1 cwt. to 100 gallons of water, and afterwards for light waterings at half strength, the dust evil will be entirely disposed of. I take it that this has reference to macadam roads. The correspondent writes, 'I was in Woodbridge (Suffolk) on the 20th instant, and the clerk of the council assured me that the streets had not been thoroughly drenched with the solution since July 28. They had been watered lightly once daily early in the morning. They were in perfect condition, and not a particle of dust flying when I inspected them.'

Perhaps some Canadian municipalities would think it worth while to make a trial of this remedy on some part of its streets where the dust nuisance has been most pronounced.

W. A. MACKINNON.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(Mr. C. E. Sontum.)

CHRISTIANIA, NORWAY, September 5, 1906.

HARVEST PROSPECTS.

Although the final reports on the crop season are not yet to hand, the harvest prospects may be approximately ascertained by the preliminary reports of the county sheriffs, which have lately been published. It appears, that the hay crop can be described as yielding an average return. Next to hay comes the potato crop, which seems to be somewhat above that of an average year. The grain crop is nowhere exceeding the average return. As to the fruit crop, it may interest Canadian exporters of apples to know, that the apple crop will not be large this year, and there ought to be some sale for Canadian apples. The offers which I have heard about from Canada so far this season have, however, been higher than offers from United States exporters.

WOODPULP.

Mechanical woodpulp is in good demand, both for prompt delivery and for contracts over 1907. Some of the best brands have already been sold out for next year, and for good ordinary brands there is quoted Kr. 32.00—Kr. 33.00 (\$8.53—\$8.85) or perhaps a shade more. If packed in hessians 50 to 75 cents more. This price level, which would have been considered very satisfactory a few years ago, does not leave more than a meagre profit now, so much has the cost of logs, hessians, taxes and other expenses increased. The difference in the cost of logs now being received as against those of last year is alone sufficient to increase the cost of a ton of moist pulp with from 30 to 40 cents per ton.

Cellulose has been a quiet market for some time, and few if any contracts have been made for delivery in 1908. For 1907 unsold lots command a price of Kr. 148.00= \$39.50 net, f.o.b., for strong sulphite, which is about the figure at which current long-dated contracts have been made.

TELEGRAPH CABLE TO ICELAND OPENED.

The cable line to Iceland, which has been under construction for some time, is now completed, and it is thus possible hereafter to correspond by cable also with that country, which has become a necessity with the steadily increasing trade of that northern island.

ICELAND AND AMERICA STEAMSHIP LINE.

Danish newspapers lately have contained several articles in regard to the establishing of a direct steamship line between Iceland and America, which is considered of much importance for the future development of the trade of Iceland.

HIORTH FURNACE FOR ELECTRIC SMELTING.

I mentioned in my report of July 4 (see Monthly Report, June, 1906, page 2134), a new patent smelting furnace invented by Mr. Albert Hiorth, C.E., of Christiania. Since then I have had inquiry from Canada for further details about it, the cost, &c. I have therefore asked Mr. Hiorth for such details, and he informs me, that a complete electric equipment for a 600 horse-power plant would cost about £1,000, packed ready for shipment f.o.b., Christiania. To this would come a small royalty pr. 100 kgr. (220½ lbs.) steel produced; but as he is much interested in getting a plant started in Canada, he would put the royalty for the first plant equipped with his furnace very low. To any eventual purchaser he will furnish drawings of the furnace and full instructions for putting in the electric equipment free of charge. As the invention is so new, there is no such furnace in operation yet, but Mr. Hiorth said he was now just making a contract for one.

The smallest size furnace which would pay to operate, he said, was a 200 h.p., but proportionately these would come higher both to build and operate than a larger size one. Gysinge steel, it will cost about \$37 a ton to produce after Mr. Hiorth's method. As this steel in Germany commands a price of about \$160 per ton, a splendid profit can be made.

C. E. SONTUM.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No. 14, BUND, ROOM B., YOKOHAMA, August 28, 1906.

CERTIFICATES OF ORIGIN.

The Japanese customs authorities have issued notice to the effect that on and after October 1 the regulations respecting certificates of origin will be strictly applied with regard to imports under the conventional tariff. All goods not accompanied by certificate of origin upon invoice will be liable to the general or maximum tariff. The regulations so providing are as follows:—

Art. 1.—Persons wishing to enjoy the benefit of special conventions according to the proviso of the first paragraph of Art. 1 of the Customs Duties Law shall furnish proof of the fact that the goods they are importing are the produce or manufacture of the country to which such special conventions are applicable, but postal matter and goods, the dutiable value of which does not exceed 100 yen, are excepted.

Art. 2.—The proof mentioned in the preceding article must be furnished by means of a certificate of origin by the Imperial Japanese consulate or commercial agency at the place of production, manufacture or shipment of the goods, or where there is no such consulate or agency, by the custom house, or other government or public office, or by the Chamber of Commerce of the locality.

The certificate of origin mentioned in the preceding paragraph shall contain the marks, numbers, descriptions, number of packages, weights or measurements of the goods and the place of production or fabrication.

TIMBER IN JAPAN.

According to the official expert of the Bureau of Civil Administration in Japanese Saghalien, there are in that country forests of immense extent. 'A striking but characteristic feature,' says the expert, 'the great fires occurring in these gigantic forests, and only ocular demonstration can enable one to realize the damage thus caused to the forests.' A forest fire is said to last in some cases from one to three years, combustion smouldering throughout the winter underneath the snow; and starting up with renewed fury, being fed in the early spring by the dried foliage before fresh vegetation is developed. The same authority remarks it as being almost incredible that under these circumstances lumber for present requirements should be brought in from northern Japan. This Saghalien timber is described as pine of great size and excellent quality, with other varieties of valuable timber; but although at present totally without facilities for manufacture and transportation, the estimate is that lumbering operations will open with the advent of law and order now being organized.

This contribution to the wealth of Japan in timber, previously quite extensive in the northern island, will make the country self-providing in the matter of lumber, assuming, of course, that in their lumber manufacture they supersede the handsaw by the circular, the gang, and the bandsaw. The Ostaru Lumber Company is promoted by six named wealthy Japanese business men, with a capital of 1,500,000 yen. This company will take over the interests of another lesser company, that has been doing a prosperous business for a number of years, with the view of greatly extending operations. The government also are understood to be directly concerned in the manufacture of lumber. Of late the timber and lumber capabilities of Japan have been the subject of much attention. Whether the result will be to practically set aside foreign lumber as an item of trade, is a question that cannot be answered yet.

COMBINATION AMONGST SUGAR REFINERS.

The sometime-talked-of Sugar Refinery Combination has taken on the appearance of renewed vitality. The *Kobe Chronicle*, a good authority, says that 'about forty leading shareholders in the Japan Sugar Refinery of Tokyo, decided last week to incorporate their concern with the 'Osaka Sugar Refining Company.' It is also stated that 'the directors of the Dairi Sugar Works are interested in the combine,' so that there is the probable event of three of the largest sugar refineries shortly becoming one common property.

THE COTTON INDUSTRY.

Cotton manufacture, both spinning and weaving, is doing very well in Japan, and the future seems to offer tempting opportunities. Every day there are further announcements of new enterprises, and increases of capital by old ones. The most important of recent well vouched for investments is by the Mitsui Company, one of the wealthiest in Japan, organizing a subsidiary company with a capital of 3,000,000 yen; 20,000 spindles for cotton spinning, 5,000 for silk spinning, and 500 weaving machines. Cotton spinning for export, figures as a most important industry.

WHAT NECESSARY TO OPEN TRADE.

The *Japan Advertiser* of Yokohama, a newspaper understood to represent interests that go by the name of 'American' here, but actually United States interests, makes suggestions as to what should be done in order to promote American trade in China:—

'The greatest need of American trade is improved representation of special interests. At the present time American houses dealing with China directly depend for

their business upon agencies held by business houses in the several open ports of the empire. The old business houses handle foreign goods mostly on commission. Most of the firms are British, and they naturally prefer British rather than American goods. There is need of direct American representation of American firms, and this representation should necessarily first come at Hong Kong and Shanghai, the two ports representing the great trade divisions of China.'

With a few obvious substitutions, every word here quoted applies to the case of Canada and Japan. There is not only no direct representation here, but its absence is a conspicuous feature. There is unmeasured trade and opportunity here, with special representation taking every advantage that offers. Until Canadian lines of trade come here with their agencies behind them, it will probably continue a matter of surprise to Canadians that their trade with the Orient does not make progress.

HORSE IMPROVEMENT.

The Japanese authorities, and active public spirits amongst the leading people are very much alive to the need of improving or perhaps entirely replacing, in the course of time, the breed of horses common to the country. The Horse Administrative Bureau, a branch of the Department of Commerce and Agriculture, preparatory to the next legislative session, estimates its expenditure for the next fiscal year at 1,500,000 yen. This appropriation will be for the maintenance and operation of the farms, and for the purchase abroad of horses.

An organization, with headquarters at Tokyo, has been formed for the purpose of promoting improvement in the quality of Japanese horses. Whether the intention is to draw a line and entirely supplant the present native animal, which is a suggestion that finds frequent vent, does not yet appear. The name is appropriately Japanese, the nearest approach to which in English may be given as the Japan Horse-Race Association. The corporate interest is half private by way of shares, and half public in the form of government appropriation. It is provided in the articles of association 'that the honorary presidency of the association shall be offered to a prince of the Imperial Family,' the chief director being Viscount Kano. The character and seriousness of purpose, and doubtless the ultimate good work of the association may be assured. The Japanese government is said to fully appreciate the importance of effecting improvement in the country's stock of horses, and to that end encouraging in a practical way similar methods to those that have been successful in other countries.

There have been already ordered some fifty horses, distributed between Austria, England, Australia, and the United States. The association will, however, receive offers or tenders from private horse breeders or owners anywhere. The association fix an average or upset price. Assuming the price to be 1,000 yen; a party offering some at 600 or 800 yen, others at 1,200 or 1,600 yen; the lot, if accepted, would be at not more than 1,000 yen a head. Of these, when imported, there will be a distribution by ballot amongst applicants, on which occasions there will be races and other demonstrations by which the quality of the animals will be exemplified for public instruction and popular entertainment.

The private capital of the association is 150,000 yen, and was promptly over-subscribed. Preparatory operations commenced last March. The first speed competitions will be in November, and the regular events in spring and autumn, with minor monthly occasions; and as far as possible branch associations will be promoted in other leading centres. The Japanese government are said to be expending every year an average of 200,000 yen in the importation of horses from foreign countries for the purpose of improving the home stock, and the tendency seems to be towards increasing effort and expenditure in this direction.

If Canadian thoroughbred horse and good brood mare stock are available, upon receiving the necessary information, such as pedigree, size, &c., I would have much pleasure in submitting the Canadian opportunity to the government department and to the management of the association.

JAPANESE ENTERPRISE.

The South Manchurian Railway is the great trunk line of Manchuria, from Harbin to Port Arthur and Dalny. The greater part of it accrues to Japan as one of the items of the war settlement. The South Manchurian Railway Company has been organized with the approval of the Japanese authorities, the government contributing half of the capital of 200,000,000 yen in the railway, mines, &c., and the company to provide the other half, or cash capital required. The government guarantees interest, stated at six per cent, on the private capital invested, and there is hope expressed of higher dividends as the development of Manchuria proceeds. The outlook of the issue of stock, and of the enterprise are regarded as being quite inviting to capital, both foreign and home.

SIGN OF DEPRESSION.

An incident, and evidence, of trade depression, given by the native press, is to the effect that the goods traffic on all Japanese railways has shown a marked decreasing tendency of late. The government lines carried last month 322,912 tons. About two-thirds of this total were carried on the main line, which shows a falling-off in receipts of 89,898 yen compared with July of last year. The mileage operated shows an increase of sixty for the year.

THE COMMERCIAL TREATY BETWEEN JAPAN AND CANADA.

Referring to this propitious event the *Osaka Shimpō* (*Times*) says:—

‘The Commercial treaty being concluded between Japan and Canada, we recall a part of the speech made by the Hon. Mr. Fisher, Canadian Minister of Agriculture, who visited this country when the Fifth Industrial Exposition was being held. The minister observed that Japan was a land of flowers, but not of fruits; that the beauty of the cherry and the plum blossoms was incomparable, yet it was to be acknowledged that the fruits were not equal in quality to those of Canada. The criticism on that occasion was nothing but a mere representation, but he spoke of a fact, that Canada is prolific of excellent agricultural products of all varieties. All who viewed the Canadian exhibit in the last Osaka exposition might recollect how excellent it was. At the present time our trade with the vast Dominion is still insignificant, the exports and imports amounting to only a few million yen altogether. However, we may mention here that it is not long since our people began to pay their attention to that country; that it was not until after the exhibition that Japan suddenly became attractive from the Canadian point of view, even to the degree of displacing China teas with those of Japan; and with these keenly competing with the Ceylon brands. Now, the treaty having been agreed upon, we have every reason to expect trade will enter upon a prosperous era and that it will have a greatly desired mutual success.’

KOREAN WHEAT.

It was stated by a correspondent of the *Osaka Mainichi* a few days ago, that the wheat harvest in Korea has been very good, with the result of a heavy decline in the market, and that wheat can now be shipped to Japan with a profit. In support of this statement, the same report states that the steamer *Keijo-maru*, which left Chinnampo on the 11th instant, shipped over 2,000 bags of wheat for Osaka. The market price at Chinnampo is about \$2.50 per koku of five bushels. It is recalled that wheat once formed a considerable line of export from Korea to Japan, but since the coming of cheap flour from the United States, and increased production of grain in northern Japan, the grain trade with Korea has within recent years almost entirely ceased.

ALEX. MACLEAN.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. MacNamara.*)

CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., September 15, 1906.

STOCK OF PROVISIONS AT LIVERPOOL.

Estimate of the stock of provisions, &c., in the port of Liverpool, on August 31, 1906, together with the figures at the corresponding date last year, and also of last month:—

		31st Aug., 1906.	31st July, 1906.	31st Aug., 1905.
Bacon	Boxes.	22,355	18,101	18,697
Hams	"	3,816	2,374	6,852
Shoulders	"	4,136	1,846	8,134
Butter	Cwts.	14,888	9,825	10,061
Cheese	Boxes.	58,647	65,649	59,985
Lard (prime steam western)	Tierces.	4,315	5,162	4,935
Lard (imported pure refined lard) in tierces, firkins, or other packages.	Tons.	1,702	2,532	2,214
Lardine and compound	"	113	89	126

BACON.

The British government trade returns recently issued show some variations in quantity, of the imports of bacon for month of August in the years 1905 and 1906 from the three chief exporting countries, and I give the quantities and values as obtained therefrom:—

	1905.	1906.	1905 Value.	1906 Value.
	Cwts.	Cwts.	£	£
Denmark	120,314	125,907	343,269	358,871
United States	154,328	214,634	344,384	568,749
Canada	213,404	168,051	500,316	449,964

The total quantity imported during eight months ending August 31, 1906, is:—

	Cwts.	Value, £.
Denmark	963,462	2,832,626=12 $\frac{3}{4}$ cts. per lb.
United States	1,963,331	4,696,347=10 $\frac{1}{4}$ cts. "
Canada	837,708	2,166,008=11 $\frac{1}{2}$ cts. "

From the best information I can procure from some of the largest retail firms, the following order of preference prevails amongst the public, viz.: Wiltshire, Irish, Danish, Canadian and American. In the south of England smoked bacon is chiefly used, and in Manchester from 60 to 70 per cent plain cured is used. The most popular weight is from 56 to 60 pounds sides, and not too fat. The Canadian exporters are carefully attending to the branding of their shipments, and this is commendable, as from the above figures it commands a higher price than its chief competitor, and it should be so easily identified that substitution would be impossible.

WHOLE SALMON.

The attention of Canadian shippers of whole salmon is drawn to the fact that at the present time and until the end of February, prices rule very high and the fish is very scarce. In order to overcome this scarcity and consequent high prices, a scheme is said to be inaugurated whereby the great centres of Great Britain can be supplied by shipments in a refrigerated condition from Siberia. Two steamers specially built for the frozen meat trade are said to be now loading salmon at a port on the Amur river. Immediately on being caught they will be placed in the ships' holds and kept in a frozen state until delivered. The Amur salmon is stated to be equal in size and quality to the Canadian variety. The exports of salmon from Canada to Great Britain in November, 1905, amounted to 90,853 pounds, valued at \$7,119, or an average price of 8c. per pound. The wholesale price of Scotch and Irish salmon at the present time is about 2s. 3d. per pound. I am confident that if more attention was paid to the English market a very much larger volume of business could be secured.

CHEESE.

I have canvassed the opinion of several large wholesale dealers regarding the condition and quality of Canadian cheese handled by them, and they are unanimous in their praise of this season's shipments. The only feature that mars their serenity is the very high price it commands 61s. to 62s. 6d., which they claim tends to lessen their average profits. One of the largest cheese factors in Cheshire says, that now, and for a series of years, cheese making has paid the producer much better than milk selling, and since the beginning of the present year Cheshire farmers have been realizing 10s. per cwt. more for their cheese than last year. Twenty-five thousand tons are annually made in Cheshire, and in its manufacture 60,000,000 gallons of milk are used. When we consider the large quantity manufactured in this country as well as that shipped from the United States, it speaks volumes in praise of the Canadian products that it appeals to the taste of the public, and commands such a high place in its esteem.

BRITISH TRADE RETURNS.

The imports for August amounted to £48,894,624, an increase of £2,031,633 on August, 1905; while the exports for the month were £33,492,614, which was £3,974,778 more than in the same month last year.

For the first eight months of this year the imports totalled £398,009,524, against £364,692,457, an increase of £33,317,067 on the same period last year. The exports for the same period were £247,529,091, against £213,045,108, an increase of £34,483,984.

P. B. MACNAMARA.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No. 14, BUND, ROOM B, YOKAHAMA, September 6, 1906.

CANADIAN PRICES TOO HIGH.

Discussing the prospective importing and grinding of wheat in Japan, which some say the new tariff is designed to encourage, a director of a milling company says that his company get wheat at present from the United States. He was well informed as to the quality of Canadian wheat and would like to have it, but under present conditions it 'could be imported only at a loss. Not only from the United States, but from Australia, he could get wheat cheaper than from Canada.' And as it is with wheat, so must it be with flour. The trifle of Albert flour that last season offered in this market, however, did show that competition would be practicable. Doubtless the now approaching flour season will make another advance in the same direction.

THE RICE CROP.

The outlook for the rice crop is cheering not only to the Japanese farmer, but to every business interest in the country. According to the native press, a recent estimate made by the Department of Agriculture and Commerce is that the coming crop will exceed that of last year by over 80,000,000 bushels representing a money value of about \$100,000,000. The year 1904, which is said to be a record year, gave a yield of 255,000,000 bushels; but this season's estimated 274,000,000 bushels is regarded without precedent.

MONTHLY RETURN OF FOREIGN TRADE.

The following is a comparative statement of the value of some of the principal items of export and import between Canada and Japan, as shown by the Monthly Return, for the seven months ending July 31, of the present and the previous year:—

EXPORTS TO CANADA.

	1906.	1905.
Silk (raw)....	\$118,050	\$ 24,548
Silk tissues, habutae ..	164,127	135,188
Silk tissues, kaiki (incl. cotton mixture)..	10,343	19,770
Silk handkerchiefs..	49,557	73,013
Cotton tissues....	2,247	2,717
Mats and mattings for floor (Hanagoza).	24,544	45,031
Porcelain and earthen ware..	50,360	51,023
Lacquered ware..	5,949	5,018
Straw-plaits..	1,203	3,336
Rice..	93,702	76,253
Camphor..	6,623	7,373

IMPORTS FROM CANADA.

	1906.	1905.
Flour..	\$46,147	\$35,117

The 'principal items' given in the Monthly Return number only twenty-three of imports and twenty-six of exports. For information respecting the lesser and numerous items making up the aggregate of trade the Annual Return has to be awaited.

\$	\$	\$	\$	\$	\$
15,283,985	126,803,766	161,036,001	15,467,661	103,803,020	83,527,467

AN OPENING FOR BARLEY AND HOPS.

The brewery business is one of those imported industries of which the Japanese are making a conspicuous success. This is daily being made apparent by the cartage; by the return bottles, by the million, being landed from the junks, and by the acknowledged value of brewery company securities. The demand is now coming from Shanghai, Vladivostock, and from Korean and Manchurian points. Increasing capital, in order to expanding facilities 'in view of the inability to supply the ever increasing demand,' is now seriously occupying the attention of the directors of the Japan Beer Brewing Company. This is suggestive of malt and hops, both of which 'raw materials' are mostly imported, and likely to be. As soon as British Columbia and Albert are in a position to export the raw material for the manufacture of beer, they will find a market in the Orient.

A FAIR ADVANTAGE.

The transfer of 'in transit' traffic at the port of Nagasaki, according to the July returns, increased during that month by 65 per cent, compared with the corresponding

month a year ago. This is an incident of changing traffic currents, consequent upon the changed relations between Japanese and Manchurian ports brought about by the war. The Odessa trade, and also American canned meats en route to Vladivostock, and English and German metal wares for Korea and Manchuria, being now transferred at Nagasaki. This may be regarded as an example of Japan's incidental advantages, at the present stage of the 'Far Eastern Question.'

WOOLLEN MANUFACTURE.

There is an increase going on, that is now being described as rapid, in the woollen manufacturing industry. Home consumption demand is credited with a large percentage of that increase; and the northern provinces of China, when the troops are withdrawn and the ports are opened are expected to consume largely. Although it is not conspicuously noticeable, the Japanese are taking to the use of woollen clothing in the winter season at a rate of progression that tells upon the trade when it comes from a movement amongst a large population. The Tokyo Woollen Cloth Factory Company are proposing to increase their capital of \$500,000 to \$1,500,000 upon one plan, or to \$2,500,000 upon another or alternative; one of which schemes involves the building of a factory in the Yanktze Valley, one of the most important industrial and commercial districts of China. This is only one incident of a movement towards extension that is general amongst the woollen manufacturers.

The importation of wool for 1905 was:—

<i>Quantity.</i>	<i>Value</i>
14,092,140 lbs.	\$4,173,783.

This figures out at a fraction under 30 cents per lb. and comes mostly from Australia, British India, China, Germany and Great Britain; the latter being the largest contributor.

ALEX. MACLEAN.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. M. Kittson.*)

RHODES BUILDING, CAPE TOWN, August 29, 1906.

SIX MONTHS TRADE RETURNS.

The figures showing South Africa's trade for the six months ending June 30, 1906, have just been issued and are as follows:—

Total imports £18,237,762, made up as follows: from United Kingdom, £8,920,521: British colonies, £2,037,087; foreign countries, £5,054,987.

The total exports amounted to £20,810,507, as follows: Produce, £4,272,876; diamonds, £4,295,676; gold, £12,147,976; specie, £93,979.

SOUTH AFRICA'S TRADE WITH THE EMPIRE.

It is encouraging to note that approximately four-fifths of the total South African trade for the six months ending June 30, 1906, was between component parts of the empire, as the following table testifies:—

	<i>From.</i>	<i>To.</i>
United Kingdom.	£8,920,521	£19,125,288
British India.	323,391	55
Mauritius.	300,556	659
Canada.	218,648	10
Australia.	1,065,763	1,997
Other.	128,729	868
Total.	£10,957,608	£19,128,877

Foreign countries—

	<i>From.</i>	<i>To.</i>
Belgium.	£ 210,876	£226,549
France.	246,146	28,849
Germany.	1,238,858	502,177
German S. W. Africa.	7,497	284,320
Holland.	162,604	410
Sweden.	139,941	—
U. S. America.	1,583,021	7,497
Argentina.	613,446	184
Brazil.	138,112	—
Other.	614,486	41,517
Total.	£5,054,987	£1,091,593

TENDERS FOR STEAM COAL REQUESTED.

As advised by cable the Cape government railways are calling for tenders for the supply of 130,000 tons of steam coal for use on their various lines, copies of specifications have been forwarded and may be obtained from the Superintendent of Commercial Agencies, Department of Trade and Commerce, Ottawa.

HARDWOOD RAILWAY SLEEPERS WANTED.

The Cape government railways import large quantities of hardwood sleepers and at present require tenders for the supply of a steamer cargo of same to be delivered at East London. Size of sleepers to be seven feet by ten inches by five inches. Quotations to be c.i.f. above port. Statement must be made as to whether the timber offered is hewn or sawn, and the botanical as well as the colloquial name of same.

TRANSVAAL AND NATAL FLOUR DUTY.

Contrary to expectation the Transvaal and Natal have not removed the existing duty on wheat and flour as they desired, the government of the Cape of Good Hope having objected to such removal, and under the conditions of the South African Customs Union Convention the consent of all parties thereto was necessary to any change in the Customs tariff.

OPENING FOR COMPRESSED YEAST.

A good opening exists in South Africa for the sale of compressed yeast both among the bakers and householders, in the past little effort has been made to introduce this article generally. The demand would be principally for a dry compressed yeast for rapid working as South African bakers mostly employ the straight dough system in baking.

WIRE NAILS.

An order for 200 kegs of Canadian wire nails is going forward by this mail, and if Canadian manufacturers would avail themselves of the services of an energetic representative on this market a considerable trade could be done in this article as well as in wire, plain and barbed, and horse and mule shoes, machine made.

STOVES.

Having been requested to look into the possibilities for the sale of Canadian stoves in South Africa I have to report as follows:—

Sweden supplies the bulk of the demand with a very cheap quality of stove made with four to six holes and oven. Great Britain, France and the United States of America share in the trade, but the demand for high grade stoves or ranges is limited. Soft coal is the universal South African fuel. If Canadian manufacturers can supply a stove embodying the above characteristics at \$54 per dozen f.o.b., Montreal, or St. John, N.B., a fair amount of business can be done.

CHAS. M. KITTSON.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. Ball.)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., September 18, 1906.

IRON AND STEEL.

This morning were issued a memorandum and statistical tables showing the production and consumption of iron ore and pig iron, and the production of steel in the United Kingdom and the principal foreign countries in recent years. According to the return the total output of iron ore in the world amounted in 1904 to about 94 million tons, the United States, Germany, the United Kingdom and Spain being the by the principal countries:—

Country.	OUTPUT IN 1903 AND 1904.	
	1903.	1904.
	Tons.	Tons.
United States.	35,619,000	27,644,000
Germany (including Luxemburg).	20,890,000	21,693,000
United Kingdom.	13,716,000	13,774,000
Spain.	8,171,000	7,837,000
France.	6,120,000	6,910,000
Russia.	4,150,000	5,187,000
Sweden.	3,619,000	4,019,000
Austria-Hungary.	3,104,000	3,191,000
Belgium.	181,000	204,000

From the above table it will be seen that the iron ore mined in the United States in 1904 was nearly $7\frac{1}{2}$ millions less than in 1903, whilst the other countries show a slight increase.

The preliminary figures available for 1905 indicate an enormously increased output in the United States, the total being greater by over 16 millions than in 1903. Germany, the United Kingdom and Spain also show considerable increases, and it is probable that the world's output of iron ore for 1905 will be found to reach about 114,000,000 tons.

PRODUCTION OF PIG IRON.

The total quantity of pig iron produced in the world in 1904, probably amounted to about 45 million tons, the principal producers being the United States, Germany, and the United Kingdom. The following statement shows the total output of pig iron by the principal countries:—

Country.	1903.	1904.
	Tons.	Tons.
United States	18,009,000	16,497,000
Germany (including Luxemburg).....	9,857,000	9,896,000
United Kingdom.....	8,935,000	8,694,000
Russia.....	2,405,000	2,930,000
France.....	2,795,000	2,926,000
Austria-Hungary.....	1,364,000	1,354,000
Belgium.....	1,196,000	1,262,000
Sweden.....	499,000	520,000
Spain	375,000	380,000

CONSUMPTION OF PIG IRON.

The consumption of pig iron in the principal countries producing differs but slightly from their production. The following statement will show the total quantity consumed:—

Country.	1903.	1904.
	Tons.	Tons.
United States.....	18,587,000	16,526,000
Germany (including Luxemburg).....	9,601,000	9,819,000
United Kingdom.....	7,999,000	8,007,000
France.....	2,717,000	2,878,000
Russia.....	2,419,000	2,946,000
Belgium.....	1,501,000	1,575,000
Austria-Hungary	1,373,000	1,354,000
Sweden.....	477,000	486,000
Spain	324,000	341,000

The use of steel having increased so markedly during recent years the greater proportion of pig iron is utilized in its manufacture.

PRODUCTION OF STEEL.

The world's production of steel in 1904 may be approximately estimated as 36 million tons. Dealing with the same countries as are quoted above, the following statement will show the quantity of steel produced:—

Country.	1903.	1904.
	Tons.	Tons.
United States.....	14,535,000	13,860,000
Germany (including Luxemburg).....	8,115,000	8,786,000
United Kingdom.....	5,034,000	5,027,000
Russia.....	2,328,000	2,657,000
France.....	1,810,000	2,054,000
Belgium.....	1,277,000	1,502,000
Sweden.....	313,000	328,000
Spain.....	328,000	191,000

From the above figures it will be seen that Germany, in 1904, increased her production over the previous year by 700,000 tons, while the United States shows a decline almost corresponding to Germany's increase. For the two years the United Kingdom remained almost unchanged.

Preliminary figures for 1905 indicate an enormous increase in the production of the United States, about 20 million tons, Germany showing an increase of about 1 million tons, and the United Kingdom nearly three-quarters of a million tons. The combined output in 1905 of Germany, the United States and the United Kingdom may be estimated at a little more than 35½ millions, and the world's probably at 43½ million tons.

MANGANESE ORE.

The total output of manganese ore in the United Kingdom in 1905 amounted to 14,474 tons, compared with 8,756 tons in 1904. Of the 239,000 tons imported in 1905, 88,000 tons were derived from Russia, 68,000 tons from Brazil, and 72,000 from India. There was also imported 286,000 tons of manganiferous iron ore, and 24,000 tons of spiegeleisen and ferro-manganese.

The above figures should be interesting to Canadians partly as showing what other countries are doing, and partly to show what a small proportion of the world's manufacture Canada now produces.

CIDER.

As the season draws on for cider making I would again call the attention of our cider makers to the large export trade which can be done with this country. In my district only one Canadian firm seems to have thoroughly gone into the matter, and with the exception of a few barrels which became ropery, the trade has been a thoroughly satisfactory one, at least so far as the quality of the article and the sale are concerned. Canadian cider has made a good name.

INQUIRIES FOR CIDER.

I have numbers of inquiries for cider and I have from time to time given the names of the people who have written to me desirous of opening up trade. There seems to be a very good opportunity for opening up further business. There must be a large quantity of apples in Canada which would not pay to export, but which are good for cider making.

BRITISH CIDER MAKING.

Certain districts in Great Britain are celebrated for their cider, and are going into the manufacture much more scientifically than heretofore, being much assisted by investigations made by agricultural societies (I made a report on this subject published in the Monthly Report, September, 1905, page 507) but they cannot supply anything like the demand which seems to become greater every year. In talking with cider makers and dealers, I find that Great Britain cannot now supply the demand with their own apples, and though the makers have imported from Canada and other countries apples in bulk, this is not a very satisfactory way for several reasons. The old idea that any apple, whether bruised or partly rotten, was good enough for cider is exploded. A few bad apples will take away both the flavour and keeping qualities, and to have them packed carefully in barrels would make them too dear.

Another thing is that apples grown in Canada contain much more juice, have thinner skins than British, and in the process of manufacture as used here they crush away to a much finer pulp than they are accustomed to, making it much harder to clarify. The Canadian maker having been accustomed to his own class of apples, knows just how it should be done. It stands to reason then, that he should make use of his own opportunities and go to the dealer here. What would be a wholesale liquor dealer in Canada is the man who sells here. He buys in bulk, and bottles on his own premises.

CARRYING QUALITIES.

Of course, it is to be understood that the Canadian shipper must make his inquiries as to the carrying qualities of his goods, and the strength of his packages, as packages have been known to explode on board ship. A shipment is apt to get rather rough handling.

T. B. BALL.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(Mr. E. D. Arnaud.)

GAZETTE BUILDINGS, ST. JOHN'S, September 27, 1906.

PORTLAND CEMENT.

A number of new buildings are at present under construction, here in which cement concrete is being extensively, if not entirely, employed for foundations and walls, and from information on the subject that I have been able to obtain it appears to be likely that the use of cement for building purposes will be increased in future years. It would, therefore, seem an appropriate time for the makers of cement in Canada to ascertain whether they cannot secure a larger share of this trade than they have hitherto done in the colony, and for their information I am able to give the following figures from the Customs returns for the year ended June 30 last, relative to the importations of cement from different sources:—

From United Kingdom..	\$ 1,440
“ Dominion of Canada..	1,953
“ Belgium	4,835
“ United States..	122
“ Germany	1,705
Total..	\$10,055

White's English cement is said to be the best imported, but 75 per cent of that used is of German or Belgian manufacture. The average importation is probably about 20,000 barrels. A Portland cement is called for in this market not a Puzzolan which is a manufacture from refuse slag.

PRICES AND BRANDS OF CEMENT IMPORTED.

White's London cement, \$2.30 to \$2.60 per barrel (present price.)

Samson brand (German), \$2 to \$2.50 per barrel.

Eagle brand (German), \$2 to \$2.50 per barrel.

Hammer brand (German), \$2 to \$2.50 per barrel.

These last three brands are practically the same cement under different names. Although the market here is at present quite limited, it might very well be worth some attention on the part of Canadian manufacturers of Portland cement, in view of the probability that a more extensive use of concrete as a building material will result in future years when it would be desirable that Canadian brands should be better known here, and be in demand. The duty is 25 per cent ad valorem on all cement.

E. A. ARNAUD.

NOTE—'Special' means in the case of Imports; 'Imports for Home Consumption,' in case of Exports, Exports of Domestic Produce and Manufacture. α The figures for Mexico include coin and bullion.

COMMERCIAL AGENCIES

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, etc., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(Mr. C. M. Kittson.)

RHODES BUILDING, CAPE TOWN,

P. O. Box 668.

The following cable has been received from the Canadian Commercial Agent at Cape Town, under date of October 4:—

‘Tenders are invited for supplying Cape railways 69,000 superficial feet strictly clear pine boards, tenders must be sent in by November 15. Have sent full details by letter.’

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(Mr. J. B. Jackson.)

NORTH BRITISH AND MERCANTILE BUILDINGS,

EAST PARADE, LEEDS, ENG., September 20, 1906.

HAY.

At a meeting of the Yorkshire Union of Agricultural Clubs, held at York, July 19, 1906, the following remarks were made:—

‘Major J. W. Dent said, he had had the experience of eighteen years’ service in the army, and had had dealings with contractors in supplying meat to the men and forage to the horses. Things might be different now from what they were when he left the army, but at that time, at contract prices and at prices which the tax-payer would pay, there was far superior quality in the foreign article than in the home-grown. The best foreign killed or chilled meat was to be got at the same price paid for old cow and old bull served out when home-grown. There was also to be got in Russian oats, good, clean, hard, sweet corn, when only soft, dirty, indifferent corn was supplied by the home producer.

‘The whole question was one of getting the best for the soldier and his horse at the prices which the tax-payer was prepared to pay, and he repeated that during the time he was in the army they could get better foreign stuff at the price than they could home-grown. He was anxious to see his men and horses fed on the best food the tax-payers would pay for, and unless the tax-payers would pay the higher prices for the home-grown food, then he preferred to feed his men and horses on good foreign food to inferior home-grown. “I know,” said Major Dent, “the difference in the condition of my horses in 1891, when I came from Ireland to Aldershot, and got off the Irish hay and the Irish corn on to the Russian oats and Canadian hay, was most marked and greatly improved.” He believed, however, that there was a great deal of “home killed” palmed off as “home fed,” which was a totally different thing. You can detect the difference in chilled meat, but he defied any one to detect “Birkenhead killed” by its appearance on the table from meat killed in York. If they insisted on

home-fed in their contracts he was not at all certain that the farmer would get any better prices, but he was perfectly certain that the army horses and men would get worse stuff to consume because the tax-payer would not pay more than he is now doing.'

'Major Stapylton said he had seen English hay come into the depot at Canterbury and have to be sent out by the cartload, as it was absolutely unfit for horses, but when you got Canadian hay the horses did well. He was not surprised, in view of the amount of swindling which went on in forage, that the government went elsewhere and got good foreign supplies for their horses. All the horses did better at Canterbury on foreign than on English hay. They could come nearer home; when they were out with the Yeomanry, he knew very well they had had to reject hay because it did not come up to the standard.'

In conversation with a leading hay importer who made inquiries through several mediums for Canadian hay, he tells me that it is not the quality of the hay itself which impedes Canada's annual export of this product, but the fault lies in the business methods of the Canadian exporters.

'I have received numerous letters,' he remarks, 'offering me Canadian Timothy and Clover hay, and nearly in every case I am asked what I am willing to give for it, without the offerer suggesting any terms whatever; without this information I cannot proceed further, and generally allow the matter to drop, buying foreign hay instead. Canadians cannot expect us to make the offer—we are the buyers and they are the sellers, and the sooner they get into the system of making specific offers for their hay, the bigger the export trade in this commodity will become.'

Several hundred tons of Canadian hay have arrived at Hull during the last few weeks, and more is expected. The hay market is fluctuating very rapidly at present, and I am informed on good authority that Canadian hay would be particularly welcome by Yorkshire importers at the present time.

FROZEN FISH.

Not only is there a large demand in this district for the canned salmon from British Columbia, but there is also a growing trade in frozen salmon from British Columbia, which has been arriving in England in excellent condition, and is quite as good as the best Scotch salmon, which readily brings 60 cents per pound.

The development of this trade in frozen salmon has been so gratifying that competitors are now in the field, and two British steamers of large refrigerating capacity are being employed. These vessels were specially built for the Argentine frozen meat trade, but they are now in Nicolaivsk, a port at the entrance of the Amur river in Siberia, where the fish, on immediately being caught, will be placed in the ships' holds, and kept in a frozen state until the cargo is completed.

The Siberian salmon from the Amur is stated to be equal in size and quality to the British Columbia variety. The fish are to be brought to England whole, and if the venture realizes expectations, the number of steamers engaged will be increased.

JNO. B. JACKSON.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(Mr. J. S. Larke.)

THE EXCHANGE, SYDNEY, AUSTRALIA, September 4, 1906.

PATTERNS AND STYLES.

I have alluded to the effect of patterns and styles upon imports in past reports, but it is entitled to more consideration. Statistics of Australian trade as published are imperfect as to the origin of the goods, and any deductions therefore made from them cannot be absolutely correct, but it may be taken that the statistics of to-day are no worse than they were ten years ago, and for the future are likely to be much better. For the purpose of comparison, the statistics as furnished of last year's trade under the 'country of origin' cannot be used, as similar statistics are not available for past years.

AUSTRALIAN TRADE FACTS WORTH CONSIDERATION.

Taking them as originally published, they furnish some facts worth considering. Up to 1901 the imports from foreign countries as against those from the United Kingdom and British possessions seemed to grow with some degree of rapidity. The imports for 1904 from these countries were three times those of 1894, though the total imports had only increased by 33 per cent. Latterly the increase from foreign countries has been relatively small: thus, the increase in imports of 1905 over those of 1899 was £4,017,044, of which increase £1,843,804 went to Great Britain, £1,394,094 to British colonies, and only £824,146 to foreign countries. In these years the trade from the principal manufacturing nations—Belgium, France, Germany and the United States—shared these increases, but as compared with last year the position is altered. The imports of 1905 exceeded those of 1904 by £1,325,889. Of this trade the United Kingdom has an increase of £612,863 and other British possessions £859,432, while the imports from the foreign manufacturing nations fell off by £35,565, the imports from these countries being as follows:—

	1904.	1905.
Belgium...	£ 643,974	£ 551,984
France...	336,741	510,950
Germany...	2,655,585	2,643,414
United States...	4,591,945	4,486,602

This reversal of the imports from the United Kingdom and from foreign countries, and the comparative slow growth of the imports from these foreign manufacturing nations, are not an accident. In part it is no doubt due to the greater ability of the United Kingdom to deliver orders after the conclusion of the South African war, but on the other hand, foreign nations have had advantages in shipping facilities, there having been increased fleets from Germany and the United States which, for a considerable time, carried goods from these countries to Australia at a lower rate than they were carried from the United Kingdom, and certainly both Germany and the United States have pushed their interests with great energy.

The explanation is largely due to the fact that British manufactures have, as a whole, given greater satisfaction, after experience, than the goods made elsewhere. The pushful salesman has succeeded in getting in goods from these countries for a time, but they have not stood the test of experience as British goods have. The Australian likes novelties as much as any other people, but he will not sacrifice utility to them.

COMPARISON OF UNITED STATES AND UNITED KINGDOM IMPORTS.

The figures of lines of imports which in Canada it is supposed the United States has almost a monopoly of, is an interesting study. Taking the years 1902 and 1905, which, with the exception of the general improvement of trade, were normal years, the following statement of imports from the United States and United Kingdom is worth consideration :—

	United States.		United Kingdom.	
	1902.	1905.	1902.	1905.
Arms and ammunition.....	87,310	86,508	484,404	567,693
Blacking and dressing.....	1,990	1,107	26,447	41,495
Boots and shoes.....	121,770	47,194	226,266	193,321
Electrical materials.....	55,211	18,844	133,500	141,484
Pianos.....	11,320	6,574	12,176	18,061
Engines and machinery.....	472,309	500,410	925,178	1,054,541
Paper.....	221,430	203,176	216,835	236,055
Plated ware.....	15,548	17,381	144,075	129,099
Tools of trade.....	146,613	123,572	124,620	141,940
Watches.....	(1903) 11,558	7,671	(1903) 74,224	78,785
Motors.....	(1903) 7,346	13,110	(1903) 14,622	64,016
Bicycles.....	(1902) 39,043	18,119	(1902) 111,821	112,294

BOOTS AND SHOES.

Some of these lines are noteworthy. In the case of boots and shoes, United States manufacturers have for many years made strenuous efforts to take possession of this market, and up to a few years ago it would seem as if they would succeed. British makers were steadily losing their trade to the United States, but it will be seen that while the trade of both countries has been affected by the Commonwealth duties, the United States has suffered the most. In 1902 the makers of the United Kingdom sent less than double the quantity from the United States, but in 1905 their trade was four times greater. The manufacturers of the United States followed French lines and boasted of the neatness of their goods. The Australian wants his goods neat, but he insists that boots are to walk in and that they must be comfortable and wear well.

BICYCLES.

The figures for bicycles are quite as striking in this connection. As it was with boots and shoes, so it was with bicycles. Light machines came in which threatened to drive out the heavier construction of the United Kingdom. While the total trade has considerably fallen off in the last three years, the loss has been entirely to foreign manufacturers, British makers doing a little more business in 1905 than in 1904. Users have preferred the machine that will stand the test.

MOTORS.

The figures respecting motors are still more striking. France has yet the largest share of the trade, but it will be seen that the imports from the United Kingdom have increased in the two years by £50,000, while those from the United States have not increased by £6,000, and more money has been spent in advertising the motors from the United States than those from the United Kingdom.

CHANGES IN AUSTRALIAN IMPORTS.

An analysis of some minor details will show the change that has taken place in the last three years. In 1903, out of a total import of £79,398 in value of cream

separators, the United Kingdom supplied £25,498. Last year the total imports were £121,500, of which the United Kingdom secured £70,973. The manufacture of sewing machines for export is presumed to be largely monopolised by the United States. The following are the figures for 1903 and 1905:—

	1903.	1905.
Total imports..	£138,144	£117,493
United Kingdom..	8,600	42,865
Germany..	43,697	22,887
United States..	84,923	50,394
Again with typewriters:—		
Total trade..	41,920	40,489
United Kingdom..	8,789	9,389
Germany..	815	267
United States..	32,150	29,104

OTHER DESIGNS NOTED.

I have, in a previous report, shown the effect upon paper-hangings, where the United States has followed the widths and designs of French makers, and their trade to-day is but two-thirds of what it was in 1903, and it never was of any amount. The efforts to introduce United States plated-ware has not been very much more successful than the effort to introduce paper-hangings, and neither the United States nor any foreign country has made a very large inroad upon the plated-ware from Great Britain, because Australians like its plain solidity, which not only wears, but is easily kept clean as compared with the floral designs of goods made in Europe and in the United States.

AUSTRALIANS REQUIRE SUBSTANTIAL GOODS.

One cannot draw too strong conclusions from an examination of imperfect returns, but as a whole they undoubtedly show that the Australian prefers goods that will wear to goods that are showy. He likes to have them attractive, but use must not be sacrificed to attraction. The practical effect of this upon Canadian trade is that so large a percentage of our manufactures are based upon the United States system. The greatest success of Canadian trade has been in agricultural implements and machinery, and some part of which is due to the fact that they have an average strength beyond those made in the United States. Goods of superior quality but not so showy as inferior goods take a longer time and are more expensive to introduce, but when once introduced they retain the trade, and in this way more than compensate for the disadvantages in their introduction. In Australia, Canadian goods would be given preference over those made in a foreign country, largely through the belief that they are made upon British lines. A combination of the ingenious novelties which emanate from the United States with added strength, and such a finish in the working parts that they will run as smoothly as British machines do, would find great acceptance.

NEW ZEALAND TRADE.

The imports and exports of New Zealand for the years ending June 30, 1905 and 1906 were as follows:—

	1905.	1906.
Imports..	£12,691,919	£13,869,042
Exports..	15,380,403	17,706,689

The principal increase in exports was in wool, which showed an advance of over a million sterling. Meats show some advance, though the price of meat has fallen a penny per pound within twelve months. Butter shows considerable advance. Cheese was increased from £180,215 to £300,056. It is probable from this statement of trade that the imports for this year will show a very considerable increase over those of last year. The imports for the June quarter show an advance of nearly £400,000 over those of the June quarter of 1905.

NEW ZEALAND AND AUSTRALIAN PREFERENTIAL TARIFF.

The Australian government brought down to the House on Friday evening last the agreement entered into between the Premier and the late Right Hon. R. J. Seddon, Premier of New Zealand, for improved trade relationship between the two countries. The proposal advances the duty against the products of foreign countries, allowing the imports from each to remain very much as they were before. Butter and cheese from Canada under this agreement would be increased from 3d. to 4d. per pound; oats, barley, beans, peas and wheat from 1s. 6d. per cental to 2s.; flour into Australia would remain as before; hops would pay 1s. instead of 6d.; malt, 7s. per cental instead of 6s.; onions and potatoes from 1s. to 1s. 6d.; Oregon undressed would advance from 6d. to 1s. 6d.

Canadian trade for the moment would not be adversely affected to any considerable extent, though it will at once militate against the imports of onions and potatoes, which this country now requires.

PREFERENCE TO GREAT BRITAIN.

There was introduced at the same time a proposition to increase the existing duties on a number of lines of manufactured goods, but to allow those coming directly from the United Kingdom in British ships to remain as now. Canadian goods affected would be:—

Ammunition, now free, proposed duty.	10%
Woodenware, advanced from.	20% to 30%
Bicycles, tricycles and similar vehicles, from.	20% to 30%
Boots and shoes, from.	30% to 40%
Boots and shoes (india rubber), from.	25% to 30%
Watches and clocks, from.	20% to 30%
Furniture, from.	20% to 30%
Engines, gas, oil and high speed, from.	12½% to 22½%
Paints and colours, from.	2s. to 2s.6d. per cwt.
Paper, strawboard, from.	1s. to 1s.6d.
Paper, bags, from.	5s. to 6s.
Paperhangings, from.	15% to 25%
Pickles and sauces (pints), from 6d. to 7½d. doz. (larger sizes in proportion).	
Platedware and plated cutlery, from.	20% to 30%

FROZEN PORK.

In my report of March 19, I gave a statement of an experimental shipment of frozen pork from Queensland to Glasgow. A later shipment to London arrived in excellent order, and the agents reported sales at 5½d. per pound in cool stores, and stated that they will want 1,000 pigs per month from June to September at 50 to 80 pounds weight for porkers and 120 to 150 pounds weight for baconers. A shipment from New South Wales which arrived on July 14 were also well reported upon, but met a depressed market, the price offered being 4½d. per pound, which was not taken.

CHANGE OF DUTY ON SPIRITS.

In my last report I advised that the government had increased the duty on whisky from 14s. to 15s. per gallon. Since that report went forward the government has rescinded this order, and the duty stands as before. It is probable that after February next no imported spirits will be delivered from the Comptroller of Customs for consumption unless matured by two years' storage in wood. Exporters of Canadian whisky should, therefore, secure a certificate from the Excise Department of the government of Canada respecting the age of their liquors, and perhaps arrangements can be made with the Australian government to accept such certificates.

SALE OF HORSES.

An exhibition and sale of horses was held in Sydney last month, which it is hoped will be annual. The prices realized would not, apparently, support any suggestion of sending thoroughbred horses to Australia, the highest prices obtained being: for blood stallions, 150 guineas; trotting, 165 guineas; draught, 185 guineas; for a colt three years old, 120 guineas; for one colt two years old, and a third at 120 guineas, and others at less amounts. It should be noted that the horses sold were neither of a high character nor well got up. I still think that experiments in the shipping of first-class stock to this country is warranted, though the early shipments might not be profitable until the value of the animals had been attested by experience.

FRUIT FLY IN QUEENSLAND.

A letter from Canada informs me that some Canadian newspapers have published a paragraph in which it is stated that I have advised that the Queensland fruit fly might become a pest in Canada. I cannot find that I have written anything that would bear such a construction. The only reference that I have made to the fly is in sending a copy of an order in council of the government of New Zealand, prohibiting the importation of vegetables or fruit affected by a number of pests and diseases, in which the Queensland fruit fly is named. As a matter of fact, the Queensland fruit fly, though popularly attributed the author of the damage to fruit in New South Wales, is not so, the real enemy of the orchardists being the Mediterranean fruit fly, imported from Italy. The Queensland fruit fly is almost unknown in southern Australia. It is not likely, therefore, that it could flourish in the climate of Canada.

SHEEP CENSUS OF THE WORLD.

The Victorian government statist has issued the following table giving the number of sheep in the principal sheep-breeding countries of the world. It is:—

Countries.	1887.	1903.
United Kingdom.	28,900,000	30,000,000
Other European countries.	168,800,000	141,000,000
Total for Europe.	197,700,000	171,000,000
United States.	43,500,000	52,000,000
Australian States and New Zealand.	96,600,000	76,000,000
Cape Colony.	13,100,000	11,500,000
Canada.	2,000,000	2,500,000
Argentine Republic.	70,450,000	80,500,000
Uruguay.	10,550,000	14,500,000
Total for other principal countries.	236,800,000	237,000,000
Grand totals.	434,500,000	408,000,000

Since 1903 the sheep of New Zealand and Australia have increased to 93,000,000. It is probable, therefore, that the number of sheep in the world is about the same now as eighteen years ago. The population of the principal wool using and mutton eating countries has, in these eighteen years, increased by about $12\frac{1}{2}$ per cent. These figures will explain the wool situation of to-day and its probable future, and may be specially interesting in view of requests that I have had for the number of sheep in Australia, and the publication of figures in some Canadian newspapers upon the authority of a United States journal. This statement, in discussing the mutton and wool situation, left out of consideration the sheep of Australia and must, therefore, be erroneous.

ICE SKATES.

Ever since ice-skating rinks were established in Adelaide and Melbourne, efforts have been made to organize a company for the construction of such a rink in Sydney, but these efforts for a long time were unsuccessful. A company has now been floated, which will probably carry out the scheme. There is a possibility, therefore, for the sale of a number of ice skates in this city. Canadian interests have been looked after in this matter.

J. S. LARKE.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(*Mr. W. A. MacKinnon.*)

BRISTOL, ENG., September 29, 1906.

HAY.

If present conditions continue there should be an excellent market for good qualities of Canadian hay in Great Britain during the coming winter. The situation may be summed up in a few words: a dry summer has produced burnt pastures, with the result that cattle are being fed hay thus early in the season. The effect of this can also be seen at a glance: the price of hay a year ago ranged from 40s. to 45s. per ton at the farms, while the ruling price to-day is 70s.

CANADIAN HAY PREFERRED.

Farmers would like to hold their stocks in anticipation of a rise, but only those who are exceptionally well placed are able to do this, the demand for feed forcing their hands. Canadian hay is much preferred to Dutch, supplies of which are coming forward. I am credibly informed that before the end of the winter prices will be considerably higher, and that Canadian shippers, if landing their product in good condition, will have no trouble in securing a highly favourable position in the market.

BUTTER ADULTERATION.

The report of the Select Committee of the Commissioners on the butter trade, issued recently, recommends that premises where butter is being re-worked, blended or treated should be registered as factories, and placed under inspection, that nothing should be sold under the name of butter which contains more than 16 per cent of moisture, and that adulteration be expressly prohibited. It is further recommended that premises where margarine is re-worked should be registered as margarine factories.

COMPLAINTS AGAINST CANADIAN BUTTER BOXES.

I regret being obliged to record objections made to the manner in which some Canadian butter boxes are turned out. Some of these which arrive here are criticised as being very rough and badly made; in many cases the covers project beyond the boxes, so that in handling they are very apt to be broken or torn off. Other lots have arrived in a very dirty condition; the canvas covers which were originally white being described by one gentleman in the trade here as 'filthy.' It must be evident to all that in comparison with the neat and attractive New Zealand packages our own suffer considerably, even if the faulty boxes form a slight percentage of each cargo.

REPORTING COMPLAINTS.

It has been charged that Canadian commercial agents are if anything too ready to report complaints against Canadian goods or methods. Doubtless such complaints do not make pleasant reading in Canada, but does any one imagine that they are pleasant writing for the commercial agents? I can assure all concerned that it would be most delightful to chronicle nothing but the successes of various Canadian products, and the advances which have been made towards the capture of British markets. Unfortunately such reports would not tell the whole story, and while the commercial community is justly entitled to pride itself on the progress it is making in many directions, yet it is necessary, if this advance is to be maintained, that such errors as are discovered here and there should be made known officially and at once. If such faults are promptly corrected they will never more be heard of in the weekly reports.

SHIPPING STATISTICS.

The 'Annual Statement of the Navigation and Shipping of the United Kingdom for the year 1905' has just been issued in the form of a blue book. The figures for the tonnage of vessels entered and cleared at the ports of the United Kingdom during the last three years are as follows:—

	FOREIGN TRADE.		COASTING TRADE.	
	Entered.	Cleared.	Entered.	Cleared.
1903.....	52,244,509	52,528,649	57,905,442	56,467,939
1904.....	53,587,035	54,064,418	59,782,799	58,099,343
1905.....	55,623,974	58,416,760	60,066,919	58,670,971

SOUTH WALES PORTS.

In the foreign trade, the following are the numbers and net tonnage of vessels entered and cleared with cargoes and ballast from and to foreign countries and British possessions in 1905 at the principal ports of South Wales:—

	ENTERED.		CLEARED.	
	Vessels.	Tons.	Vessels.	Tons.
Cardiff.....	3,521	4,337,720	5,810	7,476,879
Newport.....	1,284	1,250,192	1,546	1,773,161
Swansea (including Pt. Talbot).....	1,507	979,691	2,786	1,855,093

British vessels make up about five-eighths of the above tonnage.

W. A. MACKINNON.

GREAT BRITAIN.

REPORT OF THE CANADIAN HIGH COMMISSIONER.

(The Rt. Hon. Lord Strathcona, G.C.M.G., &c.)

17 VICTORIA STREET,

LONDON, S.W., March 31, 1906.

The Right Honourable
The Minister of Trade and Commerce,
Ottawa.

SIR,—I have the honour to transmit herewith a report on the commercial relations between Canada and the United Kingdom, for the period which has elapsed since my last report down to date.

TRADE INQUIRIES.

The practice which was originated in this department some years ago of making public, through the British and Canadian daily newspapers and trade journals, brief particulars of such trade inquiries as are dealt with has been continued, and the publicity which these items also receive through the medium of the weekly and monthly reports of your department leads to excellent results, and has been fruitful in effecting useful introductions between Canadian exporters and traders on this side.

It may be stated that all inquiries concerning Canadian trade are promptly answered, and the publication of the particulars referred to above is supplementary, as it is found most useful to give the widest publicity to many of the commercial inquiries received in this department.

Much work is entailed in dealing with the commercial inquiries, both verbal and written, that are constantly received here, and which cover a wide and useful range. Numbers of commercial houses contemplating doing business with the Dominion apply to my office for official statistics bearing on the import and export trade of the country, for information concerning the customs tariff, for names of importers and exporters in different parts of Canada, and for other information to enable them to make satisfactory business arrangements. Others, already doing business with Canada, apply for information which will enable them to extend their connections and increase their trade, and the number of inquiries received from firms and individuals in Canada seeking openings in British and European markets is also very large.

The records in this department of Canadian manufacturers and exporters are supplemented from time to time by lists obtained from Canada, and through the correspondence I enjoy with traders in the Dominion. Care is taken to keep the supply of business directories and other works of reference as up-to-date as possible. The various trade journals and class periodicals published in Canada are received regularly, as well as all the leading newspapers, and care is taken to keep our intelligence service abreast of the times.

Files are kept for reference dealing with various lines of commercial intercourse, and showing the progress made in them from time to time. No opportunity is ever lost of drawing attention to openings that exist for the development of Canadian commercial interests in any direction, and materials are collected for special reports when occasion demands in order that the attention of those likely to be concerned may be attracted.

The fact that the office is so well known is an important factor in this respect, and British and foreign business men always accord the fullest advice and assistance when appealed to by this department.

A full supply of bluebooks containing statistics relating to Canadian trade is kept and distributed with discretion. Anything that appears of a useful character, either official or otherwise, is promptly obtained for the use of the office.

The reading rooms are available for those who call to consult newspapers, trade journals, directories, &c., and there is an excellent reference library of Canadian books which is much patronized. The library contains a wealth of varied information, including geological reports, historical works, Dominion and provincial statutes, and other more general publications of an exceedingly useful character. A supply of maps, charts, &c., &c., dealing with all the provinces of the Dominion, is also available, and is much consulted by persons interested in Canada and Canadian enterprises.

From time to time I have occasion to communicate with the press, both London and provincial, and am invariably successful in obtaining full publicity on any special matters that may arise. I also keep the press well supplied with periodical reports that are issued by the Dominion and provincial governments.

The chambers of commerce and public libraries throughout the kingdom, the British consulates on the continent, and other suitable institutions are also carefully furnished with such data regarding Canada as will enable them to keep themselves informed, and in a position to reply direct to inquirers on Canadian trade matters.

I endeavour to keep our sources of information as up-to-date as possible, and am always glad of any assistance your department can render in this respect.

I frequently receive testimony to the value of the services rendered to business houses in enabling them to establish communication with other firms, and quote below a letter of the kind which reached me some few months ago:—

‘Some time since I wrote asking you to kindly refer me to British manufacturers of manilla rope, with a view to opening up correspondence with them regarding a Canadian agency, and I now wish to tender you my very best thanks for the promptness with which you replied, and also to inform you that in consequence of your recommendation we have formed an excellent connection in this country in the line named.

‘I may also add that before applying to you I had exhausted every means at my command in Canada to discover such people as you so promptly referred us to.’

CUSTOMS REGULATIONS.

In consequence of the legislation passed, considerable changes were made in the regulations governing the entry of goods into Canada. At any time such changes, even though only of a minor character, cause a certain amount of inconvenience to the mercantile community; and owing to the important alteration necessitated by the circumstances alluded to, a large amount of work has been entailed to make known the new conditions to those concerned. I was, however, successful in securing the widest publicity for the regulations in the press, and by all other possible means, and incidentally, of course, this was the means of keeping the question of Canadian trade to the fore. The matter was also widely discussed by the various chambers of commerce throughout the kingdom, which has again served a more or less useful purpose in the same way, as their proceedings are usually reported to the local press. Several of the more important chambers of commerce took the matter up with the Department of Customs, through me, and as the result the minister prepared a very valuable minute dealing exhaustively with all the points that had been raised. This minute was printed and distributed among all the chambers, as well as to most of the large firms who had communicated directly with me upon the subject.

GRAIN INSPECTION.

Nothing has been heard for some time past in the way of complaints as to grain inspection, and I have had the gratification of receiving satisfactory assurances in regard to grading from some of the largest importers.

FLOUR.

The returns show a considerable falling off in the imports of flour from Canada during the past two years, the figures for 1905 being £1,330,100, as compared with £2,637,617 in 1903.

A large firm in the flour trade have informed me that what is at present to a large extent obstructing the export of flour from Canada to the United Kingdom is the fact that there are too few mills there, and those do not follow the policy pursued by the first-class American and Hungarian mills, which is to give their agency to one firm who gradually build up a business for one brand, and thus insure a continuous trade. They point out that at present the mills in the Dominion sell their product to any one, and that consequently it never becomes the special interest of any particular firm to push a special brand of flour, or to help make a reputation for it.

BARLEY.

One of the largest brewing houses have during the last two years inspected different lots of Canadian barley, which did not, however, appear suitable for their purposes, and other samples which they have quite recently obtained from two of the leading shippers do not show any improvement in quality. They suggest that for seed purposes the Canadian grower would find Austrian and South Hungarian barley the most suitable for the English brewers' requirements.

BACON AND HAMS.

The trade in bacon and hams continues to expand, and there was a gratifying increase during the twelve months ending December 31 last, the value of the importations being £1,191,390, as compared with £829,883 in 1904. It has been pointed out by those who should be in a position to know that it would be advisable if very young hogs were not marketed, unless for some very special reason. The product makes light and somewhat inferior bacon, and as such has to be sold at a heavy discount. This is borne out to some extent by what was experienced some time ago in regard to Danish bacon. A disease developed in Denmark which affected the young pigs, and prevented them from maturing. The small pigs were first exported as pork, but owing to difficulties arising and the question of their suitability for food being raised, many of them, although unsuitable, were turned into bacon. A depression in prices ensued, which also affected the Canadian product. My attention was drawn to a circular issued by a Danish concern trading here, which while minimising the amount of disease in Denmark, claimed that the English public have given the preference to Danish bacon to such an extent that the Canadian article has to be offered at from 8s. to 10s. under the price of Danish. This is denied by most of the large importers dealing in Canadian bacon.

I have been favoured with a few remarks on the Canadian export trade in bacon by a prominent produce house which include information of such general interest that I quote them:—

'The popularity of Canadian bacon and hams has been steadily growing in the United Kingdom, though owing to certain conditions existing in respect of the price of live hogs the trade has not shown the expansion during 1904 which might have been expected. In the opinion of my directors, the position of the hog packing is at the present somewhat critical. It is a matter of common knowledge that for the last eighteen months the price of hogs in Canada has been out of all reasonable proportion as regards the price of the finished product in the United Kingdom. This condition of affairs appears to have arisen in Canada probably from the fact that the number of packing houses which have been established in Canada is now largely in excess of the supply of hogs in that country. Competition amongst the Canadian packers of a more or less reckless character in the buying of hogs has led to an artificial price being paid for the live hog, so that constant and serious losses have been incurred by the Canadian

packers. There appears to be no immediate probability of any relief from this position till the raising of hogs in Canada assumes larger proportions or till the Canadian packers realize the impossibility and hopelessness of competing successfully against cheap European hogs with relatively dear raw material. If the present state of matters goes on, what promises to be a healthy and growing industry for Canada will be seriously crippled and probably be set back for some years. If the Canadian packers would combine in a friendly way, arranging to pay only such prices for hogs as would insure them a reasonable probability of making a profit on their product in the United Kingdom, the industry would once again assume a healthy state of affairs. The quality of Canadian bacon has continued to improve, and the British taste is undoubtedly steadily growing in the direction of Canadian produce; but what is not realized in Canada is that, however fine their bacon may be, it cannot still be considered as choice an article as is shipped from Denmark, and that without there is an advantage in the price of the large hog as compared with the Danish and Irish hog, the Canadian cannot prosper. The conditions under which the Danish hog is raised are totally different to the conditions existing in Canada, and though the Canadian hog is an infinitely superior hog for English bacon purposes to the United States hog, yet on the other hand, the Danish and Irish hog is again superior to the Canadian, and this state of affairs is not likely to be changed in the immediate future. The present state of affairs by which packing house after packing house is being built in Canada, in the face of the fact that there is not a supply of the raw material to give such undertakings a reasonable chance of success, is bound to end in disaster sooner or later.'

The packages now used by most of the shippers in Canada are spoken of as being superior to those coming from other quarters, as they keep the bacon in better condition than when it is shipped in bales, and permit of other cargo being stowed with it.

CHEESE.

Canada stands first among the countries from which cheese is imported into Great Britain, sending nearly eighty per cent of what is received. It is highly necessary that care should be taken by those interested to retain this lead by doing everything possible to meet the requirements of importers.

Complaints regarding the boxing of cheese are not nearly so numerous as formerly, in fact little was heard on the point during the past season, breakages amounted to under ten per cent as compared with twenty-five per cent three years ago. This improved state of things is undoubtedly to be attributed to the better methods of handling the produce now employed.

In connection with the question of broken cheese boxes, the result of rough handling during transit, the report to the effect that one of the steamship companies engaged in the Canadian trade have adopted an improved device for loading is of much interest. The machine, while considerably increasing the number of boxes that can be loaded per hour, does its work so gently that none are broken. It is a long square tube, inside of which travels a carriage into which the packages are loaded, and which carriage descends rapidly by its own gravity to the lower end of the chute, where an opening allows the boxes to be discharged into the hands of stevedores and stowed away, while the carriage, relieved of the load, returns to the top of the chute ready for another. Other steamship companies are considering its introduction.

Weights should be marked clearly (by stencil if possible) on the outsides of the boxes, in order to obviate disputes which frequently occur as the result of the weight being indistinctly marked in pencil. In regard to weights, it may also be recommended that these should be more uniform in character, and certainly not too heavy, in view of the difficulty experienced in handling bulky packages during transit. An important firm in this trade writes me as follows:—

'There has been a very perceptible improvement in the condition of the cheese arriving here, owing to its having been carried in cool storage on the vessels, not frozen, but merely cooled to a suitable temperature. We have also found a great advantage

from cooling the ch  ese which is in our own store in Montreal, before putting it on the steamers.

'One of the disadvantages with which we have had to contend in this country, during the summer months, has been the effect of the heat on the cheese, after they have been taken away from the ship, and we are now making arrangements here to provide storage, the temperature of which will not be higher than 40 to 50 degrees in the summer.'

BUTTER.

The importations of butter into the United Kingdom during 1905 were valued at £4,147,864, and Canada's share of this trade amounted to £292,117, a steady advance over the two preceding years. There is plenty of opportunity for a much greater business so long as quality is maintained.

PRESERVED FRUITS.

Comparing the shipments of similar products in glass with those received from the United States, an importer writes as follows:—

'We find that the American packed goods are always of the very highest class, and are packed with great care and attention in shapely jars with small labels, which helps very much the sale of the goods. Those we have had from Canada of a similar nature have been as a rule poorly packed and in ugly packages. Could we get goods from Canada equal in all points to what we import from the States, not only would we give them the preference, but also our customers. The goods themselves we think are quite as good, but it is the manner of doing up the packages, cases, &c., which militates largely against Canadian goods.'

EGGS.

The importation of eggs from Canada has decreased very considerably, and presumably the home demand is such that there is no room for a larger export trade. Indeed it has been seriously stated that, unless production is greatly stimulated, Canada may in a few years be called upon to import eggs, or at any rate will have no surplus for export. The value of the importation under this heading during the past twelve months was £260,140, as compared with £317,722 in the previous year, and £557,080 in 1903.

APPLES.

The past season was a fairly good one, and good prices were realized. The supply from Canada was said to be well graded, and I have heard no complaints as to quality. There has been a good demand for what are known as the 'colour' varieties, and owing to the high reputation that is being established here for Canadian apples, there has been a sensible difference in the price obtained per barrel as compared with fruit from other quarters.

An important firm in the fruit trade makes the suggestion that apples from Canada should be graded according to size. Under present circumstances fruit branded with three crosses is supposed to be of the best quality, but two seasons ago, when the fruit in general was so small, this brand only represented small apples at best. They, therefore, think the government, in order to remedy this, should fix a standard of so many inches in circumference, so that in a season like the last there would be few or no parcels marked with the three crosses, and the customers would know exactly the size of the fruit according to the brand. Another point that is insisted upon by importers has reference to the sizes and weights of barrels and other packages. Some barrels have been found varying in weight from the standard recognized by most importers, and which they calculated upon when buying. If smaller barrels are received, there may be a loss per barrel, which the dealer resents. If boxes are used instead of barrels there should again be greater uniformity in size.

POULTRY.

Owing to the scarcity of Russian poultry, chickens from Canada would find a good market in this country, and supplies would be welcomed by the trade, providing the birds were properly graded, i.e., packed in boxes of twelve, all much about the same size. With improved accommodation upon the vessels, the facilities for shipping poultry so that it can arrive in this country in good condition are now excellent. The market requirements have, however, been so fully described in the publications of the Department of Agriculture, that there is no need for me to repeat them here. I regret to say that a large consignment arrived a few days after Christmas, and having missed the market, a loss was entailed; whereas if the poultry had reached London a day or so earlier high prices could have been realized.

The competition from Russia under normal conditions is an important matter, as the questions of fattening, grading, and handling have been closely studied there with excellent results.

HAY.

A complaint has been received from a Scotch importer regarding the quality of Canadian hay sent to Great Britain. It is pointed out that care should be taken to send high quality hay, because the market here has been made for the reason that Canadian hay has been better than English or Scotch grown, and the demand will cease when the quality is inferior. It is suggested that many hay growers in the Dominion are allowing their hay crop to run out, that is to say, they are not manuring their land and keeping it up to a high state of fertility.

PAPER AND PULP.

The following is an extract I have taken from a communication received from a correspondent who is well known in the trade in this country:—

‘The shortage of water in Canada and other pulp-making countries, and the consequent scarcity of pulp increasing as the months went on has greatly enhanced the value of paper. As a result the consumption was curtailed, newspapers running on as small sizes as they could, so that there has not been the usual natural increase that one looks for. Despite the shortness of supply the prices here have gone up comparatively little. There can be little doubt that Canadian makers of paper will find this an excellent opportunity of increasing their hold on this market, especially in “News,” as there is likely to be a considerable shortage in the Scandinavian supply this year, and, so far as one can see, in American supplies also, so that the newer country, with its more natural and abundant resources of raw material, has now an opening to secure a much larger share of the trade of this market. Prices of paper seem likely to be maintained this year at the present level as a minimum, and should the Scandinavian supply of ground wood not be speedily augmented, in all probability we shall see high prices. I shall be glad to know that developments in Canada are taking place to enable her to secure a fuller share in supplying the needs of this market, especially in “News” and “Sulphite Pulp,” which are practically the only two remunerative branches of the trade.’

Another gentleman largely interested in the pulp trade warns Canadian business men not to think of putting down mills for ‘mechanical’ pulp unless they are within cheap reach of a port, and unless wood is to be obtained at a price of not more than \$4 a cord on the boom. As regards ‘sulphite’ there is a bigger chance for development even higher up the country, but wood should not cost more than the figure named.

PIT PROPS.

At the request of a correspondent in Canada a little while back, I made inquiry in South Wales respecting the present demand for pit props from Canada. As the remarks with which I was favoured are of general interest, I quote them below:—

'As you are aware, the main of the pit props used in our district is derived from France, Norway and the Baltic, Portugal and Spain. France leads the way with say 400,000 tons, then comes Norway and the Baltic (chiefly the Baltic) with say 140,000 tons. Two or three cargoes of Newfoundland pit props came into Cardiff some three years ago, shipped on speculation, and lay for some time without finding buyers. The most common dimensions required are the $6\frac{1}{2}$ -feet lengths with 3-inch to 7-inch diameter at small end, and 9 feet lengths with 4-inch to 9-inch diameter at small end. The ends are cut straight, and the wood remains in the round, and our Norwegian and Baltic props are peeled, as the Canadian must be. Some other lengths are used, such as $4\frac{1}{2}$, 5, $5\frac{1}{2}$, 7, $7\frac{1}{2}$ feet, &c., but to begin with, those in greatest use, i.e., the $6\frac{1}{2}$ and 9 feet, should be handled. Our props are pine, red and white wood. Roughly the proportion of lengths required are 2 of $6\frac{1}{2}$ and one of 9 feet.

'The props are bought mainly by the fathom of 216 cubic feet pile measure, but for stability this fathom is reduced to a lineal feet scale, which I give as now:—

$2\frac{1}{2}$ diameter (if any) small end, 3,048 lineal feet.

3	"	"	2,160	"
$3\frac{1}{2}$	"	"	1,728	"
4	"	"	1,339	"
$4\frac{1}{2}$	"	"	1,123	"
5	"	"	950	"
$5\frac{1}{2}$	"	"	777	"
6	"	"	648	"
$6\frac{1}{2}$	"	"	561	"
7	"	"	475	"
$7\frac{1}{2}$	"	"	408	"
8	"	"	346	"
$8\frac{1}{2}$	"	"	312	"
9	"	"	278	"

prices per fathom over 1904 season from about say 60s. to 65s. (per delivered fathom here) c.i.f. Bristol channel. For 1905 season we anticipate prices will own 57s. 6d. to 62s. 6d. per fathom c.i.f. Payment is usually made by four months bills for nett amount of f.o.b. value (i.e. c.i.f. value less freight) against documents or cash less $2\frac{1}{2}$ per cent, also against document buyers' option. Two and a half per cent discount is also allowed off freight as this is considered a cash payment in any case.

'Sometimes we buy by the 100 lineal feet, and if your friends prefer it they may quote that way, or by the cord, which they will understand, but in this latter case we would require a lineal scale on the basis of the fathom.

'My firm imports about 80,000 loads a year.

'Your friends might offer us to begin with, say, 2,000 to 4,000 fathoms, and we shall be pleased to hear from them.'

RATES FOR BANANA, TOMATO AND POTATO PACKING.

Some time ago I drew your attention to specifications of banana crates, and tomato and potato boxes, as used in the Canary Islands, and it may be well to quote in full the particulars which emanated from the British consul at Teneriffe:—

SPECIFICATION OF BANANA CRATES—WOOD. PRICE C. I. F. SANTA CRUZ, TENERIFFE.

Size of crate used for No. 2, Bunches:
 Heads, 8 pieces $10\frac{1}{2}$ " x 3" x $1\frac{1}{2}$ " }
 " 4 " 14" x $2\frac{1}{2}$ " x $1\frac{1}{2}$ " } £22 15s. per thousand.
 Sides, 8 " $26\frac{1}{2}$ " x $2\frac{1}{2}$ " x $1\frac{1}{2}$ " }
 " 4 " 27" x 3" x $1\frac{1}{2}$ " }

Size used for No. 1's.
 Heads same as above.
 Sides, 8 pieces $28\frac{1}{2}$ " x $2\frac{1}{2}$ " x $1\frac{1}{2}$ " } £23 7s. 6d. per thousand.
 " 4 " 29" x 3" x $1\frac{1}{2}$ " }

Size used for extras.
 Heads same as above.
 Sides, 8 pieces $30\frac{1}{2}$ " x $2\frac{1}{2}$ " x $1\frac{1}{2}$ " } £24 2s. 6d. per thousand.
 " 4 " 31" x 3" x $1\frac{1}{2}$ " }

Size used for extra extras.
 Heads same as above.
 Sides, 8 pieces $32\frac{1}{2}$ " x $2\frac{1}{2}$ " x $1\frac{1}{2}$ " } £25 5s. per thousand.
 " 4 " 33" x 3" x $1\frac{1}{2}$ " }

Size used for packing two bunches, viz.:—Doubles.
 Heads, 4 pieces $27\frac{1}{2}$ " x 3" x $1\frac{1}{2}$ " }
 " 4 " $10\frac{1}{2}$ " x 3" x $1\frac{1}{2}$ " } £27 15s. per thousand.
 Sides, 6 " 14" x $2\frac{1}{2}$ " x $1\frac{1}{2}$ " }
 " 14 " 26" x $2\frac{1}{2}$ " x $1\frac{1}{2}$ " }

SPECIFICATION OF TOMATO BOX.

Tops and bottoms 16" x $9\frac{1}{2}$ " x $1\frac{3}{4}$ " }
 Sides 16" x $6\frac{1}{2}$ " x $1\frac{3}{4}$ " } £8 11s. 6d. per thousand.
 Heads 9 $\frac{1}{2}$ " x $6\frac{1}{2}$ " x $1\frac{3}{4}$ " }

SPECIFICATION OF POTATO BOX.

Tops and bottoms 26" x $16\frac{1}{2}$ " x $9\frac{1}{2}$ " in 3 pieces }
 Sides 26" x 7" x $9\frac{1}{2}$ " " 1 piece. } £30 per thousand.
 Heads 16 $\frac{1}{2}$ " x 7" x $9\frac{1}{2}$ " " 1 " }

The above are subject to fluctuation.

HORSES.

The question of how best to provide for a national supply of horses was under discussion recently, and it was pointed out by competent authorities that the scarcity of brood mares and stallions was due to extensive purchases by foreigners. Not only in this country, but also in Canada, mares have been a negligible quantity, and breeders have been apt to pay insufficient attention to the quality of breeding stock. It has been stated that Canada is peculiarly well situated to supply a large number of horses to this country in case of emergency, and the suggestion made that, as a means of encouraging horse breeding in Canada, stallions should be sent over, and that the two King's Plates now competed for in the Dominion should be increased by three or four.

CANADIAN MANUFACTURERS' LIST.

It was with great pleasure that I received from your department a large number of copies of this work for distribution in suitable quarters, and I trust that if a new edition is coming out you will again place me in possession of a good supply. Copies were forwarded to the British consuls in the leading cities and towns in European

countries, to the various chambers of commerce in the United Kingdom, to the commercial and emigration agencies, and to the more important public libraries, &c. The acknowledgments received show that the books are fully appreciated, and are likely to prove of considerable use. I distributed copies of the blue book containing the annual report of your department, in the same way, and am sure the work is found exceedingly useful for reference purposes.

EXHIBITIONS.

At the shows of colonial grown fruit which are occasionally held under the auspices of the Royal Horticultural Society at their new hall in Vincent Square, Westminster, good displays of Nova Scotian and British Columbian apples have been made, and have attracted favourable notice. I trust that the society will continue to interest itself in this good work. Displays of Canadian apples have also been made in the Canadian Court at the Crystal Palace, Sydenham, in the windows of the Dominion government emigration office, in London, and at the offices of the Canadian Pacific Railway.

I am, sir,

Your obedient servant,

STRATHCONA,
High Commissioner.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B., YOKOHAMA, September 14, 1906.

PROGRESS OF THE FLOUR TRADE.

It is announced with every evidence of bona fide intention that the Toa Flour Manufacturing Company of Tokyo is now in a position to go ahead. The capital of 3,000,000 yen has been taken up by leading financial promoters with Baron Shibusawa at their head. The object of the company is to undertake the manufacture and sale of wheat flour in Japan and China, and to carry on the additional business of warehousing at Hankow, China.

Another milling company with a similarly large capital is being promoted by Mr. Okura, a leading Tokyo capitalist largely concerned in various industrial enterprises. Mr. Okura says, however, that he intends this enterprise entirely for China, and that he expects to grind Chinese grain exclusively. He admits that Chinese wheat is far inferior, measured by the Canadian, Australian and other high standards, but it supplies the demand there. It is what the native people have been using; it serves their purpose and they would not appreciate high grade flour which must of course be at a higher price. He said there was a great quantity of good flour taken by China, and the trade would grow, he thought, rapidly. He had been looking to Canada in connection with the several industries in which he was interested, and he expected profitable results as Canadian development advanced. Although for the present intending to

use only Chinese grain, because at first it was necessary to go slowly, he anticipated success, and in that case the extending to the production of a high class article would no doubt follow. In that event he would likely want the best raw material he could find. There was no question as to the quality of Canadian wheat and flour, but the market in the Orient had to be cultivated with perseverance.

A NATIONALIZED INDUSTRY.

The Finance Department has notified the Salt Monopoly Bureau that no further permits for the manufacture of salt will be granted for the time being, as it is necessary to restrict the production of salt. It is reported that according to the salt monopoly system, permits are given to salt makers, and the product is taken by the government at a fixed price; but the supply in the government's stores at present being in excess of the market requirements, it is considered advisable to restrict production.

ADVANCING PRICES.

Illustrative of the effect of the increasing tariff, a foreign piano firm, manufacturing to some extent, and agents for the leading foreign pianos, announce to their patrons that they will save from \$50 to \$200, meaning doubtless current dollars or yen, upon each instrument, by buying before October 1; that there will be an advance of 15 per cent after that date.

TIMBER IN JAPAN.

The forests in Japan, excluding the Lucho and Formosa islands, cover over 88,595,000 acres, occupying 55 per cent of the whole area of the country, the densest part of which is that of Hokkaido, Northern Japan. Of these forests 58 per cent is owned by the state, and 35 per cent by temples, villages, &c., and the remainder is classed as other public and private.

The value of the export of wood (lumber, timber, boards, &c.), in 1905 amounted to \$2,500,000, and of wood manufactured, \$1,000,000. This export compared with that of five years ago, is trebled. The number of saw-mills, so described, in 1904 was 491, with 4,305 employees.

Amongst the innumerable propositions now claiming public attention, is the company formations for the exploiting of the lumber regions of Manchuria and Saghalien. It is not explained why the lumbering prospect in Manchuria should be so attractive to the Japanese speculative investor, while that of Japan is evidently neglected. No doubt a large proportion of the whole timber area is not very valuable for timber; but those who claim to be informed upon the subject say that there are vast areas heavily timbered in Northern Japan, that would afford large export, as well as home supply for generations. Of course, the present methods of lumber production being primitive in the extreme, much in the way of export is not to be looked for; and in proportion to their numbers the Japanese are not large consumers of lumber, although making progress in this respect as in others with surprising facility.

THE RAW SILK MARKET.

The silk producing season has so far advanced that calculations are current as to its results. The *Tokyo Asahi* (*Sunrise*) points out that raw silk producers are having an unexpectedly high price, and that this tendency is not relaxing, but rather the reverse. In consequence of this favourable state of the market, activity prevails in the producing districts and in Yokohama. The continuance of this state of things, the *Asahi* regards as doubtful and gives its warning accordingly.

The grounds of doubt are indicated as follows: At the present time the price of raw silk has risen as high as \$525 to \$530 per bale, but such figures are not to be taken without reserve as the natural outcome of the law of supply and demand. The principal factor in the present forcing up of the price of raw silk is the high figure at which the export to France has been sold. But the export to Europe is only 30 per cent of the whole, and is now about closed; the remaining 70 per cent must therefore look to America, now by far the most important consumer. At this stage the latter market becomes a most significant object of observation and study. The price of raw silk sold to America in 1904 ranged from \$425 to \$500, and since the American silk weavers are striving to compete in woven fabrics by the production of cheap grades, they are not likely to pay high prices for their raw material. From this standpoint it will not appear that exports to America should go freely until there is a substantial abatement of present prices at the point of export. The current quotations indicate some revival of demand, but merely for the supplementing of stocks and the making good of casual requirements. It is nothing like a market mover, and large orders are not to be expected on a market value that is not under \$500. The advice in short is that safety is to be found only in a subsiding market.

THE TEA CROP.

At one time only two crops were picked and sufficient for the home consumption; but modern trade exigency calls upon the tea plant to do more. Export demand makes it yield four crops in the season. The first is gathered in the latter part of April, and the second about the same time in June, while the third comes in the middle of August, and the fourth early in September. In respect of quality the first is the most valuable; the second much less so; the third in point of quality comes between the first and second; and the fourth takes place as complement to the third.

The first and second crops of this year are short 30 per cent compared with the average. At the closing of the second crop the discouraging estimate was made by some that not more than half an average crop would be marketed this year; but favourable weather setting in, the third crop went up to the average, and the fourth is now following with favourable results.

The foreign market supply, passed through the port of Yokohama up to September 10, this year, amounted to 13,335,600 lbs. according to the trade statistics. Compared with last year for the like time this is a decrease of 1,026,800 lbs. This shortage is accounted for partly by the deficiency of the first and second crops; but perhaps more by export this year for the first time from Shimizu, the port of Shizuoka, a large tea producing centre tributary to Yokohama.

On hand at Yokohama, at this date, there is estimated to be 265,000 lbs., which quantity varies from day to day, with the current trade and the finish up of the fourth crop.

MUST CUT COMMISSIONS FINER.

There was a time when the Occidental impression, with regard to the opportunities of those who adventured to the far east, was that good fortune was their great reward. That was possibly a correct impression long ago; but the lapse of time has brought along changes which parties wishing to extend trade out here would do well to make a note of.

A commission merchant in Canada inquired for business connections in Japan. The consequent correspondence indicated that the parties could come together, only that they were widely apart upon the essential matter of the commission merchant's commission.

The Canadian merchant supposed that the lines of goods in question would pay at least 5 per cent commission. The merchant in Japan responded that the kind of business in question was done in his own case, and he had reason to believe in the case of others, in London, Lyons, and New York on a commission of one-half per cent.

At this end the difference between the parties was regarded as being too great to admit of business, without a compromise that would show that the position of one or other, or both was unreasonable.

The low rate of commission upon which much business is done here would be incredible unless supported by evidence that is unquestionable. Only magnitude of turn over could make it at all compensatory.

A GOOD APPLE CROP.

Newspaper reports say the crop of apples in Japan is unusually good this year, and large supplies of apples are coming in to the market from the principal producing districts. The price is according to quality and size, 20 per cent cheaper than last year.

CHINA'S GREAT TRADE.

The trade of China, in so far as it is represented by the Port of Shanghai, which is a very great section of the whole foreign trade of the country, is represented by the British consular report to show a large increase over that of the preceding year. This increase is stated to be in spite of an exceptional run of unfavourable incidents, among which were the boycott of American goods, the blocking of the Manchurian and Siberian ports, a destructive typhoon and flood-tide, the fluctuations of exchange, the indiscriminate coinage of copper 'cash,' the Shanghai riot and its consequent ill feeling, and many lingering incidents of the war proving a serious deterrent of shipping. The marked and continued increase in the trade of the port of Shanghai speaks volumes for the commercial prosperity of that port, and indeed the whole of China. In 1905 the trade of the port amounted to £66,795,116.

HIGH TARIFF EFFECTS.

The new customs tariff in effect October 1, bears heavily upon luxuries. The Japanese application of 'luxuries' differs perhaps widely from the foreign classification. Without giving due consideration to this circumstance, and many relative complications, some infer from the tariff a tendency towards a protective policy.

On toilet goods, for example, the duty is doubled, which may be a fair enough levy upon this class of goods, and certain to have a liberally protective effect upon the manufacture. Yet the toilet goods manufacturers in Tokyo, Osaka, and Kyoto are moved to petition for fear that the price of raw material for toilet soaps and perfumeries made in Japan will largely increase, and that as a result they will be unable to compete with foreign goods in the market from abroad.

A. MACLEAN.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(*Mr. E. D. Arnaud.*)

GAZETTE BUILDING'S, ST. JOHN'S, October 3, 1906.

PRICE OF CODFISH.

As a consequence of the smaller catch of fish during the present season compared with that of last year, and referred to in a previous report the prices still maintain a high standard, and instances have been reported where the figures then quoted have been advanced to \$6.70 for large merchantable, with other grades in proportion.

The following figures are, however, still quoted in the market report published in the *Trade Review* of September 29 last, and may be taken as fairly correct up to that date. It is expected that the price for large merchantable will be still further advanced, and may reach \$7, which was the figure given in the same month last year, and the highest price touched for several years in this market.

FISH AND OIL.

Fish, large merchantable, per qtl.	\$6 00
Fish, small merchantable.	5 00
Fish, large Madeira.	6 00
Fish, small Madeira.	5 00
Fish, large West India.	3 50
Fish, small West India.	3 00
Fish, Labrador.	\$3 00 to 3 50
Haddock, per qtl.	3 50
Herring, per bbl.	\$2 50 to 3 00
Salmon, No. 1, large, per tre.	14 00
Salmon, No. 1, small, per tre.	12 00
Lobsters, per case, No. 1, flats.	\$13 75 to 14 50
Cod oil, per tun {	hardwood pkgs. 62 00
	softwood. 57 00

E. D. ARNAUD.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA
AND TASMANIA.

(Mr. D. H. Ross.)

STOCK EXCHANGE BUILDING, MELBOURNE, September 6, 1906.

INCREASED DUTIES ON AGRICULTURAL IMPLEMENTS.

In my report of August 11 (Monthly Report, August, 1906, p. 271), I gave details concerning the increased rates of customs duties which were, at that date, being enforced upon agricultural implements and machinery. On August 29, the Minister of Customs made further proposals relative to specific and ad valorem duties. The schedule recently adopted is given herewith, but is liable to modification before being ratified by parliament:—

Specific or Fixed Duties.

Stripper harvesters, each £16.	\$77 86
Strippers (without winnowers) £8.	38 93
Metal parts of stripper harvesters and strippers per lb. 2½d.	0 05

Ad Valorem Rates.

Stump, jump ploughs, disc cultivators, winnowers, horse and other power, combined cornsheller, husker, ad valorem.	25 per cent.
Ploughs, other, ploughshares, harrows, chaff cutters and horse gear, cultivators other than disc, scarifiers, plough mould boards, corn shellers, corn huskers, ad valorem.	20 per cent.

The following goods shall be free of customs duty:—

Manufactures of metal, viz.:—Hand-worked rakes, and ploughs combined, hay tedders, maize harvesters, maize binders, maize planters, mouldboard plates in the rough and not cut into shape, potato sorters, potato raisers or diggers.

ALTERATION IN AUSTRALIAN CUSTOMS TARIFF.

The Commonwealth parliament is now, from day to day, debating proposals brought forward by the government for an increase of duties in lieu of those imposed since the first customs tariff was enforced in 1902. Until finality is reached, there is no use commenting upon the frequent changes in the tariff, as customs duties temporarily imposed by the department may not be ratified by parliament. In case of any definite alteration of special interest to Canadian exporters being made, particulars will be promptly cabled to the Superintendent of Commercial Agencies, Ottawa.

AUSTRALIAN PREFERENTIAL TRADE PROPOSALS.

It was known that the Australian government had for some time been negotiating with South Africa and New Zealand for reciprocal trade relations, but the announcement of a proposed tariff preference in favour of certain lines of goods manufactured in the United Kingdom was one of the greatest political surprises since the inauguration of the Commonwealth. Both the Commonwealth and New Zealand parliaments are now debating a provisional agreement between the two governments. It is considered that at least the New Zealand parliament will reject the preferential proposals. Canada would be interested in the proposed Australian preference on New Zealand lumber and grain.

CONDITIONS OF SUGGESTED PREFERENCE TO UNITED KINGDOM.

Upon reference to the conditions which the Commonwealth government proposes to favour the United Kingdom, it is observed that the present customs duties remain in operation so far as British goods named in the schedule—and carried in British ships—are concerned, but there is an advance of about 10 per cent in the duties of similar goods obtained from other countries, including Canada. This advance will affect some of the leading lines of goods which Canada has been exporting to Australia, provided, of course, that the proposal for a British preference—not including Canada—is ratified by parliament. Full details will reach the Department of Trade and Commerce, Ottawa, by cable long before the arrival of this advice.

HOW THE PREFERENCE MAY AFFECT CANADA.

The Australian schedule of proposed tariff concessions in favour of goods manufactured in the United Kingdom is not by any means upon similar lines to the comprehensive Canadian preference in favour of nearly all goods of British manufacture. The number of lines is limited, and in the main the schedule is composed of a list of goods not manufactured in Australia. The principal items, showing a comparison of proposed duties, from a Canadian exporter's point of view, are as follows:—

	Proposed Duty on British (U.K.) per cent.	Duty on Cana- dian and other per cent.
Bicycles and motor cars	20 = 22 net.	30 = 33 net.
Boots and shoes	30 = 33 "	40 = 44 "
Boots, rubber, &c.	25 = 27½ "	35 = 38½ "
Rubber sand shoes	20 = 22 "	30 = 33 "
Furniture	20 = 22 "	30 = 33 "
Paper hangings	15 = 16½ "	25 = 27½ "
Engines, various	12½ = 13¾ "	22½ = 25 "
Platedware	20 = 22 "	30 = 33 "

The net duty is caused by 10 per cent being added to the invoice value of the goods before the duty is computed thereon, and the net figures are given to clearly indicate the importing charges.

PREFERENTIAL TRADE PROSPECTS BETWEEN CANADA AND AUSTRALIA.

While the Canadian government is willing to give a general tariff preference of 33½ per cent in favour of Australian goods, yet the Commonwealth government may not be disposed to reciprocate to such an extent. It must not be overlooked that in submitting proposed concessions for goods imported from the United Kingdom, the Australian schedule disclosed a comparatively limited number of items, many of which are of no special interest to Canadian exporters. Canadian trade interests with Australia are receiving the closest attention of the government and the commercial agents in this country.

D. H. ROSS.

AUSTRALIAN PREFERENCE WITHDRAWN.

Since the receipt of the report under date of September 6, from Mr. D. H. Ross, herein published, Mr. Ross cables under date of October 12, as follows:—

‘British and New Zealand preference has been abandoned by the Australian government this session. The duty has been increased upon agricultural implements and machines. Mailed you a letter on September 22 giving full particulars.’

The department is unable to state whether the increased duty on agricultural implements and machines referred to in the cable is the same as the duty as originally introduced in the Australian parliament or not, but all information will be made known through the press immediately upon receipt of further advices.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(*Mr. E. D. Arnaud.*)

GAZETTE BUILDINGS, ST. JOHN'S, October 5, 1906.

OPPORTUNITY FOR MANUFACTURED TOBACCO EXPORTERS.

The premises of the Imperial Tobacco Company, of St. John's, and the only factory of the kind in the colony, were destroyed by fire to-day. It will take some weeks to repair the damage done sufficiently to resume work, and meanwhile the market must be supplied from outside sources. This is an opportunity for Canadian tobacco factories to come in and supply the demand.

I am given to understand that stocks of tobacco in the hands of merchants are rather low at present, and that consequently orders will have to be given abroad without delay.

GOLD MINING IN NEWFOUNDLAND.

There are at present on exhibition in St. John's three small bars of gold weighing about 75 ozs., and valued at \$1,500, the first that have ever been produced in the colony by means of the stamp milling process. The above facts may prove of some interest to persons in Nova Scotia and elsewhere engaged in the gold mining industry.

COPPER.

Deposits of copper ore in paying quantities are being diligently sought for during the present year, and several Americans have spent considerable time in the necessary explorations.

COAL.

Borings for this mineral have been going on for several months, under the direction of Mr. Howley, the government geologist, at a place on the west side of the island, and not far from Bay of Islands, but it is not yet known with what success.

E. D. ARNAUD.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(*Mr. W. A. MacKinnon.*)

BRISTOL, ENG., October 4, 1906.

FRUIT CROP PROSPECTS.

As confirming my earlier reports on the fruit prospects here, I send the following, which has just been published by the Board of Agriculture:—

England, East.—Plums and stone fruit generally are reported a failure. Apples are plentiful, but they have suffered somewhat from the lack of rain. Pears are scarce.

England, Northeast.—Apples are a good crop and plentiful, and pears and plums are reported plentiful in parts of Lincolnshire.

England, Southeast.—Apples are fairly plentiful. Plums and damsons have slightly improved since last month, but pears are scarce.

England, Midlands.—Apples are a good crop, but are reported as small in size. Pears are scarce, while stone fruit is almost a complete failure.

England, Southwest.—Apples are on the whole a fair crop, and in South Devon a large yield is recorded, but in Cornwall the crop is bad. Plums are a good crop both in yield and quality.

England, North and Northwest.—Very little fruit is grown for market in these divisions. Apples are only a moderate crop. Stone fruit almost a complete failure.

Scotland.—Very little fruit is grown. In Lanark apples, pears and plums are poor.

W. A. MACKINNON.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. MacNamara.)

MANCHESTER, ENG., October 31, 1906.

STOCK OF PROVISIONS AT LIVERPOOL.

MANCHESTER, October 5, 1906.

Estimate of the stock of provisions, &c., in the port of Liverpool on September 29, 1906; together with the figures at the corresponding date last year, and also of last month:—

		Sept. 29, 1906.	Aug. 31, 1906.	Sept. 30, 1905.
Bacon.....	Bxs.	19,649	22,355	15,153
Hams.....	"	1,627	3,816	5,791
Shoulders.....	"	3,960	4,136	7,999

Lardine and compound.....	"	70	113	135

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(Mr. C. E. Sontum.)

CHRISTIANIA, NORWAY, October 4, 1906.

TRADE AND INDUSTRY OF NORWAY.

According to the official report of the Central Bureau of Statistics, the trade values of Norway for July, 1906, and the 7 months period, January-July, compares as follows with the corresponding month and period of 1905:—

	Imports.	Exports.
July, 1906..	\$ 6,753,173	\$ 4,416,426
July, 1905..	6,883,706	4,589,546
January-July, 1906..	47,542,800	32,605,786
January-July, 1905..	46,443,280	29,367,920

During the first 7 months of this year the import has thus increased with about \$1,100,000 in value as compared with the same months last year. The most decided improvement, however, is shown by the export value, 1906 being so far about \$3,300,000 ahead of the same months last year.

MECHANICAL AND ENGINEERING WORKSHOPS.

The mechanical and engineering workshops of Norway are all busy and have increased the number of their hands. Turbine machinery for cellulose mills and structural iron for new factories are the main items of their orders in hand. The combined works of 'Brown Boveri' and 'Norsk Elektisk Aktiebolag' have in order a number of big dynamoses for export to England, France, Russia and other countries.

NORWEGIAN STEAMSHIP FLEET.

It is of interest to note the increase of the Norwegian steamship fleet during the last twenty years, from which will also be seen the importance for the country of having this fleet well engaged. In 1885 Norway had only 15 steamers of more than 1,000 tons each. The largest steamer then measured 1,600 tons. In 1895 the number had increased to 82 steamers between 1,000-3,000 tons each, while in 1905 the fleet counted 169 steamers of this size. Most of the Norwegian steamers are between 300-900 net reg. tons, consequently ships that count about three times as many d. w. tons.

HARBOUR AT REYKJAVIK, ICELAND.

Mr. Smith, director of the Norwegian harbours, has just returned from Iceland, where he has been at the request of the Iceland government in order to prepare plans for an improved harbour for the capital, Reykjavik. His plans, estimated to cost about kr. 1,800,000, or nearly half a million dollars, have been approved of by the authorities, and will now be carried out.

EXPORT OF AGRICULTURAL PRODUCTS FROM DENMARK.

During the month of July there was exported from Denmark:—

138,147 casks of butter, weighing.. . . .	lbs.	15,206,170
19,529 cases of butter, partly fresh, partly in tins....		
52,912 bales of bacon, weighing.. . . .	lbs.	12,804,700
1,529 barrels of mess pork, weighing.. . . .	"	504,570
599 barrels of salted beef, weighing.. . . .	"	197,670
21,860 cases of eggs.. . . .	pieces	31,478,400
Fresh meats.. . . .	lbs.	1,350,930
Fresh pork.. . . .	"	20,350
Tallow, skins, &c.. . . .	"	5,044,160
Cream.. . . .	"	1,293,380
Milk.. . . .	"	676,280
Cattle.. . . .	number.	7,714
Horses.. . . .	number.	2,148

The value altogether amounts to kr. 29,600,000 (about £1,626,375.)

C. E. SONTUM.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(Mr. C. M. Kittson.)

RHODES BUILDING, CAPE TOWN,
P.O. Box 668,
September 21, 1906.

IMPORTS OF SPRING WHEAT FLOUR DECLINING.

For various reasons the importation of hard wheat flour into South Africa is declining, the chief cause of this is the fact that it has been quoted up to as much as \$1.20 per 100 lbs., above the price of Australian soft flour, and also because of the increase of the duty on flour without a corresponding advance in the price of bread, which has caused bakers to employ a cheaper article in their dough-making—bakers who used to use two parts hard to one of soft are now reversing the proportion and using two parts soft to one of hard, and in some cases nothing but soft Australian flour, which is quoted at 8s. per 100 lbs. c.i.f. South African ports.

OPENING FOR CANADIAN BUTTER.

At present Canadian exporters of butter possess an undoubtedly good opportunity for obtaining a share of the South African butter trade, South America, who usually ships large quantities here, is not able to supply the demand at the moment, and first quality Australian is quoted at 25 cents f.o.b. Australian ports. Full details of South Africa's requirements of this article were published in report No. 87, dated September 25, 1906.

PROPOSED UNION OF TRANSVAAL AND NATAL.

Much attention is being given to the proposed union between the Transvaal and Natal, and the feeling generally is favourable to such union.

ENAMEL WARE.

Hitherto enamel ware from Great Britain controlled this market, but lately the German article has been coming to the front chiefly on account of its low price, and threatens to entirely supersede the former.

THE BROOM TRADE.

Until recently American brooms have been having their own way in South Africa, but now quantities are being made locally which undersell the imported article, and consequently are obtaining a large and increasing share of the trade. South African broom makers are quoting 9s. 6d., 10s. 6d. and 13s. for Nos. 6, 7, 8, respectively.

C. M. KITTSON.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA
AND TASMANIA.

(*Mr. D. H. Ross.*)

STOCK EXCHANGE BUILDING, MELBOURNE, September 22, 1906.

COMMONWEALTH CUSTOMS DUTIES ON IMPLEMENTS.

On September 7, the Australian customs duties upon agricultural implements and machinery were again amended in both specific and ad valorem rates. A reduction was made in the fixed duties as at first proposed, but the ad valorem rates on fertilizers and seed drills were increased from 12½ per cent to 25 per cent. Although the alterations in the tariff have not yet been ratified by parliament, the duties shown in the following schedule are now being enforced.

Fixed Rates.

Stripper harvesters, each £12 0 0	\$58 40
Strippers (without winnowers) \$6 0 0	29 20
Metal parts of stripper harvesters and strippers per lb. 1¼d.	0 03½

Ad Valorem Rates.

Stump jump ploughs.	}	25 per cent ad valorem.
Disc cultivators.		
Winnowers, horse and other power.		
Combined corn sheller, husker and bagger.		
Combined corn sheller and husker.		
Fertilizers.	}	25 per cent ad valorem.
Seed drills.		
Ploughs, other.	}	20 per cent ad valorem.
Ploughshares.		
Harrows.		
Chaff cutters and horse gear.		
Cultivators other than disc.		
Scarifiers.		
Plough mould boards.		
Corn shellers.		
Corn huskers.		

The following goods are free of customs duty:—

- Reapers and binders.
- Mowing machines.
- Hand-worked rakes and ploughs combined.
- Hay tedders.
- Maize harvesters.
- Maize binders.
- Moul board plates in the rough and not cut into shape.
- Potato sorters.
- Potato raisers or diggers.
- Subsoil packers.

PRICES OF AUSTRALIAN AGRICULTURAL IMPLEMENTS FIXED BY THE GOVERNMENT.

In connection with the proposals to increase the customs duties upon certain lines of agricultural implements, the Australian Minister of Customs has introduced special conditions in regard to the maximum prices which Australian makers can charge for same. Provision is also made in the bill that the workers in Australian implement factories shall be paid fair and reasonable wages. The maximum selling prices of some of the lines are as follows:—

Australian stripper harvesters after, February 1, 1907, 5 feet and under.	£70 0 0
Australian stripper harvesters, after February 1, 1907, 5 feet 6 inches to 6 feet.	75 0 0
Australian stripper harvesters, after February 1, 1907, 6 feet and over.	80 0 0
Australian stripper harvesters, after February 1, 1908, 5 feet and under.	65 0 0
Australian stripper harvesters, after February 1, 1908, 5 feet 6 inches to 6 feet.	70 0 0
Australian stripper harvesters, after February 1, 1908, 6 feet and over.	75 0 0

Australian drills (fertilizers, seed and grain). On and after February 1, 1907.

COMMONWEALTH BOUNTIES PROPOSALS.

The Bounties Bill, having passed the House of Representatives, has been presented to the Commonwealth Senate for its concurrence. The Bill provides for an expenditure of £500,000 during the period of ten years, as from July 1, 1906, for the payment of bounties on the production in Australia of certain goods and products. It is

stipulated that not more than £75,000 shall be paid in any one financial year. The articles and rates of bounty enumerated in the schedule are as follows:—

Articles.	Period Bounty may be paid.	Rate of Bounty.	Maximum pay- ment each year.
			£
Cocoa.....	9 years....	1d. per lb. on dried beans . . .	1,000
Coffee.....	8 "	1d. per lb.....	1,500
Cotton.....	5 "	10 per cent on market value....	4,500
Fibres—Flax, ramie, sisal hemp, hemp, New Zealand flax, pandanus, and such other fibres as are described.....	10 "	10 per cent on market value....	6,000
Fish, canned or tinned.....	5 "	1d. per lb.....	9,000
Milk, sweetened, condensed.....	5 "	1d. per lb.....	6,000
Milk, powdered.....	5 "	1d. per lb.....	5,000
Oils—Olive, China, linseed, castor, colza, sunflower, essential, cottonwood, and such other oils as are prescribed.....	10 "	10 per cent on market value....	6,500
Rice.....	5 "	20 per cent per ton.....	1,500
Miscellaneous—Rubber, kapok, and such other goods as are prescribed.....	10 "	To be prescribed by regulation..	9,000
			50,000

THE MELBOURNE LUMBER MARKET.

For the year which ended on June 30, last, the importations of lumber into Melbourne totalled 89,662,000 super. feet, being a reduction of about 3,000,000 feet from the previous year. The total consumption of imported lumber is given at 86,715,000, being an increase of about 6,000,000 feet over the previous twelve months. The stocks on hand amounted to 46,139,000 feet, being a reduction of some 3,000,000 feet from the stocks held on June 30, 1905. For the period as above stated 11,231,000 laths and 599,000 pickets were imported. The building trade for the last year has been exceedingly brisk in and about Melbourne, and the demand for all classes of lumber is a very active one. Recent business has been somewhat curtailed owing to proposed changes in the customs duties.

STOCKS AND CONSUMPTION OF LUMBER IN MELBOURNE.

The following are the details of the consumption of lumber and the stocks on hand for the year which ended on June 30, last:—

	Consumption, 1906.	Stocks, June 30, 1906.
Red deals.....	3,339,000	2,302,000
Flooring, lining and weatherboards	27,676,000	13,789,000
Spruce and white deals.....	5,037,000	4,006,000
Oregon.....	20,759,000	8,660,000
Sugar and yellow pine and doorstock.....	3,207,000	2,196,000
Redwood.....	5,708,000	3,948,000
American shelving.....	570,000	615,000
N. Z. Kauri.....	9,683,000	4,171,000
N. Z. white pine.....	10,582,000	6,287,000
Clear pine.....	154,000	165,000
Totals.....	86,715,000	46,139,000

AUSTRALIAN FRUIT PULP.

It is claimed by shippers that the export of fruit pulp from Australia to England is not a remunerative business. The London market is simply being availed of for the disposal of surplus stocks of fruit not required in this country. Tasmania controls the bulk of the exports, practically of two kinds only, raspberry and black currant. There is no sugar used in Australia in the manufacture of pulp. The fruit is brought to a boil and packed in hermetically sealed cans, each can weighing 15 lbs. gross. Four cans are packed in a case for export.

CANADIAN FRUIT PULP.

It can only be on very rare occasions that any importation of fruit pulps from Canada or elsewhere would be required by Australian jam manufacturers. The only line in which business is likely to be done is that of strawberry pulp, for which a limited quantity could be sold in Melbourne and other leading importing centres. Recently an inquiry went to Canada for a c.i.f. Melbourne price for 50 tons of strawberry pulp, but shippers were unable to quote.

AUSTRALIAN JAMS.

South Africa is the principal oversea market for Australian jams, which are exported in 1, 2 and 6-lb. cans, labelled and cased in the ordinary way. The various sizes are packed as follows: 6 doz. 1-lb. cans, 3 doz. 2-lb. cans and 1 doz. 6-lb. cans per case. Australian manufacturers obtain a drawback of either the entire import duty or the excise paid upon sugar used in the manufacture of jams exported. Formerly only five-sixths of the duty was rebated, but latterly the whole customs or excise duty has been refunded by the government.

THE QUEENSLAND FRUIT FLY.

In my report of June 11—Monthly Report (June, 1906, p. 2123)—I gave some particulars with reference to the alarm of Victorian orchardists over the possible introduction of the dreaded Queensland fruit fly into this State. There appears to be a difference of opinion amongst Australian entomologists as to whether the Mediterranean fruit fly or the Queensland fruit fly is the greater pest. As my former report aroused some interest in Canada, I am forwarding to the Department of Trade and Commerce the views of the Victorian Government's entomologist which were embodied—and illustrated—in a report published some years ago, and the opinions then expressed are still endorsed by him. Canadian orchardists—or papers devoted to their interest—can obtain further details upon application to the Superintendent of Commercial Agencies, Ottawa.

CANADIAN MOTOR CARS.

Canadian motor cars were exhibited this month at the Royal Agricultural Shows in both Melbourne and Adelaide. The models exhibited were of the luxurious touring class, which are so popular in countries of immense distances such as Australia. The cars are fully equipped, of splendid appearance and distinctly high grade in every respect. Orders have already been taken for a number of cars, but, for the moment, the proposed Commonwealth preferential duty of 20 per cent on cars made in Great Britain as against 30 per cent on Canadian cars has precluded the completion of several contracts.

PROPOSED INCREASE IN AUSTRALIAN CUSTOMS DUTIES.

The mail closes without the proposed higher duties upon agricultural implements, or the tariff preference in favour of certain goods manufactured in the United King-

dom, being finally approved by the Commonwealth Parliament. Both measures have been under discussion in the House of Representatives during the last two days, and will be debated next week. Parliament will likely be prorogued before the end of September. Details as to the customs duties finally ratified will be cabled to the Superintendent of Commercial Agencies, Ottawa, immediately the information is available.

D. H. ROSS.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No. 14, BUND, ROOM B., YOKOHAMA, October 1, 1906.

THE NEW IMPORT TARIFF.

The new import tariff went into operation to-day. In order to forestall the increased duty many steamers arrived in Yokohama, and doubtless at other ports, yesterday at the highest possible speed. Some made record runs, shortening the time as much as two days coming from the American continent. At the request of the importers, the custom-house was specially opened on Sunday.

THE LACQUER TRADE.

In reference to lacquer ware for export, the value of the ware exported during the first eight months of this year amounted to 1,105,828 yen, showing an increase of 355,465 yen on the figures for the corresponding period of last year. The increase is accounted for chiefly by large export of the ware to Russia, the business at one time being so brisk that almost all the stocks were cleared in Yokohama and Kobe by the resumption of the trade with Russia. The native press say that while there are bright prospects for the lacquer-ware trade, the manufacturers are experiencing difficulties in their relations with the workers. It is asserted that when the men hear of any large orders obtained, they immediately demand an increase of wages or go on strike. The Japanese workmen are becoming 'up to date.'

THE JAPANESE AND FLOUR.

The Governor General of Canada is reported to have said in one of his recent addresses in the course of his tour throughout the Northwest, that the Canadian producers 'must give their attention to Japan, which was turning from a rice-eating to a wheat-eating country.'

This quotation appropriately introduces another, from a recent report of the United States Consul at Kobe, as follows:—

'It may be of interest to note the fact that the Japanese are rapidly adopting the use of wheat and flour instead of an exclusive rice diet. Much wheat is now consumed among the working-classes, it being mixed with rice, this having been found not only cheaper and more strengthening, but also to act beneficially against beri-beri, a disease peculiar to rice-eating people.'

The demand for flour here is chiefly confined to the lower grades, not only because the use of flour is making the greatest strides among the poorer classes of the country, with whom cheapness is the greatest desideratum, but because a large quantity is used for making paste in the enormous paper industries, such as the manufacture of screens, fans, kites and numerous other articles for which a good and cheap quality of paste is necessary. The American flour imported here comes principally from the Pacific Coast.

IMPORTS OF WHEAT INTO KOBE BY COUNTRIES.

	1905.	1904.
Australia.. . . .	\$212,628	\$ 48,978
British India.. . . .	102,213	8,261
China.. . . .	95
Korea.. . . .	92
United States.. . . .	343,301	119,857
Canada..	52
Total.. . . .	\$658,329	\$177,148

IMPORTS OF FLOUR (WHEAT) INTO KOBE BY COUNTRIES.

	1905.	1904.
Australia.. . . .	\$ 37,154	\$ 16,344
British India.. . . .	13	769
Canada.. . . .	39,948	64,300
United States.. . . .	1,857,687	1,350,626
Total.. . . .	\$1,934,802	\$1,432,039

The same report attributes the marked falling off in the importation of rice, Japan being a large importer as well as exporter of rice, 'to the fact that the Japanese people are commencing to live partly on bread, a tendency which will increase under the heavy tariff now imposed.'

FERTILIZERS.

The season of activity in the fertilizer importation business is now entered upon. The *Japan Chronicle* (Kobe), in the course of a review of the past year's importations, under date September 29, says: 'The demand for various kinds of imported fertilizers has been steadily on the increase of late years, though the trade was somewhat unfavourably affected last year by the war. With the assurance of peace, however, the market became very active, and the importation for the year under review has been considerably larger than the previous year, oil cake alone showing an increase of \$1,399,249, of which China supplied \$1,216,354, and ammonium sulphate an increase of \$706,013, to which Great Britain contributed \$660,769; While the United States increase in nitrate of soda, oil cake, phosphate, &c., aggregated \$358,963.

'The remarkable increase in the demand for artificial fertilizers is a noteworthy feature of Japanese agriculture. About ten years since, the demand was met by home products, but with the development of agriculture, supplies are sought from abroad.

THE CHARACTER OF JAPANESE IMPORTATIONS.

The principal imports of general interest, indicative of the character of the Japanese import trade, will be exemplified by the following selection from the current

trade returns of the port of Yokohama. These are the imports for the current week ending September 25, and for the year from January to the same date:—

ARTICLES.		Sept. 19— Sept. 25.	Jan. 1— Sept. 18.

COPPER IN JAPAN.

In view of the present activity of the copper market, the following particulars from the *Osaka Mainichi (Daily News)*, relating to the production of copper in Japan, will be of interest: 'The world-wide development of electrical industry has largely increased the demand for copper, with a corresponding rise in price and great activity in copper mining. A decade or two ago the production of copper in Japan was no more than sufficient to supply the home demand, but it has increased considerably of late years, and now Japan supplies copper for consumption abroad. The steady advance of the copper market in London has encouraged the Japanese copper mining industry,

with the result of an enormously increased production. The following figures show the production and home consumption of copper in Japan for recent years:—

	Production.	Home Consumption.
	Tons.	Tons.
1899.....	23,890	3,000
1900.....	28,930	4,000
1901.....	27,000	5,600
1902.....	28,570	8,500
1903.....	32,600	5,900
1904.....	34,600	
1905.....	36,600	

The figures up to 1903 are taken from the official return of the Department of Agriculture and Commerce, and those for the remaining two years are taken from the statistics prepared by the Kobe office of Mr. Sumitomo, copper merchant of Osaka. Last year's production—36,600 tons—is not more than one-fifteenth of the total production of the world; but in the Orient, Japan is the largest copper producing country. While the production of copper in Japan is regarded as an important factor in the world's supply, doubt is expressed as to how long the production at the present rate can be continued. In Spain a survey is always made of the vein for 50 years working in advance, with the necessary arrangements to ensure production for 50 years. In Japan, operations are continued without method; no trouble is taken to survey the veins with a view to future supplies. This fact is causing doubt in the foreign copper market, as it is felt that no reliability can be placed upon Japanese supplies owing to the neglect of prospecting for new deposits.

THE RICE CROP.

According to reports from different sources, the rice crop of Japan for the coming autumn promises to be abundant, or at least to be much more so than that of last autumn. Farmers in the eastern provinces are expecting a record crop over recent years. The weather has been comparatively favourable ever since the rice was planted. The locusts this year have not been destructive; the plants have attained more than satisfactory growth on the whole; and but for heavy storms in the future, the crop will be a record one. There are, of course, some exceptions where disastrous floods were experienced some time ago, and rice fields extending to thousands of acres were completely ruined. These exceptional cases are, however, insignificant when compared with the area under cultivation, and will be fully made up by the abundance of the crop in the rice-growing provinces generally.

SILK CONDITIONS.

The outlook for the silk crop this year is very good. The newspapers reviewing the situation say that according to latest investigations the autumn crop of silk cocoons in Japan, is estimated to show a thirty per cent increase over the average crop figure. But the market conditions are less satisfactory. The home consumption is curtailing, caused by the practice of economy enjoined upon the people in view of the heavy demands made upon them because of the war obligations.

The foreign market is something of an enigma. It is not overloaded, rather the contrary, yet it is holding down the price. The silk trade of Japan is with equal persistency holding up the price. The foreign market and the exporter are therefore a long way apart. The result, few transactions, and stagnation all along the line.

THE OPIUM TRADE.

While the ginseng plant is permitted, in China, its profitable traffic with its harmful or harmless effects, so long as its consumers can afford the luxury, the poppy and its product are threatened with prohibition. But prohibition in the Orient, means very much what it means in the occident when applied to another great traffic. It represents on one hand a salutary reform; but on the other, a formidable combination of custom, habit, and vested interests. Whether the later may be arbitrarily circumvented, to the end that in a purely voluntary realm moral aims may succeed when moral suasion has proven weak for complete results, is a question to which there will be conflicting answers doubtless until the millenium.

The practical aspect of the case represents Great Britain and China, both taking adverse action, the latter by imperial decree, the former by parliamentary resolution. Both are interested too in the traffic, as a large trade item and as a source of revenue. And since Great Britain has been constituted the collector of China's customs, and is further responsible for the application of the money collected, this is a serious complication greatly swelling the volume of complications arising out of the private interests involved, to say nothing of the other alleged right, that of the individual, to eat, drink, and smoke whatever he can pay for.

However, the Tokio newspapers are informed from Peking that an imperial rescript has been promulgated to the effect following:—

‘Since the removal of the restrictions upon opium the country has suffered severely from the poisonous drug. Men have become indifferent to food and have abandoned their occupations, which state of affairs has for many years contributed materially to the impoverishment of the nation. To-day, when the throne is labouring earnestly to promote the country's prosperity and develop its military strength, all classes must unite to abolish evil and debilitating customs. Therefore in ten years from the present time it shall be declared unlawful for any one to smoke or eat opium, and all cultivation of the poppy shall be strictly forbidden throughout the length and breadth of the land. The throne invites memorials containing drafts of law for carrying out this reform.’

Every foreign newspaper in Japan, and doubtless throughout the far east, is now engaged in discussing this surprising anti-opium edict. The *Japan Daily Mail* (Yokohama), commenting upon the subject says: ‘Vested interests, however, cannot be ignored. For nearly fifty years opium has been an openly recognized article of the China trade and it now stands for some twenty-eight millions of taels in the annual import returns. Is that great item of commerce to be wiped out by a stroke of the pen? We must assume, however, that this phase of the question has received full attention from the throne's advisers, and that there really is a serious purpose to eradicate the evil. The Chinese government had it set out deliberately to furnish a sensation for the world's excitement, could not have taken a more effective measure than the issue of this rescript.’

The vested rights in the trade, with the vested right of China's creditors in whose behalf her customs revenues are pledged and administered by a British commissioner, makes a weighty point of resistance. Ten years is a long notice of action, however, and since in the argument it appears that there is a reasonable doubt of the legality of the importation of opium surviving judicial test, the ten years may be accepted by the vested interests as a fair warning. That Japan, many years ago, prohibited the opium trade within her borders, may be taken as a tribute to her moral sensibility. But the legal prohibition of opium did not necessarily preclude Japanese enterprise from sharing in the casual advantages incidental to the traffic. Upon this point it is said that there is a considerable manufacture and export by Japan of the implements for hypodermic injection of morphine, greatly practised by the Chinese. According to the imperial rescript there will be ten years' sunshine for the Japanese manufacturer of syringes, during which he will industriously make hay, no doubt.

DECLINED FOR FINANCIAL REASONS.

The Japanese government has been invited to make an exhibit at the marine fair, to be held at Bordeaux, France, next year. After due consideration, the invitation has been declined, for financial reasons. The *Japan Times*, with authority, no doubt, says, however, the Department of Agriculture and Commerce approves of the proposal upon its merits, and will take measures to encourage private enterprise to make the most of the opportunity.

DEVELOPING JAPAN.

An 'Association for the Development of Foreign Trade' has been formed at Tokio with several leading citizens at the head of it, with the view to promoting trade abroad. The object of this society is to advertise Japan. Members will travel through Europe and America, and by means of cinematograph shows present before the foreign public the real state of Japanese industries. Another idea is to connect the Japanese merchants with foreigners and enter into what is known as sample contracts, so as to facilitate business relations. They have advertised to enlist the sympathy and help of Japanese firms and companies, their object being to introduce these firms to the foreign public.

The *Kangyo* (Industrial Review) just issued, is made a special number in commemoration of the first anniversary of its publication. It proposes to devote its whole energy to the development of the foreign trade of Japan and contains articles by Count Okuma, Baron Shibusawa, Dr. Amano, Mr. K. Murai, and other prominent persons. The English department of the magazine contains many readable pages.

The Japan Marine Products' Association's exhibition will be opened at Yokohama on October 7, and the ceremony of conferring prizes on the exhibitors will be held on the 14th of the same month. The latter ceremony will be attended by H.I.H. Prince Arisugawa. The association will hold a general meeting also on the 14th proximo, which Prince Arisugawa will attend. His Highness will pay a visit to the Educational Aquarium in Yokohama on the same occasion.

CEMENT IN DEMAND.

Cement continues to be shipped in large quantities for San Francisco. The amount shipped for use there by the cement works in Osaka exceeds 400,000 barrels, and it is estimated that 600,000 more barrels will be required for the Pacific coast. The Osaka Cement Company is extending its works with the object of attaining an annual output of about 250,000 barrels and at present the works are in operation night and day.

ALEX. MACLEAN.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. MacNamara.)

CANADA CHAMBERS, 36 SPRING GARDENS,

MANCHESTER, ENG., October 15, 1906.

COLD TRANSIT SHED AT MANCHESTER DOCKS.

Fully realizing the necessity of affording to the British importer the amplest facility and best appliances for the protection of refrigerated commodities upon landing at their quays, the Manchester Ship Canal Company have recently added a refrigerated chamber at No. 9 dock for the purpose of sorting out shipments of frozen mutton, butter and other perishable and dairy produce for delivery to the different consignees, thus avoiding any danger to such traffic through exposure to high temperature.

This cold transit shed consists of an insulated chamber 123 feet 6 inches long, 99 feet 3 inches wide, and 7 feet 5 inches high on the first floor, and at the easterly end of No. 9 dock, which forms part of the berth appropriated to the steamers arriving at Manchester from Australia and New Zealand.

It is questionable whether a cold transit shed of this nature is provided at any other port in Great Britain, and the enterprise of the canal company in this matter shows their willingness to specially cater for the colonial trade, and do all in their power to get perishable goods into the hands of the consumers in the best possible condition.

The canal is now being deepened a further two feet, giving a total excavated depth through of 28 feet, and the Manchester Liners, Ltd., are running regular lines from Montreal and Quebec. During this summer this service has been of a more frequent and regular nature than in previous years, owing to the general improvement in trade, and the large volume of traffic now moving by direct steamers to Manchester.

HOPS.

The best available sources of information indicate that the hop crop of this season has been but a very indifferent one. The long spell of hot dry weather has had a very bad effect, not only curtailing their development, but also increasing the blight, and in consequence prices have advanced materially. Reports from the continent points also to a short crop, and dealers look for a continuance of high prices. The British trade returns give the following figures as the importations for the month of August, 1906, and also for eight months ending August 31, 1906:—

	AUGUST, 1906.		
	Quantity.	Value.	Per lb.
	Cwt.	£	Cts.
United States	3,619	14,404	17½
Other Countries	2,137	7,617	15½

	EIGHT MONTHS ENDING 31ST AUGUST, 1906.		
	Quantity.	Value.	Per lb.
	Cwt.	£	Cts.
United States.....	74,735	280,719	16
Other Countries.....	44,066	134,497	13½

London seems to monopolize the largest share of the hop business, and firms engaged in the hop trade here seem to be branches of London houses.

A steamship company having direct sailings from Canadian ports to Manchester quoted approximate freight 7s. 6d. per 40 cubic feet, equivalent to £2 8s. 9d. per ton of 2,240 lbs., or one-half cent per lb.

APPLES AT MANCHESTER.

During the past week the shipments of apples ex. 'Manchester Commerce' have been sold here, and although the fruit was chiefly fall varieties, was rather deficient in colour, still prices on the whole have been fairly good and serve to indicate that the market will pay good figures for any really good apples.

The following prices were realized:—

- Colverts, from 13s. to 15s.
- Wealthy, from 14s. to 16s.
- Blenheims, from 13s. 6d. to 16s.
- Gravenstein, 14s. to 17s.
- Holland Pippin, from 13s. to 14s.
- Various, from 12s. to 15s. per brl:

As a good deal of the above fruit was short of colour this fact naturally affected the prices to some extent, as the demand here is at present running chiefly on fruit of good colour.

Messrs. Woodall & Co., reports that apple arrivals at Liverpool were as follows:—

Arrivals this week, 27,512 barrels, 137 boxes, 27,558 barrels.

Arrivals to date, 71,590 barrels, against same period last year 138,426 barrels.

APPLE RECEIPTS FOR THE SEASON.

Total receipts this season to date are 71,590 barrels, 27,558 of which arrived this week, as against 138,426 barrels up to same period last year. The English crop has turned out larger than expected, and is excellent in quality. These are now filling the market and seriously affecting the situation for American and Canadian. In addition to this the bulk of arrivals have been fall fruit, and from Boston districts immature Baldwins, which, except in a few instances, have been unattractive, with the result that a low range of prices had to be accepted. This is the general experience when home fruit is plentiful and imports do not show sufficient superiority to command the trade. The probabilities are that home supplies will be strongly in evidence for a further three or four weeks, and it therefore cannot be expected that any noticeable improvement can take place. The only hopeful outlook is that every arrival from now on should bring better matured winter stock, and thus divert the trade to what is certainly the superior article. Canadian have been generally disappointing, probably owing to a spell of hot weather at time of shipment. Some western Ben Davies showed splendid colour and appearance, but attractiveness is the chief qualification of this variety.

At yesterday's sales, with fairly large supplies, there was a dragging demand, and the market closed very dull at the following quotations:—

Western.

	Firsts.	Seconds and Slack.
Ben Davies.	13s. 6d. to 15s. 6d.	10s. to 14s.

Canadian.

	Firsts.	Seconds and Slack.
Snows.	15s. 6d. to 20s.	7s. to 14s.
Greenings.	15s. to 18s.	9s. to 14s. 3d.
Kings.	19s. to 23s. 6d.	15s. 6d. to 17s. 9d.
Colverts.	14s. to 16s.	11s. to 13s. 6d.

BRITISH BANKRUPTCIES.

The following statement obtained from the annual bankruptcy return of the board of trade recently issued, may be of interest. It shows that during the year 1905, in England and Wales, there were 8,603 bankruptcies, a decrease of 28 on the year preceding. The estimated loss to creditors was £7,665,088, a decrease of £1,706,692 as compared with 1904.

BIRCH FOR COTTON REELS.

It is stated that practically all the wood used for making reels for cotton in Great Britain is cut in the Maine woods, but so great is the amount of timber required each year for making these small articles that Maine will not be able to supply the raw material much longer. The reels are made of birchwood, and the birch of the Maine forests is said to be considered the best for the purpose. The question arises has the Canadian birch been considered and fairly tested in arriving at this conclusion, and is it not advisable that Canadian timber exporters should look into the matter carefully and endeavour to place the Canadian product in this market? More than two million feet of timber is shipped to Scotland every year for the use of the great thread manufacturers there.

THE LATEST ROAD MATERIAL.

The latest road material, claimed to solve the dust problem, is taafalt, really a cheap, artificial asphalt, consisting of about 12 per cent of tar or pitch, powdered limestone, powdered furnace slag, and an alkaline solution, all mixed in proper proportions, and heated to over 300 degrees Fahr. in a vacuum. Chemical changes occur in the heating, and the resulting material, when applied to the road, settles hard and does not become plastic in hot weather, as is the case with ordinary asphalt or tar treated roads. It can be used as a road surface at a cost of 4d. per square yard, or a road can be entirely made with it for 3s. (three shillings) per yard, a cost which shows it to be very economical in comparison with other road-making materials. It is dustless in dry and free from slipperiness in wet weather, unaffected by heat or frost, and, while resilient, is rigid under heavy traffic.

The above appeared in one of the scientific journals recently, and may be of interest to some Canadian municipalities.

P. B. MACNAMARA.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(Mr. J. S. Larke.)

THE ROYAL EXCHANGE, SYDNEY, AUSTRALIA, September 24, 1906.

NEW ZEALAND TRADE, 1905.

The returns of the trade of New Zealand for 1905 have been issued. The total trade for four years was:—

	Imports.	Exports.
1902.	£11,326,723	£13,644,977
1903.	12,788,679	15,010,378
1904.	13,291,694	14,744,348
1905.	12,828,857	15,655,947

Per head of the population the trade was:—

	Imports.	Exports.
1902.	£11 3 11	£17 2 1
1903.	15 11 10	18 6 0
1904.	15 14 7	17 9 1
1905.	14 14 11	17 19 11

The Canadian share of the trade was:—

	Imports from Canada.	Exports to Canada.
1902.	£ 52,374	£ 7,366
1903.	68,329	2,421
1904.	113,485	15,961
1905.	96,119	51,329

IMPORTS FROM CANADA.

The following are the items of the imports from Canada for 1902-3-4-5:—

The totals of the items given for the trade of 1905 do not agree with the total of the imports from Canada, by £101. This is probably due to a misprint.

EXPORTS TO CANADA.

The exports of the produce of New Zealand for the years 1904-5 were:—

	1904.	1905.
Butter.....	£ 1,244	£ 1,764
Kauri gum.....	879	523
Flax.....	10,345	7,227
Wool.....	1,676	32,388
Ploughs.....		30
Meats, potted.....		47
Preserved milk.....		10
Provisions.....		59
Window sashes.....		2
Seeds.....		732
Skins.....		1,865
Skins, sheep.....		5,914

The balance consists of small items not of New Zealand produce.

DEVELOPMENT OF TRADE.

The total trade between New Zealand and Canada in 1905 was £147,448 as against £129,446 for the previous year. This would apparently show a fair growth, but an examination of the items shows that the development is wholly due to the great increase of exports from New Zealand to Canada, which increased more than three-fold during the last year, the increase being in wool, skins and sheep skins—a trade formerly done from Australia, but which now has fallen to New Zealand. An examination of the items of import shows a very heavy decline in bicycles and materials, which has been steadily declining for the last four years; in cotton goods, boots and shoes, agricultural machinery, paper-hangings and other items of less extent. The decline in agricultural machinery is due in part to the over-importations of the previous year.

ANALYSIS OF IMPORTS FROM CANADA.

An examination of the total imports and the comparison with that of the previous year would not appear to be encouraging, but there is evidence to show that the figures do not represent the actual trade. In New Zealand, as in Australia, the importations from Canada are under-stated, and in some cases to a considerable amount. The following statement giving first the exports from Canada to New Zealand, according to Canadian returns, and secondly, the imports into New Zealand from Canada according to New Zealand returns, will illustrate this:—

	Canadian Returns.	New Zealand Returns.
	£	£
Cottons.....	15,935	12,652
Books.....	401	24
India rubber goods.....	6,400	4,279
Paper.....	22,100	19,236
Agricultural implements.....	19,601	8,197
Furniture.....	5,618	3,999
Paper-hangings.....	2,180	1,777

DIFFERENCE IN STATISTICS.

The difference in the returns on these seven items is over £22,000. The Canadian returns, instead of showing, as the New Zealand returns do, a decline, in some articles of export show the opposite, but this is not all. As would naturally be expected, United States export agents, finding there was a preference on some lines in favour of Canadian goods, sought these goods in Canada. The New Zealand returns show this to have been the case. Goods are credited to the United States which escaped paying the higher duties levied under the preferential tariff, which must have come from Canada. In twenty-four lines there was an entry of over £12,000 in value of such goods. This does not include paper and railway materials, amounting to over £40,000, some of which may have come from Canada, but probably not a very large quantity. It may be taken, therefore, from these facts, that the exports of Canada to New Zealand last year did not decrease as compared with the previous year. Still, the improvement in Canadian exports is not what is was hoped it would be, particularly in view of the preferential duties in favour of a number of lines of Canadian goods.

PREFERENTIAL DUTIES.

The imports from foreign countries of goods subject to increased duties under the preference granted to Great Britain and Canada were: 1904, £487,867; 1905, £599,764. This would apparently show an increase in the foreign trade in spite of the heavier duties. This is not conclusive, as the duties did not go into effect until March 31, 1904, on such articles as had been ordered prior to the passing of the tariff. The following is a table of the imports from Canada, United States and total importations from all countries of the lines on which Canada and Great Britain enjoy a preferential tariff:—

Article.	From Canada.	From United States.	From all foreign countries.

Totals	66,668	215,495	439,784

OPPORTUNITY FOR CANADIAN TRADE.

It will be seen that there is room for a very considerable expansion of Canadian trade, particularly in the lines of boots and shoes, furniture and paper. The figures in the statement respecting paper do not convey all the facts. The total importation of printing paper last year was £133,436, nearly the whole of it, as will be seen, coming in without being subject to the preferential tariff. The Act exempted for three years contracts which had been entered into by newspapers for that period from the excess duties. These contracts will shortly expire and Canadian paper makers ought to very largely increase the trade which is now being done. In wrapping paper the total imports were £9,746, nearly one-half of which paid the extra duty of 2s. 6d. per cwt. Canada has scarcely touched this line.

J. S. LARKE.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(Mr. E. D. Arnaud.)

GAZETTE BUILDINGS, ST. JOHN'S, October 23, 1906.

ASH STAVES.

An inquiry has been made at this agency for a supply of ash staves suitable for the manufacture of fish drums. On inquiry at the Customs, I learn that the only staves imported into this colony last year consisted of 485,547 oak staves of the value of \$18,451, from United States, used for the making of oil casks, and the very small quantity of 147 staves for herring packages imported on the west coast from Canada. The bulk of the staves used here are manufactured by the local steam cooperage, and are made of white birch grown in the colony, supplemented by a large number of empty flour barrels, which bring about 16 cents each.

DEMAND FOR STAVES INCREASING.

A large quantity of fish that was formerly exported in bulk is now put up in packages, and consequently there is an increasing demand for the staves necessary for this trade. Canadian manufacturers of staves suitable for the above-mentioned uses are recommended to ascertain what they can do towards supplying the demands of this market.

DUTIES ON STAVES.

On oak staves undressed.	5 per cent ad valorem.
On other woods undressed.	25 " "
Manufactured dressed or partly manu- factured and dressed.	\$5 50 per 1,200

E. D. ARNAUD.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. Ball.)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., October 16, 1906.

CALCIUM CARBIDE.

In April, 1906, I sent a report on the subject of calcium carbide, which has brought up a most interesting correspondence here. I regret to say, however, that it has not brought any correspondence from Canada. Some of the British manufacturers seem to have formed the idea that my report stated in some mysterious way that the British were not manufacturing their own calcium carbide. How they could draw such an inference I cannot understand, I merely calling attention to the fact that a very large quantity was imported from Norway, Germany and other countries.

CANADIAN CALCIUM CARBIDE NOT UP TO STANDARD.

I received one letter this morning stating that Canada is shipping a certain amount of calcium carbide to this country, 'and many of us would prefer to buy from Canada instead of from Norway or Germany, but unfortunately the quality of the goods is not up to our standard.' This is a matter now for the Canadian manufacturer to look into. There is one thing that the British want, and that is a first-class article, and all Canadian exporters, in whatever class of goods, should bear that fact in mind. The British naturally wish to buy their goods as cheaply as possible, but they will not buy an inferior article because it is a shade cheaper.

P. B. BALL.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA,
AND TASMANIA.*(Mr. D. H. Ross.)*

STOCK EXCHANGE BUILDING, MELBOURNE, September 22, 1906.

COMMONWEALTH PROPOSALS TO TAKE OVER STATE DEBTS.

It is proposed by the Commonwealth government to take over the state debts, and in order to do so it is necessary to alter the constitution. If the government succeeds in altering the constitution the question will be submitted to a referendum at the approaching elections. It is assumed that the Commonwealth can float loans at $\frac{1}{4}$ per cent better than the states, and upon that basis a special return has been presented to parliament by the federal treasurer.

The total amount of the existing public debts of the Australian states is shown to be £236,680,739. Of this amount £54,319,106 represents loans at 3 per cent, and it is

not expected that they could be refloated at a much lower rate of interest. The existing debts, other than those at 3 per cent, amount to £182,361,633. A saving of $\frac{1}{4}$ per cent on £182,361,633 would amount to £440,564, which, multiplied by the years up to 1952, would give an aggregate saving of £14,415,194. To this is added £1,230,822, being ' $\frac{1}{4}$ per cent on the amount of 3 per cent debt, multiplied by the number of years from latest redeemable date up to 1952.' A grand total saving of £15,646,016, or approximately, £16,000,000 is thus shown. The total amount of saving is apportioned as under:—

New South Wales..	£5,548,604
Victoria..	3,506,711
Queensland..	2,674,915
South Australia..	1,975,302
Western Australia..	1,179,370
Tasmania..	761,114
Total..	£15,646,016

AUSTRALIAN GOLD FOR THE UNITED STATES.

The official returns show that specie has been exported from Australia to the United States during recent years as follows:—

1902..	£1,601,000
1903..	1,500,000
1904..	1,161,000
1905..	338
1906 (8 months)..	1,870,000

About half of this year's exports was sent via Vancouver in transit for San Francisco. Further heavy shipments are probable during the next few months. The recent gold exports from Australia to the United States have been caused by abnormal conditions, and have no special relation to Australian trade with America.

AUSTRALIAN GOLD PRODUCTION TO AUGUST 31.

The Commonwealth gold production for the eight months amount, approximately, to 2,306,532 fine ounces, of the value of about £9,802,700, against 2,388,044 fine ounces, of the value of about £10,149,000 for the corresponding period of last year. The net decrease is 81,512 ounces. Increases are shown by Victoria and New South Wales, and decreases by Queensland and Western Australia.

THE AUSTRALIAN COMMERCE ACT.

In Monthly Report for June, 1906, p. 2124, I gave some preliminary information regarding the Australian Commerce Act which is largely based upon the Merchandise Marks Act of Great Britain. The regulations relating to the compulsory marking of the prescribed imports do not come into force until January 1, 1907, but those relating to the compulsory marking of the prescribed exports will come into operation on October 1, 1906. In the meantime, the Commerce (Trade Descriptions) Act, as it stands, applies to any descriptions voluntarily affixed to any goods, and requires that such descriptions shall be in accordance with fact and shall not contain any suggestion which might mislead any person in any matter relating to the goods.

PENALTIES UNDER AUSTRALIAN COMMERCE ACT.

Clause 10 of the Australian Commerce (Trade Descriptions) Act reads: 'all goods to which any false trade description is applied are hereby prohibited to be imported, and shall, if imported, be forfeited to the King.' Provision is made, however, to prevent undue hardship where the importer can prove that he had no desire to mislead the

public. In some instances fines of £100 can be imposed—where the importer has acted in ignorance—instead of absolutely forfeiting the goods. The Act is extremely drastic, and Canadian exporters should take special note of the regulations which, so far as any special inquiries are concerned, can be obtained upon application to the Superintendent of Commercial Agencies, Ottawa.

AUSTRALIAN TRADE CONDITIONS.

In most departments of the import trade business continues to be exceptionally good, though in some instances the uncertainty as to the proposed alterations in the customs tariff has checked the placing of some large orders for Canadian as well as other oversea goods. The outlook for pastoral, agricultural, dairying and mining industries is most encouraging, as in nearly every instance, the output is being increased by the stimulating influence of high prices. The cereal crops have so far had fair spring weather, and, while the next two months are most uncertain, it is anticipated that Australia will produce more than 60,000,000 bushels of wheat this season. Imports and exports are expanding, and with a settled tariff, greater increases are with confidence expected.

CANADIAN TRADE NOTES.

Large shipments of Canadian chairs, sundry lines of furniture and iron piping are now landing in Melbourne. Canadian pipe makers have been unable to meet United States competition in some exceedingly large orders placed recently by local importers. Canadian axes are being slowly introduced after a hard fight with the old brands, which controlled the market for many years. Quite a large number of indents have recently been taken in South Australia for varied lines of 'made in Canada' goods. An increasing business is being done in glace kid and other leathers shipped by Canadian tanners, who are giving special care to the export business. British Columbia cannerymen are unable to execute Australian orders for salmon. Local supplies are short, prices are advancing, and there is little chance of any salmon being carried over from this season. Manufacturers' agents report much business being held over until the tariff proposals are definitely settled.

D. H. ROSS.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(*Mr. J. B. Jackson.*)

NORTH BRITISH AND MERCANTILE BUILDINGS,
EAST PARADE, LEEDS, ENG., October 18, 1906.

APPLES.

The apple trade in this district is very brisk at present, and already quite large shipments of Canadian apples have been received in Hull, Leeds, Sheffield and Newcastle-on-Tyne. The attention that is given to this trade is fully exemplified by the large number of representatives of Yorkshire fruit importing firms who are at present in Canada making arrangements for apple shipments. At present, to my knowledge, there are twelve representatives from Yorkshire in Canada, and five others are on their way out.

DISTRICTS DEMAND VARYING CLASSES.

It would help the Canadian shippers to get the best prices for their products, if they obtained careful information from the different centres, as to the class of apples in greatest demand; for it will be found in the different districts in England, different classes of apples are preferred; for instance, a class of apple which would sell well in Hull, would probably obtain very little demand in Manchester or Birmingham.

The great fruit centre of England (Covent Garden, London), I am told by a leading fruit expert here, has got a particular preference for 'greenings.' Manchester dealers find the most demand for the largest apples exceedingly high-coloured, for supplying large restaurant and hotel trade; whilst the Leeds dealers give the preference to Russets, Baldwins and Kings and like apples.

Hull has a peculiar trade of its own, inasmuch as it has to supply many inland centres with fruit, and the dealers in that port can take shipments of almost any kind of apple.

EFFICACY OF WEEKLY REPORT.

I am also pleased to be in a position to report, that as a direct result of the trade inquiries which have appeared in the Weekly Report from this office, very many firms have got in direct communication with Canadian exporters, and are this year buying direct from the grower or shipper in Canada. This is the commencement of a large direct inland trade with the Yorkshire district, which will mean very much, both to the Canadian grower and the Yorkshire buyer, and it is to be hoped that the packing and grading will be honestly attended to at the Canadian end.

METHODS OF PACKING APPLES IMPROVING.

Whilst Canada is building up a national reputation in the scrupulous packing up of her food products, it is very interesting to note how this is gradually affecting her trade in the north of England, with result greatly to her own advantage. The government inspection of Canadian fruit before shipment, for instance, is becoming so well known here, that every confidence is now placed in barrel-packed apples.

Fruit dealing firms, independent of whether they are situated in a port, or in an inland town, have no hesitation now in buying shipments of Canadian apples direct from the actual exporter; a procedure which would have been considered impracticable to an inland firm three years ago, and which, even now, is considered a very risky piece of business, when applied to European or American packed fruit. This confidence applies with equal force to other Canadian products.

FAME OF CANADIAN FRUIT INCREASING.

Experienced and far-seeing business men here are of the opinion that all things point in one direction, viz.: that the confidence in packing, and fame of Canadian products, is responsible for bringing about a greater state of independence amongst wholesale houses in the inland towns, which will gradually but ultimately result in the larger inland firms overlooking middle men at the different ports, and transacting their trade direct with the actual shipper in Canada.

CARELESS PACKING WILL BE INVESTIGATED.

I have circulated amongst all the large buyers in this district copies of the Fruits Mark Act, and full particulars as to the packing and grading required by the Act, and I am arranging to have definite and full particulars of the principal shipments, and if any attempt to palm off apples that are not graded and packed according to the regulations is attempted, full investigations will be made into the matter.

I discovered one lot of 'Ribstone Pippins,' No. 1's, which arrived in Leeds last week direct from the shipper which were very badly packed, being exceedingly slack, and on account thereof the fruit was very much bruised and disfigured. It was a shame to see such beautiful fruit so completely ruined. The curious fact in connection with this shipment was that the other varieties of apples in the shipment were well packed, and arrived in first-class condition, and were all from the same shipper. The whole shipment was exceedingly well graded. Although the buyer here was disappointed with the condition of the 'Ribstone Pippins,' still he was delighted with the condition of the balance of the shipment, and he is sending out repeat orders.

WHOLESALE LEEDS PRICES.

The prices in Leeds wholesale market to-day are as follows:—

Blenheims.	17s.	to 20s.	per barrel.
Snows, No. 1.	16s. 9d.	to 19s. 9d.	"
Snows, No. 2.	10s. 8d.	to 16s. 9d.	"
Culverts, No. 1.	16s. 9d.	to 19s. 8d.	"
Culverts, No. 2.	14s. 9d.	to 17s. 9d.	"
Greenings, No. 1.	17s. 8d.	to 19s. 9d.	"
Greenings, No. 2.	14s. 7d.	to 16s. 8d.	"

These prices are considered exceedingly high for this time of the year.

CANADIAN WHEAT REACHES HULL.

Canadian wheat is beginning to reach Hull from Montreal, some 25,000 bushels arriving last week. The inward trade from the British colonies to Hull in 1905 was as follows:—

	Tons.
From Australia.	32,405
" Canada.	4,220
" India.	250,428

Australia, by reason of her direct line to Hull, is making rapid progress in regard to her food products imported into Yorkshire, and during the year 1906 the increase will still be more marked.

PIT PROPS.

Hull's timber trade with the Baltic is seriously dislocated by Russia's internal affairs, and local importers are finding difficulty in obtaining regular shipments of pit props. Whilst Canadian prices are dearer than those asked by Baltic shippers when the trade is in a normal condition, yet the present circumstances offer no alternative but to obtain supplies from Canada. The props should be free from bark and of good sound quality, and must be shipped in regular monthly quantities from November, 1906, to May, 1907, or at quicker rates if they can be supplied.

Prices are asked at 72 lineal feet, c.i.f., Hull, and the props must be cut to the following specific lengths, which is an example of what one firm requires immediately:—

7 inches diameter top—

10,000 7 feet 6 inches long.

12,000 8 feet long.

5,000 9 feet long.

8,000 7 feet 6 inches long.

8,000 8 feet long.

4,000 9 feet long.

8 inches diameter top—

2,000 7 feet 6 inches long.

3,000 8 feet long.

1,000 9 feet long.

GRINDSTONES.

To those interested in the importing of grindstones, this district offers the best opportunity in north England; a large trade being done with the United States, India and South Africa. All kinds of grindstones are manufactured, in sizes ranging from six inches up to seven feet in diameter, for purposes varying from the grinding of a pin to the bevelling of glass.

American firms are also extensive users of these stones in the manufacture of wood pulp. When placing orders it is most essential that the class of work the stone is intended for should be stated.

INROADS OF CANADIAN FLOUR IN ENGLAND.

Local millers are much concerned in this district at the inroads which Canadian flour has made in the English market during the past three years. The imports of Canadian flour for the first nine months of 1905 was 847,000 cwts. This year these imports have increased to 1,520,000 cwts. in the same period.

Vigorous efforts are to be made to meet this competition, as otherwise the English millers are of the opinion that in a short time Canada will capture this trade in Great Britain. Evidently before long a fierce fight for supremacy will take place, and several of the Yorkshire millers are increasing their producing powers in preparation for this event.

IMPORTS OF HAY FROM CANADA INCREASING.

The hay trade from Canada is increasing very rapidly in this district. In the city of York, which is the headquarters of the northeastern military district, some £1,500 worth of Canadian hay has been sold to the army authorities, and in other directions during the past few months. The army authorities favour Canadian hay when it is well baled, and prefer it to all foreign varieties.

York, itself, is the centre of a large agricultural district, but notwithstanding this, local forage contractors always fall back on Canadian hay when there is a dearth in the home market.

The price for Canadian hay during the last few weeks has been as high as 78 shillings per ton. Canadian shippers should not, however, hope to do a direct trade at present with this city, as the merchants invariably buy from the Hull importers.

REPUTATION OF CANADIAN ORGANS GOOD.

During the past ten years the sales of both home and foreign made organs have seriously diminished in Yorkshire, still, the reputation of Canadian organs obtains for them a demand equal, if not greater, than that obtained by any other organ. Results show that one Canadian organ is sold to every one of English manufacture, and the average is more favourable still, when compared with foreign made instruments.

JNO. B. JACKSON.

TRINIDAD AND TOBAGO.

REPORT OF COMMERCIAL AGENT.

(Mr. Edgar E. Tripp.)

PORT OF SPAIN, TRINIDAD, October 20, 1906.

TRINIDAD TRADE.

The quarterly customs returns to September 30 have been issued, showing the total imports entered for consumption to have been £600,419, and the exports £459,705, against £514,023 and £342,510, respectively, for the corresponding period last year. On the face of it the increase appears very gratifying, but when looked into it is seen that £46,000 imports and £63,000 of the exports are represented by bullion and specie over and above the quantities that passed through the colony in 1905.

CEDAR.

The most noticeable item was cedar, of which there were shipped during the three months under review 143,525 cubic feet, valued at £21,530, against only 13,274 cubic feet in 1905. This mostly goes to the continent, and the demand and price are steadily increasing. The export of this wood is quite a new trade for the colony.

SOAP.

I am glad to note that shipments of soap are being maintained. There is a capital market here for the ordinary washing soaps.

TABLE BUTTER.

Table butter also is working its way into favour and compares well in quality and price with the foreign article.

EDGAR TRIPP.

NOTE.—'Special' means, in the case of Imports, 'Imports for Home Consumption,' in case of Exports Exports of Domestic Produce and Manufacture.' (a) The figures for Mexico include Coin and Bullion.

NEW TARIFFS.

During the month under review there have been distributed from this department to all the principal Custom-houses and Boards of Trade throughout the Dominion, copies of all foreign and colonial tariffs and supplements thereto, as furnished during that period by the International Customs Tariff Bureau, which are always available for reference by those interested therein, resident at the principal centres of trade. The following British and Colonial are supplemental to those published in the departmental annual report, 1893, and the quarterly and monthly reports since published, and comprise all additions thereto or changes therein, so far as the department has authentic advice.

ST. HELENA.

TABLE OF CUSTOMS DUTIES, WHARFAGE AND OTHER DUES.

(The Customs Ordinance No. 3, dated July 3, 1905, entered into force January 1, 1906.)

Condemned vessels for demolition, with their tackle, apparel and furniture	per ton measurement	1 3
All articles of every description not enumerated in the above.	each	0 6
One-half of the foregoing wharfage dues to be charged on goods landed from ships or vessels discharging for repairs; on whale oil and bone landed for reshipment into any vessel; and on empty casks and tanks landed from vessels which are to be broken up.		
Copper ore, coals, patent fuel and sand may for convenience be landed in bags or other packages, paying wharfage on bulk, if so stowed on board the importing ship.		
For every hulk lying within three miles of the island after the first twelve calendar months, per original registered ton, per month.		0 0½
For the use of the government anchors on the beach for vessels originally measuring 500 tons and upwards.	each	60 0
— originally measuring 200 tons and under 500 tons.		30 0
All others.		20 0
For any boat which shall be landed on the wharf so long as the same may remain, at per week.		0 6
If any goods shall be left on the wharf for a longer period than forty-eight hours, additional wharfage dues shall be charged for the same for every subsequent additional seven days or part of seven days at the same rate as originally imposed.		

SHIPPING DUES.

All vessels, including hired transports, bringing cargo for this port or obtaining cargo at this port shall pay upon all cargo so landed or shipped at the rate of 1s. per ton, the number of tons to be ascertained either by the total upon which freight has or has not been charged, or otherwise by weight or measurement of the cargo landed or shipped.		1 0
All vessels bringing live stock shall pay upon horses, oxen, mules and asses, imported.	per head	5 0
Sheep.	per head	1 0

EXCEPTIONS.

Stores and clothing intended exclusively for use on His Majesty's service; the regulation allowances of luggage of officers and others in His Majesty's service, and passengers clothing in actual use; goods cleared from bond as cargo, or for ship's stores; trees, plants, shrubs, coin, birds, natural curiosities; oil and whalers catchings transhipped; shooks, heads and staves, and goods other than wines, beer, spirits, and tobacco for vessels engaged in the whale fishery; empty cases, casks and tins landed for the purpose of being filled for immediate reshipment on board the vessel from which they were landed, and manure for island use collected on the coasts.

TARIFF CHANGES.

UNITED KINGDOM.

I.—ABOLITION OF EXPORT DUTY ON COAL.

(Finance Act, 1906.)

Section 3 of the Finance Act, 1906, provides that on the first day of November, 1906, the duty on coal imposed by section 3 of the Finance Act, 1901, shall cease.

II.—TREATY OF FRIENDSHIP, COMMERCE AND NAVIGATION BETWEEN THE UNITED KINGDOM AND THE REPUBLIC OF NICARAGUA, SIGNED AT MANAGUA, JULY 28, 1905.—RATIFICATIONS EXCHANGED AT LONDON, AUGUST 24, 1906.

By this treaty, which came into effect ten days after the exchange of ratifications and is to remain in force for a period of ten years, and thereafter until one year after denunciation by either contracting party, mutual most-favoured-nation treatment as regards import and export duties, and as regards all prohibitions and restrictions on importation and exportation, is provided for; exception being made, however, in the case of certain advantages accorded by Nicaragua to the Central American Republics only.

ISLE OF MAN.

REDUCTION OF DUTY ON TEA.

(General Customs Order No. 40, of June 1, 1906.)

The rate of duty on tea removed or imported into the Isle of Man has, by a resolution of the Tynwald Court, been reduced, as from May 14, 1906, from sixpence to fivepence per pound.

AUSTRALIAN COMMONWEALTH.

CUSTOMS TARIFF.

No. 14 of 1906.

An Act relating to Duties of Customs.

[Assented to 12th October, 1906.]

Be it enacted by the King's Most Excellent Majesty, the Senate, and the House of Representatives of the Commonwealth of Australia, as follows:—

1. This Act may be cited as the 'Customs Tariff, 1906.'

2. In lieu of the duties of customs imposed by the Customs Tariff, 1902, on the dutiable goods specified in the schedule to this Act, duties of customs shall, from the

twenty-eighth day of August, one thousand nine hundred and six, at half-past four o'clock in the afternoon according to the standard time in the state of Victoria or from such later dates as are mentioned in the said schedule as regards particular items, be imposed on the dutiable goods specified in Part I. of the Schedule in accordance with the rates of duty set out therein. The goods specified in Part II. of the first schedule shall be free of customs duty.

3. The duties of customs specified in the schedule to this Act shall be charged, collected and paid to the use of the King for the purposes of the Commonwealth on the dutiable goods specified in the said schedule and imported into Australia after the time from which the said duties are imposed or imported into Australia before that time and not entered for home consumption until after that time.

4. If the Governor General is satisfied that the cash prices at which stripper harvesters and drills manufactured in Australia are sold exceeds the prices hereunder set out he may by proclamation reduce the rate of duty specified in the schedule in respect of stripper harvesters, but so that the reduction shall not reduce the rate of duty below one-half the rate of duty imposed by this Act.

Prices of Australian Stripper Harvesters.

On and after 1st February, 1907—

Stripper Harvesters, 5-foot size and under, price £70.
Stripper Harvesters, 5-foot 6-inch to 6-foot size, price £75.
Stripper Harvesters, 6-foot size and over, price £80.

On and after 1st February, 1908—

Stripper Harvesters, 5-foot size and under, price £65.
Stripper Harvesters, 5-foot 6-inch to 6-foot size, price £70.
Stripper Harvesters, 6-foot size and over, price £75.

Prices of Australian Drills (Fertilizer, Seed, and Grain).

On and after 1st February, 1907—

	<i>Hoe drills.</i>		<i>Disc drills.</i>
11 x 7 size.. . . .	£30 17s.	£32 15s
13 x 7 "	£33 5s.	£35 3s.
14 x 7 "	£34 4s.	£36 2s.
15 x 7 "	£36 2s.	£38
16 x 7 "	£37 1s.	£38 19s

On and after 1st February, 1908—

	<i>Hoe drills.</i>		<i>Disc drills.</i>
11 x 7 size.. . . .	£29 6s.	£31 2s.
13 x 7 "	£31 12s.	£33 8s.
14 x 7 "	£32 10s.	£34 6s.
15 x 7 "	£34 6s.	£36 2s.
16 x 7 "	£35 4s.	£37

The prices herein mentioned are to be the maximum prices of the harvesters and drills delivered to the purchaser at the railway station nearest to the factory where they are made or at the port nearest to the factory.

THE SCHEDULE.

EXCISE TARIFF.

No. 16 of 1906.

An Act relating to Duties of Excise.

[Assented to 12th October, 1906.]

Be it enacted by the King's Most Excellent Majesty, the Senate, and the House of Representatives of the Commonwealth of Australia, as follows:—

1. This Act may be cited as the Excise Tariff, 1906.

2. Duties of Excise shall on and from the first day of January, one thousand nine hundred and seven, be imposed on the dutiable goods specified in the schedule at the rates specified in the said schedule.

Provided that this Act shall not apply to goods manufactured by any person in any part of the Commonwealth under conditions as to the remuneration of labour which—

- (a) are declared by resolution of both Houses of the Parliament to be fair and reasonable; or
- (b) are in accordance with an industrial award under the 'Commonwealth Conciliation and Arbitration Act' 1904; or
- (c) are in accordance with the terms of an industrial agreement filed under the 'Commonwealth Conciliation and Arbitration Act,' 1904; or
- (d) are, on an application made for the purpose to the President of the Commonwealth Court of Conciliation and Arbitration, declared to be fair and reasonable by him or by a judge of the Supreme Court of a state or any person or persons who compose a state industrial authority to whom he may refer the matter.

BRITISH CENTRAL AFRICA.

I.—PROCLAMATION DATED APRIL 29, 1905, RELATING TO DRAWBACK OF IMPORT DUTY ON GUNNY BAGS, &c.

(The British Central Africa Gazette, of April 29, 1905.)

On and after May 1, 1905, a drawback of the ten per cent ad valorem import duty paid on gunny bags, gunny cloth, sacking and hooping, and other materials imported into the Protectorate, and used for packing cotton or other produce of the Protectorate for export, will be allowed, on proof being produced to the Director of Customs that such materials have bona fide so used and have left the Protectorate.

(Retrospective effect will be given from March 1, 1905.)

II.—NOTICE DATED JANUARY 31, 1906, IN REFERENCE TO CERTAIN ALCOHOLIC LIQUORS.

(The British Central Africa Gazette, of January 31, 1906.)

In accordance with the provisions of section 2 of 'The British Central Africa Liquor (Amending) Ordinance, 1906,' the following liquors are hereby declared to be exempt from the import duty prescribed by 'The British Central Africa Liquor (Amending) Ordinance, 1905': All scents and perfumes containing distilled or alcoholic liquors.

In accordance with the said powers, on all scents and perfumes exempted as above an import duty of ten per cent (10 per cent) ad valorem shall be charged.

BRITISH INDIA.

I.—EXEMPTION OF CERTAIN PRINTING AND LITHOGRAPHING ARTICLES FROM IMPORT DUTY.

(Notification by the Government of India, Department of Commerce and Industry, No. 5567-52, dated July 18, 1906—Customs Circular No. 111, of 1906.)

In exercise of the power conferred by section 23 of the Sea Customs Act, VIII. of 1878, the Governor General in Council is pleased to exempt from import duty the undermentioned articles used for printing and lithographing purposes, namely:—

- Roller moulds,
- Roller frames and stocks,
- Roller composition,
- Standing screw and hot presses,
- Perforating machines,
- Gold blocking presses,
- Stereotyping apparatus,
- Metal furniture,
- Paper folding machines,
- Paging and numbering machines,

so far as the said articles are liable to duty under schedule IV. (Import Tariff) of the Indian Tariff Act, VIII. of 1894.

II.—CLASSIFICATION OF COTTON PIECE-GOODS.

(Resolution—By the Government of India, Department of Commerce and Industry, No. 5448-5449-8, dated July 13, 1906—Customs Circular No. IV. of 1906.)

4. All 'piece-goods' enumerated in the appended list will in future be assessed to duty under article 30 of schedule IV. of the Indian Tariff Act; and a customs officer dealing with any imported article made of cotton—not being hosiery—which is not specifically included in that list will have to consider whether it should be treated as 'apparel' under article 17, or as 'other manufactured cotton goods not otherwise described' under article 30 of the schedule. In determining whether an article is in fact an article of apparel, the following definition of that term may usefully be referred to:—

'Articles of clothing for personal use or wear, which have been so cut, shaped, sewn or otherwise treated as to be ready for use or wear without further manipulation, or without further manipulation save of an unimportant character.'

5. All articles of cotton, which are neither 'piece-goods' nor 'apparel' as defined in the foregoing paragraphs, and which are not specifically included in any other head of the tariff schedules, will in general be assessed to import duty under article 30 as 'other manufactured cotton goods not otherwise described.'

6. The list of 'cotton piece-goods' referred to above is, it may be added, intended to assist customs officers in the practical administration of the Tariff Act only; and inclusion in that list does not necessarily import the requirement of stamping of length under section 10 (2) (f) of the Indian Merchandise Marks Act, 1889 (IV. of 1889), unless the article is also included in the list of piece-goods published with Government of India, Notification No. 1430, dated April 6, 1891. The orders issued in Finance and Commerce Department letter, No. 3924-S.R., dated September 15, 1896, in regard to the levy of customs duty on cotton goods embroidered with silk or wool will also remain in force.

LIST OF COTTON PIECE-GOODS.

III.—RULES FOR THE EXEMPTION OF PASSENGERS' BAGGAGE FROM CUSTOMS DUTY.

(Resolution—By the Government of India, No. 6095—6099-68, dated August 3, 1906—Customs Circular No V. of 1906..)

In supersession of the 'Rules for the exemption of passengers' baggage from customs duty,' issued with the resolution of the Government of India in the Department of Commerce and Industry, No. 5528—59-6, dated October 3, 1905, the revised rules

appended to this resolution are published in the supplement to the *Gazette of India* for general information. These rules, which will be printed on all baggage declaration forms, will supersede the previous rules and executive orders on the subject, and will come into force at all customs ports on October 1, 1906.

RULES FOR THE EXEMPTION OF PASSENGERS' BAGGAGE FROM CUSTOMS DUTY.

(1) The bona fide baggage of a passenger is exempt from duty when it accompanies him; does not form part of the cargo; and is not included in the manifest.

(2) Bona fide baggage shall include wearing apparel and personal effects, provided that the articles are not for sale and are imported for the personal use of the passenger or for the use of members of his family travelling with him; but it shall not include the following articles, on which duty must be paid in all cases:—

- (a) Arms, ammunition and all other articles enumerated in schedule II. of the Tariff Import Schedule.
- (b) Alcoholic liquor, exceeding two quarts, perfumed spirit exceeding one quart, and all other articles enumerated in schedule III.
- (c) Cigars and cigarettes exceeding one hundred in number, whether opened or unopened boxes, and other tobacco exceeding one pound in weight.
- (d) Pianos, pianolas, carriages, motor cars and motor cycles.
- (e) Articles for household use such as furniture, pictures, carpets, glass, crockery, cutlery and silver and platedware, except such articles (other than furniture or carpets) as shall appear to the customs authorities to be imported in a moderate quantity and to be required for the personal use of the passenger whilst travelling or immediately upon his arrival at his destination.

(3) Notwithstanding anything to the contrary in rule 1, bona fide baggage landed at any customs port within one month before or after the arrival of a passenger in India may, subject to the exceptions specified in rule 2, be passed free at the discretion of the collector of customs.

IV.—AMENDED TARIFF VALUES OF CERTAIN COPPER GOODS.

(Notification—By the Government of India, Department of Commerce and Industry, No. 5187-90, dated July 7, 1906—Customs Circular No. VI. of 1906.)

In exercise of the powers conferred by section 22 of the Sea Customs Act, 1878 (VIII. of 1878), the Governor General in Council is pleased to direct that, for the corresponding items of entry No. 15 in the notification of the Government of India in this department, No. 7641-78, dated December 23, 1905, the following shall be substituted, with effect from July 10, 1906, namely:—

No. 15	Names of Articles.	Tariff Valuation.		Duty.
		Rs.	a.	
	Copper braziers and sheets up to $\frac{1}{8}$ -inch thick.cwt.	63	0	5%
	— pigs, tiles, ingots, cakes, bricks and slabs.cwt.	58	0	5%
	— plate over $\frac{1}{8}$ -inch thick and sheathing.cwt.	68	0	5%
	Tin, block.cwt.	130	0	5%

V.—AMENDED TARIFF VALUES OF CERTAIN BRASS GOODS.

(Notification—By the Government of India, Department of Commerce and Industry, No. 6274-111, dated August 10, 1906—Customs Circular No. VII. of 1906.)

In exercise of the powers conferred by section 22 of the Sea Customs Act, 1878 (VIII. of 1878), the Governor General in Council is pleased to direct that, for the corresponding item of entry No. 15 in the notification of the Government of India in this department, No. 7641-78, dated December 23, 1905, the following shall be substituted, with effect from August 18, 1906, viz.:—

No.	Names of Articles.	Tariff Valuation.		Duty.
		Rs.	a.	
15	Brass, patent or yellow metal, sheathing, sheets, braziers, and plates.....cwt.	51	0	5%

JAMAICA.

THE TARIFF LAW, 1899, AMENDMENT LAW, 1906.

(No. 4, dated April 11, 1906.)

1. Notwithstanding anything to the contrary contained in the Tariff Law, 1899 (Law 20 of 1899), the said Law (No. 20 of 1899) as amended by the Tariff Law, 1899, Amendment Law, 1903 (Law 42 of 1903), and as further amended by the Tariff Law, 1899, Amendment Law, 1905 (Law 2 of 1905), is hereby continued in force until the 1st day of June, 1911.

3. Section 4 of Law 2 of 1905 ('The Tariff Law, 1899, Amendment Law, 1905') is hereby repealed, and the following inserted as item 40 in the first schedule to the Tariff Law, 1899, that is to say:—

'40. Matches, lucifers and others, per gross of twelve dozen boxes, each box to contain fifty sticks, and boxes containing any greater or less quantity, to be charged in proportion... £0 1s. 9d.'

4. Section 19 of the Tariff Law, 1899 (Law 20 of 1899) is hereby repealed.

MALTA.

ORDER DATED NOVEMBER 20, 1905, AMENDING 'THE MALTA REVENUE AND GENERAL PURPOSES ORDER IN COUNCIL, 1901.

This order, which shall be read and construed as if forming part of the Malta Revenue and General Purposes Order in Council, 1901, and take effect as from the first day of January, 1902, provides that the collector of customs shall levy the duty and store rent hereunder specified:—

	Import duty.		Store rent.
	Per lb.	Per Rotolo.*	(payable only once). Per cantar.
Malt.....	.34d.	.60d.	2d.

* The duty on malt shall be calculated per rotolo and not per pound. One rotolo equals 1 pound 12 ounces.

NIGER TERRITORIES.—SOUTHERN NIGERIA.

I.—ORDER No. 3, DATED SEPTEMBER 28, 1905, BY H. B. M. DEPUTY HIGH COMMISSIONER FOR THE PROTECTORATE OF SOUTHERN NIGERIA, IN REFERENCE TO SPIRITS.

It is hereby ordered that from and after the 1st day of January, 1906, for the purpose of ascertaining the strength of spirits, Tralles' hydrometer shall be used in place of Sykes' hydrometer.

The following shall be the scale of duties chargeable:—

	s.	d.
On brandy, gin, rum, liqueurs, perfumed, medicated and miscellaneous spirits not being sweetened or mixed with any article so that the degree of strength cannot be ascertained by Tralles' hydrometer, for every Imperial gallon not exceeding the strength of fifty degrees (Tralles)	3	6
And for every degree or part of a degree (Tralles) in excess of fifty degrees by such hydrometer an additional duty per Imperial gallon of	0	0½

II.—PROCLAMATION No. 1, ENACTED ON JANUARY 4, 1906, BY H. B. M. ACTING HIGH COMMISSIONER FOR THE PROTECTORATE OF SOUTHERN NIGERIA, REPEALING A PROCLAMATION OF 1905.

1. This proclamation may be cited as 'The Customs Amendment Proclamation, 1906,' and shall be read and construed as one with 'The Niger Coast Customs Ordinance, 1894.'
2. 'The Customs Proclamation, 1905,' is hereby repealed.
3. This proclamation shall commence and come into operation on the Eighteenth day of January, in the year of Our Lord One thousand nine hundred and six.

COMMERCIAL AGENCIES

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, etc., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

Canadian Commercial Agents.

Australasia.....	{ J. S. Larke, The Exchange, Sydney, agent for New South Wales, Queensland and New Zealand. D. H. Ross, Stock Exchange, Melbourne, agent for Victoria, South Australia, Western Australia and Tasmania.

MEXICO.

REPORT OF COMMERCIAL AGENT.

(Mr. A. W. Donly.)

APARTADO, 2029,

MEXICO CITY, MEX., Oct. 26, 1906.

MEANS OF COMMUNICATION.

Now that the contract for a Pacific coast steamship service between Canada and Mexico has been signed by the governments of these respective countries and in view of the actual establishment of said service at an early date, it may be well to give a resumé of the present routes via which the commerce of Mexico with Canada and the United States is handled.

RAIL ROUTES.

There are four important gateways on the northern frontier of Mexico, three of these being situated on the southern boundary of the State of Texas and the fourth on that of Arizona. Beginning with the most easterly they are: Nuevo Laredo, Ciudad, Porfirio Diaz, Ciudad Juarez and Nogales. The respective towns on the opposite side of the boundary line are: Laredo, Eagle Pass and El Paso, Texas, and Nogales, Arizona. The principal railroad systems of the north all have their connections through one or more of the first three of these gateways for Mexico city, and the interior of the Republic, while Nogales is the port of entry for shipments for the State of Sonora and the towns of the Pacific coast. From all important points in Canada or the United States through bills of lading are issued to this city and the more important centres of the Republic.

From Laredo and Eagle Pass shipments are handled over the Mexican National and Mexican International Railways, both these roads forming part of the National Lines of Mexico, commonly spoken of as the Merger System. Shipments coming via El Paso are handled from that point to points in Mexico by the Mexican Central Railroad, while the line entering Mexico at Nogales is the Sonora Railway. This last is at present but a short line running only to Guaymas, in the State of Sonora, the most northerly of the Mexican Pacific ports of any importance. It belongs to the Southern Pacific system and at present a large force is employed in its extension south to Guadalajara, situated in the State of Jalisco and the second city of the country, it having a population of more than 100,000.

MEXICO'S INTERIOR COMMUNICATION.

The interior of the Republic is connected by rail with the ports of the Gulf of Mexico by several lines and branches. The Mexican Railway and the Interoceanic (part of the Merger System) connect Mexico city with the port of Veracruz, while the Tampico and Monterey divisions of the Mexican Central connect the city of Mexico and the city of Monterey as well as interior points generally with the port of Tampico.

MEXICO'S OCEAN TRADE PORTS.

Water routes through Veracruz and Tampico handle by far the greatest part of Mexico's foreign trade; the customs collections at Veracruz alone amount to about

one-third the total amount collected, while the collections at Tampico are nearly half what they are at Veracruz. Besides the numerous tramp steamers calling at these two ports there are at Veracruz sailings from New York, Montreal and Halifax, Hamburg, London, Liverpool, Havre, and the principal ports of Spain. Most boats calling at these ports also call at Progreso, the port of Yucatan, to leave and receive cargo. Progreso, of all Mexican ports, gives the greatest amount of return cargo her exports of sisal being extremely large.

Besides the ocean freights handled through the ports of Veracruz and Tampico, there is a considerable quantity handled through New Orleans and Galveston and thence by rail to different point throughout Mexico.

It is worthy of note, in this connection, to say that the through freight rate to Mexico city via these different ports is the same and the rail proportion is also the same so that the roads handling from New Orleans or Galveston receive the same amount for a haul of more than a week that others do for a haul of two days which is the time generally required for a freight shipment from Veracruz to reach this city.

On the Pacific side the Pacific Mail and the Kosmos line both run regular schedules from Panama, north to the United States, touching the principal Mexican ports en route, while a Chinese company runs a line from Hong Kong to Manzanillo.

Foreign lines are not allowed to handle local freight, that is freight from one Mexican port to another. This class of business is handled by small coasting vessels of which there are several lines both on the gulf and Pacific coasts.

TRANS-ISTHMIAN TRAFFIC.

Though the Tehuantepec National Railroad has for a number of years connected the port of Coatzacoalcas on the Gulf with the port of Salina Cruz on the Pacific it has not heretofore, for lack of terminal facilities, played any important part in the carrying trade. For the past several years, however, extensive port works have been in the course of construction at both these terminals. A sum in the neighbourhood of \$100,000,000 (Mexican pesos) has already been spent in their construction and on the first of January next the road is to be opened to the world's commerce as an active competitor of the Panama route. For shipments from the west of the United States and from the Orient there will be a saving of about 2,000 miles in distance for shipments to the east of the United States and Europe, and with the facilities for rapid handling of large cargoes at either end a consequent saving of time in transit. All the principal lines of steamers are preparing to rearrange their sailing schedules and will, after the above date, make regular calls at these terminals. It is proposed at an early date to double track the road from end to end.

ITS IMPORTANCE TO CANADA.

At present eastern Canada has no way of reaching the Pacific coast ports of Mexico without a long and expensive trip via Panama or a yet longer via the Horn, and the same may be said of western Canada in respect to the Gulf ports and the West Indies. With the opening of traffic on the Tehuantepec National on January first next, there is no reason why eastern Canada should not make a bid for the Pacific coast trade of Mexico, especially in manufactured articles, while British Columbia will be in a position to send her fish and lumber to Eastern and Central Mexico and the West Indies both expeditiously and at a low freight rate.

RAILROAD EXTENSION.

At present, to go from Mexico city by rail to the Pacific coast of Mexico, it is necessary to make a round about trip via the Mexican, the Veracruz and Pacific and the Tehuantepec National to Salina Cruz, or to go via El Paso and Nogales to Guaymas. The Mexican Central has a large force at work on its Pacific extension to Manzanillo which it expects to complete about the middle of next year. This will

bring Mexico city within about thirty-six hours of the Pacific with the line running the whole way through a rich, fertile and populous country. Besides this both the Central and National systems are at present at work on short cut connections between the capital and Tampico. The present trip from here to Tampico, on the Central, in a passenger train via Aguascalientes and San Luis Potosi, consumes thirty-six hours. By these short cuts the time will be reduced to but little more than twelve hours.

RAILROAD EARNINGS.

Railroad earnings this year, on practically all the roads in Mexico, have been far in excess of anything in the past. Add to this the increased value of the Mexican peso, due to the adoption of the gold standard and the rise in the price of silver and it is little to be wondered at to see the different lines resuming the construction of lines long ago begun and going ahead with new propositions.

THE CURRENCY.

The Gold Standard is no myth in Mexico. There is at present in circulation and in possession of the banks something over fifty million pesos. All banks now pay out gold on demand without a protest. On the other hand, due to the recent high price of silver, there has been an unprecedented and unthought of exportation of silver pesos, till at the present time it is very difficult to procure sufficient money of the dollar denomination to meet local needs. The smallest paper money circulated here is of the denomination of five pesos and the banks are asking as high as $2\frac{1}{2}$ per cent premium for silver dollars for domestic use. Previously one could demand silver dollars for his paper money, but now gold is tendered instead.

WHEAT.

There is again a short wheat crop throughout the country as well as a short corn crop. This will mean the necessity of importing largely of both these staples. The government has, as yet, made no announcement, but it is expected that about December or January the duties on these cereals will be materially lowered or entirely raised. Those who are interested in this market for either article would do well to make their arrangements at once. The kind of wheat in best demand here is number two red. Canadian red grown east of Port Arthur is well suited to the market.

CANNED FOODS.

A large wholesale provision merchant with whom I discussed the canned food question, made the following statement:—

'We wholesale provision dealers are rather astonished that Canadian canning firms have not taken more energetic steps to convince the British public that their goods are beyond reproach, and that no connection exists between the Canadian can-

ning firms, and the Chicago houses. This is made all the more imperative, seeing that the bulk of the working classes never discriminate between Canadian and American brands, and in this way the innocent Canadian suffers equally with the guilty American. In its relative position, too, the grocery trade has suffered as much, and perhaps more than any one else, and much disgust is shown at the poor spirited attempt made to restore public confidence.

'We do not think that anything beneficial will be gained by Canadian firms advertising the purity of their brands in English trade journals. The trade already knows that the Canadian canned goods are beyond reproach. What we are most concerned about, is how to make the British buying public know this.

'The retail stores will not buy the canned goods from us, until the public demand them, and in order to get at the public, Canada must advertise the purity of her canned goods in the English newspapers, and not through the trade journals, which the general public never read. The matter is a question for the public to decide, and the only way that the trade can be restored, is by efficient inspection made by the government inspectors in Canada, and by incessant advertising of this in the English press.'

A conference on canned foods was held at the Institute of Hygiene, in London yesterday, and included medical officers of health and other medical men, as well as leading members of the trade throughout England; at this meeting the following resolution was unanimously carried:—

'Resolved that it is contrary to public policy upon economic grounds to hamper unnecessarily the production of tinned meat by the creation of vexatious conditions for its regulation by legislation, but that such steps should be taken as will ensure that all canned goods can be prepared under efficient inspection.'

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. Ball.*)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., October 30, 1906.

WORLD'S SUPPLY OF BACON.

The following statement appears in a Continental journal, and will no doubt be of interest to Canadians.

'Considering the high prices for bacon in the North of Europe, and the prospects of still higher prices or downright bacon famine during the forth-coming winter, it may be expedient to survey the prices and prospects of export from the different countries likely to be of any importance.

'South-eastern Europe, the original home of the pig, may be completely passed by, for since epidemics and want of food have decreased the number of pigs, and the German market has been closed, Hungary, Servia, Roumania and Russia no more influence the world's price for bacon. Italy and France, which supply their own requirements of bacon at about two-thirds of the price in Germany, cannot be reckoned within the world's market either. Switzerland, Spain and Norway belong to the bacon importing countries. Sweden produces its own requirements, and is endeavouring to again become an exporter of bacon, which it has not been since the introduction of

duty on maize and other articles of food for the pigs eleven years ago. There are in Europe only two countries which export pigs or bacon, and they are Ireland and Denmark. The former country exports every week 30,000 hogs to England, of which two-thirds are alive, and the rest in the shape of bacon. The export of Denmark to England likewise amounts to about 1,500,000 hogs annually in the shape of bacon. Ireland with a population of 4,000,000 exports two hogs for every five inhabitants; whilst Denmark with its 2,500,000 inhabitants exports three hogs for every five inhabitants. At this rate, Germany, if adopting the same tariff and the same rational agriculture as Denmark, ought to be able to export 36,000,000 hogs annually.

‘From where are the ever increasing requirements to be supplied. Outside Europe there is only North America to reckon with, as Mexico does not export bacon.

‘In Canada, in the province of Ontario, 40,000 export hogs are killed every week. The other Canadian provinces have no importance for the world’s market. Of these 40,000 hogs, some ten years ago, 32,000 went to England as bacon, but by and by Canada’s home consumption of bacon steadily increased, whilst the production remained about stationary, and of the 40,000 hogs produced per week only 15,000 to 18,000 are now exported to England, and the price is almost as high as in Denmark, viz., 37 marks per 50 kilograms live weight.

‘If the Canadian population goes on increasing as has hitherto been the case, Canada’s export of bacon to England will cease in the course of a few years. There only remains then the United States, and it is that country that regulates the price of bacon on the world’s market. In the course of time, and under the influence of the immense increase in population, things, however, are subject to such changes that there is every reason to believe that this apparently inexhaustible country within a measurable time will consume its own production of bacon. The large slaughter houses west of Chicago, which as little as twelve years ago competed with Chicago on the eastern market, now send almost everything that is not used in the States around the Missouri to the Western and Southern States, whilst the East has more and more to fall back upon its own production. This state of affairs must likewise account for the fact that bacon prices in the United States, contrary to all expectation, have been slowly rising, and at the big slaughtering centre pigs now cost 31.50 marks (one mark about 1/-) per 50 kilograms live weight, a price which has been reached but once before during a severe failure of crops. New places for export of bacon are Oklahoma, Arkansas, and Wisconsin, but so far they have not made much progress. The maize growing states of Iowa, Illinois, Minnesota, Missouri, Kansas and Nebraska, are the only places in the world where an increase in the number of pigs raised takes place, and if it happened, through some cause or other, that the number of pigs produced in those parts was reduced by say, only 20 per cent, we could see prices which would make the producers jump for joy, whilst millions of people, to a greater or smaller extent, would have to give up animal food.’

PRICES OF CANADIAN BACON.

Probably the only remark I can make in connection with this is the extremely high price of Canadian bacon here. Certain brands of Canadian bacon are bringing 2/- per cwt. more in the British market than British bacon.

P. B. BALL.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(*Mr. W. A. MacKinnon.*)

SUN BUILDING,

CLARE ST., BRISTOL, ENG., October 31, 1906.

SHIPPING MARKS ON CHEESE BOXES.

A good deal of unnecessary trouble would be spared British importers, and the transportation companies, if care were taken to see that all cheese boxes carried their respective shipping marks. In many cases cheese arrive here with only the factory marks, and if several importers are expecting consignments from the same factories, these marks are not sufficient to identify the cheese as belonging to either one of such firms. When once the attention of the shippers has been called to this deficiency, there is little doubt that they will take measures to prevent further complaint.

APPLES.

We have had, in Bristol more extensive consignments of apples than for some years past, and it is a pleasure to chronicle the fact that on the whole the shipments so far received have given great satisfaction. I had an opportunity of seeing sample barrels of Blenheim, Cranberry Pippin, Ribston Pippin, and other varieties opened previous to auction, and, as stated, these were highly creditable.

SERIOUS CHARGE AGAINST APPLE SHIPPER.

Of the several shippers concerned there was one who has, by means of two consignments, attained a most unenviable notoriety with the trade here. His brand for the rest of the present season may be said to have received a 'black eye,' and certainly it is long since I have seen worse looking fruit offered for sale. Some fruit men who were standing by made the remark that the sanitary inspector would certainly have condemned some of the apples had he seen them; and I do not know but that it would have been a kindness to Canadian fruit exporters in general had that official's attention been called to the condition of this fruit, so that the consignment would have been annihilated, instead of remaining as an unsavory witness to the business methods of, let us hope, only one Canadian shipper. On this side of the Atlantic it is difficult to say with precision what causes have brought about a given result in a barrel of apples, but most of those in question, consisting of Greening, Snow, Wealthy, Golden Russet, Holland Peppin, and other varieties, looked as if they had been wind-falls, which had been packed wet and bruised, and had afterwards been subjected to considerable heat. Almost every apple was covered with small brown spots, most of them smaller than a five-cent piece, and the rot was of course spreading rapidly.

THE COMMERCIAL RESULT.

I was informed that the previous consignment of the same shipper sold at less than 2/- a barrel—this gross return to be placed against a four shilling freight, to say nothing of the cost of the barrels, picking, packing and so on. Not only does the shipper in such a case receive nothing, but either he or an importer who may have

advanced against the fruit, suffers a financial loss on every barrel. Such an importer is apt to be discouraged, and to fight shy of further investments in Canadian fruit, while a general feeling of suspicion and uncertainty is created in the market, both amongst those who see the fruit at the auction, the retailers who may handle it, and the public who use what portion of it may be fit for consumption. True, such a consignment serves to emphasize the excellence of other fruit offered at the same sale, but on the whole the evil is unfortunately more than the good.

BRITISH SOAP COMBINE.

Considerable stir has been made recently by the announcement of what is called a 'combine' amongst some of the chief manufacturers, including the well known firm of Lever Bros. of Port Sunlight. The West of England representatives of this 'combine' are Messrs. Christr. Thomas & Co., of Bristol.

POPULAR OPPOSITION.

The grocery trade on the whole appears to be very hostile to this re-organization, or combination, which ever is the proper name for it.

OPENING FOR CANADIAN SOAP.

My reason for calling attention to the matter is that many grocers are pledging themselves not to handle the soaps produced by the 'combine.' If the difficulty is not soon adjusted it looks as if British manufacturers outside the 'combine' and Canadian exporters will both have an unusually good opportunity of securing popular favour. Needless to say any such exporters who think of seizing the present moment to extend their trade must lose no time in taking effective action.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(Mr. C. M. Kittson.)

RHODES BUILDING, CAPE TOWN,
P.O. Box 668,

October 16, 1906.

DOUBLE PROTECTION.

South African manufacturers and agriculturalists receive protection from outside competition not only through their customs tariff, but also by the fact that the South African railways in many cases levy a far heavier freight rate on imported articles than on those of South African origin. As examples of this system of double protection, we will take the case of imported flour and butter versus South African:—

	Customs Duty.	Rail Rates per ton. (500 miles.)	Total amount of Protection per ton. (Customs and Railage.)
Flour Imported.....	2s. 6d. p. 100 lbs.	£ 2 13 9	
Flour South African.....		1 2 6	£ 4 1 3
Butter Imported.....	18s. 9d. p. 100 lbs.	8 6 8	
Butter South African.....		3 13 4	5 12 1

It will thus be clearly seen that a foreign supplier of butter and flour shipping to a point 500 miles inland is handicapped by differential rail rates and customs tariff to the extent of approximately twenty dollars a ton, and this arrangement applies to many articles other than those specified.

OPENING FOR PORK.

The principal cold storage company of South Africa is making arrangements to cure ham and bacon in bond, consequently the attention of Canadian pork exporters is drawn to the probable increase in the demand of this market for the articles necessary.

TENDERS FOR CLEAR PINE REQUIRED.

The Cape Government railways are calling for tenders for the supply of 72,000 superficial feet of clear pine and 8,300 superficial feet of shelving boards in specified measurements. Forms of tenders may be obtained from the Superintendent of Commercial Agencies, Department of Trade and Commerce, Ottawa.

LARD OIL.

The Cape Government railways are consumers of large quantities of lard oil, and are at present advertising for the supply of 15,000 gallons of this article.

BOX SHOOKS.

In a previous report an opening was advised for Canadian box shooks. A trial order went forward by last mail for 5,000, and if these give satisfaction an order will be given for 200,000 annually by one South African firm alone.

MANUFACTURE OF BOX SHOOKS IN SOUTH AFRICA.

Two large Cape Town firms have decided to manufacture box shooks, and are importing the necessary machinery therefor. As the duty imposed on box shooks amounts to 15 per cent ad valorem, and on unmanufactured wood only 3 per cent, the proposed industry will possess a no inconsiderable amount of protection from outside competition.

CAPE WINES IN CANADA.

One of the leading exporters of Cape wines recently informed this office that one reason why he was not exploiting the Canadian market was the lack of direct shipping facilities, which had forced him to turn down several likely propositions.

IMPORTATION OF STOCK SHEEP FROM AUSTRALIA.

The Government of the Orange River Colony recently despatched three representative agriculturists to Australia to select and purchase breeding sheep for shipment to South Africa, and news has now been received of the purchase of 7,000 head from highly bred stock, which will be distributed amongst the farmers of the Orange River Colony.

DISCOVERY OF ASBESTOS.

Asbestos in payable quantity and quality has been discovered in the Transvaal. An expert who has examined the deposit states that it is of abnormal width and equal to the finest in Canada or Italy. An offer of £40 per ton has been received from Germany for the best quality.

NEW DISCOVERIES OF DIAMONDS.

Recently many new discoveries of diamondiferous ground have been made in localities many hundreds of miles apart, and in view of this fact it is quite possible that within the next few years the world's supply of diamonds may exceed the demand, with a resultant fall in prices, although it is pointed out by one authority that the world's demand is constantly on the increase.

BROOMS.

Sample indents for a few hundred dozen brooms are going forward by this mail to a leading Canadian manufacturer, and it is hoped that these trial orders may be the means of obtaining regular indents for the future, but it is generally thought that Canadian brooms are of too good a quality for the South African market.

DISEASED APPLES.

The following paragraph taken from the *Agricultural Journal* published by the Department of Agriculture of the Colony of the Cape of Good Hope, is of interest to Canadian exporters of apples:—

'Both the Australian and Canadian governments having been warned that in consequence of diseased apples being shipped to this colony, the Secretary for Agriculture now feels justified in taking steps to prevent such fruit being landed here in future. The Australian government has replied, stating that full publicity has been given to that warning in the press, and customs officers in all the states have been instructed to warn shippers as well. The Minister for Trade and Customs of the

Australian Commonwealth also forwards copy of an Act—the Commerce Act of 1905—under which, regulations are to be enforced, providing that the export of fruit (and other goods) shall be prohibited, unless there shall be applied thereto a “trade description,” indicating, *inter alia*, that the fruit is sound. The fruit is to be examined by an officer prior to export, and if found to be in the condition indicated, will be stamped “approved for export.” This system it is hoped may remove the danger of the exportation of diseased fruit. We may add that it is expected that all consignments of apples sent to our ports from Canada will in future be examined by government inspectors before despatch, with the view of eliminating parcels which would not be acceptable here.’

C. M. KITTSOON.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(*Mr. J. S. Larke.*)

THE ROYAL EXCHANGE, SYDNEY, AUSTRALIA, October 15, 1906.

IMPORTS INTO NEW ZEALAND FROM UNITED STATES.

In Monthly Report, September, 1906, P. 473, I gave the imports from the United States of articles affected by the preferential tariff. As the exports from Canada are more akin to those from the United States than from any other country, it will be of interest to note the imports from the United States for the last three years. It may be noted that the figures now given will not agree with those given on the specified articles of my last report in all cases, as in the list below are included certain articles under the preferential tariff that must have been imported from Canada and thus escaped paying the higher duties:—

Imports from the United States of America into New Zealand during the years ended December 31, 1905, 1904 and 1903.

	1905.	1904.	1903.

PREFERENTIAL TARIFF.

Upon bicycles, carriages, carts and wagons, perambulators, fancy goods and toys, hardware and hollow ware, lamps, lanterns and lamp ware, pianos, plate and plated-ware, pumps and other apparatus for raising water, the United States exporters have to pay a tariff of 30 per cent as against 20 per cent upon such goods from Canada or Great Britain. Upon boots, shoes and goloshes the duty on goods from the United States is 33½ per cent, while those from Canada pay 22½ per cent. Canadian hops are admitted at 6d. per pound, while those from the United States pay 6d. On iron nails the duties are, Canada, 2s, United States, 3s. per cwt. Upon furniture Canada has a preference of 12½ per cent, the duty being on Canadian, 25 per cent, the United States, 37½ per cent. Upon paperhangings the duties are 15 per cent on Canadian and 22½ per cent on the United States. On wrapping paper Canada would pay 5s. per cwt., the United States 7s. 6d. Bicycle fittings, consisting of tyres, pedal rubbers, inner tubes, drop forgings and stampings, ball bearings, rims, forks, spokes in the rough, of United States manufacture, pay a duty of 20 per cent, while those from Canada would be free. This also applies to gas and oil engines, gum boots, printing paper, rails for railways and tramways, sail cloth, canvas and surgical and dental instruments. An examination of these lines will show that there is room for expansion of Canadian trade to a considerable extent. Printing paper from the United States made prior to the passage of the Act will have another year for admission free of duty, but at the end of that time practically the whole of the printing paper now received from the United States should come from Canadian mills. Printing paper and canned fish as yet are the only articles which have taken large advantage of this preference, though boots and shoes, carriages and one or two other lines have made progress..

POTATOES.

Californian shippers have taken advantage of the high prices of potatoes in New Zealand, and sent fairly heavy supplies by direct steamers from San Francisco, reduc-

ing the price from £12 to £10 per ton. It will be a very considerable time before new potatoes in any quantity can reach New Zealand from Australia or from its own fields. I am unaware whether any contracts have been entered into by British Columbia shippers to meet the demand, though correspondence has taken place. Offers of potatoes from Ontario and Nova Scotia have been made, but unfortunately unaccompanied with any estimate of the price at which these potatoes could be delivered. No buyers would undertake the risk of making purchases in these provinces, or even cabling for prices, without having some assurance that if the prices were right the potatoes could be carried safely across the continent and landed in good condition either in New Zealand or in Australia. There was a reaction in the Sydney and Brisbane markets, but prices have again advanced, and quotations are now from £9 to £9 10s. per ton of 2,240 pounds. As the British Columbia potato is, on the whole, of a better quality than those from California, there should be a profit in exporting at these prices, but scarcely from the eastern provinces.

ONIONS.

Onions have not reached proportionately as high a price as potatoes. The advent of considerable quantities into New Zealand and into this market from San Francisco has had its effect upon prices. They are, however, quoted at £12 to £12 10s. for Californian, and £9 to £10 for Australian, in Wellington, New Zealand. In this market the prices are about £1 less. It is possible that there may be a surplus in British Columbia that could be exported profitably at these figures. Samples of onions from British Columbia have proven to be of good quality and suited to this market.

PRICES AND CATALOGUES.

In but two instances, even where requests were sent for both, have prices and catalogues of articles for which a market is sought in this country been received during the last two months. Sometimes prices without catalogues have been received, and conversely catalogues without prices. It is practically useless to go to a good house with a proposition unless you can give a fair idea of what the goods will cost laid down in Sydney. There have been so many disappointments in the Canadian trade that such houses are unwilling to spend time and money unless they have some assurance that something is likely to come out of their efforts.

Canadian firms who now or later propose to get information respecting the possibility of selling their goods in this country should post up in their office information that all inquiries should be accompanied by prices f.o.b. New York, also delivered in Sydney via Vancouver; cubic contents of such package and number of articles and weight that can be put into a package; catalogues or such descriptive matter as will give the special merits of the article, and, where it can be done by parcel post or cheaply otherwise, a sample of the article itself. Much loss of time will be saved, and it will prevent a prejudice arising against the article and the exporter, which now does arise when an inquiry is presented to an Australian firm without such necessary information. It naturally concludes that it is a firm without business experience, and therefore not large enough to warrant it in anticipating a success in any efforts to introduce the goods.

WOOL.

The wool season of 1906-07 has been opened in Sydney by a number of auction sales. Owing to the frequent showers in the interior, shearing has been very much delayed, and the receipts of wool to date have been much below those of last year. The prices for good quality are firm, but for inferior quality a little reduction has been experienced. It is not expected that there will be any reduction in prices during the season. The increased output of Australian wool this year has been estimated at from 150,000 to 250,000 bales above that of last year. The probability is that the medium between these figures will be realized.

PROROGATION OF PARLIAMENT.

The parliament of Australia closed its session on Friday last prior to prorogation for the coming election. Two Bills were passed which may affect Canadian trade. One, the customs duty respecting strippers and harvesters, of which you have had the particulars; the duties are not materially increased over that levied under the decision of the Minister of Customs. The second is the 'Australian Industries Preservation Bill,' the purpose of which is to protect Australian industries menaced by trusts or by dumping. I send a copy of this Bill, as it may be important that its provisions should be generally known.

PREFERENTIAL TARIFFS.

The parliament of New Zealand refused to confirm the agreement entered into between the late premier of New Zealand and the Australian government, providing for a preferential tariff upon certain commodities of the two countries. The Australian parliament introduced a clause to the Bill, granting a preference upon certain specified goods of the United Kingdom, to the effect that it should be applicable only to goods coming in British ships manned by white seamen. The Governor General was advised that such a clause was *ultra vires*, as it conflicted with treaties entered into with foreign countries, whereby preference could not be granted to British ships. The government proposed to strike out the clause, but upon technical grounds the Senate refused to agree to the change, and also refused to pass a new Bill, amending the Preferential Bill. The Bill including the shipping clause passed, but the Governor General is not likely to sign it, and this is so certain that the government has ceased collecting the higher duties which it had levied upon the introduction of the Bill. The duties upon the articles included in the British and New Zealand propositions will remain, therefore, as they were. The parliament unanimously adopted the proposed agreement with South Africa.

In closing parliament, in the speech from the throne the Governor General said, in reviewing the proposition to grant a preference to Great Britain: 'My advisers earnestly trust that their efforts may lead to closer commercial relations and foster a sentiment of unity between the United Kingdom and the self-governing dominions.'

The premier of New Zealand has announced the intention of the government to revise the tariff at the next session of parliament, with a view to lowering the duties on many articles.

J. S. LARKE.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. E. Sontum.*)

CHRISTIANIA, NORWAY, November 3, 1906.

OFFERS WANTED ON BARREL AND CASE MATERIAL.

I notice in one of the trade papers here for October 27, that a/s De danske Sukerfabriker" (sugar factory), of Copenhagen, Denmark, wants offers on barrel and case material for the year 1907. The material is wanted according to samples, which may be seen at the company's offices, ready to be put together. Although it is rather late for Canadian exporters to compete for this order next year, as the offers must be in by November. I mention this so they can bear this in mind for future requirements.

SCANDINAVIAN FISHERY EXPOSITION IN 1908.

A Scandinavian fishery exposition is to be held at Drontheim, Norway, in 1908. It promises to be a very complete and interesting exposition worth seeing by everybody who carries on fishing or the manufacturing of fish products. The exhibition will be open from the last part of June to September 1, 1908. Only Norwegian, Swedish and Danish residents or firms, who carry on fishing, the preparation of fish, dealers, manufacturers, or otherwise interested in fishing, will be admitted as exhibitors.

SUPPLY OF TIMBER.

(Extract from an article in the Norwegian Trade-paper 'Farmand'.)

'The Norwegian buyers of logs, viz., the floorings, mechanical, pulp and cellulose mills, are getting seriously alarmed at the continued rise in log prices, which have taken place, and which have reached a point not much below the high water mark of the famous boom in 1872.

'While battens sizes of logs were purchased last year in the Glommen district for Kr. 34 to 36 (\$9.07 to \$9.60), and pulpwood sizes at Kr. 14½ to 15 (\$3.87 to \$4) per dozen, the earliest purchases this year were made on a basis of Kr. 36 to 38 (\$9.60 to \$10), and Kr. 15½ to 16 (\$4.13 to \$4.27), respectively, but these prices have advanced during the autumn until Kr. 40 and Kr. 17 (\$10.67 and \$4.53) have been paid.

'The situation may be summed up thus: At £10 c.i.f., cheap English ports, for mixed white floorings, the Norwegian floorings mills have a very moderate profit on logs purchased at last year's prices; at Kr. 32 (\$8.53) per ton not in hessians f.o.b. for ordinary moist mechanical pulp makers have a profit on logs purchased last year of 5 per cent on the cost of the mill and on cellulose there was on the same supposition a fair margin of profit.

'But at the level of log prices, now established, the present price of £10 for floorings will leave only an agency commission, for makers of mechanical pulp at Kr. 32 (\$8.53), there will be no profit at all, and the cellulose mills will see their margin materially reduced, even if their selling prices are fully maintained.

'It must be admitted, that to make large log contracts under these circumstances is a risky business, to say the least of it, considering that most of the stuff, which is to be manufactured from the same logs will not be shipped before the year 1908.

'Why, then, do the owners of the mills concede these prices, which are about the same, that are paid in other districts, and which must be characterized as quite absurd in relation to current export values of floorings and mechanical pulp, and high even for the cellulose mills?

'To this question their only reply is, that they must follow suit, if they wish to see their mills running; and owners of floorings and mechanical pulp mills accuse cellulose makers of grabbing.

'The fact seems to be that the Norwegian forests are not large enough to supply a sufficient quantity of logs for all existing mills and that those branches of the wood goods trade which are not under existing conditions sufficiently profitable to stand the strain of this severe scramble for logs are doomed to go to the wall.

'The enormously expanding demand for cellulose seems to be sufficiently strong to sustain the value of cellulose, and these mills are therefore able to pay extravagantly to secure the vast quantity of wood which they require.

'As to mechanical pulp, it appears inevitable that a permanent rise in its value must be the result of the rapid appreciation of wood, for even Kr. 36 or 40 per ton (\$9.60 to \$10.67) f.o.b., this is the cheapest material out of which to manufacture newspaper.

'Only floorings remain to be considered. If the Norwegian floorings mill-owners are to get a reasonable profit, the selling value must advance beyond a £10 basis. But if this happens, it may become cheaper to obtain supplies from more distant countries.

'It may be answered that these abnormally high log prices will stimulate the felling of logs, and this will undoubtedly be the case. But if the requirements for wood goods of the world continue to be what they are to-day, the forests in Norway, Sweden and Finland will not be able to stand a constant strain such as they have been subjected to of recent years. The big Swedish sawing mills are unable to procure the quantity of wood which they would like to handle, and log prices are so high even in the Sundsvall district, that it is a poor business to carry on a sawing mill for those who have not their own forests or felling rights. And the woodpulp and cellulose industry is rapidly expanding there as in our country (Norway).

"The higher the prices go the more the forestry of Norway will become a sort of a culture of the forests, in which case it will be found more profitable to cut young trees at frequent intervals instead of allowing them to become large enough for battens.

'This tendency, which is already apparent, will be advantageous to the country, but it will act against the floorings industry of Norway. A reaction from present log prices would not be surprising, but the course of the timber market in the immediate future will depend largely upon the fate of the cellulose market.'

HAY CROP OF SWEDEN IN 1906.

Caused by inquiries I have received from Canadian hay exporters in regard to the prospects for export of hay to Sweden at present, I quote the following from a report of the Norwegian consul-general at Stockholm:—

'The hay crop of Sweden has this year been even good, in some districts exceptionally good, which is also confirmed by the consulate at Gothenburg. In the southwestern Sweden, Bohusten, Holland, &c., the drought has done some damage on the growth of the grass, so there possibly can be found a market for good and not too expensive hay. In Gothenburg the market price for hay has recently been from Kr. 7 to 8 (\$1.87 to \$2.13) per 100 kilogrammes (220½ lbs.). For Danish hay in larger lots there was paid recently Kr. 6 (\$1.60) per 220½ lbs.'

C. E. SONTUM.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(*Mr. J. B. Jackson.*)

NORTH BRITISH AND MERCANTILE BUILDINGS,
EAST PARADE, LEEDS, ENG., November 7, 1906.

EGGS.

Eggs are from 2s. to 3s. a great hundred (10 dozen) dearer than they were at the corresponding period of last year. The best foreign eggs are larger than the same kind of eggs produced in this country. The recently issued returns show that the imports for the first nine months of this year were 1,631,418,120 single eggs, costing £4,855,720. English eggs as a rule are cheaper than foreign eggs of the same quality, the latter being larger and more carefully graded.

A very large part of the Canadian eggs shipped into north England go to Sheffield, which is one of the best egg markets in Great Britain; in fact, there are many more eggs sold in Sheffield annually than in any town in Great Britain (outside of London).

This has long been taken advantage of by English egg shippers, and it is said that there is no home firm of any repute which is not represented in Sheffield. The popular demand in Sheffield is for small sized eggs, either glycerined or direct from cold storage. Sheffield's working classes form such a large proportion of the population, it makes it an excellent market for small sized eggs of good quality at cheap prices.

TIMBER.

Local woollen loom makers are experiencing much difficulty in obtaining the requisite timber for their trade, and as a result are anxious for direct shipments from Canada.

The timber should be of the highest quality, free from knots, heart, shakes and sap wood, and in prime condition; otherwise a direct trade would be impossible. Yellow pine is principally used, measuring $4\frac{1}{2}$ inches to 5 inches wide by 3 inches thick, and from 7 feet to 16 feet in length.

Pine fitches are also in demand from 4 inches to 6 inches thick at various lengths. Maple $\frac{1}{2}$ inch thick by 4 inches to $4\frac{1}{2}$ inches and 5 inches wide.

SPADE HANDLES WANTED.

A well known manufacturer informs me that there is a very large market here for Canadian spade handles. The handles must be turned and finished off to requirements in every minute detail: what is required by one firm may not suit another. Each manufacturer's article differs in some point or other from that of his competitors. An everyday 'T-shaped' handle generally averages 32 inches by $1\frac{1}{2}$ inches in diameter, and from the size of the popular 'D' from 30 inches to 32 inches long by $1\frac{1}{2}$ inches in diameter.

Wood handles are also required for numerous other implements. Sheffield is the best market in the north of England for these goods, followed by Leeds and Hull respectively. Several important inquiries have been made for wheel spokes and trap shafts. The spokes should average 28 inches long and from 2 inches to 3 inches in width. The trap shafts would be bent in the usual way, and should average 9 feet to 12 feet in length, and from $2\frac{1}{2}$ inches x $1\frac{1}{2}$ inches, $2\frac{3}{4}$ inches x $1\frac{1}{4}$ inches and 3 inches x 2 inches in width and thickness.

JNO. B. JACKSON.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No. 14, BUND, ROOM B., YOKOHAMA, October 30, 1906.

THE FLOUR AND WHEAT PROBLEM.

Inquiries have been received at this office which indicate doubt as to the future of the flour trade in Japan because of the difference of duty in favour of wheat, and the reports that the Japanese are promoting flour mill enterprises.

The defence of the duty on flour, put forward in the interest of the government when charged with initiating a protectionist policy, is that in this country flour is largely a luxury consumed by those who can afford to pay for it, and therefore a fair subject of taxation for revenue when public necessities are urgent. It is further stated that were wheat an article worth considering for revenue purposes, it would have been brought under the revenue impost with flour. The manager of one of the most extensive purveying firms in Japan, who have not heretofore dealt in flour, has been considering the flour question since the prospect of Canadian flour from the Pacific Coast has

opened up with a competing chance. He is now recommending, to a meeting of the managers of the several branch houses, to take up Canadian flour. He would not do this if he thought seriously of the prospect of Japanese grinding. He says that flour milling companies will be formed to some extent, but he does not believe that Japanese millers will be able within many years to make flour nearly equal to the imported article. His further idea is that the more the Japanese interest themselves in flour and wheat, the greater will be the force behind competition and consumption, and the greater the progress that will be made towards the general use of flour.

There is this to be said of the present milling predisposition, that China is more its objective point than Japan. China is a very much larger market, and the sphere of Japanese influence is just now a most attractive field for all sorts of projectors.

TRADE RETURN.

The Monthly Return, Foreign Trade of Japan for September, gives the following information:—

Principal Exports to Canada.	NINE MONTHS ENDING Sept. 30, 1906.		NINE MONTHS ENDING SEPT. 30, 1905.	
		\$		\$
Silk, raw.....	31,293 lbs.	118,050	10,987 lbs.	40,373

Principal Import from Canada.	NINE MONTHS ENDING SEPT. 30, 1906.		NINE MONTHS ENDING SEPT. 30, 1905.	
		\$		\$
Flour, wheat.....	3,083,748 lbs.	62,015	1,771,873 lbs.	35,117

THE RICE AND GENERAL CROP.

The official estimate of the rice crop made up to September 29th shows the extent of the damaging effect of the storms and wet weather prevalent during the month. The estimate indicates a decrease of 2,163,257 koku (1 koku=5 bushels) compared with the earlier estimate made before the unfavourable weather. Taking the country at large, however, the general grain crop is expected to show an increase of 4,766,094 koku compared with that of previous years.

JAPANESE COMMERCIAL TRAVELLERS.

'More visible every year is the commercial traveller from the Orient to America. He is there not alone to sell but to buy,' remarked the American Asiatic. 'It is the foreign visitor who is here to buy we wish to refer to more particularly. Some years ago—say six years ago—the Japanese business man who visited the United States to

buy manufactured goods was something of a novelty; to-day he is expected as a matter of course. The large manufacturing plants of the Pacific coast and the east are being constantly visited by the representative of some enterprise, large and small.'

COLD STORAGE EQUIPMENT.

Cold storage, an innovation here until within the last two or three years, has become a recognized necessity. One merchant firm in Yokohama has within a year past installed cold storage for the preservation of perishable comestibles, amongst which are Canadian dairy products. A joint stock company also has entered upon the field on the ground of public accommodation, and have made such progress as to assure facilities for next season's warm weather. A joint stock company is being formed at Tokyo also, with a capital of a million yen, the chief line of its prospective business being to supply Tokyo with fresh fish more satisfactorily than at present. The plan is to have the steamers conveying fish from the northern ports equipped with cold storage, whence the fish products will pass into cold storage upon landing, thus preserving the flavour of the fish, which is very much required here in order to save the fish products from what is perhaps an unjust charge, lack of flavour. Cold storage between Japan and Australia has proven an effective auxiliary to trade. That between Japan and Canada is yet in the future.

REMARKABLE SALES OF RAW SILK.

The quantity of raw silk sold during the current month up to the 18th inst. has been remarkable, amounting to 19,300 bales, each of 133 lbs. The active sale has realized as high as 1,100 yen (\$550) per bale, while the average price realized is placed at 980 yen (\$490). This price is higher all over by about eighty yen (\$40) than that of last year. This revival of the silk trade, the Boyeki Shimpō (*Trade News*) says, is accounted for upon these grounds :—

- 1st. That the Chinese silk market is unfavourable owing to the high value of silver.
- 2nd. That in Italy and France the silk crop has not turned out well.
- 3rd. The increasing demand for silk the world over.
- 4th. That the American silk merchants are recovering from adverse circumstances which they have to some extent experienced of late.
- 5th. That Yokohama silk merchants had on hand full stocks upon which they are now realizing handsomely.

WOOD PRESERVATIVE.

Professor Taizan Shiza, Director of Forestry, has patented an invention for the preservation of wood, in the case of railway ties, posts, bridge timber, and so on. A number of capitalists in Osaka have formed a company to take up his discovery and establish an industry on their appreciation of it. Railway and other authorities are said to have given much attention to this subject, and will welcome an advance if it prove to have merit. Tar and creosote are understood to be principal materials used in this case.

INSUFFICIENT FERTILIZERS.

Complaint is general among farmers that fertilizers are scarce. Ten years ago all the demand was filled by home supply. But last year alone importation showed the large sum of 22,000,000 yen. It is not surprising under these circumstances that many projects are before the public inviting capital into the manufacture of fertilizers. The small and uncertain quantity obtainable from the Pacific coast of Canada is but the merest drop in the bucket; and a good deal of correspondence fails to show that importation from Eastern Canada is practicable.

NEW MATERIAL FOR PULP.

The Education Department of the Japanese Government, through the medium of the Agricultural College, has been making many experiments with the view of discovering a satisfactory native material for pulp, but without success. Latterly they have tried the young bamboo plant, or 'bamboo grass,' with very promising results.

Former materials failed in the drying; this dries readily. It grows in great profusion, and can be cultivated by the farmers as a branch of their work to any extent. If this discovery succeeds, as it is expected, it will have a very interesting future.

IMPORT OF WHEAT BRAN.

The import of wheat husk, or bran, has been growing of recent date. Every month about 10,000 bags arrive, about 7,000 of which is consumed in Tokyo, as horse feed and other purposes. This is not found in the new tariff, and the merchants interested claim that it should be classed with rice bran, for free admission as manure, while the authorities put it into the list of horse feed, at 5 per cent duty. This proves embarrassing to merchants who expect a large quantity of it to arrive to fill orders.

FLOUR OUTLOOK IN MANCHURIA.

At Tetsurai, which is the northern limit of Japan army occupation in Manchuria, foreign flour was introduced by traders about a year ago. According to the Chugai Shogyo (*Trade News, Home and Foreign*), published at Tokyo, the demand has since been growing to such a remarkable degree that it can be safely estimated that flour will become one of the principal imports of that country. There is some production there of native flour, the description of which translated is 'white flour.' This article, which brought fabulous prices during the war, has settled down in price to three sen, or one and a half cents gold per lb.

The importation of wheat flour showed last year 300,000 bags (49 lbs.), at the value of 1,000,000 yen. To-day 80 per cent of the demand is filled by imported flour. The importation is all of the ordinary quality from United States Pacific ports. The general price is about 3.50 yen, or about 1 yen higher than in Japan. The quantity imported during the first six months of this year amounted to 150,000 bags. Considering that a very large part of last year's 300,000 bags must have been for army use, the keeping up of that rate of consumption confirms the report that the use of flour amongst natives is extending and becoming a very important consideration.

IMPROVING MANUFACTURING METHODS.

The Department of Agriculture and Commerce has decided to establish a bureau at Osaka to conduct experiments in the manufacture of saké, enamelled goods, porcelain, and other exports which are most largely sent to India and China. The object of this bureau will be to discover new or better processes than those at present employed, and the estimate for the necessary funds is included in the new Budget.

THE PROPOSED MATCH TRUST.

The vice-president of the Diamond Match Company of America has been conferring with Mr. Morita, director of the Commercial and Industrial Bureau at Tokyo, on the subject of the proposed Japanese-American match trust.

According to Japanese papers Baron Shibusawa and other leading capitalists are forming a large match-making concern with a capital of 6,000,000 yen, to be subscribed by Japanese and Americans. Japan, it is alleged by the native press, has a vast field in which to extend her match trade, which includes Europe, America, Africa, and the South Sea Islands. The present system of manufacture, together with the competition, seriously hinders the development of the industry, and it is with a view to eliminating these difficulties that the new company is about to be formed.

The Kobe Chronicle says that the arrival of the vice-president of the Diamond

Match Company, has caused considerable commotion among match manufacturers in Japan, as he is believed to have in hand a scheme to form a trust of match manufacturers in England, America and Japan. It is also stated that the government is again investigating a proposal to take over the industry as a government monopoly.

LUMBERING ON THE YALU.

It is stated on current newspaper authority that there are large areas of timber available in the Northern Korean frontier regions, and that a project for carrying on the lumber business along the Korean frontier of the Yalu and Tamen rivers by the Japanese and Korean governments has been submitted for approval to the Korean State Council. The capital is fixed at 1,200,000 yen, to be raised in equal proportions by both governments. Should it later be deemed advisable to admit subjects of both countries as shareholders, transforming the concern into a joint-stock company, it may be done after due consultation and arrangement by the governments of Japan and Korea.

PRACTICAL OPINION ON SILK.

A leading Japanese silk exporter (Mr. K. Sugawa) answering inquiry about the Habutai trade in Canada and other countries, gave expression to the following view:—

‘In the Habutai trade I must confess that the Japanese manufacture cannot compete with the European in respect of the art of printing figures on silk, and of giving it a nice shade of colour. Japan must produce the best she can of excellent quality of silk textile and sell it at the lowest profitable figure if necessary. This must be the policy of the Japanese trade in silk, as our best business purpose will be to concentrate our attention upon improving our strong points, instead of trying to imitate the excellencies of the strong points of other countries, in the silk trade. As to design, the Japanese design is best realized in Japan, as the English design is best realized in England. As to the prospect of the Habutai trade, what the United States is doing now will most likely be what other countries will do. The United States gets the superior kind of silk manufactures by way of France, and the lowest from Japan, and she manufactures the middle class of goods herself. With all the vexatious conditions the silk trade is full of, we must be thankful to find much encouragement in the fact that export of habutai has been steadily increasing for the past ten years.

RECIPROCAL TRADE.

Mr. Uchida, consul general for Japan at New York, addressing the Oriental Economic Society at Tokyo recently on the commercial relations between Japan and America, is reported to this effect:—

‘The customs policy of America has a great bearing on the trade of Japan and America. Under the present protectionist policy the export of habutai, matting, &c., from Japan was suffering. In many branches of manufacturing industry in America was in advance of Europe, and the United States was now able to produce iron manufactures of good quality at a very low price. Sometimes iron-work was imported into Japan at a lower price than it was being sold in New York. Under these circumstances opinion appears to be gaining ground to the effect that certain special classes of foreign goods should be admitted free of duty, while other countries should reciprocate. The proposal has repeatedly passed through the House of Representatives, but has always been shelved by the Senate. In Japan an opinion prevailed that habutai and matting should be admitted into the United States free of duty, which concession would be reciprocated by the free importation of American flour.’

THE RICE CROP.

The rice crop for 1906, which promised to be an exceptionally abundant one, has undergone change lately; the outlook is now considered somewhat unfavourable. The worse conditions are in the northeast provinces, especially in the districts along the Pacific coast. In some places there the crops are again almost entirely ruined, though

the general condition is better than last year. In the districts along the Japan sea coast the weather has been comparatively favourable, and the growth of the plants has generally been very good. The result of the harvest in these districts is estimated to be above that of a normal year. Generally speaking, the result of the harvest this year may be estimated at not less than 43,000,000 koku (1 koku = 5 bush.). This estimate shows a decrease of about 8,000,000 koku on the first forecast issued by the Department of Agriculture and Commerce, and a decrease of about 5,000,000 koku from the second forecast that was published.

JAPAN FOREIGN TRADE.

The growth of exports continues to be a feature of this year's foreign trade. They totalled 38,296,992 yen in September, against 29,532,468 yen for the corresponding month in 1905. During the first nine months of 1906, 1905 and 1904 the figures were:—

Exports.

1906..	285,849,542 yen
1905..	224,478,977 “
1904..	220,710,542 “

This shows an increase of 61,370,665 yen as compared with last year, and of 64,139,000 as compared with 1904.

On the other hand, imports fell from 36,526,517 yen in September of last year to 35,545,624 yen in the same month of this year; and the figures for the first nine months of 1906, 1905 and 1904 were:—

1906..	324,434,354 yen
1905..	393,187,670 “
1904..	265,759,490 “

Thus the total imports from January to September, 1906, were 68,753,316 yen less than in the same period of 1905, but they were 58,683,864 yen greater than the figure for 1904.

The total exports and imports for the nine-months period of the three years were:—

Exports and Imports.

1906..	610,283,896 yen
1905..	617,666,647 “
1904..	486,470,032 “

The total trade thus indicated for the present year, being within the critical twelve months following the sudden close of the war with war importations largely in stock, may be taken to show that the country has passed through an interval usually open to grave doubts and fears, without any other than satisfactory experiences, and therefore in a quite hopeful condition.

MACHINERY SHOW ROOM.

The Agricultural and Commerce Department has a scheme of establishing a machinery show room, the estimated expenditure for which has been put into next fiscal year's budget. The scheme aims at the encouragement of manual industries. The department would buy all useful descriptions of machinery from abroad and exhibit them, explaining to persons interested their uses. When thought expedient the department may permit the borrowing of machines in order to induce the general use of them. This project indicates the ruling desire to advance in industrial methods; and the need felt for recourse to such extraordinary effort, of which this is not the first evidence, gives proof of how hardly old practice and method give way.

A NEW MATERIAL FOR MATCH WOOD.

The beech tree has been tested recently for making match stems and proved satisfactory. Heretofore the aspen has been thought to be the only material for it. The beech has been used heretofore mainly for making Japanese shoes, or 'geta.' It will now enter a wider field, for the match manufacture for home and export is a very important one.

LEATHER BUSINESS IN JAPAN.

Owing to the European demand for leather from America, elephant hide leather and sheepskin leather are very scarce in the Japanese market, the latter being dearer than ever before, ruling at \$125 gold per roll. This figure is over thirty per cent higher than that of two months ago. In spite of this high price competition is active.

VALUABLE CARGO.

The *Tartar* of the Canadian Pacific Steamship line, leaving here to-day, carried as part cargo 8,872 chests of tea, of which 4,909 were for Canada; and 1,145 bales of silk for New York.

A. MACLEAN.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. MacNamara.*)

CANADA CHAMBERS, 36 SPRING GARDENS,

MANCHESTER, ENG., November 15, 1906.

CANNED GOODS.

The advent of cooler weather has not had as stimulating an effect on the sale of canned meats as the dealers had anticipated. I have called upon the largest firms engaged in the trade and the answer was emphatically no improvement. The representatives of the large packing houses of Chicago in circulars of recent date, hold firm to prices and state that an advance is highly probable owing to advancing prices of cattle. In connection with this subject, I may be permitted to reiterate the opinion held by the trade in Manchester, regarding the date of packing being shown on the package, and they are unanimously opposed to it, as it would prove inimical not only to their trade, but that of their customers.

DATE ON THE LABEL.

They unanimously claim that it would serve no good purpose if placed on the label, for as in the case of canned salmon frauds, unscrupulous dealers would remove original label and affix a brand of their own. It might be urged that this could be overcome by branding date on tin, but is this expense to be put upon reliable canners to protect consumers against a very few unreliable ones whose sales are restricted owing to that reason. The well known brands with a reputation for quality are always asked for by the customer, and as these contain only food in first-class condition when packed and the canning properly done, should keep in perfect condition indefinitely, if proper storage is effected.

APPLE SALES AT LIVERPOOL.

I am favoured with a report from Messrs. Woodall & Co., of Liverpool, regarding the arrival of apples at that port to the 10th of November, and their resume of the situation.

Arrivals this week.. . . .	86,990 barrels	} 87,942 barrels
Arrivals this week.. . . .	2,857 boxes	
Arrivals this week.. . . .	43,450 barrels	
Arrivals to 10th November, 1906.. . . .	307,792 barrels	
Arrivals against same period 1905.. . . .	357,569 barrels	

The amount offered this week was the largest for any week during the last two seasons, and nearly as large as in 1903-04. The market responded generously, and the demand was good, though slight reaction in prices was noticeable in fruit not up to the standard, and though last week's prices were reached for choice parcels, it was very occasional, the great bulk realizing 1/ to 1/6 per barrel less. The following prices were obtained:—

Baldwins.. . . .	12/3 to 16/
Snows.. . . .	18/ to 18/3
Spies.. . . .	15/ to 20/6
Greenings.. . . .	14/ to 17/6
Russetts.. . . .	14/ to 20/
Kings.. . . .	18/ to 20/6
Davis.. . . .	11/ to 13/9

APPLE SALES AT MANCHESTER.

During the week ending 10th November the arrivals from both the States and Canada have been fairly heavy and prices have ruled somewhat lower. The quality of the Canadian fruit continues to be very satisfactory, but there is a large proportion of poor fruit now coming forward from the States, and it is this class that has pulled the market down. Greenings continue to meet with a good demand, and are likely to do so for the next two or three weeks.

Shipments from the western states consisting mostly of Ben Davis have arrived in fair condition, although most of the barrels are slack. The grading of this fruit is generally very satisfactory.

The following prices were obtained:—

Canadian.

Baldwins.. . . .	12/ to 14/6
Greenings.. . . .	12/6 to 15/6
Russetts.. . . .	13/6 to 17/6
Spies.. . . .	12/ to 16/
Kings.. . . .	15/ to 19/

American.

Baldwins.. . . .	9/ to 14/
Greenings.. . . .	11/ to 14/6
Russetts.. . . .	13/ to 16/6
Kings.. . . .	14/ to 16/
Western Ben Davis.. . . .	9/ to 13/6

INCREASES IN BRITISH IMPORTS AND EXPORTS.

According to the Board of Trade returns, issued recently, the imports last month amounted to £54,639,318, or £5,962,900 more than in October, 1905, whilst the exports

last month were £33,234,331, an increase of \$3,866,775 over October, 1905. For the ten months of this year as compared with the same period of 1905 there were increases of £38,581,739 in imports and £39,525,452 in exports. As compared with the ten months in 1904 the increases are, imports £49,770,121, and exports £64,656,101.

DUST LAYING BY CHEMICALS.

Owing to the ever increasing number of motors now using the grand roads of this country, and the nuisance they create by dust when travelling at high speed, a good deal of attention was paid to methods to overcome it, and suggestions were made and experiments tried in various places by sprinkling the roads with chemicals, and I give herewith the results of the Cheshire county council as a warning to Canadian municipalities to hasten slowly in the practical adoption of dust layers of a chemical nature. The chairman of the Cheshire roads committee declared that a stretch of the main road from Manchester to Chester in the Knutsford district had been seriously damaged by dust-laying experiments. When wet weather came the road broke up, and became perfectly rotten.

The county surveyor estimated that it would cost about £600 to remake the road. He was thankful the council had not entered more largely into these experiments. The particular road had been macadamized only last year. That was the most satisfactory dust-layer.

P. B. MACNAMARA,

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(*Mr. W. A. MacKinnon.*)

SUN BUILDINGS,

BRISTOL, ENG., November 10, 1906.

SOAP.

I wish to advise Canadian exporters that the Bristol Grocers' Association have invited soap producers to send to their offices in the Guildhall, Small street, Bristol, samples of soaps together with any details of their composition, and full particulars as to prices.

RETAILER'S NAME ON WRAPPER.

There has developed quite an agitation in favour of establishing a trade in various common soaps, the wrappers of which show the retailer's name instead of that of the manufacturer. This is probably a matter in which Canadian exporters could readily afford to meet the wishes of their customers..

W. A. MACKINNON.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA
AND TASMANIA.

(*Mr. D. H. Ross.*)

STOCK EXCHANGE BUILDING, MELBOURNE, October 29, 1906.

AUSTRALIAN PATENTS AND TRADE MARKS.

From time to time I have received inquiries from Canadian correspondents concerning Australian patents and trade marks. The head office of the Commissioner of Patents and Registrar of Trade Marks for the Commonwealth of Australia is in Melbourne. The official fees payable for securing an Australian patent amount to £13 (\$63.26) and for registering a trade mark the amount is £3 5s. (\$15.81), in each case covering a period of 14 years. There has been a marked reduction in the patent fees as prior to the federation of the colonies, the patent fees for all Australia aggregated £93 (\$452.60). All patents granted before federation will expire on June 1, 1913. Under the Trade Marks regulations, which were proclaimed by Act on July 2, 1906, over 2,700 applications for registration have already been received.

The Australian Official Journal of Patents and the Australian Official Journal of Trade Marks are forwarded to the following Canadian addresses:—

The Commissioner of Patents, Ottawa.
The Patents Review, Victoria Chambers, Ottawa.
The Public Library, province of Quebec, Quebec.
The Board of Arts and Manufacture, Montreal.
The Bureau of Agriculture, Toronto.
The Public Library, Winnipeg, Manitoba.

The annual subscription to each of the official journals—published weekly—is £1 5s. (\$6.07) and they contain detailed schedules of the fees and regulations.

AUSTRALIAN-SOUTH AFRICAN CUSTOMS PREFERENCE.

The Commonwealth Parliament this month ratified the reciprocal trade agreement entered into with the British colonies included within the South African Customs Union. Canada, for some time past, has enjoyed a South African tariff preference, and a detailed schedule of the reciprocal agreement with Australia is being forwarded to the Superintendent of Commercial Agencies, Ottawa, from whom particulars are obtainable. The Australian Prime Minister in introducing the agreement stated that 'the treaty affected five separate states in South Africa, and the difficulty lay in the fact that practically the whole of the trade between the two countries consisted of exports from Australia, the return trade being very small at present.'

AUSTRALIAN TRADE WITH SOUTH AFRICA.

In 1905, the Australian exports to South Africa were valued at £1,752,944, whereas the imports into Australia from South Africa amounted to the modest figures of £11,105. The principal items of Australian exports to South Africa in 1905 were:—

Butter.....	£112,286
Fodder.....	28,744
Fruits.....	8,998
Wheat.....	639,747
Flour.....	127,746
Bran.....	6,913
Jams.....	5,245
Leather.....	44,218
Frozen beef.....	56,220
Frozen mutton.....	79,294
Sugar.....	25,215
Lumber.....	103,684
Specie (gold).....	470,000

THE PROPOSED RECIPROCAL TARIFF AUSTRALIA-NEW ZEALAND.

The provisional agreement entered into by the governments of Australia and New Zealand for a reciprocal Customs tariff was practically ratified by the Commonwealth parliament. The Commerce Committee of the New Zealand parliament, to which the draft of the proposed reciprocal treaty was referred, intimated that it was unable to recommend the ratification of the treaty submitted on the ground that any advantages which would accrue to New Zealand would—in its opinion—be outweighed by the sacrifices involved. The Bill had therefore to be dropped and the increased duties collected were subsequently refunded by the Customs. In 1905, the Australian exports to New Zealand were valued at £1,595,368, and the imports into Australia from New Zealand amounted to £2,333,516 (of which gold, specie and ore comprised £1,448,195 and lumber £332,480).

PROPOSED AUSTRALIAN PREFERENCE ON BRITISH (U K.) GOODS.

On October 12, I cabled to the Superintendent of Commercial Agencies, Ottawa, that the Commonwealth government had—for the time being—abandoned the proposed tariff preference in favour of certain lines of goods manufactured in the United Kingdom. In Monthly Report, September, 1906, P. 449, I made a comparison of the net duties on the goods scheduled from a United Kingdom and Canadian exporter's basis. With slight amendments, the original proposals were ratified by the Commonwealth parliament. To secure the preference it was embodied in the proposals that the goods would require to be imported direct in British ships manned exclusively by white seamen. The Imperial government cabled that the 'white seamen' condition would not be accepted, as such a discrimination was forbidden by a number of treaties binding on some of the Australian colonies (states) which had been assented to prior to federation. The Bill has been reserved for the Imperial government to accept or refuse the preference offered by the Australian parliament. The duties collected after the introduction of the measure have been refunded, and it is considered improbable that the Imperial government will assent to an Act contrary to the spirit of existing trade treaties.

INCREASED AUSTRALIAN CUSTOMS DUTIES ON IMPLEMENTS.

In Monthly Report, September, 1906, P. 456, I gave full particulars of the amended duties imposed by the Commonwealth Customs upon agricultural implements and machinery. On October 12, I cabled the Superintendent of Commercial Agencies, Ottawa, that the increased Customs duties had been ratified by parliament, and have been enforced since September 7 last. By this mail, I am forwarding copies of the Act under which the increased duties are collected.

EXCISE TARIFF ON AUSTRALIAN IMPLEMENTS.

In order to insure fair wages and labour conditions in connection with the manufacture of agricultural implements in Australia—upon which increased Customs duties had been imposed on similar imported goods—the Commonwealth parliament passed an Excise Tariff Act which is to be enforced from January 1, 1907. It is provided, however, that the Act shall not apply to goods manufactured in any part of the Commonwealth under prescribed conditions as to the remuneration of labour being fair and reasonable. The excise duties are exactly half of the customs duties scheduled in Monthly Report, September, 1906, P. 456. As an example the customs duty on stripper harvesters is £12, whereas the excise duty on Australian stripper harvesters is £6. Ad valorem customs duties are 20 and 25 per cent, and excise duties are 10 and 12½ per cent respectively.

LEGAL DOUBT AS TO CONSTITUTIONALITY OF INCREASED DUTIES.

Amongst importers there appears to be grave doubt as to the constitutionality of the Customs Tariff Act of 1906, as well as the Excise Act, both of which affect the duties on agricultural implements. It is stated that both Acts will be tested in the courts, and in the meantime importers are depositing the increased duties imposed under protest to await the legal decision. If the Acts are upset, duties will then be assessed under the Customs Tariff Act of 1902, and the over-payments would be refunded to importers, leaving the latter in the same position as though the Acts had not been passed.

PROBABLE RESULT OF INCREASED DUTIES ON IMPLEMENTS.

It is rather difficult at present to estimate the results of the increased Customs duties on implements. If the Acts—referred to in the preceding paragraph—are declared constitutional by the courts, it is thought that the increased duties on imported implements, combined with the reduction in prices of Australian implements arranged in the Excise Act, would serve to almost prohibit the importation of stump jump ploughs, stripper harvesters and possibly grain drills. The new Act increased the duty on harvesters by £7, and compels a reduction of the local makers' price by £15, a difference—now as compared with six months ago—against the importer of £22. When the latter amount is added to the old duty of £5—and freight and other importing charges are taken into consideration—it gives the Australian maker of harvesters such an advantage (on a machine, which admittedly does not cost more than £35 to produce) that importations would seem to be handicapped beyond successful competition.

HIGHER CUSTOMS DUTIES ON PLOUGHS AND DRILLS

The importers' margin of profit upon stump jump ploughs has always been a close one, and in doubling the duty it will undoubtedly decrease the importation of this line. The duty on combined grain and fertilizer drills has also been doubled, and under the Excise Act the local makers are compelled ultimately to reduce existing prices to the extent of about £3. The drills are sold and distributed with much less expense than harvesters or stump jump ploughs, and, if the Australian makers do not reduce prices to a greater extent than is provided in the Act, the probabilities are that regular importations will continue though likely upon a more limited scale. If Australian prices are dropped lower than present rates importations of drills will necessarily be considerably curtailed. Importers will probably be able to increase the retail prices on their other duty-bearing lines sufficiently to cover the advance of 7½ per cent in duties, and consequently such lines—which include disc ploughs, cultivators, &c.—will not be materially affected by the tariff alterations.

DEMAND FOR IMPORTED REAPERS AND BINDERS.

On account of excellent crop prospects throughout all parts of Australia, the demand for reapers and binders is this season very extensive. Already the sales in some states are over 100 per cent greater than in the whole of last year. Canadian binders are in favour throughout Australia and, on account of their honest construction and practical adaptability to local requirements, they constitute the bulk of the importations. This line of agricultural machinery continues on the free list—i.e., there is no customs duty on binders.

PROPOSED COMMONWEALTH LEGISLATION FOR NEXT SESSION.

In Monthly Report, September, 1906, P. 456, I referred to the proposals of the Commonwealth government, then under consideration, relative to the taking over of state debts amounting to £236,680,730, and also to the Bounties Bill, providing for the expenditure of £500,000 spread over a period of years for the payment of bounties on the production in Australia of certain goods and products. Owing to the somewhat hurried prorogation of parliament, in view of the impending general elections, both proposals were abandoned by the government so far as the recent session was concerned.

AUSTRALIAN STATE DEBTS.

The conference of Ministers of the various Australian states, convened upon the question of transferring state debts to the Commonwealth, concluded its deliberations in Melbourne on October 13. Resolutions were passed and a definite scheme formulated for consideration at another conference early next year to settle details and deal finally with the question. Until this matter has been dealt with in a satisfactory manner, one of the looked for advantages of Australian federation will remain unfulfilled. Of the total Australian debt of £236,680,730 about £189,000,000 was borrowed in London and £47,000,000 locally. The annual interest bill of all the states aggregates £8,488,000, of which £5,807,000 is earned by public works, railways, &c.

Loans falling due in the (comparatively) near future are as follows:—In 1907, £12,300,000; 1908, £8,000,000; 1912, £10,200,000; 1915, £19,400,000; 1924, £31,300,000. The financial relations between the Commonwealth and the states is one of the most important political questions now prominently before this country.

THE TRADE OF THE COMMONWEALTH

The figures relating to Australian trade for the first nine months of 1906 show considerable expansion in both imports and exports. The totals are appended showing the increase over the similar period of last year:—

Imports—Nine Months.

	1905.	1906.	Increase.
	£	£	£
Gold.	1,046,718	1,559,271	512,553
Merchandise.	26,377,617	31,317,193	4,939,576
Totals.	27,424,335	32,876,464	5,452,129

Exports—Nine Months.

	1905.	1906.	Increase.
	£	£	£
Gold.	7,556,402	14,366,235	6,809,833
Merchandise.	25,087,400	30,759,611	5,672,211
Totals.	32,643,802	45,125,846	12,482,044

The gain in merchandise imports is £4,939,576, and the exports of merchandise have increased by £5,672,211. It is evident from the official figures that the import trade is making marked progress in nearly all departments. There has been a substantial increase in the importations of dry goods, boots and shoes, iron and steel, manufactures of metals, machinery, lumber, india rubber goods, raw tobacco, cordage, twines and jute goods. The gain in exports of gold is most marked, and there has been a striking increase in exports of butter, wheat and wool. The total trade of the Commonwealth for the nine months ending on September 30, was £78,002,310—an advance of £17,934,173 in comparison with the similar period of 1906.

TRADE OF THE STATE OF VICTORIA.

The Government Statist has just issued a return showing that the total trade of Victoria in 1905 in imports and exports amounted to £45,096,714, which is the greatest for any year in the history of the state. Deducting the interstate totals of £18,110,218 the net oversea trade amounted to £26,986,496. Included in the interstate exports was £2,828,840 worth of goods other than Victorian origin, which serves to illustrate the growing importance of Melbourne as a distributing and manufacturing centre for the neighbouring states. The principal items of exports from Victoria to other states in the Commonwealth are given as follows:—Apparel and attire, £570,631; machines, tools and implements, £449,268; butter, £339,049; boots and shoes, £330,700; piece goods, £404,613. tobacco, £257,039; metal manufactures, £240,144; live stock, £862,043, and bullion and specie, £794,234. The following table gives the principal countries with which the trade was done:—

<i>Countries.</i>	<i>Imports.</i>	<i>Exports.</i>
	1905. £	1906. £
New Zealand.. . . .	843,264	552,820
United Kingdom.. . . .	7,472,489	7,472,462
Other Australian States.. . . .	9,380,031	8,730,187
India and Ceylon.. . . .	848,727	849,450
South Africa.. . . .	5,581	917,238
Other British possessions.. . . .	347,307	246,839
Belgium.. . . .	205,772	697,885
France.. . . .	118,168	1,529,438
Germany.. . . .	925,040	534,121
United States of America.. . . .	1,480,809	423,979
Other foreign countries.. . . .	710,698	804,409
	<hr/> 22,337,886	<hr/> 22,758,828

AUSTRALIAN WHEAT CROP PROSPECTS—1906-1907.

Harvesting has commenced in South Australia, and in a week or two will become general in all the states excepting Tasmania. Present prospects have never been previously equalled, and, as larger areas are under cultivation, everything indicates the probability of a record wheat harvest in Australia. The next week or two—with perhaps excessively hot winds or heavy rains—is the most dangerous period, but, approximately, the wheat yield is estimated as follows:—

	<i>Bushels.</i>
Victoria.. . . .	30,000,000
New South Wales.. . . .	26,000,000
South Australia.. . . .	20,000,000
Other States.. . . .	5,000,000
Total Australia.. . . .	<hr/> 81,000,000

For the sake of comparison the total Australian yield of wheat for the last three seasons is appended:—

	<i>Bushels.</i>
1903-04.	74,150,000
1904-05.	54,537,000
1905-06.	58,000,000

AUSTRALIAN WHEAT AVAILABLE FOR SHIPMENT OVERSEA.

The estimated Australian crop of 81,000,000 bushels of wheat for 1906-1907 would be 23,000,000 bushels more than last season, and nearly 7,000,000 bushels above the record of 1903-1904. Assuming that the present wheat prospects are realized, the total value of crop as set out above at the seaboard would be over £12,000,000. It would represent 2,170,000 tons, and allowing for the quantity required for food and seed in the Commonwealth, would leave over 1,400,000 tons, representing cargo for about 600 sailing ships, as a surplus for export.

AUSTRALIAN WOOL.

The opening sales of the new clip of Australian wool have taken place in the principal markets of the Commonwealth. On many stations shearing is not yet completed on account of wet weather and the roads in some districts are impassable. Wool when shorn has not reached the local markets with normal regularity, which is reflected by the fact that the arrivals to date show a decrease of 149,000 bales as compared with the corresponding period of last year. In addition to purchases made by local commission brokers on behalf of oversea firms, 35 wool buyers from England, 36 from France, 19 from Germany, 15 from Belgium, 1 from Switzerland, 9 from the United States of America, and 2 from Japan, are now operating the wool sales in Australia. The latest sales in Melbourne demonstrated that wool occupies a strong position and the prices realized were the highest since this season opened.

PRICES REALIZED IN MELBOURNE FOR WOOL.

The last Melbourne wool sales were held on October 24, and the irregularity in the biddings, noticeable a week earlier, entirely disappeared. Greasy merino realized as high as 13½d. (27 cents) and varied down to 9d. (18 cents) and even less for a limited offering of indifferent staple. Greasy comeback and crossbred from 10¾d. (21½ cents), to 13¾d. (27½ cents). Scoured merino from 20d. to 21¾d. (40 to 43 cents), and scoured comeback and crossbred from 18d. to 19¼d. (36 to 38½ cents) per lb. The mail closes with an exceptionally strong demand for best descriptions, but inferior wools are more or less neglected.

REDUCED AUSTRALIAN TELEPHONE CHARGES.

February 1, 1907, is the date fixed by the postal administration of the Commonwealth for giving effect to substantial reductions in the cost of telephones, whilst offering improved facilities to subscribers. Under the measured or 'toll' system the following minimum charges will be available in the different centres:—

<i>Town population.</i>	<i>Exclusive service.</i>		<i>Two-party line.</i>		<i>Three or more.</i>	
	£	\$	£	\$	£	\$
Up to 10,000.	£4 0 0	= \$19 47	£3 0 0	= \$14 60	£2 10 0	= \$12 16
10,001 to 100,000. . . .	4 10 0	= 21 90	3 7 6	= 16 43	2 15 0	= 13 38
100,001 upwards.	5 0 0	= 24 33	3 15 0	= 18 25	3 0 0	= 14 60

In the state capitals ordinary business rates for exclusive service will thus be reduced as follows:—Melbourne and Sydney from £9 to £5; Adelaide, £10 to £5; Brisbane, £6 to £5; Perth, £7 to £5; Hobart, £6 to £4, 10s. Two thousand calls each year will be allowed for the fees, and additional calls will be charged for at rates varying from a halfpenny to a farthing each, according to the number of conversations annually. The charge for the use of public telephones is to be reduced from 3d. to 1d. (6 to 2 cents) and for the use of short trunk lines (15 miles in length) from 6d. to 4d. (12 to 8 cents). Greater facilities are also offered for the opening of public telephones at subscribers' premises (the subscribers sharing in the revenue obtained) on wharves or steamships and in other public places. Nearly all oversea and intercolonial steamers are, on arrival, connected with the telephone exchanges at Melbourne, &c., thus conferring a boon upon passengers and crews.

TELEPHONES FOR COUNTRY TOWNS AND FARMERS IN AUSTRALIA.

In country towns exchanges are being opened for two or more subscribers, exclusive services, constructed entirely by the Commonwealth Postal Department, the service being obtainable within small townships for £4 (\$19.47) per annum, or a party line service a slow as £2 10s. (\$12.16), while for farmers' line—lines extending beyond town boundaries and constructed partly by Postal Department and partly by the users—even lower rates are offered. By five or six persons joining on one line a payment of £2 9s. (\$11.95) or £2 7s. 8d. (\$11.60) will obtain full exchange service, free telephoning of telegrams over the subscribers' lines and free intercommunication with other instruments on the same wire.

TELEPHONE MATERIAL REQUIRED BY AUSTRALIA.

Specifications are now being prepared and tenders will be invited by the Commonwealth Postal Department for a large quantity of material required for the extension and equipment of the various telephone systems throughout Australia. At least 6,000 new instruments will be wanted within a few months, and it is anticipated that many more thousands of instruments will be required to replace the Berthon-Ader type, for years in use, by a more modern make. The Postal Department are not confined to any particular instrument, but the majority of telephones recently installed in Australia were made by Ericsson & Co. of Stockholm, who are represented—and carry limited stocks for urgent delivery in Melbourne. A few months ago 2,000 Ericsson telephones were delivered to the Commonwealth Postal authorities for £6,116 or £3 2s. 4d. (\$15.16) each. The Customs duties on telephones is 12½ per cent ad valorem, which was included in the price quoted. Specifications and tender forms for telephonic material required by the Commonwealth are now in course of preparation, and when available copies will be sent to the Superintendent of Commercial Agencies, Ottawa.

STATE AID FOR CONSTRUCTING SILOS.

In order to encourage the establishment of silos in different parts of the state, the government of Victoria undertakes to erect them on selected farms on an understanding that the cost shall be repaid in three equal annual instalments without interest. These silos are constructed of wood and iron, and stand well above the ground, costing about £35 to £40 each. The sum of £2,000 has already been devoted to this purpose, and a large number of applications for assistance has been received by the Department of Agriculture, Melbourne.

AUSTRALIAN TRADE CONDITIONS.

The brighter and warmer weather recently experienced has exercised a stimulating influence on business throughout these states. Copious rains have fallen all over

Australia and the crop prospects were never better than now, although in Victoria the wet weather prevailing a few weeks ago had somewhat retarded exports of wool, besides making the wheat harvest rather later than usual. The trading position is considered to be in a very healthy condition, and indications point to a continuance of the present satisfactory state of affairs.

CANADIAN TRADE NOTES

The recent removal of Australian customs tariff uncertainties has relieved importers and manufacturers' agents from considerable anxiety. Orders which were held in obedience for some little time have—in the main—gone forward as originally intended, to Canadian manufacturers. In seasonable requirements such as rubber footwear, the business was in some instances diverted from Canada to Great Britain in view of the ratification of the proposed preferential tariff. Some Canadian saw-mill machinery has been sold, by the local office of the Imperial Export Company of Toronto, for erection in another state. Samples of Nova Scotian tweeds arrived too late for this season's indents, but the qualities and some values are of such a nature as to offer encouragement for future business. A sample shipment of Nova Scotian boneless cod has just been received in Melbourne in splendid condition in time to secure indents for the Lenten season. New samples of Canadian manufactures covering a wide range of goods are now being opened up in Melbourne. Fair indents for usual Canadian lines are going forward from agents and importers by this mail.

D. H. ROSS.

JAMAICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. G. Eustace Burke.*)

KINGSTON, JAMAICA, November 22, 1906.

IMPORTS.

By the Collector General's report of the colony, it will be seen that the ratio of trade from the Dominion of the island's total imports increased from 5.9 per cent for the fiscal year 1904-1905 to 8.1 per cent for the period 1905-1906. It is also worthy of note that the imports from the United States for the same period under consideration fell from 42.8 to 39 per cent.

EXPORTS.

It will also be noticed that while the bulk of the exports to Canada fell off a little over two points of the previous financial year, the gratifying increase in the direct trade of oranges and bananas are very marked, viz.:

In 1904-5-6, 150,640 oranges were shipped in direct bottom, as against 7,479,875 for 1905-06.

In bananas, no less a quantity than 57,611 bunches went direct during the period under review, as against but 10,529 bunches of the previous year, and it is safe to say that if the voyages could have been reduced to 7 days, the difference of increase would have been still more marked.

IMPORTANT SHIPPING FACILITIES.

It is pleasing to be able to record, that in addition to the *Beta* and *Boston*, Messrs. Pickford & Black have felt justified in placing a third boat of greater capacity and speed on the line of service. This boat is expected to do the run between this point and Halifax in seven days, which is a decided improvement, and direct shipments of fruit in consequence will very materially develop. I think I will be correct in stating that importations from Halifax far exceed that from United States sources to-day, importers finding it more economical.

APPLES AND PEARS.

An effort is being made during the present season to introduce Canadian apples and pears in appreciable quantities. Of course this market is not a very large one for the respective fruits, but such as it is, I see no reason why Canada should not enjoy her fair share.

THE NON-CARRYING OUT OF SHIPPING INSTRUCTIONS.

It is much to be regretted that Canadian packers and manufacturers are so indifferent to the definite instructions given by indentors. The inevitable result being monetary loss and dissatisfaction one way or the other, and in the case of new goods being introduced, a valuable loss of future output. This market is a conservative one, and the sending of one thing; or leaning to one method of pack or grade when another is called for can have but one result; and that disastrous.

When complaint is made, and loss ensues, a common argument by the shippers in justification of the course they pursued is, 'We have shipped thousands of pounds of the like grade of goods similarly packed to South Africa, and have never received complaint or suffered financially thereby.' All that I can say is, that if such Dominion producers and manufacturers desire to successfully capture any portion of this island's trade for their products, they must learn to distinctly understand that the requirements of the Jamaica market differs very materially from that of South Africa.

TRADE CONDITIONS.

Signs are not wanting of a very marked buoyancy in trade conditions. And there is no difficulty at arriving at the contributory cause, increased export in almost every line of the island's products, with encouraging foreign markets, being directly responsible.

G. EUSTACE BURKE.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(*Mr. E. D. Arnaud.*)

GAZETTE BUILDING, ST. JOHN'S, December 4, 1906.

HAY.

Hay is reported as likely to be scarce and expensive during the present winter, the price having already reached \$24 a ton, with a probability in view of the small stocks

at present held here by dealers of an advance to \$27 or \$28 a ton. The rise in the cost of Canadian hay is attributed to a shortage in the province of Quebec last summer, and that is not possible at this late season to obtain any further supplies from that source. There is very little local hay over to dispose of, and the farmers will probably require all they have raised this year for their own use.

It is also understood that only very limited supplies are expected to reach this market from the lower provinces, so that taking the above mentioned facts into consideration it would appear that a very good opening will exist for the export of hay from Nova Scotia or some other easily accessible source of supply whenever the gulf ports are closed to navigation.

The quantities of hay imported into Newfoundland in 1905, according to the Customs returns, are as follows:—

Canada, 6,718 tons, valued, \$77,457.

United States, 134½ tons, valued, \$2,164.

St. Pierre, 1 ton, valued, \$12.

The duty on hay is \$3 per 2,000 lbs.

E. D. ARNAUD.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. Ball.*)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., Dec. 1, 1906.

SHORTAGE OF PIGS.

According to the returns of the Board of Agriculture there is a striking decline in the production of pigs in Great Britain. I have it from an authoritative source that at the annual meeting of a large firm in Birmingham this week handling pork, a loss of £540 was announced on the year's working, due entirely to the high price of hogs which had been dearer than at any period during the last sixteen years. They had killed 870 pigs less than last year, and yet they had cost £7,500 more.

It was pointed out that there were 100,000 pigs less in England, Scotland and Wales than there were twelve months ago, and although Ireland showed an increase of 80,000, there was a shortage of 20,000 in the country.

It was also stated that the company in 1903-4 killed 18,434 piges which cost £77,500; in 1904-5, 16,330 pigs costing £74,719, and last year 15,462 pigs costing £81,863.

CANADA'S OPPORTUNITY.

As Canadian bacon is now so favourably received in this country, there should be an excellent opportunity for increased pig raising and bacon curing in Canada. An even greater shortage is anticipated in the future, and Canadians should make a point of concentrating their energies on the markets of Great Britain.

P. B. BALL.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(Mr. W. A. MacKinnon.)

SUN BUILDING, CLARKE ST., BRISTOL, ENG.,
November 30, 1906.

THE BRUSH TRADE.

There are a number of openings in connection with the manufacture of brushes in this district, for Canadian goods. In the first place, bass wood broom handles are in great demand, the supply being entirely inadequate. I shall be glad to put any exporters of these goods in touch with the manufacturers.

PAINT BRUSH HANDLES.

For the commoner sorts of paint brushes, birch wood handles of the usual plain, round, pointed style are wanted, large quantities of these can be used if prices are satisfactory.

WASH BOARDS.

I was surprised to find that nearly all the wash boards which are imported by a prominent wholesale house in Bristol are of American origin. When I suggested that these might be obtained in Canada, the importer stated that he would be delighted if he could get them there; unfortunately, the Canadian boards are not made as substantially as the American article, which this dealer handles. He assured me, however, that nothing else was required but that the Canadian boards should be made heavier. If this is done large orders await the exporter.

LIGHT PACKING BOXES.

Inquiry is made for Canadian supplies of small packing boxes, made of very light materials, for the use of confectioners, fancy goods dealers, and so on. The specifications furnished me are as follows:—

Inside Measurements.

6½	x	4⅞	x	3⅛
7⅜	x	5½	x	3⅝
8	x	6⅛	x	4⅛
8⅞	x	6⅞	x	4⅝
9⅝	x	7½	x	5⅝
10⅝	x	8	x	5⅝
11	x	8⅝	x	6⅛
11⅞	x	9½	x	6⅞
12¾	x	10¼	x	7½
13⅛	x	11	x	8
14	x	12	x	9
15	x	13	x	10

It will be observed that these sizes will fit into each other, the whole twelve making a 'nest;' the usual method of shipping is to pack twelve 'nests' in a case containing a total of one gross.

WOOD BLOCKS FOR ROADS.

Wood paving blocks of red pine are used by the Bristol corporation, and the city engineer is open to receive particulars and tenders from Canadian firms.

Specifications.

The timber is usually supplied in planks, 9 inches by 3 inches; the most convenient lengths are from 9 to 5 feet.

APPLES.

The following extract from a recent issue of a fruit trade journal brings to notice once more the value of 'provincial' markets, that is to say, those outside of London:—

'London—Barrel apples of good fruit are doing well, though results are much below the provincial markets.'

It is greatly to be desired that Canadian exporters should make arrangements to supply as many inland dealers as possible direct, instead of sending all their output to the great auction rooms in London, Liverpool and Glasgow.

THE SOAP TRADE.

It has doubtless already been announced in Canada that the 'working arrangement,' which hostile critics have called a 'Soap Combine,' has been absolutely and finally terminated. This decision was come to at the end of last week, and has been fully confirmed by the heads of the various companies concerned. I have no hesitation, however, after conversations with members of the trade here, in stating that there is still an excellent opportunity for the introduction of well-made Canadian soaps. The fact is that the trade have, during the existence of the 'working arrangement,' been learning the habit of testing and 'pushing' new brands of soap. The result is that many such brands have met with a most favourable reception from the public, though they had been practically unknown before. This habit, once acquired, will persist for some time; I therefore repeat that Canadian exporters who will vigorously push a thoroughly good article at a fair price have much to hope for in the British soap trade.

W. A. MACKINNON.

INTERNATIONAL TOBACCO TRADE EXHIBITION.

A copy of the prospectus of the 3rd International Tobacco Trade Exhibition to be held in London, England, in April, 1907, has been received at the Department of Trade and Commerce. It is promoted by the proprietor of two well-known tobacco journals. Representatives from the British colonies at the exhibition are desired. It is stated that it is a unique opportunity for colonial manufacturers and tobacco growers to impress the British trade and public with the resources of the empire. Communications should be addressed to:—E. S. Caton, Monument Station Buildings, London, E.C., England.

TRADE OF CANADA.

(From Canadian Returns.)

TARIFF CHANGES.

BAHAMAS.

THE TARIFF AMENDMENT ACT, 1906.

(Assented to May 29, 1906.)

Under section 2 of this Act, the following articles shall be exempted from import duty:—

Bees.
 Dynamite.
 Boars, bulls, rams, stallions.
 Poultry.
 Fresh meat, dead poultry and game.
 Siphons, or siphon bottles for containing aerated waters.
 Wheeled invalid chairs.

CYPRUS.

I. Order of the High Commissioner in Council No. 418, dated June 22, 1906, respecting the importation of gunpowder, explosives and ammunition.

(The *Cyprus Gazette*, No. 858, of June 29, 1906.)

Gunpowder, shot, percussion caps, cartridges (ball and shot), dynamite, nitroglycerine, guncotton, blasting powder, fulminate of mercury or other metals, and every other substance or preparation used or manufactured for explosive or pyrotechnic purposes, fog signals, rockets, fireworks, fuses, detonators and ammunition of all descriptions, including empty cartridge cases, may be imported at the Port of Famagusta by such person or persons as may be authorized in that behalf by special permission of the High Commissioner given under the hand of the Chief Secretary to government, and subject to such limitations as to quantity as the High Commissioner may see fit to impose; and upon such importation the said articles shall be landed at such place and in such a manner as the commissioner and principal officer of customs of the District of Famagusta shall appoint.

II. Order of the High Commissioner in Council No. 422, dated August 1, 1906, granting free admission of manures.

(The *Cyprus Gazette*, No. 863, of August 24, 1906.)

From and after the date hereof all manure and fertilizers, guano, bone-dust and all chemical manures and preparations to be used as manure shall be admitted into the island free of customs import duty.

III. 'The Wine and Spirit Duties Law, 1906,' assented to August 24, 1906, relating to the manufacture, sale and exportation of wines and spirits.

(The *Cyprus Gazette Supplement* of August 24, 1906.)

* * * * *

4. In lieu of the excise and other duties now imposed under the Zijriyyé Tax Abolition Law, 1901, there shall hereafter be levied and paid:—

(a) The export duties severally set forth in the first schedule to this law.

* * * * *

FIRST SCHEDULE.

EXPORT DUTIES.

Upon all wine exported from the island a duty at the rate of 8 paras per (liquid) gallon.

Upon all spirit exported from the island a duty at the rate of 20 paras per (liquid) gallon.

Upon all vinegar exported from the island a duty at the rate of 5 paras per (liquid) gallon.

1V. Order of the High Commissioner in Council, No. 408, dated January 3, 1906, respecting the importation of fish oils.

(The Cyprus *Gazette*, No. 843, of January 12, 1906.)

From and after the date of this order the import duty to be levied on fish oils, which the customs authorities are satisfied are imported for use in the manufacture of leather, shall be 4s. 4 cp. per 100 okes, instead of £2 as heretofore.

MONTSERRAT.

Ordinance No. 2 of 1906, intituled 'The Customs Tariff Ordinance, 1906,'

(Assented to April 14, 1906.—Published and proclaimed April 26, 1906.)

This ordinance repeals ordinance No. 3 of 1903, and ordinance No. 9 of 1903, but with the exception of the under mentioned items, is of the same tenor as the last named ordinance.

SCHEDULE A.

	£	s.	d.
Sugar, other than Muscovado or Melado	100	lbs.	0 2 1
Sugar, Muscovado or Melado	"		0 1 8

SCHEDULE B.—EXEMPTIONS.

* * * * *

Coal to be used as fuel in the manufacture of any product of the Presidency.

* * * * *

Packages, viz.: Boxes, barrels, crates and inner packages of all kinds, also packages and coverings (except butts, puncheons, hogsheads, tierces and trunks), in which goods are actually imported, if usual and proper for the purpose, and every empty package imported into this Presidency and which shall be proved to the satisfaction of the Treasurer to have been exported from this Presidency with molasses or lime juice therein, or which shall be proved to the satisfaction of the Treasurer to have been received at or brought from any port or place without this Presidency in exchange for a package exported from this Presidency with molasses.

* * * * *

Steam engines, steam pipes, boilers, boiler tubes fire bars and ploughs, machinery, whether stationary or portable for agriculture, irrigation or mining or machinery for the manufacture of starch, lime juice or lime juice products, sugar, or rum or the ginning or baling of cotton or the crushing of cotton seed or the manufacture of cotton seed oil.

All necessary parts for the repair of any of the above articles of machinery or for the communication of motive power thereto.

Provided that none of the above articles or machinery shall be free of duty when imported for sale.

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, &c., and the names and addresses of trade representatives, b Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

*(Mr. P. B. MacNamara.)*CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., November 16, 1906.

SHORT WEIGHT CHEESE SHIPMENTS.

For some time the wholesale dealers have noticed that the weight of cheese has turned out short, and patience being exhausted Messrs. Willer & Riley have complained to this office, and a copy of their letter to J. A. Ruddick, Esq., is appended herewith. In consequence of the statements made, I have canvassed several of the largest dealers, and find that they have experienced losses in weight also.

MARKS NOT STENCILLED.

Complaint is also made that the marks are not always stencilled, and it is very difficult to make out the pencilled marks. Again in some cases the stencilled weights are inverted, thus a cheese weighing 78 pounds is marked 87 pounds, but the dealers here say, that by no accident is the error made against the cheese-maker.

It is also reported to me that the cheese boxes arrive in better condition than formerly, and that the boxes are large enough to contain the cheese.

QUEBEC CHEESE SHIPMENTS.

The cheese complained of as short weight is from Quebec province, and one large dealer assured me that he has ceased to handle it, for though he can buy it cheaper than the western cheese, yet when loss of weight and trouble is reckoned, it does not pay him. In consequence of the high price of cheese, and the loss of weight which is very difficult to obtain adjustment for, some dealers who heretofore imported direct, now buy in Liverpool.

The stock of cheese held in Liverpool on the 31st October, 1906, was 15,550 cases in excess of same date 1905. I observed also that very large stocks of Cheshire cheese were in evidence in the different warehouses visited.

P. B. MACNAMARA.

WILLER & RILEY, LTD.,

GENERAL PROVISION MERCHANTS,

54 & 56 CORPORATION STREET,
MANCHESTER, November 15, 1906.J. A. RUDDICK, Esq.,
Ottawa, Canada.

DEAR SIR,—We trust you will excuse our taking this opportunity of writing a few notes to you on a matter which is of great importance to us, and which we think of vital importance to the dairy prospects of Canada.

It is in reference to the loss in weight, and of the averaging of cheese from your country. This year we have had to complain many times to our own people in King street, Montreal, and to several other shippers from whom we have purchased cheese,

with respect to the great difference of average loss between the invoice and the average loss when we receive the goods.

Of course, the usual custom has been, up to lately, to claim for all over the 1 per cent difference, but, owing to an arrangement with your government and the shippers in Montreal with regard to the official weigher, we can get no redress whatever now, as they hide behind the excuse that these goods were averaged by the government, and therefore they have nothing further to do with them after you have inspected same.

Now this is all very well from the shippers' point of view, and we give you a few particulars, which show the great difficulties that we, along with many others on this side, have had to contend with this year.

On September 7, 1906, we purchased, through our own Montreal house, 498 boxes of Canadian cheese. These were shipped per ss. *Manchester Trader* to Manchester, and arrived here on the 20th, and averaged on the 22nd, and we found a difference of 492 pounds between the average loss allowed and the actual loss.

Again on September 27, we purchased 267 boxes, which were shipped per ss. *Manchester Commerce*, and which arrived here on October 5, and were averaged on the 6th, showing a total difference of 230 pounds.

Also on October 27, 285 boxes to Liverpool per ss. *Dominion*, which arrived on the 7th instant, and were averaged on the 9th instant, and showed a difference of 228 pounds.

These are only three instances of many that we could point out, which has actually put on the market value of these goods 9d. per cwt. on the invoiced price. It is a very serious matter to us, and one which should have immediate attention. Of course, this year the factory men have been influenced by the high prices ruling all through the season, and it has been a great temptation to them to forward their goods out of the factory in a green state, and some of the cheese we have received have been spoilt, owing to being shipped in such tender state; and being placed in the chill rooms on some of the boats, it has completely spoilt their character and taste.

We believe that owing to the short time the cheese have been allowed to mature on the shelves, and the average being taken so near to the date of the make, has been the cause of this great loss, which, unfortunately, falls on the people on this side. It is important that all the factories should keep their goods at least for ten days before putting them on the market. We know that goods have left the factory boxed and shipped aboard the steamer in four days from the time of being made, which is not conducive to creating a good impression with the consumer of your produce.

We trust we shall hear from you on this matter; and knowing the deep interest you take in the welfare of your country, you will follow this up, and do something towards remedying this growing evil.

We are, dear sir, yours faithfully,

(Signed) WILLER & RILEY, LTD.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(Mr. C. E. Sontum.)

CHRISTIANIA, NORWAY, December 4, 1906.

SCANDINAVIAN CELLULOSE ASSOCIATION.

The Scandinavian Cellulose Association held its annual general meeting at Stockholm on November 17, where nearly all the Norwegian mills were represented. The following official report has been issued:—Statistics submitted showed that there is no reason to fear an over-production for the year 1907, in spite of the great number of new mills that will be started. Both the old and the new mills have already disposed of the bulk of their production, and considerable sales for several years ahead have taken place.

A number of sawing mills in Swedish Norrland having already acquired cellulose mills and the price of wood having risen so much, it was the hope of the meeting that the other sawing mills, who could easily sell their wood, and who have planned the establishment of sulphite mills, would await an increase in consumption, before realizing their plans.

The production of sulphite in Scandinavia was calculated for 1907 to amount to about 540,000 tons and of sulphite to about 100,000 tons.

'PETROLIT' INVENTION.

An invention made by the Swedish marine engineer, Mr. Hugo Medberg, and which it is said, will be a hard competitor against kerosene oil for both lighting and power purposes, appears to be an assured success according to the Swedish paper *Dagens Nyheter*. The inventor himself has already disposed of the patent a couple of months ago at a comparatively insignificant price, while the present owners of the patent, who also are Swedes, ask thirty million francs for it, and they already have offers from many holds. Even Rockefeller is said to have entered into negotiations to acquire the novelty, which he fears will be a dangerous competitor.

The invention consists in the producing of a stuff which is given the name 'Petrolit,' and with quite remarkable properties. The light, which this new article gives, is said to be stronger and more pleasant than that of kerosene and the energy for power purposes greater than a corresponding quantity of kerosene. 'Petrolit' is produced from common wood-tar, which under the influences of certain stuffs, this is the secret of the invention, is mixed with water. In countries with plenty of wood-tar, the new product will come very cheap, and it is figured that 'Petrolit' may be sold for less than 1½ cents per litre or about 6 cents per gallon.

If the invention holds what it promises, it will readily be seen of which enormous consequences it will be. Trials have proven that 'Petrolit' is fully as well fit for automobiles as benzine. Another advantage over both kerosene and benzine is that 'Petrolit' burns absolutely odorless.

HARVEST RESULTS IN SWEDEN.

From the statements that have come into the Department of Agriculture, the following is an extract:—

'The winter seed, both wheat and rye, have everywhere given more or less above a medium crop. The wheat has mostly yielded a good crop, partially excellent. The rye crop has varied somewhat in the different parts of the country and according to the soil and moisture. On an average the rye crop also has given a medium result, although in several districts the marrow is rather small, especially where grown on sharp ground.

The spring seed has more than the winter seed suffered from the drought during the past summer. The straw is nearly everywhere very short and the crop of grain has been very varying, from poor to good.

The root crop and potatoes, which during the early part of the summer looked as if they were going to give an excellent result, have been much set back by the drought and in several places have frozen, especially in Norrland. The sugar beets have generally given above a medium harvest.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(Mr. C. E. Sontum.)

CHRISTIANIA, NORWAY, December 5, 1906.

LETTERS FROM CANADA INSUFFICIENTLY STAMPED.

Very frequently I receive from Canadian firms, especially from those not doing regular business here, letters that are not sufficiently stamped, and which consequently I have to redeem with double the required postage. In most cases these letters contain besides a sheet or so in writing, a bunch of price-lists or other printed matter, which, of course, might have been sent separately as printed matter. Frequently also these letters come from Canadian firms with only a 2-cent stamp on, while the postage on a letter of regular weight is 5 cents.

So far I have redeemed all such mail from Canada, but as lately with the increasing correspondence I am receiving from Canada, my outlays in this connection have taken rather large dimensions, I hereby respectfully call your attention to the matter. Possibly your department could make this known to the manufacturers and exporters of Canada. Very likely in many instances it is only a fault of the clerks who mail the letters.

C. E. SONTUM.

SOUTH AFRICA.

REPORT OF ACTING COMMERCIAL AGENT.

(Mr. W. T. R. Preston.)

RHODES BUILDING, CAPE TOWN, November 21, 1906.

SOUTH AFRICAN TRADE.

The returns of South African trade for the nine months ended September 30, show that the imports through British ports have decreased by almost a million from the corresponding figures of last year, that is, from £20,621,301, in 1905, to £19,700,104, in 1906, and the exports through these ports have increased from £25,645,789 to £30,446,118. On the other hand, the imports via Portuguese ports have risen from £3,087,808 in 1905, to £3,246,633 in 1906. These foreign ports which had 13·1 per cent of the import trade in 1905, received 14·2 per cent in 1906.

The proportion of trade received through the Cape ports has also increased from 57·1 to 58·3, while Port Natal has suffered most, its imports falling from £7,080,104 to £6,302,825. In exports Cape Town appears to do the bulk of the business, with a value of £25,221,880, or 82·3 per cent; but, of course, this is largely composed of gold and diamonds. In the total of the imports, manufactured articles have still a huge preponderance, amounting to the value of £14,053,843; then comes articles of food and drink, £6,345,885; followed by raw materials and articles mainly unmanufactured, £1,890,794. Of the import trade the British Empire supplies £15,321,533, or 68·9 per cent of the whole, the amount from foreign countries being £7,125,204, or 31·1 per cent; while of the exports the total to the British Empire is £29,145,708, or 95·1 per cent.

W. T. R. PRESTON.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(Mr. E. D. Arnaud.)

GAZETTE BUILDING, ST. JOHN'S, December 18, 1906.

BANKING FACILITIES IN NEWFOUNDLAND.

It is reported that the colonial government intends very shortly extending the operations of the Government Savings Bank by opening a branch at Bay Roberts, a prosperous and growing settlement on the west coast of Conception bay containing a population of some two thousand inhabitants, and it is probable that before very long similar facilities will be provided at other places, as soon as sufficient inducements are offered for their establishment.

The Government Savings Bank has now in operation branches at Harbour Grace and Heart's Content, the central office being at St. John's.

The general banking business of the colony is at present conducted by the Bank of Montreal, the Royal Bank of Canada, and the Bank of Nova Scotia. The first named has a branch at Birchy Cove bay of islands on the west coast, and the Bank of Nova Scotia has a branch at Harbour Grace. It is generally believed that a very large sum of floating money does not find its way into any of the established banks but remains unremunerative in the hands of its owners hidden away in their houses, and always subject to the risk of fire and robbery.

COMMERCIAL TRAVELLERS ON WEST COAST.

A western correspondent of a local newspaper reports that travellers representing St. John's firms are gradually supplanting the travellers for Canadian houses in that part of the colony where they formerly came in considerable numbers, and have captured the bulk of the trade. This it is now asserted is being lost to Canada in consequence of the enterprise displayed by several firms in this city, and the energetic work done by their representatives in that field.

PAINT FACTORY.

It is reported that the Standard Mfg. Co., of St. John's is about to add to its other lines of business that of making paint. The manager has gone to the United States to look up the necessary machinery, and make other arrangements in connection with the proposal. A small factory making copper paint for the use of vessels has been in operation for some years, and having acquired control of the local demand, and driven the American made article out of the market, has not thought it necessary to advertise in any way. The total quantity of paint used here is not a very large one, and the latest available figures give the importations as follows:—

From Great Britain.. . . .	\$25,492
From Canada.. . . .	24,532
From United States.. . . .	16,718
	<hr/>
	\$66,742

The duty on paint is 30 per cent ad valorem, and it is considered that there is a favourable opening under this protection for a successful local industry probably amounting to a value of over \$100,000 a year.

E. D. ARNAUD.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B., YOKOHAMA, November 24, 1906.

GROWTH OF JAPANESE DIRECT EXPORT OF RAW SILK.

The silk trade indicates how the purpose of direct trade is progressing. In reviewing the growth of direct export carried on by the Japanese, vernacular newspapers recall the fact that originally raw silk, the most important export commodity of Japan, was exported chiefly by foreign firms in Japan. The direct export of this commodity has made steady and rapid progress during recent years, and the following figures show the business done by Japanese and foreign firms in Yokohama from January to October last, exclusive of waste silk:—

Exported by foreign firms, total.	81,030½ bales.
Exported by Japanese firms, total.	57,589 “

A remarkable feature of the trade development is seen in the circumstance that while the foreign merchants' share of the silk trade is divided between some twenty-six firms, that of the Japanese is held by four extensive houses. To this circumstance is attributed the speculative movement of the market, and the extreme inflation of prices, maintained in the face of an abundant supply in silk producing countries, and the consequent lethargic demand. Since 1902, no distinction has been made in the statistics of the Finance Department between the amount of trade done by Japanese and foreigners. The latest statistics available are those for 1902. The total value of exports in the ten years to 1902, rose from yen 31,952,217 to yen 96,125,275, and the value of direct exports through the hands of Japanese firms rose from yen 2,544,535 to yen 22,272,246, a phenomenal increase.

FERTILIZER MANUFACTURE.

The importation of beans and bean cake (oil-cake fertilizer) to this country from China and Corea is increasing year after year. For the current year it is estimated that the total quantity will come up to nearly 10,000,000 bushels, out of which the import of bean cake will be about 7,500,000 bushels of 66 pounds.

The manufacture of bean cake in this country is in the state of infancy, being carried on in a small scale in three or four prefectures; the total quantity aggregated in these prefectures does not exceed 540,000 bushels per annum. The demand for bean cake arises from the fact that it is an indispensable article for the fertilizing of the mulberry tree, the leaves of which are the food for the silk worm.

This demand has come into line with all other demands as an object of speculative industrial enterprise. A company for the manufacture of bean-cake fertilizer is being organized at Tokio, with a capital of \$500,000. It is estimated that 4,500,000 bushels of bean-cake fertilizer will be made from 5,000,000 bushels of beans, which it is expected will be imported from Manchuria.

The oil made out of this manufacture will enter into competition with rape-seed oil for lubricating and lighting purposes. The value of the imported beans as entered for customs, averaged over last year, is 67 cents per bushel. The demand for fertilizers has so rapidly developed within recent years that it has far outrun the current of supply.

But that circumstance does not indicate the probable advance of price beyond practical values. The Japanese farmer, although he may want more, will do with less rather than pay what he thinks the thing is not worth.

PASSING OF THE MIDDLEMAN.

Foreign trade, a comparatively modern institution in Japan, like most other innovations, in its progressive march carries with it disturbing factors. The authorities of the Agriculture and Commercial Museum, a branch of the Department of Agriculture and Commerce at Tokio, have been requested by certain foreign trade organizations to supply the addresses of Japanese merchants who are desirous of import and export dealing directly, instead of as mostly heretofore through the medium of the intervening commission merchant. This projected movement indicates a great variety of goods, both import and export; for there is no country that does not appreciate trade both ways, although in practice it does not appear so. In this case leading trade centres such as Berlin, Paris and London, are represented.

The enterprise of foreign merchants in this respect is reciprocated in Japan. Time was when the trader was ranked as of a low order; but that estimate of him is passing away with many other well recognized things that are found to be inconsistent with what the nation is struggling to achieve. Trade is now a great subdivision of the national economy; and many of those who are engaged in it are become potent influences commercially and otherwise. Then the average Japanese business man shows facility, adaptability, and economy in management. To be on the safe side is a situation that none can better appreciate; neither 'get there' with greater celerity than he can. It is thus that a good proportion of them are making money. At the same time competition is intensifying, and he finds it necessary to make saving at every possible point.

Heretofore, since foreign trade began, the Japanese merchant has been the client of the foreign merchant at the ports. That was a condition that for a half century past has served both parties very well. Of course, it imposed additional cost upon the goods passing outward and inward, because the foreign merchant had to have his profit or commission as the case might be; but here, as in older trading countries, the items of cost go forward with the goods to the consumer, who is an unorganized quantity and therefore cannot help himself.

It is clear, however, that help is coming to him in one of the ordinary ways common to the development of trade. Numbers of the Japanese trading people are becoming relatively wealthy, and naturally they are feeling that strength which wealth gives. They are aspiring and moving towards importing and exporting rank; many of them indeed have reached that goal already.

The keen interest manifested by the enterprising Japanese merchant in direct foreign trade is a circumstance that strikes the trade investigator forcibly. He says what, if said in our language, would be that he had been long enough a 'hewer of wood and drawer of water' to the foreign merchant at the ports, and intends to do his own foreign trading. That is indicative of the spirit that animates the Japanese merchant as soon as he feels himself able to make the venture.

The resident foreign merchant is, generally speaking, a highly respectable and responsible agent, standing as he does between the native and the foreign market. It is to his pioneer venturing that this country is indebted for its great foreign trade assets. It is said that he is passing, but he has not yet passed away, nor is he likely to very soon, for he is a very substantial element. He will doubtless adapt himself to the changed conditions as they confront him. In fact the native and the foreign elements in trade have interests so interwoven as to be mutual, and the rapidly increasing volume of traffic will afford compensation for the passing of the day of smaller things and larger profits.

ALEX. MACLEAN.

SOUTH AFRICA.

REPORT OF ACTING COMMERCIAL AGENT.

(Mr. W. T. R. Preston.)

RHODES BUILDING, CAPE TOWN,

P.O. Box 668,

November 27, 1906.

GOOD MARKET IN SOUTH AFRICA.

It needs but a cursory acquaintance with the commercial situation to convince one that a good market exists here for Canadian products. This is due in the first place to a strong imperial sentiment, and secondly to a belief that Canadian goods if placed on the market will be of good quality. On several occasions I have come in direct contact with the force of the sentiment to deal with Great Britain and the colonies in preference to any other country.

SYSTEM OF MANUFACTURERS' AGENCIES.

I am not clear in how far manufacturers or traders in Canada are aware of the conditions under which so-called manufacturers' agencies are carried on in South Africa. A manufacturers' agent doing business throughout the various British South African colonies must pay license fees for the privilege of doing business in this country aggregating about \$600 per annum. When these agents represent British houses the general business is done on commission, the commission is supplemented by an amount agreed upon to insist in covering the general expenses of the agent. This is found to be necessary in view of the fact that travelling with samples is expensive. This view has been brought to my attention by a very prominent general agency.

CHEESE AND CANNED FRUITS.

There is very active demand for Canadian cheese and Canadian canned fruits. In respect to both these commodities in order to ensure profitable sale they must be of the best quality. In respect to fruit the cheaper or coarser grades grown here are always in the market, and that is why a demand exists for a finer fruit in canned goods. In reply to a late correspondent, a Canadian canning company manifested a desire to place their goods on the South African market by the labels used by them and forwarded to the correspondent a set or sets of the labels in question. Upon interviewing the gentleman I was informed that he found it practically impossible to secure orders without samples of the goods. He told me that a set of samples, such as the letter from the Canadian company indicated, would ensure a considerable business, but being without the samples he would not be able to secure orders. The general agency here with a full set of samples of goods would undoubtedly promote a profitable trade between South Africa and Canada.

In as far as I have been able to learn on the question of Canadian cheese, the bulk of this commodity which reaches here comes via England, and is not the best quality of this Canadian product. I have seen a much better and finer grade of Canadian cheese both in Canada and in Great Britain than I have been able so far to find in South Africa. If my opinion on this subject is well-founded as it appears to be, the trade in this commodity is not being developed on favourable lines.

W. T. R. PRESTON.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

*(Mr. P. B. Ball.)*39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., December 14, 1906.

CALCIUM CARBIDE.

The correspondence in the newspapers here with regard to Canadian calcium carbide, I think, is going to have a very good effect, and if the Canadian manufacturers will give a little attention to this market there is no doubt they can get part of the trade.

To-day I have a letter from a large firm who are putting on the market a flare light and are using acetylene gas. They write me that they would much prefer using Canadian carbide if they can get the quality. They say that samples of the Canadian carbide submitted to them may be all right when used in small quantities but when used in large quantities the result is not so satisfactory. They suggest that 14-pound tins should be sent them from all carbide manufacturers in Canada, and that probably to show no unfairness or partiality these tins should be sent to me. That they should not know from what firms they are sent, and should be given a thorough test. I should say that this plan would be a most satisfactory way of trying the carbide, and I shall be very glad to further the interests of any firms submitting these samples.

P. B. BALL.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

*(Mr. P. B. MacNamara.)*CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., December 15, 1906.

ROAD MAKING MATERIAL.

Pursuant to instructions from you, I have endeavoured to obtain fuller information regarding the new road-making material called 'Taafalt,' necessitating considerable correspondence and involving incidental delay. Letters sent to the different borough engineers elicited the admission that the name 'Taafalt' was not known to them, but that no doubt it was a form of tar macadam, the component parts of which were well known and had been in use under their control. I am now led to believe that the name originated with a road contractor who had some experience in laying tar macadam, and may therefore be taken as meaning such. I give a synopsis of the sittings of the Royal Commission on road surveyors and motor traffic, dealing with the evidence of witnesses who in part testified as to tar macadam, the unanimous opinion being, that it was found to yield very satisfactory results, as it combined all the advantages of the best macadamized roads with perfect freedom from dust and longer durability, owing to its practically water proof character.

Tar macadam is made of stone or slag in which tar is intimately incorporated with the material before it is put on the road. In Newcastle it is found that the slag from blast furnaces is the best material for holding the tar, and it is graded from a 2-inch stone in the bottom layer, then 1 inch, and lastly $\frac{1}{2}$ inch, each layer being treated separately with tar, and it rolls down without further binding. Furnace slag is not a necessity, but owing to its porosity it makes better tar macadam than a hard impervious stone. Any road stone that is hard but absorbent is eminently suitable for tar macadam.

Dust would be forgotten if the main roads were laid with it, and their durability is likewise increased over roads made in the ordinary way. Streets laid with tar macadam in Newcastle have not been touched for five years, and only now want renewing with just a surface coat. The heat has not affected them, but it would be a question for Canadian municipalities to ascertain if severe frosts would. Avoid inferior quality of tar as danger lurks in its use, and the street is apt to soften in the heated term. There is also a limit to the gradient on which tar macadam can be used, because if you have a harder surface it becomes more slippery for horse traffic in frosty weather.

'TARMAC.'

The surveyor to the Croydon rural district described a length of 200 yards of tar macadam of a patent kind known as 'Tarmac' on the London and Epsom road, and compared it with a similar length of Guernsey granite laid at the same time and adjoining it. The former cost 30 per cent more than the latter. The granite road has had to be entirely remade, but the 'Tarmac' is as good as the day it was laid, and has been entirely free from dust. The traffic was extremely heavy, the road has not proved slippery, nor has it been affected by heat or frost.

ANOTHER EXPERIMENT IN TAR MACADAM.

The Northumberland engineer is carrying out at the present time eight miles of tar macadam, which he states produces no dust whatever, and gives a perfect road surface. This experiment is undertaken not so much with a view to abating the dust nuisance, as from motives of economy. Two miles have been laid for ten months. The extra cost of tarring and mixing the stone has been 3s. 1½d. per ton, or 30 per cent more than ordinary broken stone, which costs 1s. 7½d. per square yard, whilst tar macadam costs 2s. 1½d. per square yard. By employing machinery to mix the material in future, a saving will be effected, and in consequence of the saving of labour in scavenging and in laying the material, it will cost no more than ordinary macadam, and will endure much longer.

A CHEAP FORM OF TAR MACADAM.

The Kent engineer referred to a cheap form of tar macadam, having built in August last a mile of road with blue Norway granite by laying it on the old surface and then pouring hot distilled tar into it. On top of that was laid clippings of the same material and then rolled down. This formed a very nice surface, and its cost including tar, labour, stone, &c., was 1s. 9d. per super. yard. It has stood the test of all traffic during the past three months. No tar is lost by percolating through, as rolling seems to bring it right up through the clippings again. It is deemed advisable to tar paint the surface the following spring.

IN USE FOUR YEARS.

The clerk to the Notts county council stated that there is a length of tar macadam known as 'Tarmac' that has been down for about four years, and on a road of a wet nature, on which little or no expense in repair has taken place since laid. It is a heavy traffic road, and the tar macadam used is the patent of Mr. E. P. Hooley, the county surveyor of Nottinghamshire. The cost of laying it is about equal to the cost

of granite macadam. In addition it has far greater durability and comparative freedom from dust, and is not affected by heat or frost. If a tar macadam road is not properly constructed, and the wet can get into it, it is liable to break up very quickly in frosty weather.

TARRED STONE.

The engineer of the Withington district, a suburb of Manchester, writes that tarred stone for the paving of roadways has been largely used in his district during the past twelve years. The chief point to be observed in laying a tarred roadway, is to obtain a sound and hard material, with sufficient porosity that when heated it absorbs the oils of tar. The material is laid in two layers three inches deep each, rolled separately. The first broken to a gauge of $2\frac{1}{4}$ inches, and the second $1\frac{1}{2}$ inches. The work should be laid in dry weather, and it should have a fair life of from 8 to 10 years. Such a material would have all the best hygienic advantages to be obtained from a jointless paving. The Municipal Appliances Company of Bamber Bridge, Preston, manufacture a machine on wheels at a cost of £40 for heating and treating the stone, which effects a great saving by obviating the hauling from a central station.

From the preceding paragraphs it is readily seen that tar macadam consists of broken stone dried carefully and then mixed with tar and laid on the road-bed. It may double the cost compared with ordinary roads, but it quadruples the durability and lessens if it does not remove the dust nuisance.

TARMAC FOR ROAD-MAKING.

The county surveyor of Nottinghamshire has patented a material for road-making named 'Tarmac' and which is controlled by a company called the Tarmac Limited, and I examined the length of six miles made therefrom, on one of the main roads out of Nottingham, some portions of which were laid over four years, and as yet need no repairs. In motoring over it it seemed like an asphalt pavement, smooth, noiseless, and comparatively free from dust. I examined a mile of it on foot, and could not see any evidence of wear, although it is a very heavy traffic road, motor lorries and traction engines frequently passing over it. I saw 'Tarmac' in course of laying and traffic was not interfered with. The first layer of $2\frac{1}{4}$ -inch gauge, 2 inches deep is rolled and allowed to stand, before the top layer of $1\frac{1}{2}$ -inch gauge, $1\frac{1}{2}$ inches deep is applied. The material is made from furnace slag and treated according to the patented plan. Two plants located near large ironworks are now turning it out, and another is projected. I read the report of a Belgium engineer sent over specially to investigate it, and he commends it very highly. The cost of 'Tarmac' at the works is 8s. 6d. per ton, and it is estimated that including freight charges for 100 miles from the works, the cost per square super. yard of road laid would be 3s. The road I examined cost 2s. 3d. per square yard, the distance from the works being 30 miles. Six men were employed and they can spread 50 tons per day. A steam roller can thoroughly consolidate 60 tons per day at a cost of 5d. per ton. I understand that the Tarmac Limited have had inquiries from Canada, with reference to establishing a plant to manufacture their material, but they are still open to negotiate. I may be permitted to say, that if it can be introduced into Canada for the making of main roads an immense advantage to the public and those responsible for the construction and maintenance of the roads would result, and that it would prove an undoubted economy.

CANADIAN BACON.

The past twelve months has been by no means a bumper year for Canadian bacon. The first half of the year brought full supplies, and whilst prices at no point touched the curers' notion of what they should be, yet Canadian bacon held its own amongst numerous competitors and came out very little behind its two principal rivals—Irish and Danish. Since August, supplies of Canadian bacon to this country have been very meagre, owing to a deficiency in the supply of hogs and the unusually high prices pre-

vailing. It has been fortunate for Canadian shippers that the quantities placed on the English market have been small, for the prices have been very unprofitable. If Canadian bacon is to maintain its position on the British market, the shipments must be on a more liberal scale. The English merchants look hopefully to the time when Canada can produce more hogs, and there is a generally expressed wish that her vast resources should be turned in this direction by an increase in the number of hog-producing centres.

The quality of Canadian bacon is uniformly good. The feeding of hogs, the selection of the bacon, the mildness of the cure, the transit to this country, and the facilities for placing it on the English market here could not be improved.

Canada has not been alone in the diminution of shipments of bacon to the English market, as the shrinkage in shipments from the United States during the last few months has been very great, and at the time of writing it has been estimated only 8 per cent of the American bacon products is being sent to Great Britain; dear hogs and the good condition of the home trade being accountable for this fact.

HOP FAILURE IN GREAT BRITAIN.

The latest official returns fully confirm the serious expectations that have prevailed in expert circles for some time with regard to the 1906 hop crop. There is now no doubt that this has been a disastrous failure, the total weight gathered being estimated at no more than 245,700 cwts. as against 691,900 cwts. in 1905, the area under cultivation being 46,700 acres, or about 2,200 acres less than in the previous year. The yield per acre has thus fallen from 14.21 to 5.26 cwts. Business at the hop exchange is quite stagnant, as the result of the conditions thus disclosed. The fact that there is not a stronger demand for the crop is attributed to the depressed condition of the brewing trade. It is estimated that small hop growers have lost one million sterling during the last twelve months. It is fairly certain that the area under hop cultivation in this country in 1907 will show a considerable reduction, even on the diminished total given for this year. Some surplus of the 1905 crop is still available for the market, but it is not believed that this represented more than a few months' supply.

APPLES AT LIVERPOOL.

Messrs. Woodall & Co., report under date December 8, that arrivals for week were 53,781 barrels, as against 61,533 barrels for preceding week. Total receipts for season to date, 560,916 barrels, as against same period last year of 594,807 barrels. The shortage has not had the response from the market that might have been expected, and the result is disappointing. The chief arrivals were from Maine and Boston, and the latter especially landing slack and generally poor quality. The demand is active for good stock, but no actual advance can be quoted. Canadian continue scarce, and those showing quality realized a higher range of prices.

P. B. MacNAMARA.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA
AND TASMANIA.

(*Mr. D. H. Ross.*)

STOCK EXCHANGE BUILDING,
MELBOURNE, November 26, 1906.

AUSTRALIAN COMMERCE ACT REGULATIONS.

New regulations relative to the operation of the Australian Commerce (Trade Descriptions) Act, which—so far as imports are concerned—comes into force on January 1, 1907, are being issued by the Commonwealth Department of Trade and Customs when it is obvious that there is necessity for same. Copies of the regulations as issued are being forwarded to the Superintendent of Commercial Agencies, Ottawa, from whom the latest decisions are available upon application.

PROHIBITION CLAUSES IN AUSTRALIAN COMMERCE ACT.

Upon importation, the Australian Customs may seize and absolutely forfeit any goods not bearing the prescribed trade description. The description must be accurate in every instance, and the minimum fine to the importer for passing an entry to which a false description has been applied is fixed, under certain subsections of the Act, at £100 (\$486.66). Section 15 of the Commerce Act clearly states the particular goods upon which Canadian exporters must exercise the greatest care in marking and invoicing for the Australian market, which are as follows : (a) Articles for food or drink, or used in the preparation of food or drink by man; (b) medicines or medicinal preparations for internal or external use; (c) manures; (d) apparel (including boots and shoes) and materials from which such apparel is made; (e) jewellery, and (f) seeds and plants.

EXEMPTIONS UNDER THE AUSTRALIAN COMMERCE ACT.

In the case of all goods landed in the commonwealth, which do not come under any headings mentioned in section 15 of the Australian Commerce Act, a statement of the country of origin is only necessary when any marking is used in connection with the goods which would suggest that the goods were made in a country different from that in which they were made. For example, English wording on German goods would require a statement of the country of origin, but English wording on goods made in an English-speaking country (Great Britain, Canada or United States) need not be accompanied by any statement of the country of origin. In view of this special decision of the Australian Department of Trade and Customs, it will not be necessary for the country or place of origin to be marked on goods made in Canada (or the United States) unless they come under the Commerce Act Regulations. In the latter case the name of the country, or place of origin, must be stated and the general term 'made in America' would not be accepted.

GOVERNMENT ASSISTANCE IN DEVELOPING GOLD AND OTHER MINING.

The state of Victoria has for some ten years been granting financial assistance to miners and prospecting parties. Under the Victorian Mining Development Act, loans of any sum up to £10,000 are made to registered companies, and loans up to £250 to co-operative parties of miners—the party to consist of not less than two working

miners. On application of a mining company being duly reported upon and approved, a mortgage and bill of sale are taken over the company's lease, machinery and plant in order to secure the government in the event of non-payment of the loan. In the case of prospecting parties, an agreement is required that the advance given will be repaid before dividing any profits accruing from the work done by the party in connection with the advance, but no security is asked or given, and in very few cases has the money been repaid.

HOW MONEY IS ADVANCED TO PROSPECTORS AND MINING COMPANIES.

The procedure adopted by the state of Victoria in making monetary advances to prospectors and mining parties is usually upon the £1 for £1 basis. The instalments are made to the party or company as the work proceeds, and after the government inspector has satisfied himself that the work has been done, the government then contributes half the cost and the party or company defrays the other half. Copies of the Victoria Mining Development Acts under which the loans are made, together with the necessary forms required in connection with same, are being forwarded by this mail to the Superintendent of Commercial Agencies, Ottawa, from whom further details are obtainable by those interested.

EXPENDITURE BY THE VICTORIAN GOVERNMENT IN DEVELOPING MINING.

During the past three years, apart from the ordinary expenditure of the Mines Department, £43,000 has been voted out of surplus revenue by the Victorian government for aiding mining development by advances to mining companies and co-operative parties, boring for coal and gold, constructing new batteries, providing new and improved drills, and cutting and clearing prospectors' tracks in mountainous districts. A sum of £37,230 was voted from ordinary revenue for boring and batteries. Nineteen boring plants are at work in various parts of the state. In thirteen of these, foremen paid by the state are in charge. The net cost of working, as far as the department is concerned, after allowing for the crushing fees, amounts to £5,555. The remaining six batteries, which are managed by local committees, have been provided within the last eighteen months, and are powerful five-head plants of the most up-to-date pattern, Wilfley tables and Berdan pans being provided where necessary, the total capital cost of this new mining plant being £14,918.

FINANCIAL RESULTS OF AUSTRALIAN RAILWAYS, 1905-6.

The complete figures showing the working of the Australian railways in 1905-6 are now available. The gross earnings of the railways expanded by £982,821 from £11,842,983 to £12,825,804. On the other hand, working expenses rose by only £129,432 from £7,342,503 to £7,474,935. The net revenue, therefore, improved by no less than £853,389, from £4,496,480 to £5,349,869. The total net revenue, therefore, of £5,349,869 leaves a surplus after paying all interest, &c., of about £530,000, which is the first time for a considerable number of years that the lines have made a profit. The following comparison is of interest:—

1902-1903, deficit.	£1,447,300
1903-1904, deficit.	730,300
1904-1905, deficit.	401,500
1905-1906, surplus.	530,000

The improvement effected, as compared with the previous year, is about £941,500, while as compared with 1902-1903 the results are almost £2,000,000 better. So far the 1906-7 returns have shown further gains on the past financial year's figures, and it is tolerably clear that a considerable addition to the profit earned during the past twelve months will be made.

SUGAR BOUNTIES AND REPATRIATION OF COLOURED LABOURERS.

Owing to the repatriation of the coloured labourers—Kanakas—from Australia (to the South Sea Islands) the bounties paid by the Commonwealth government to the sugar growers of Queensland and New South Wales, who employ white labour only, is becoming a heavy item of national expenditure. The estimate for the present financial year is £278,000, as against £148,000 for 1905-6, but already—that is down to October 31—no less than £165,813 has been paid away to the planters in the northern states. The government has approved of the draft contract by which some sugar growers in Queensland intend to import Italian labourers upon what appears to be equitable rates of wages and hours of work.

THE AUSTRALIAN WHEAT HARVEST.

The prolonged spell of unseasonable weather continues to delay harvesting in some of the states and in Victoria it is not probable that much new grain will be available for export before the end of this year. In a late season the risk of damage increases and recent reports indicate yields below those anticipated a month ago. The demand for new wheat is thus being accentuated and f.a.q. is now quoted for late December delivery at about 2s. 11d. (71 cents) f.o.b., and a slightly lesser rate for January shipment.

NINE THOUSAND TELEPHONES REQUIRED BY AUSTRALIA.

The Postmaster General of Australia will shortly invite tenders for some 9,000 telephone instruments of a modern type which are required for the state of Victoria alone. Complete specifications of the particular requirements of the Department have been forwarded by this mail to the office of the Superintendent of Commercial Agencies, Ottawa, where interested manufacturers can refer to them. The specifications vary a little in several of the states, but the Victorian requirements of telephonic material are—in the main—similar to those of the entire Commonwealth. During 1907, the Australian government purposes importing large supplies of telephone material.

TENDERS FOR 340 TONS OF COPPER WIRE ACCEPTED.

Tenders have been accepted by the Australian Postmaster General for the supply of copper wire—and other important items—required for the construction of the trunk telephone line between Melbourne and Sydney. The contractors have agreed to deliver 233 tons of copper wire at Sydney for £115 5s. per ton, and 107 tons at Melbourne for £115 10s. per ton. The inauguration of the first long distance telephone service in the Commonwealth is expected by June, 1907. A considerable amount of preparatory work has already been done, and the capital outlay will be in the vicinity of £35,000.

CANADIAN TRADE NOTES.

By the loss of the ss. *Haversham Grange* on the voyage from New York to Australia a cargo valued at, approximately, £275,000 of United States and Canadian merchandise failed to reach its destination. The steamer carried a considerable quantity of Canadian goods and, as regards the latter, cabled instructions were, in most cases, promptly sent to have the shipments repeated. A Melbourne manufacturers' agent who recently returned from Canada, after completing some fine business connections, lost his original consignment of samples and stock. By this mail, orders are being forwarded on behalf of Melbourne, Adelaide and Tasmanian buyers for a varied assortment of Canadian manufactures including a wide range of furniture and fittings, chairs, desks, washing machines, refrigerators, sewing machines, organs, corundum wheels, whips, wall paper, gas tubing, &c. Seasonable requirements of agricultural implements and machinery are also being indented by this mail for the autumn and spring of 1907. In some instances, the recent increase of customs duty has not materially affected the quantity of implements ordered.

D. H. ROSS.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(Mr. J. S. Larke.)

THE EXCHANGE, SYDNEY, AUSTRALIA, November 26, 1906.

COMMERCIAL TRAVELLERS' DUTIES IN NEW ZEALAND.

In response to your inquiry, I have no knowledge of any change since my report on this subject in July, 1903, which was as follows:—

'In New Zealand the tax of fifty pounds levied a few years ago was changed to an income tax on the goods sold. It was considered that a profit of five per cent had been made on all sales, and the government levied a tax of two and a half per cent upon this profit. This amounted to one-eighth of one per cent, or twelve and a half cents on the hundred dollars of orders taken. It is impossible for the majority of travellers to know how much their sales have been, as the larger firms commonly send in their orders through their London or New York agents, and this furnished a means of evading the Act and of often escaping it. The government now requires every traveller to make a deposit of five pounds on entering the colony and pay duty on his samples also. On leaving it he is required to make a declaration of his sales, when, if the deposit exceeds the tax due, the excess is refunded to him, with the duty on the samples he may take away with him. He may enter at any port or take his departure from any port of the colony, a certificate of the deposit and duty paid being given him at the port of entry, which is honoured at the port of departure.'

WHEAT.

The exports of Australian wheat for the nine months was 34,420,882 bushels, as against 30,250,000 bushels in 1905 and 36,000,000 in 1904. It is estimated that the harvest of 1906-7 will be equal at least to that of 1904, though not quite equal in the state of New South Wales to the yield of that year. The estimate for this state is 25,000,000 bushels, as against 20,737,200 bushels reaped last harvest. The government is purchasing a number of estates for the purpose of cutting them up for closer settlement, and the owners of other estates are doing this for themselves. This means a very much larger area under crop in the future than is now cultivated, with an increase of wheat for export. It is possible that with good seasons the export quantity of wheat from Australia may be doubled in the next ten years. It is anticipated that there is still in stock about five and a half million bushels in all Australia that can be exported.

MANUFACTURES.

New South Wales has always been the premier state in respect to commerce, but it appears now to have taken the lead in manufactures as well. The following statement respecting the manufactures in New South Wales and Victoria are taken from the respective statistical returns of these states. They are for the year 1905:—

	N.S.W.	Victoria.
No. of factories.	3,700	4,264
Total hands, No.	72,175	80,235
Male hands, No.	56,111	52,925
Female hands, No.	16,064	27,310

	N.S.W.	Victoria.
Value machinery and plant.. . . .	£ 7,919,948	£ 6,187,919
Value land, buildings, &c...	4,969,698	7,771,238
Materials used, value...	18,636,720	15,058,471
Wages paid...	5,191,350	5,039,115
Goods manufactured, value...	30,028,150	25,200,648
Value added by manufacture...	12,381,430	10,142,177

COMMERCE DECISIONS.

In reply to inquiries the Department of Customs has made public the following statement, which will be of interest to Canadian manufacturers:—

‘Will the English hall mark on silver and gold goods be a sufficient indication of place of origin? Yes, if English make, and if the articles are not jewellery, Jewellery must bear the prescribed description.

‘Rolled gold, filled gold, and other imitation gold and silver goods. Can the use of the word “gold” and “silver” in connection with such terms be prohibited, and 9 carat be the lowest quality to which the term “gold” can be applied, and “sterling” be the lowest quality to which the term “silver” can be applied? The word “gold” cannot be limited as suggested, but jewellery containing gold must, where practicable, bear the carat number indicating the proportion of gold contained in them, and jewellery partly or wholly covered by gold must, where practicable, bear the words “rolled gold,” “gold filled,” “gold plated,” or “gilt,” as the case requires. In the case of goods described as “silver” which are not “sterling” silver, or which cannot properly be described as silver, it might be necessary to take action for false description.

‘If the above regulation cannot be enforced, could it be made compulsory to have the word “imitation” stamped on all such articles? The articles are required only to be stamped “imitation” if, being actually imitation gold or silver, they are stamped “gold” or “silver.”

‘Will the words “warranted to wear 5, 10 or 20 years” as now applied to such goods, be allowed, the inference being that the gold in such articles will last that period. These terms are often applied to very inferior goods, and it would be better to prohibit their use altogether? Yes, if they are facts. If they are not facts the goods will be liable to seizure.

‘Large quantities of English, American and German plate are made and simply stamped “E.P.N.S.” which is recognized all over the world as signifying “electro-plate on nickel silver.” Will the place of origin have to be stamped on the article under these words, or will a ticket or label to that effect be sufficient? The name of the country of origin must be stamped on the goods which are so branded if they are not made in English-speaking countries.’

It has been decided that where watch cases are made in one country and the movements in another, no alteration in the present marking will be required.

PREFERENTIAL TARIFF.

In my last report I gave the position of the government of Australia upon the question of preferential trade as announced in the speech from the Throne. The Right Honourable G. H. Reid, as leader of the opposition, last week declared his position upon this question, as follows:—

‘If the people of Great Britain change their minds and believe a preferential arrangement with Australia advisable, I would meet their wishes by an equitable agreement. But I do not think the people of the mother country will ever agree to taxes on food, and their horror of such taxes is natural and I think sensible too.

I supported an unconditional preference, offered by Australia to the mother country, but if any is offered it should not be a sham.’

POTATOES.

The *Miowera*, which arrived four weeks ago, brought a quantity of Canadian potatoes. They were scarcely ripe enough for shipment, but having been carried in cool storage, arrived in fairly good condition. They were of good quality but began speedily to decay. They were quoted on the market at £10 per ton. Larger shipments, in better condition, are anticipated by the *Aorangi*. New potatoes are coming in from the northern rivers and Queensland in very considerable quantities, but the quality is not good and they are quoted at £7 per ton, £1 less than old potatoes still coming from Tasmania. If the Canadian arrive in good condition they should find a profitable market.

AUSTRALIA AS A HIDE AND SKIN MARKET.

There is a considerable consumption in Canada of hides and pelts produced in Australia but the direct trade has not grown as might reasonably be expected. The proportion of purchases of these articles in London is still large. Buyers have been disappointed in the carrying out of what they deemed to be contracts. They had been led to expect a delivery of a certain quantity and when the prices went up and occasionally otherwise, the quantity delivered would be very much below that expected. What I have stated in respect to the dead meat market will give a clue to the disappointments in the delivery of hides and skins. The slaughtering firms offer in the open market by auction, the result of their flaying for the next month. They guarantee no quantity but state that a certain number are expected to be delivered. When, as in the case of last month the prices are so high that buyers hold off or, as sometimes happens, when the sales in London have fallen below expectations, the number of cattle and sheep killed is very much below the estimate when the sales were made. The successful buyers offer their expected product to markets in England or to buyers in the United States and in Canada and like the slaughtering firms, they state the amount that they expect will be available but guarantee no deliveries. When there is a short supply they only deliver the hides and skins they receive and if they deal justly they apportion the number to their customers in proportion to their expected purchases.

These disappointments have very naturally, in Canada, led to the belief that the Australian firms have deliberately cut down the deliveries because they could get higher prices elsewhere than the contract calls for. This may occasionally be true, but is not true in my experience, and the disappointments are due to the conditions of the trade here. This is true of New Zealand as well as Australia. The disappointments have occasionally been very great in respect to the supply of sheep skins from that market. The slaughtering, however, is, as a whole, more even in New Zealand than in Australia and the disappointments therefore proportionately less. There are but two methods by which these can be in some measure overcome. The Canadian buyer can have his own agent in this market, who will purchase a fixed number at the sales and ship directly, or he may insist upon the Australian seller fixing a definite number in his cable offer. The latter method, however, it will be found difficult to carry out, as most of the firms of good reputation strongly dislike to make a contract of this kind, which may land them in serious difficulties.

The above statement refers to the slaughter house hides. What is known as 'country killed' are sold after receipt of the hides, but these bring lower prices because, on the whole, they are not equal in quality and particularly in the flaying to the slaughter house killed.

AUSTRALIAN TIMBER FOR VEHICLES.

The high prices and scarcity of the better grades of hickory are no doubt giving some concern to Canadian manufacturers as to where they can obtain raw materials. I had expected that inquiries would have been sent me as to the possibility of securing Australian timbers for this purpose. Such inquiries came some time ago from Ger-

many, Great Britain and, to a small extent, from the United States, the home of the hickory. The representatives of Australian timber firms have gone to Canada, and there is no doubt that some of the users of wood are in possession of facts which will be of interest to all. Australia has no timber equal to the best hickory as regards weight, strength, elasticity, ease of working and the reception of paints and varnish, though an enthusiast can be found who believes that it has. The timber nearest to hickory is the spotted gum, a Eucalypt, so called from the appearance of its bark and not of its wood. The difference between the timbers is illustrated by the following figures:—

	Weight.	Modulus of Rupture.	Modulus of Elasticity.
Pignut hickory.. . . .	56 lbs.	18,700 lbs.	2,730,000 lbs.
Spotted gum.. . . .	62 "	13,300 "	2,056,000 "

Weight means weight in pounds per cubic foot. Modulus of rupture is eighteen times the load which is required to break a bar one inch square separated at two points one foot apart and loaded in the middle between the two points. The modulus of elasticity affords the method of comparing the strength of the two timbers in sustaining a load hanging from its end.

Pignut hickory, however, is very scarce, and it is contended—and I think correctly—that the spotted gum, as now seasoned, is better than the quality of the hickory that is in common use. In one respect spotted gum is said to excel the best hickory—its durability in moist climates. This opinion is supported by the fact that it is favoured by the coach builders of New Zealand, for of the £8,979, in value, of carriage and cart shafts, spokes and felloes, imported in the rough, nearly three-fourths of it comes from Australia and a little over one-fourth from the United States and Canada. Spotted gum has not had a reputation such as it deserves amongst the coach builders of this state, due to the character of the tree. It has a great thickness of sap wood, which, for carriage purposes, is no better than Canadian basswood, hence this must all be cut away and only the heart stuff of matured trees used for vehicles. Like all Australian hardwoods, it is liable to warp, check and twist when being seasoned if this is not carefully done. More attention has lately been given to these conditions, and now timber of good quality, free from checking and without injurious gum veins, can be secured. As in hickory, so in spotted gum, there is a very great diversity in the quality of the timber. Some lines have been sent to Canadian users, but unfortunately their selection has been governed by price rather than by quality.

PRICES VARY.

The prices vary considerably. That now ruling being from 10s. to 157s. per 100 super. feet f.o.b. at this port. If 10s. is the price fixed, 10s. timber will be shipped, but it will be much dearer timber than the 14s. quality in the end for vehicle purposes and a good deal of disappointment will be experienced in using it. Germans only take the highest grades and the United States buyers are following them in this respect. There is reason to believe that some timber which was sent to the United States has been manufactured and sold under the name of hickory. If Canadians desire to test this wood, they should select a firm of recognized responsibility and leave the quality to its selection, only requiring the best.

WAGONS AND HEAVY VEHICLES.

In respect to wagons and heavy vehicles, Australia is better placed. In the various species of iron bark it has a timber which while having a higher specific gravity than the best quality of oak, also exceeds it in strength, as the following figures show:—

	Weight. Lbs.	Modulus or Rupture. Lbs.
American oak.	62	10,600
Gray iron bark.	74	17,900

In modulus of rupture and modulus of elasticity iron bark excels the very best grades of hickory, but fails in some other qualities. Iron barks, however, are very high in price, the present quotations for the choicest vehicle timber being: Sizes 3 x 3 to 6 x 6, 17s. 6d. per 100 ft. sup.; sizes 7 x 6 to 12 x 6, 21s. per 100 ft. sup.

From these figures Canadian users can calculate the cost to them, laid down via Vancouver, as they could obtain freight rates from any railway agency. Most of the timber that goes to the United States is shipped to New York or Boston via Liverpool, England.

FIBRE FOR TWINE.

The increasing demand of the farmers of Canada for binder twine and the high price of the raw material available would indicate that it would be a desirable thing if Canada could produce a plant that would furnish this material. I am unaware whether the attention of the Canadian government has been directed to the possibility of the production in Canada of the phormium tenax of New Zealand, commonly known as the New Zealand flax. It is not a flax but a plant indigenous to New Zealand, the Norfolk Islands. It is a perennial plant, which produces leaves that will grow to about 6 feet in length and 3 inches broad and which produce, it is claimed, the strongest fibre that is grown. This fibre is now fairly well known to the twine makers of Canada.

New Zealand has but a limited area and is not likely to produce a much larger quantity than it now does and as Australian farming changes to smaller areas on which mixed agriculture is carried on, the preservation of the straw will tend to the use of binders rather than harvesters and it may be that Australia will require all the raw material that New Zealand will have for export. The possibility of its being produced in Canada has two aspects, the climatic and the commercial. The best fibre grows in moist or swampy lands. There is good reason to infer that it will grow or can be acclimatized to grow well at least in the swampy lands of southern Ontario and in the portions of the maritime provinces and British Columbia.

While swampy lands are its habitat, it will grow on dry lands and sustain life in periods of considerable drought. It is to be found in some sections of Australia, where it is grown in gardens for the purpose of furnishing a cheap fibre for tying up plants or even for more extensive use. Experiments alone would tell whether, if grown in Canada, it would produce a fibre equal to what it does in New Zealand. There it is believed that by careful selection and attention the quality can be very considerably improved. It is grown there without attention in these swampy lands and during the late high prices for fibre it has made a most profitable return to the land-owners. A royalty is paid by the millers to the owners of these lands for leave to cut in prices varying according to the price of the fibre, but averaging about 75 cents per ton and the average production per acre is set down at 25 tons. This therefore yields an extraordinary rental to the owners and makes these once considered to be useless lands amongst the most valuable in the colony.

Countries producing fibre plants have had the advantage of low-priced labour, but New Zealand is not a cheap labour country. The price of fibre must be from \$20 to \$25 per ton higher in Canada than is obtained by the New Zealand flax dresser. If at the price of labour in New Zealand and with the high royalty paid to the owners of land on which the plants grow, it can be made profitable there, it ought to be in Canada, provided that it will grow as well.

One of the hindrances in the way of its wider use has been the difficulty in obtaining a machine that will economically prepare the fibre and that difficulty has been

but in part overcome. Ingenuity, however, ought to devise a process for getting rid of the gum and otherwise preparing the fibre, not only more economically than now is done, but also ending in producing a higher grade. So far as I have knowledge this plant is worthy of the careful attention of the Department of Agriculture, and if it can be successfully grown it may become a boon to both the twine manufacturers and the farmers of Canada and, further, provide a most profitable crop for lands that are now waste or of little value.

TAN BARK.

I observe that an expert from the east who has visited British Columbia, states that the hemlock bark of that province is 20 per cent richer in tanning than the bark of eastern Canada. Nevertheless it is either burned in the woods or allowed to go to waste. I have more than once called attention to Australia as a market for bark extract and still believe that it would secure a ready sale here. I saw one or two lumber firms when in Canada and called their attention to this matter and I was given to understand that it was probable that during the present year bark extract would be made. I have not heard of anything since in regard to it.

POTATOES.

The shipment of potatoes from Vancouver which arrived by the *Aorangi* were found to be in very bad order. Most of them were given away to any one who would take them from the ship. Apparently they were too unripe for carriage in bags and outside of cool storage. My information is that potatoes shipped to New Zealand by the *Pondō* were also unfit for sale on arrival. It is absolutely impossible to carry potatoes in bags until they are thoroughly ripe and hard and the efforts which have been made this year to secure a trade have not only resulted in failure, but have injured Vancouver's reputation for careful shipment.

J. S. LARKE.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B., YOKOHAMA, December 7, 1906.

THIS YEAR'S FOREIGN TRADE.

Up to June last Japan's imports show an excess over exports every month; but in July the tables turned and exports have been exceeding imports. At the end of September exports had totalled 285 million yen, showing an increase of 61 million compared with the corresponding period of last year; while imports had amounted to 324 million yen, a decrease of 69 millions as against last year. The countries of chief import are as follows:—

Imports.

From Asia—

	1906.	1905.
	Yen.	Yen.
China.. . . .	40,678,000	33,290,000
Korea.. . . .	4,200,000	4,164,000
Hong Kong.. . . .	540,000	1,107,000
British India.. . . .	53,761,000	82,077,000
Others.. . . .	30,085,000	29,034,000
	129,269,000	149,676,000

From Europe—

Great Britain.. . . .	80,072,000	93,178,000
France.. . . .	3,803,000	3,783,000
Germany.. . . .	32,977,000	32,273,000
Others.. . . .	16,232,000	14,640,000

	133,088,000	143,878,000
--	-------------	-------------

From America—

United States.. . . .	52,441,000	88,351,000
British America.. . . .	578,000	440,000
Others.. . . .	22,000	170,000

	53,042,000	88,961,000
--	------------	------------

Australia.. . . .	3,434,000	5,165,000
Others.. . . .	4,088,000	5,504,000

	324,434,000	393,187,000
--	-------------	-------------

NOTE.—1 yen equal to 50 cents.

In the export trade raw silk, habutai, silk handkerchiefs, cotton yarn, cotton piece goods, coal, camphor, porcelains, &c., have shown a considerable increase on last year. The export trade to Asia has made an increase of 40 million yen of 25 millions to Europe and of 8 millions to America.

The imports show a decrease of 70 million yen during the nine months under review. The decrease in respect to Asiatic countries is in the import of raw cotton, rice, and hides and skins. A decrease of iron, steel, wool, woollen cloths, machinery, &c., is noted in imports from Europe.

Writing with reference to the prosperity of the export trade, the *Oriental Economist* remarks 'there is no doubt that this state of things will continue in the future, but it will be impossible to keep down the volume of imports at the present rate for any length of time. The falling off in imports has been brought about partly by the cessation of the war and partly by the dullness in mercantile and industrial circles that followed during the first half of the year. Now that the price of general commodities, which had been showing a downward tendency to the end of June last, has again risen, and with the expansion of the currency, the purchasing power of the people has been greatly stimulated. Moreover, many of the new undertakings now projected will require a large amount of machinery and material which will swell the import trade to a very considerable extent. Under such circumstances, a preponderance of trade will be likely to revert to the side of imports.'

THE GINGER INDUSTRY.

Ginger-root is largely produced in Shizuoka prefecture, and was first exported about twenty years ago. Owing to deterioration of quality, export almost entirely stopped. The quality having improved in recent years by more skilled methods, the

export trade has revived, and cultivation is carried on more extensively with prospect of rapid advancement. Last year the total area of land devoted to ginger in the prefecture was about 8,025 acres, which produced 2,833,333 lbs., valued at \$95,625. The dried ginger is exported chiefly to the United States, some going to Europe and India. In Japan the demand for ginger is limited, the consumption not exceeding 40,000 lbs. a year for medical purposes, in addition to a small quantity used for seasoning food. The producers in Shizuoka are said to be trying to improve the quality and quantity with the view to displacing West Indian and Cuban ginger on the foreign markets.

ALUMINIUM MANUFACTURE.

According to the *Japan Chronicle*, steps are being taken in Osaka for the formation of a company to undertake the promotion of a patented process for the manufacture of aluminium, with a capital of \$1,000,000.

THE PAPER TRADE IN JAPAN.

The paper-makers in Japan are said to be complaining that they are in an awkward position on account of the competition of imported paper. The demand for foreign-made paper continues to increase owing to its lower prices, and the importation is steadily increasing. The Japanese paper-mills have to pay a high price for pulp, and therefore cannot under-sell the foreign goods. Many mills have been extended and their output is glutting the market; and as they cannot hold, they are selling at a loss. The supply of raw material for Japanese paper is falling, and the price is rapidly going up. The paper market at present is inactive.

ZINC REFINING AND MANUFACTURE.

Of the several mineral refining companies now being promoted, the Oriental Zinc Refining and Manufacturing Company seems to be the best supported by influential men, in this case with Baron Shibusawa at their head. At present Japan is importing two million dollars worth of zinc sheets, &c., annually; and it is intended by the promoters not only to satisfy the domestic demand, but also to find a market for their manufactures in other eastern countries. A plentiful supply of zinc ore is obtainable in Japan, and it is confidently expected by the promoters that before long they will be able to successfully compete with the imported article.

The capital of the company is \$1,500,000. It is estimated that at the outset the works will daily refine thirty tons of ore, and manufacture six tons of sheet zinc. The manufacture of zinc wire, galvanized sheet, &c., and also the manufacture of sulphuric acid and the extraction of other metals from refuse ore, further manufactured and by products intended. There is estimated an annual profit of \$88,235 upon the capital of \$375,000 (first invested). The estimates are said to be based on most practical calculation as, for instance, the estimated prices of zinc and sheets are 15 per cent cheaper than those of the lowest grades on the market. The cost of zinc ore, on the contrary, is calculated at 20 per cent higher than the prevailing quotation.

FALLING OFF IN ORIENTAL TRADE.

A variety of causes are given for the remarkable falling off in the oriental importations from the United States. For the eight months ending with August this year the Japanese imports from that country amounted to \$21,000,000; while for the corresponding eight months of 1905 the amount was \$39,000,000. No doubt war importations, and supplies held over consequent upon the sudden ending of the war, relieve the case of Japan from cause of surprise. But China's imports from the United States, for the same corresponding terms, fell from \$42,000,000 to \$22,000,000. Ameri-

can authorities have many reasons, excepting the boycott to account for this extraordinary default in the trade of China; while people here who know China have no other reason than the boycott to give.

THE IRON SAND DISCOVERY.

The Hokkaido Colliery and Steamship Company have announced a profitable half-year's business by declaring a dividend at the rate of 15 per cent per annum, with a large addition to the reserve. This is the company that is putting capital into the manufacture of iron and steel from the iron sand found in extensive deposits at various places on the Japanese coast.

Referring to this prospective new industry the *Dai Nippon* or *Greater Japan*, a monthly magazine published at Tokyo, says: 'The Hokkaido Colliery and Railway has made the practical discovery of an economical way of making steel from the iron sands on the coast. Within a few weeks a special company will be formed and the work immediately proceeded with. The general manager of the company gives the following information respecting the proposed work:—

'On the long sea coast line between Muroran and Hakodate a natural deposit of iron-sand is found; in some parts it reaches twenty ri in length (a ri is 2.44 miles), in width 300 ken (1 ken is 6 feet), and from four to ten feet in depth. The company secured a concession and studied for many years to make iron and steel from these sands. According to foreign examples, in Australia where the iron-sand is produced in various places they make iron or steel from these materials; there are two ways—one way is to melt it with high electric power; the second is to melt it with coke with some chemicals. As in Australia, where there is no iron ore, they studied to make iron from these sands, but the Australian coal cannot make good coke and they were obliged to import from England, and therefore they cannot make any good business profit out of it. Another example is in the Norwegian steel, which is considered very superior for certain mechanical manufactures. Now, that steel is also produced from the iron-sand of the Norwegian lakes. Besides these two cases, in the olden times of our country, we produced iron from the iron-sand heated and condensed by charcoal in Izumo and Iwami prefectures; the company taking the bright prospects of the investigation, has sent the specimens to the iron factories of Wakamatsu and Kure. The results of the analysis is that the iron-sand contains no sulphur nor phosphorous, so that the quality is reported to be of the very first rate. Rear-Admiral Yamaguchi, head of the Kure iron factory, also took personal investigation on the spot, and simultaneously Professor Noro, of the Wakamatsu iron factory, has discovered at last the method to make good iron from this sand; and, therefore, now the company is going to establish there an iron factory within a short time; particularly for the steel work they are going to establish a factory on a large scale. We are not authorized to state concerning the secret discovery or as to the full scope of that business, yet we are glad that this heretofore wasted iron ore is going to become the foundation of one of the most promising industries of Japan.'

The locality of the production of iron 'in the olden times of our country,' Izumo and Iwami prefectures, is about due west from Yokohama, and slightly north of west from Kobe, and is therefore a long distance from the Hokkaido territory 'between Muroran and Hakodate.' This shows that the sand deposits are widely extended.

An Osaka paper of present date has a paragraph of which the following is a translation:—

'The iron-sand of Hoki, Izumo and Bingo prefectures is suitable for the manufacture of steel, as it is free from sulphur or phosphorous. A company is now projected by the leading capitalists in that district—Messrs. Sakaguchi, Inada and others. Their plans include the manufacture of cutlery, gun barrels and other similar uses of fine metal, under the supervision of Professor Noro, through whose investigations the recent processes have been discovered.'

The latest about this development is from the *Jiji Shimpō* (Times), to the effect that the Hokkaido Colliery Railway Company were understood to be negotiating with two or three foreign syndicates for the steel manufacture; and now it is made public that they have closed with Armstrong & Co., of England, both parties furnishing the capital of \$2,500,000. It has transpired, says the same authority, that a representative of the English company is coming to Japan by the next mail steamer to conclude arrangements.

A recent reference to this subject (Monthly Report, August, 1906, p. 257) has prompted inquiry from parties interested in the iron-sands of the Lower St. Lawrence

MONTHLY RETURNS OF FOREIGN TRADE.

The following is a comparative statement of the value of some of the principal items of import from Canada into Japan, as shown by the Monthly Return, for the ten months ending October 31, of the present and the previous year:—

Imports from Canada.

	1906.	1905.
Flour.	\$64,240	\$47,154

The 'principal items' given in the Monthly Return number only twenty-three of imports and twenty-six of exports. For information respecting the lesser and numerous items making up the aggregate of trade, the annual return has to be awaited.

GENERAL TRADE RETURNS.

	IMPORTS INTO JAPAN.		
	For October, 1906.	Ten months ending October 31 compared.	
		1906.	1905.
	\$	\$	\$
Flour, wheat.	299,874	3,691,632	3,748,110

NO TARIFF INCREASES.

It is indicated by the Tokyo ministerialist press that the budget for next fiscal year was decided upon at a meeting of cabinet council on the 4th instant, preparatory to submission to the Imperial legislature when it meets on the 22nd instant. Previous reports to the effect that there would be no increase of the existing taxes, and no new rates imposed other than those already previously decided upon, are confirmed. The interpretation put upon previous tariff legislation, to the effect that a protectionist policy was foreshadowed, is not being sustained by events.

FERTILIZER DEMAND AND PRODUCTION.

Few commodities entering Japan offer a safer prospect for the investment of capital in their production than that presented by field manure, whether in the natural state or manufactured. It operates simply as a levy made by the farmer upon himself and cheerfully paid and collected because it is necessary and profitable.

The *Japan Times* says that under strong auspices, a company for the manufacture of fertilizer is to be established at Tokyo with a capital of 3,000,000 yen. It is intended to manufacture a peculiar fertilizer for killing injurious insects by adopting some special means recently discovered by a Japanese scientist. The scheme is supported by a large number of leading business men. The trade statistics elsewhere show that the importation of fertilizers increased during the ten months of this year, over those of the corresponding term last year, more than thirty-five per cent. And still the demand is keeping ahead of supply.

CEMENT MANUFACTURE.

Cement manufacture, the Portland cement of commerce, is carried on in Japan by some fifteen companies. Some of these have recently gone into operation, while the older concerns have added to their capital and facilities. The amount invested now comes very nearly to 10,000,000 yen. The recent development of this business has been due to two principal causes, first the increasing home requirements, for the Japanese are greatly given to the using of cement mortar and concrete in its various forms; and second, the demand set in, since the war, from the neighbouring Asiatic continent, especially Korea. Another cause may be added in the reconstruction of San Francisco, some 200,000 barrels or more having been already furnished for that work. Doubt is being expressed, however, as to the continuance of the present extraordinary rate of consumption, much of which is looked upon as incidental, and that it is not safe to count upon further expansion.

THE CAMPHOR TRADE.

The foreign market for Japanese camphor is reported to a representative of *Asahi* (Morning News) to be very favourable. The quantity supplied in the last six years doubled the estimate made at the time the camphor monopoly was adopted in Japan. The excess of the demand over supply stimulated invention, and in Europe an artificial article almost equal to natural camphor was now being turned out in enormous quantities. The number of inventors of processes for making artificial camphor was said to be between twenty and thirty. Artificial camphor was now supplying about 70 per cent of the world's demand. The camphor industry in Formosa was still inadequate to the trade; the output would not exceed 7,466,000 lbs. a year, and it was of paramount importance to take measures to promote the industry. Schemes were under contemplation in Europe to plant and cultivate camphor trees, and from this source would come a strong competitor of Japanese camphor, but artificial camphor was to be more feared, because it can be made cheaply, and its quality will improve as the process of manufacture advances.

A. MACLEAN.

MEXICO.

REPORT OF COMMERCIAL AGENT.

(Mr. A. W. Donly.)

APARTADO, 2029,

MEXICO CITY, MEX., December 24, 1906.

FOREIGN TRADE FOR YEAR 1905-6.

An analysis of the recently issued resumé of Mexico's foreign trade for the fiscal year 1905-6, which ended on the 30th of June last, cannot fail to be both interesting and instructive. It was certainly Mexico's banner year in both imports and exports, the total of the two being greater than the year previous (which was larger than any previous to it) by \$52,500,000, the gain in imports being \$21,200,000, while that of the exports was \$31,300,000. The total value of the imports was \$110,325,000, while the exports show a total of \$135,570,000, or a balance of trade in favour of Mexico of \$25,245,000. The figures herein given, as will be seen, are in round numbers; the exact percentage of gain was: Imports, 23·82 per cent; exports, 30·03 per cent.

While these totals are only about one-half the total of Canada's foreign trade for the same period, still the percentage of increase here during the past ten years has been quite as remarkable as has that of our own foreign trade, for previous to 1896 the foreign trade of Mexico never exceeded \$100,000,000 in any one year.

MEXICO'S TRADE WITH THE UNITED STATES.

Our southern neighbour continues to monopolize a very large percentage of all this trade. Of the imports the United States supplied 66 per cent of the whole, while of the exports she took more than 68 per cent. The increase in dollars of American trade was: Imports, \$22,800,000; exports, \$16,500,000. A great deal of this enormous increase is certainly due to geographical position, but no small part of it is also due to the fact that Americans are reaching out for the Mexican market both systematically and energetically.

DIRECT REPRESENTATION.

A very large number of American concerns have their own representatives in the field whose business it is to drum up trade in their particular line and when they know of an order to be placed to go after it. Most large American firms are no longer content with a local agent, whose forte, only too often, was to be asleep while his competitor was securing the trade. The local agent may have a place and be all right in his place, but certainly his place, speaking generally, is not as the representative of unknown Canadian firms in Mexico who wish and expect to build up a profitable business here.

TRADE BETWEEN EUROPE AND MEXICO.

With the single exception of Germany, none of the countries of Europe seem to be making any material progress in their trade with Mexico. While during the year under discussion Mexican exports to Europe increased by nearly \$15,000,000, this increase was exceptional and almost, if not entirely, due to a very large exportation of

coined pesos and silver bullion. Now that Mexico has practically exhausted her available supply of silver dollars, and received gold in exchange, it is only to be expected that during the present year this large exportation to Europe will not be repeated. When we look at the imports we find that the only country to make a gain of more than \$50,000 over the previous year was Germany, whose increase reached the very insignificant sum of \$180,000. The total of imports from Europe shows a decrease of \$1,600,000, divided amongst the more important countries as follows:—

Belgium.. . . .	\$226,000
Spain.. . . .	70,000
France.. . . .	667,000
Great Britain.. . . .	650,000
Italy.. . . .	190,000

REASONS FOR LOSS OF BRITISH PRESTIGE.

Great Britain's failure to keep her place in the race is explained by several reasons, to wit: (a) A greatly decreased demand for textiles, due to the local market being able to supply the bulk of the demand, whereas previously she had practically a monopoly in this trade. (b) The conservative policy continuing to be pursued by British merchants in being satisfied with a local agent and an occasional visit from a traveller. (c) Britons have practically withdrawn from mercantile lines in Mexico. Whereas, years ago a great many or nearly all of the large importing firms were British, now we find these houses controlled by Spaniards, French and Germans, notably the latter.

The German combines an importing, exporting and banking business, with an extensively assorted retail stock. His employees are largely importations from the mother country, who very generally intermingle in intimate intercourse with the Mexicans and marry with the daughters of the soil. The result is that German preferences are acquired by the native or consuming element, or if not a preference, at least a feeling that it is just as good, with the result that the large mercantile concerns are day by day finding it less necessary to carry English goods which are frequently replaced by an inferior article. (d) The unwillingness of the British manufacturer to give an article suited to the prejudices of the local market if it differs in the least particular from the one he makes for the home trade or to send to Australia or China. In this last particular do we see, more than in any other, wherein the German article is displacing the British in this market. The more primitive a people, the more set will they be found in their likes and dislikes. Perhaps it is a matter of shape, or perhaps of cost or quality. The German is willing to make what the market demands. The Britisher demands that the market take what he makes.

SUGGESTIONS FOR CANADIAN FIRMS.

Canadian manufacturers, who are really desirous of obtaining a foothold in this market, or throughout Spanish-America, would do well to make a careful study of the needs of the market rather than try to convert so many people to the use of goods as supplied to the home trade. The axe is a case in point. The natives of Spanish-America have never been converted to the use of an axe of the shape and weight of that used in Canada and the United States. The result is that the Collins axe, made to suit the trade here, is sold by the thousand, whereas, had the firm failed to give the article asked for a very profitable business would have been lost.

TRADE BETWEEN CANADA AND MEXICO.

While trade between these countries is in its infancy, yet it is during that very period of infancy that the foundation should be laid for a large future trade. Canada is looked upon by Mexico as a friendly neighbour. Canadians have no ancient history

to be overcome, no political differences of past years for time to heal. Let Canadian merchants and manufacturers resolve now, from the beginning, to build up a trade by delivering good quality and in every way extending just and fair treatment to their customers here and their efforts cannot but meet with success. Let them fail in this through apathy or carelessness or from the mistaken idea that Mexico is a long way from home and that anything is good enough to send to this market and the result will be no less in doubt. It will be spelled in the letters that go to make up the word 'failure.'

And though this trade is yet in its infant stage I am unwillingly forced to state that some shippers have already been led into the folly of the mistake against which I caution. I do not wish to turn preacher or continually to offer criticism, but I would suggest that any, who, from personal motives, do not hesitate to send out an inferior article should, at least from patriotic motives, refuse to do so, for one shipment of inferior goods can do more harm to Canadian prestige, at this tentative stage, than can be counteracted by ten of prime quality. Were Canadians and Canadian goods well known in this market the damage would not be so great for the buyer would simply transfer his trade to another firm, but as the matter stands at present Canadian methods and Canadian goods are condemned in one broad condemnation.

IMPORTS.

The following table shows Mexican imports for the year 1905-6, and the increase or decrease over the year previous. The classification is according to the tariff, no further details being given in the report from which these figures are taken.

	Imports, 1905-6.	Increase.	Decrease.
Animal products.. . . .	\$ 8,193,414	\$ 1,104,782	
Vegetable products	16,308,464	1,095,012	
Mineral products.. . . .	45,468,715	19,089,408	
Textiles, &c.. . . .	11,511,264	130,010
Chemical products	3,872,136	334,135	
Spirituous, fermented and natural drinks	3,623,175	82,506	
Paper and its manufactures..	2,708,596	91,027
Machinery	10,269,606	951,885
Vehicles.. . . .	2,310,015	200,017	
Arms and explosives.. . . .	2,061,119	765,760
Sundry	3,999,030	1,256,878	

These imports come from the different countries, as follows:—

Germany	\$10,407,278	
Austria.....	581,783	
Belgium.. . . .	1,271,821	
Spain.. . . .	3,797,765	
France.....	8,191,628	
Great Britain.. . . .	10,172,322	
Italy	637,124	
Other countries in Europe.. . . .	1,146,247	\$36,205,968
Asia..	835,654
Africa	23,140
Canada	139,260	
Central America	22,106	
United States.. . . .	72,800,156	72,961,522
South America	131,359
Other countries..	167,893

EXPORTS.

In examining the exports we find the greatest increase in coined silver and silver bullion, the respective increases, over the previous year, being \$23,885,562 and \$6,514,542. This increase, as already stated, was due to the rise in the price of silver and the opportunity this rise offered for making effective the gold basis. While the export of bullion is likely to continue large so long as silver maintains its present price the stock of silver pesos, available for export, is exhausted. In fact the government has recently put an export tax on them as their scarcity in circulation, for change purposes, has been seriously felt.

The principal articles exported from Mexico during the period being treated are given in the following table, special attention being given to itemize the amounts in those products of interest to the Canadian market:—

	Exports, 1905-6.	Increase.	Decrease.
Coined silver.	\$24,835,512	23,885,562	
Silver bullion.	33,021,550	6,514,542	
Gold bullion.	13,860,655	883,831	
Copper.	14,327,949	\$573,761
Other minerals.	10,308,927	492,429	
Coffee.	4,644,312	15,920	
Caoutchouc.	1,195,213	835,660	
Chicle (gum).	848,262	36,528	
Fresh fruits.	147,662	36,280	
Gayule.	58,513	58,513	
Sisal.	14,718,659	24,095	
Ixtle (Tampico fibre). . . .	1,833,922	86,087	
Woods.	940,980	157,926
Dye woods.	267,844	78,064
Broom root.	936,378	68,297
Leaf tobacco.	1,108,141	254,540
Manufactured tobacco. . . .	186,665	46,057
Vanilla.	2,078,697	935,860	
Hides and skins, untanned.	3,941,433	571,628	
Sugar.	337,118	2,521,605

MEXICO'S FOREIGN CUSTOMERS.

The principal countries to purchase these products are:—

Germany.	\$10,262,573
Belgium.	3,633,410
Spain.	1,100,648
France.	4,005,140
Great Britain.	20,836,437
Canada.	104,168
United States.	93,005,026
Central America.	510,810
Cuba.	2,014,498

COMPARISON OF CANADIAN AND BRITISH TRADE.

Imports from Canada during this time, while not large, show a decided increase over the year previous, when they were but \$26,195, the percentage increase being more than five hundred. The same may be said of exports from here to Canada, which show a gain from \$16,750 to \$104,168, or more than six hundred per cent, and during the first year after the establishment of direct steamship service.

While British imports show a decline of about \$650,000, exports to Great Britain show the good increase of more than \$12,000,000, but, as already explained, the bulk of this increase is undoubtedly due to the abnormally large exportation of silver bullion and pesos.

GOVERNMENT OWNERSHIP OF RAILWAYS.

Mexico is the first of the countries of the American continent to make any extensive experiment of government ownership of railways. During the year 1903 the government acquired, by purchase, a controlling interest in the National Railroad, the International Railroad and the Interoceanic Railroad, which roads have since been operated as one system under the name of the National Lines of Mexico. As explained to the Chamber of Deputies a few days ago by Minister Limantour, the object of the government at the time was to prevent a proposed merger of the National and Central systems, which, as the only trunk lines connecting this city with the United States, would have tended too much in the direction of a monopoly.

The government also owns the Tehuantepec National Railroad, as also the Veracruz and Pacific, connecting the port of Veracruz by rail with the Tehuantepec National and consequently with the gulf and Pacific ports of Coatzacoalcos and Salina Cruz. These two roads each have an independent management, and, though government lines, do not, in their operation, come into close contact with the National Lines of Mexico.

About the middle of the present year the government acquired, by purchase, the Hidalgo and North Eastern Railroad, which runs from this city for a considerable distance in that direction with the ultimate idea of connecting with the port of Tuxpam on the gulf coast. This line, for operation purposes, has been added to the National Lines.

But the most important step yet taken in the acquirement of railways by the government is the purchase of a controlling interest in the Mexican Central road, the deal for the purchase having been definitely arranged on the 13th of the present month and approved by Congress on the 19th instant. To quote the words of Mr. Limantour, on asking the approval of Congress for the transaction, there were three principal reasons for the step taken: 'First, to avoid friction between the different corporations when the two are competing lines or when one of them fears being antagonized by a concern in which the government holds a controlling interest; secondly, to avoid the absorption of properties, not controlled by the government, by one of the great railway systems of the United States; and, thirdly, the prospect of realizing considerable economies through the consolidation of all the great railways under a single management.' These properties, when under one management, with the extensions completed that are now under way, will constitute a system of, approximately, ten thousand miles.

While the eyes of the world have recently been turned in this direction to study the success or lack of success of the Mexican government's venture in railway ownership, now, more than ever, will this be the case. It is worthy of note in this connection that the government has not made any radical change in the operation of its lines from the time when they were corporation properties. Competent railroad men have been left in charge, and no attempt made to administer them as departments of the government in the ordinary sense. It is not, therefore, to be presumed that the acquiring of the Central will initiate any change in policy, though as to this no announcement has been made.

A. W. DONLY.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(Mr. E. D. Arnaud.)

GAZETTE BUILDING, ST. JOHN'S, December 26, 1906.

COD FISHERIES OF NEWFOUNDLAND.

It is now possible to furnish a fairly accurate statement of the result of the present season's catch of codfish on the coast of Newfoundland and Labrador and to give the total as between 1,250,000 and 1,330,000 quintals. Of this amount the Labrador has contributed about 600,000 quintals, and deducting 250,887 quintals valued at \$1,030,432 shipped direct to foreign markets, the balance has been brought home and cured on the Newfoundland coast. These foreign shipments are made up as follows:

To Gibraltar for orders.	42,221 qts.	Valued \$174,244
Italy.	101,029 "	" 423,670
Spain	56,322 "	" 228,230
United Kingdom	23,189 "	" 93,792
Greece.	21,002 "	" 85,376
Portugal.	3,909 "	" 15,636
Canada.	2,215 "	" 9,484
Totals.	250,887	1,030,432

The quantity sent abroad from Labrador in 1905 amounted to 342,219 quintals, valued at \$1,237,329, so that for the present year there has been a decrease of 91,332 quintals, valued at \$206,897.

In addition to the above, the exports from Labrador have amounted to a value of \$55,623, made up of the following items:—

	Value.
Salmon, 847 tierces.	\$16,517
Trout, 53 barrels.	296
Cod oil, 28 tons.	1,536
Seal oil, 20½ tons.	1,482
Sealskins, 163	163
Herrings, 103 barrels.	420
Dried caplin, 35 barrels.	105
Feathers, 325 lbs.	65
Furs.	35,034
Sundries.	5
Total.	\$55,623

Owing to the fact that a higher average price has been obtained in 1906 than in 1905 for the fish cured on the Newfoundland coast, the decrease of \$206,897 noted above will be to a considerable extent made up to the fishermen who on the whole have had a very favourable return for their labours. Indeed it may be said that as a class the fishermen have never before been in such a prosperous and independent position as they are at the present time. This is shown by the fact that they demand a superior quality of goods and are able to pay a higher price for them.

E. D. ARNAUD.

SOUTH AFRICA.

REPORT OF ACTING COMMERCIAL AGENT.

(Mr. W. T. R. Preston.)

RHODES BUILDING, CAPE TOWN, December 3, 1906.

WANT TO SELL WINE TO CANADA.

There is a strong desire here on the part of the wine merchants to find a market for South African wines in Canada. All wines prepared for export or ordinary sale come under governmental supervision and inspection. No wines are allowed to be exported without inspection by government specialists.

Respecting the preparation of these wines those engaged in the trade are subject to heavy penalty if any foreign substances or matter is added to the natural product of the grade. They are not allowed even to put sugar in the wines. The object of the government apparently is to establish a reputation for colonial wines as being absolutely pure juice. With sherries, port and what is known as 'Sweet Constantia' wine they are allowed to bring them up 33 per cent proof spirit. All wines and liquors therefore coming under the supervision of this government it is claimed are absolutely clear from any adulterating compounds or foreign substances sometimes used in toning up wines. On this basis and with this guarantee there is a very strong desire to introduce these colonial wines on the Canadian market. The great difficulty however is the want of direct steamship communication between South Africa and Canada. There is direct communication of course between Canada and South Africa, but the steamers in returning to Canada go via Great Britain or some other country for cargo instead of returning direct to a Canadian port. The extensive charges for transportation via Great Britain makes the export of wines to Canada an impossibility.

An Agitation is proceeding with a view of endeavouring to induce the Cape Colony government to subsidize the Canadian South African steamships to return direct at least once in three months so as to encourage the export trade from South Africa to Canada.

W. T. R. PRESTON.

TARIFF CHANGES.

FALKLAND ISLANDS.

I.—AN ORDINANCE TO AMEND "THE TARIFF ORDINANCE, 1900."

(No. 4, assented to 8th September, 1903.)

1.—From and after the coming into operation of this Ordinance there shall be raised, levied, collected and paid, unto His Majesty, His Heirs and Successors, for the use of this Colony, upon every Seal Skin imported into this Colony, for the purpose of transhipment or exportation, such duty as shall be determined from time to time by an order made by the Governor in Council, provided that the rate of duty so determined shall not exceed ten shillings for each skin.*

This Ordinance may be cited as "The Tariff Amendment Ordinance."

II.—AN ORDINANCE TO AMEND "THE TARIFF ORDINANCE, 1900."

(No. 2, assented to 11th August, 1906.)

1.—The First Schedule to "The Tariff Ordinance, 1900," as amended by "The Tariff Amendment Ordinance, 1900," is hereby amended by striking out the words:

"Spirits, Strong Waters, Liqueurs, Cordials, Sweetened Spirits and all articles containing any quantity of alcohol or spirits which by the Imperial Customs Laws are liable to duty as spirits, per gallon, twelve shillings."

And by inserting in the place of the words so struck out the words:

"Spirits not exceeding the strength of proof as ascertained by Sikes' hydrometer, and in proportion for any greater strength than strength of proof, per gallon, twelve shillings."

2.—This Ordinance may be cited for all purposes as "The Tariff Amendment Ordinance, 1906."

SOUTH AFRICAN CUSTOMS UNION.

I.—EXTRACT FROM TREASURY (CAPE TOWN) NOTICE NO. 838, OF JUNE 29, 1906, CONTAINING CUSTOMS REGULATIONS.

(The Cape of Good Hope Government Gazette of July 6, 1906.)

A rebate of duty shall be allowed on soap and other substances imported for and used exclusively in connection with the industry of woolwashing, under certain conditions.

* An order by the Governor in Council, dated June 13, 1904, provides that from and after June 13, 1904, there shall be charged a duty of 10s. in respect of every seal skin imported into the Falkland Islands for the purpose of transhipment or exportation, as to which the Governor in Council shall not grant a certificate that he is satisfied that such skin was not taken in the months of November, December, January or February, and a duty of 1s. in respect of every other seal skin imported into the colony.

II.—PROCLAMATION No. 89, DATED JUNE 29, 1906, OF THE GOVERNOR OF THE COLONY OF NATAL, IN REFERENCE TO THE REBATE OF DUTY ON SOAP, ETC.

On and after the first day of July, 1906, a rebate of the Whole of the Customs Duties shall be allowed upon soap and other substances imported for and used exclusively in connection with the industry of wool-washing; subject to compliance with the regulations in force in that behalf.

III.—EXTENSION OF REBATES OF CUSTOMS DUTIES TO AUSTRALIAN GOODS.

(*The Cape of Good Hope Government Gazette—Extraordinary, of September 29, 1906.*)

A Proclamation, No. 347, dated September 29, 1906, of the Governor of the Colony of the Cape of Good Hope, and of the Territories and Dependencies thereof, proclaims, declares and makes known, that the Government of the said Colony and the other Parties to the South African Customs Union Convention have, in terms of article 4 of the said Convention, extended the rebates of customs duties granted on goods and articles the growth, produce or manufacture of the United Kingdom, as from the 1st October, 1906, to goods and articles the growth, produce or manufacture of the Commonwealth of Australia, the Government of the said Commonwealth having extended to goods and articles the growth, produce or manufacture of the South African Customs Union reciprocal privileges.

IV.—CUSTOMS NOTICE No. 9, DATED OCTOBER 4, 1906, IN REFERENCE TO CAPE COLONIAL SPIRITS.

(*The Cape of Good Hope Government Gazette, of October 9, 1906.*)

The following statement of import duties levied on Cape Colonial spirits imported into the other colonies and territories in the Customs Union, is hereby published for general information:—

No.	Article.	COLONY OR TERRITORY AND RATE.			
		Transvaal.	Orange River Colony.	Natal.	Southern and North-Western Rhodesia.
1	Plain spirits manufactured from the produce of the vine.	9s. per Imperial proof gallon, with a minimum of not less than 7s. 6d. per gall.	9s. per Imperial proof gallon.	9s. per Imperial proof gallon.	6s. per Imperial gallon and so on in proportion if overproof.
2	Plain spirits manufactured from other than the produce of the vine.	19s. per Imperial proof gallon, with a minimum of not less than 16s. 3d. per gall.	"	"	"
3	Tinctures, mixed or perfumed spirits and medicines containing over 3 per cent of proof spirit manufactured in the Union from the produce of the vine.	9s. per Imperial gallon.	9s. per Imperial gallon.	2s. 6d.	"
4	Tinctures, mixed spirits and medicines containing over 3 per cent of proof spirit, manufactured in the Union from other than the produce of the vine.	20s. per Imperial gallon.	"	"	"
5	Perfumed spirits manufactured in the Union from other than the produce of the vine.	22s. 6d. per Imperial gallon.	"	"	"
6	Methylated spirits.....	1s. per Imperial gallon.	Free.	Free.	Free.

V.—CUSTOMS NOTICE NO. 12, DATED OCTOBER 22, 1906, RELATING TO REBATE OF DUTY ON SPIRITS.

(*The Cape of Good Hope Government Gazette, of October 26, 1906.*)

The following statement showing (A) the rebate of duty or excise allowed by the Colonies and Territories in the Union on spirits used for manufacturing or scientific purposes within their borders, and (B) that on articles manufactured therewith on exportation, is published for general information.

A.

	Cape Colony.	Natal.	Orange River Colony.	Transvaal.	Southern Rhodesia.
Imported spirit...	None.	None.	14s. per Imperial proof gallon.	None.	The whole duty.
Union spirit, viz.: Produce of the vine.	"	The whole if manufactured in bond, and 6s. 6d. per proof gallon if manufactured elsewhere.	The whole duty.	8s. per proof gallon.	"
Other than the produce of the vine.	"	"	"	18s. per proof gallon.	"

B.

Imported spirit...	None.	None.	The whole duty.	—	None.
Union spirit, viz.: Produce of the vine.	The whole duty.	The whole if ex- ported in bond, but not if from open stock.	"	The whole if ex- ported in bond, but not if from open stock.	"
Other than the produce of the vine.	"	"	"	"	"

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, &c., and the names and addresses of trade representatives, b Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

Canadian Commercial Agents.

Australasia.....	J. S. Larke, The Exchange, Sydney, agent for New South Wales, Queensland and New Zealand.
	D. H. Ross, P.O. Box 140, Melbourne, agent for Victoria, South Australia, Western Australia and Tasmania.
China.....	H. J. Craig, 13 Szechuen Road, Shanghai.
France.....	A. Poindron, 101 Rue Réaumur, Paris.
Great Britain.....	P. B. Ball, Room 39 and 40, Central House, Birmingham.
	J. B. Jackson, cor. of E. Parade and Greek Street, Leeds, agent for Leeds and Hull.
	P. B. McNamara, Canada Chambers, 36 Spring Gardens, Manchester.
	W. A. McKinnon, Sun Buildings, Clare Street, Bristol.
Japan.....	Alex. MacLean, No. 14 Bund, Room B, Yokohama.
Mexico.....	A. W. Donly, Apartado 2029, Mexico, D.F., Mexico.
Newfoundland.....	E. D. Arnaud, Gazette Building, Water Street, St. John's.
Norway.....	C. E. Sontum, Grubbegd, No. 4, Christiana, Norway, agent for Denmark also.
South Africa.....	John A. Chesley, Rhodes Building, Cape Town, Cape Colony.
West Indies.....	G. Eustace Burke, Kingston, Jamaica.
	R. Bryson, St. John, Antigua, agent for Antigua, Montserrat and Dominica.
	S. L. Horsford, St. Kitts, agent for St. Kitts, Nevis and the Virgin Islands.
China, Japan and Corea.	Edgar Tripp, Port of Spain, Trinidad, agent for Trinidad and Tobago.
	W. T. R. Preston, Trade Commissioner.

Canadian High Commissioner's Office.

Great Britain.....	W. L. Griffith, Secretary, 17 Victoria Street, London, S.W., England.
	Harrison Watson, Canadian representative, City Trade Branch, 73 Basinghall Street, London, E.C., England.

Canadian Immigration Agents.

Belgium.....	D. Tréau De Coeli, 29 Rue de Souci, Antwerp.
France.....	Paul Wiallard, 10 Rue de Rome, Paris.
Great Britain.....	J. Bruce Walker, Assistant Superintendent of Emigration, 11-12 Charing Cross, London, S.W.
	A. F. Jury, Old Castle Buildings, Preeson's Row, Liverpool.
	G. H. Mitchell, 43 Cannon Street, Birmingham.
	H. N. Murray, Exeter.
	L. Burnett, York.
	John Webster, 35-37 St. Enoch Square, Glasgow.
	John McLennan, Aberdeen.
	E. O'Kelly, 17-19 Victoria Street, Belfast.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(Mr. J. S. Larke.)

THE ROYAL EXCHANGE, SYDNEY, AUSTRALIA, November 26, 1906.

GERMAN EXPORTS TO NEW ZEALAND.

The exports of Germany to New Zealand are in some respects akin to those from Canada, and the returns of these exports, as given by the New Zealand government, will be of interest to Canadian exporters. They were for the last three years:—

	1905.	1904.	1903.
Acids and alkali.	£ 2,140	£ 2,790	£ 3,927
Apparel and slops.	3,367	7,302	5,362
Arms, fire.	1,345	1,042	1,034
Basketware.	1,082	1,203	1,042
Bicycle and material.	1,193	1,704	3,947
Boots and shoes.	2,399	2,311	2,704
Brushware.	2,131	3,317	1,394
Building materials.	2,076	12
China and earthenware.	7,978	11,881	7,542
Clocks and watches.	2,446	3,272	1,825
Cotton piece goods.	2,115	3,323	3,158
Cutlery.	1,708	1,325	633
Drapery.	3,620	5,319	5,449
Drugs, dyes, &c.	6,154	8,194	6,021
Fancy goods.	28,705	28,096	25,333
Furniture and upholstery.	5,473	8,952	6,429
Glass and glassware.	14,434	19,224	15,380
Haberdashery.	1,249	1,862	1,529
Hardware.	10,249	12,252	10,882
Hosiery.	2,125	3,512	2,450

Tobacco pipes.	1,761	1,828	1,226
Totals.	£277,467	£308,804	£274,297

EXPORTS TO GERMANY.

The exports to Germany from New Zealand for these three years were: 1905, £38,958; 1904, £23,931; 1903, £17,584. They are, therefore, more than four times the amount they were in 1902, which amounted to £9,389. The bulk of the exports consists of two items, Kauri gum and wool.

EFFECT OF PREFERENCE.

The decline in the imports of 1905 as against those of 1904, with the marked increase in the exports to Germany, indicates the effect of the preferential tariff on the exports of that country to New Zealand. These are shown in bicycles, china and earthenware, clocks, furniture and upholstery, glass and glassware, hardware, pianos, printing paper, tramway plant and twine, which are affected by that tariff. The returns for the present year ought to show a still further decline, with the cessation of contracts. The growth of the German exports in nails, in spite of the tariff, and the similar increase in these articles from the United States, indicates that the English manufacturers have not entered into serious competition for the trade. Canada increased her exports in this line, but not sufficiently to materially effect the trade, and it is probable, until Canada makes her own iron at a price that will enable it to export, and has better freight facilities, that she may not be able to do a very large trade. In boots and shoes the German trade has also slightly increased. The trade, however, is not one of very great moment, but indicates growth for the last four or five years. The German trade has the advantage of the cheapest freight of any nation to New

Zealand, owing to the preference given to exports of that country by English shipping concerns in order to prevent German ships from entering into the trade.

LAND LEGISLATION.

The government of New Zealand has withdrawn its proposed legislation limiting the holding of any person to 1,000 acres of land and £50,000 in value, but it promises to reintroduce it at the next session of parliament.

TRADE OF NEW SOUTH WALES.

For the first nine months of the present year the exports of New South Wales amounted to £19,893,912, as against £13,272,720 for a similar period of 1905. This is an extraordinary increase of almost fifty per cent. The imports were £23,991,776, as against £20,175,475 last year. The imports include interstate transfers, but the exports do not, which will explain the larger amount of imports over exports. The extraordinary increase in exports is found in nearly all the lines and is due not only to increases in quantity of most of the lines, but also to increases in prices, particularly the improvement in metals. The wool returns are just now much below those of last year, the sales being but a little over half of those of twelve months ago. This is due to the heavy and continuous rains having interfered with shearing, but still more in preventing the wool from reaching the railway station, the tracks in many sections of the interior being impassable for heavy loads. The sales that have taken place show a maintenance of prices for good qualities, but a reduction of from 5 to 10 per cent in poorer varieties. The outlook for both agricultural and pastoral interests continues excellent and, perhaps, were never brighter in the history of the state.

The Statistical Bulletin of the state of New South Wales for the month of October reports a decline in the imports of that month of £27,158 and £365,342 in the oversea exports of the state. It might be inferred that there had come a check to the expanding prosperity of the state, but an examination of the details of the trade does not warrant that conclusion. The decrease in the imports is wholly in the imports of Australian productions, but from beyond the seas there was an increase of over £170,000. The decrease in imports of Australian produce was temporary, due in part to the condition of the season and to the weather. The decrease in exports was almost wholly in wool and to a small extent in meats. The decrease in wool is temporary. The abundant rains have delayed the shearing and reduced the interior country to such a condition that it has been impossible to get the wool, after it has been shorn, to the railway station for transmission to market in any quantity. There are still stations which completed shearing a month ago that have scarcely shipped a bale, and many of them not one-half of their product. After the weather and the roads improve, so will the receipts of wool, and when the wool year is completed the exports will show a marked advance.

MUTTON AND LAMB EXPORTED.

The decline in the quantity of mutton and lamb exported is due to different causes, but these causes will produce in the end the same effect upon the dead meat trade as the wet weather has upon the wool business. Contracts for frozen meat were made some time ago but the high prices of sheep and lamb and beef deterred the slaughter houses from purchasing in hopes that as the season advanced, prices would favour them. The killing and exporting during the month of October was, therefore, light, but the loss will be made up during the present month. Though the prices of lambs and sheep are to-day higher than they were a month ago, and are almost phenomenal for Australia, the exporters are forced into the market to meet their agreements.

WHEAT HARVEST.

The wheat harvest has almost too favourable weather, for in a few instances abundance of rain has been followed by rust or attacks of insects. The damage had not been material and the yield is still likely to be almost equal to that of the phenomenal return of 1904.

WOOL SALES.

The last wool sales were characterized by great animation and fine prices. Metals maintained their prices, and with the exception of copper, their yields. It is doubtful if ever in its history the state enjoyed so general prosperity, which is likely to reflect itself upon the demand for goods next year. What is true of New South Wales is almost equally true of Queensland and Australia generally, though the recovery in Queensland, owing to the different conditions, has not been so rapid as in New South Wales. Canadian exporters may have a reasonable assurance that there will be no diminished demand for goods next year, and thereby be encouraged to make efforts to extend their trade in this market.

J. S. LARKE.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B., YOKOHAMA, November 24, 1906.

RISE OF LIVING EXPENSES AFTER THE RECENT WAR.

The expenses of living in Japan have considerably risen since the war with Russia. The Department of Agriculture and Commerce have investigated this matter from 1900 to 1905, with the results following. (The general market price in 1900 is taken as 100):—

	Provisions.	Clothing.	General Goods.	Average.
1900.	100	100	100	100
1901.	98	99	95	97
1902.	102	98	92	97
1903.	111	100	92	100
1904.	124	109	95	108
1905.	127	120	100	116

This does not include the increase of the current year, which took effect through the tariff on October 1. According to the Japanese press, the prices of commodities, which are rising year after year, have shown a marked rise for the past two or three days, especially in the price of rice, which is unprecedentedly high. The present living expenses are two or three times the rate of ten or twenty years ago. On the other hand, the increased rate of income is very little, and the difficulties and poverty of lower officials, employees of small business companies, instructors of primary schools, workmen, &c., in gaining their livelihood, are very great. A comparative list of living expenses per month for the past twenty years, on the standard of a middle class household, income of which is from yen 30 to yen 40, is here submitted:—

	1887. Yen.	1897. Yen.	1906. Yen.
House rent.	2.50	4.50	7.00
Rice.	2.77	3.30	7.20
Salt.	03	04	12
Sake.	15	25	35
Kerosene.	24	30	51
Sugar.	15	30	60
Milk.	90	1.05	1.35

	1887. Yen.	1897. Yen.	1906 Yen.
Newspaper.	25	30	35
Primary school tuition per child.	10	20	30
Pens, inks, paper, per school child.	30	50	70
Tobacco.	90	1.20	1.50
Vegetables.	50	90	1.50
Fish.	60	1.20	1.40
Beef.	60	1.20	1.80
Tea.	18	25	42
Firewood.	16	28	40
Charcoal.	45	60	90
Ward rates.	20	30	50
Stationery.	30	40	60
Servant's wages.	1.00	1.50	2.00
Total.	12.28	18.57	29.50

In view of the above list the maintenance of a common Japanese household is said to be impossible with an income of less than 30 yen per month. It may be added that income tax must be also paid by any person who receives 25 yen and upwards per month.

ALEX. MACLEAN.

SOUTH AFRICA.

REPORT OF ACTING COMMERCIAL AGENT.

(*Mr. W. T. R. Preston.*)

RHODES BUILDING, CAPE TOWN,
P.O. Box 668,
December 12, 1906.

EXCELLENT CONDITION OF APPLE CARGO.

The cargo of apples by the steamship *Melville* from Montreal, arrived here on December 4, and came to hand in excellent condition. The fruit met with a very ready sale at highly remunerative prices for the importers. The fact that all this fruit was in such splendid condition rather accentuates the unfortunate character of the great bulk of the fruit which reached here on the preceding steamship belonging to the direct Canadian South African service.

It might be worth while mentioning, however, that a considerable quantity of frozen meat from Swifts, Chicago, was also on board the steamship *Melville*, and reached here in a very damaged condition.

W. T. R. PRESTON.

CITY TRADE BRANCH.

REPORT BY CANADIAN REPRESENTATIVE.

*(Mr. Harrison Watson.)*78 BASINGHALL STREET,
LONDON, E.C., ENG., January 15, 1907.

I have the honour to submit a report of the work conducted, at the city trade branch of the office of the High Commissioner for Canada for the past year.

SCOPE OF WORK.

The office was opened about the middle of September, 1904. Considering that no special attempt has been made to advertise its existence, the result has been quite satisfactory. There has been a steady growth of verbal inquiries and of correspondence and the volume is largely in excess of that of twelve months ago. The presence of a Canadian office in the centre of the commercial community is a great convenience to business men. Many London business men, who inhabit the suburbs or the surrounding country, have their time so fully occupied that they rarely leave the confines of the city. To such, a trade inquiry office in a central situation like Basinghall street, is a distinct advantage. It appears to be equally useful to the many representatives of provincial firms who run up to London for the day and whose time is carefully mapped out.

WORK MORE PRACTICAL.

The nature of the work of this office has undergone considerable transformation since its removal from South Kensington to the city. Formerly it consisted largely of the investigation of trade possibilities of particular products and goods, but at the city trade branch application is received for all sorts of information on general subjects, such as tariff duties, customs regulations, statistics, patent laws, shipping routes and a variety of details which if largely routine work, nevertheless occupies a considerable amount of time. To deal satisfactorily with this work it is essential that the sources of information at our disposal shall be comprehensive, because one particular desideratum of a branch like this is that it should be in a position to reply immediately to inquiries, many of which are made verbally. We are gradually equipping the office with books of reference, directories, reports and other information relating to Canada and some of the leading Canadian daily papers and a good assortment of the principal trade journals are kept on file.

CO-OPERATION WITH THE BOARD OF TRADE.

Our location in the same building as the offices of the commercial intelligence branch of the Board of Trade (the Imperial government department which most nearly resembles the Canadian Department of Trade and Commerce at Ottawa) has been a judicious move, advantageous to both departments.

As a distributing centre of commercial information of all kinds, the Board of Trade receives a considerable number of applications relating to Canada. Many of these, where special information is desired, are referred to this office and we are usually able to furnish callers with the details required. In return, the mass of commercial information relating to British import and export trade collected by the Board of Trade is frequently of much practical value in connection with our inquiries and also to Canadian visitors.

MAINTAINED INTEREST IN CANADIAN MATTERS.

A number of circumstances have tended to increase the growing interest in Canadian trade which has been evinced in this country for the past few years. Among them may be cited the continued prosperity of the Dominion and the consequent publicity given to Canadian affairs by the United Kingdom press; the more universal knowledge of the existence of the preferential tariff, partly owing to the prominence given to the fiscal question during the recent general election; the steady flow of British emigration to the Dominion.

These considerations and also to a certain extent the interest aroused by the visit of the Canadian Manufacturers' Association party to this country, have all contributed to direct the attention of the United Kingdom manufacturers, merchants and shippers to the possibility of extending trade relations between the two countries.

Another feature which must be of the highest importance to Canada has been the noticeable increase in the number of Canadian ventures applying to British investors for capital. Several of these issues were in connection with industrial enterprises and it is understood that some were well received.

INQUIRIES FOR CANADIAN PRODUCTS.

As in the past, we have received a large number of applications from United Kingdom importing houses for the addresses of Canadian shippers of all kinds of produce. The publication by the Department of Agriculture of a revised edition of the pamphlet 'A List of Exporters of some Canadian Products' is of much practical value in this connection. At the request of the department I revised the London section of the pamphlet 'A List of some British Importers of Farm Products,' a new edition of which has been issued for the benefit of Canadian shippers.

The revision was done with the co-operation of gentlemen engaged in the particular branches of the various trades and their assistance was of great practical value. There have also been many inquiries relating to raw materials and manufactured or partly manufactured goods. Special reference is made in another part of this report to the large demand for manufactures of wood of all kinds.

SUBJECTS OF NEW INQUIRIES.

Among articles which have been inquired for, as far as we are concerned for the first time, might be mentioned isinglass, milk, sugar, cod roes, pitch blende, petrol and wood spirit. As the result of information supplied a number of business relations have been established.

CANADIANS UNABLE TO FILL ORDERS.

A notable feature of the past year has been the inability of many Canadian manufacturers to fill export orders promptly or even to undertake new business. The extraordinary activity of the home demand for goods of all kinds has apparently strained the industrial capacity of the Dominion to its utmost limit and Canadian houses who formerly sought export trade have had to refuse business which they would have welcomed ordinarily. A number of British firms who have been placed in touch with Canadian houses known to be interested in export trade have reported to us to this effect. This is, however, no reason why some Canadian houses who are written to should not have the courtesy to even acknowledge letters. Several firms have informed us that this has occurred in cases where they have written to a number of Canadian firms described in 'The Canadian Industrial Blue Book' as being engaged in export trade.

Failure to attend to such matters tends to create an unfavourable impression. There will undoubtedly come times when Canadian manufacturers will welcome some of the inquiries to which they are at present unable to attend. Another feature has been the receipt of inquiries from Canadian houses seeking supplies of articles of various kinds which they can as a rule obtain within the Dominion. This furnishes

a further proof of the active home business ruling in Canada. The prospect of the existing prosperity continuing for some time would seem to offer special opportunities to British houses for obtaining a larger share of Canadian import trade.

GOODS PREVIOUSLY OBTAINED IN GERMANY.

Among the goods inquired for are several articles which previous to the surtax were obtained mainly from Germany. The considerable difference in duty between the preferential reduction and the German surtax should give British manufacturers of some of these goods a considerable advantage if they would follow up the matter in a practical manner.

CANADIAN VISITORS.

During the year we had a considerable number of calls from Canadian visitors. The proportion who came over here to inquire into the possibility of export trade was possibly rather less than usual, due presumably to the circumstances already mentioned, namely the heavy requirements of the Canadian home markets. In many instances we were able to supply these visitors with general information and also to place them in touch with firms in this country who are known to us as being interested in particular classes of goods. Attention may be called to the increased number of Canadian manufacturers agents and merchants who now visit Great Britain with the object of securing the agencies of British manufacturers and shippers. There can be no doubt that the advantages of personal intercourse in such matters are very great.

VISITS TOO HURRIED.

There is a tendency on the part of many of these visitors to allow themselves much too little time on this side for the carrying out of the objects of their mission. Many Canadian visitors seem to be under the impression that because distances in the United Kingdom are shorter than in the Dominion they can hurry from one large place to another almost without delay. Large populations are concentrated about these centres and the requirements of one community frequently differ materially from those of another. The proper investigation of these cases requires considerable time and it is usually necessary to call upon a number of firms in order to arrive at any definite understanding. Business men in this country will not be hurried and some Canadian visitors who allow themselves much less time than is absolutely essential, find themselves obliged to return to Canada just when they are beginning to get into touch with the right people. In such cases the objects of the trip are seriously jeopardised and to our knowledge many Canadians have returned home having achieved very little at a considerable outlay.

REFERENCES USUALLY NECESSARY.

It is desirable to impress both upon visitors and correspondents seeking agencies, the necessity of providing themselves with suitable references. These are nearly always required by United Kingdom houses and the absence of satisfactory credentials is frequently a cause of delay and in some cases an obstacle to the successful conclusion of negotiations. In cases where United Kingdom references are not available it should be possible to arrange this matter through the London agents of the Canadian banks.

BRITISH GOODS IN DEMAND IN CANADA.

It may be of interest to indicate some of the lines for which favourable openings exist in Canada, in the opinions of these agents. Our inquiries include woollens, worsteds and other textiles, linens, lace, hosiery and fancy goods, manufactures of jute, boot and shoe laces, engineering and hardware lines, building materials of various kinds, teas, dried fruits, olive oil and general grocery lines, crockery and china, paints, varnishes, colours and linseed oil, gelatines and glues, jewellery and fancy goods, fishing tackle, smoking supplies, &c., &c.

UNITED KINGDOM FIRMS SEEKING A CANADIAN MARKET.

We have also received a constant flow of applications from British manufacturers seeking to develop a market for their goods in Canada and there are many indications that the commercial community is much more alive to the necessity of taking active practical steps to secure Canadian trade than has been apparent in the past. From the many interviews which we have had—frequently several in one day—one cannot help deriving the impressions that British trade in Canada is still adversely affected by the traditions of 'colonial' trade methods which seem to prevail among business houses of all classes. Of course there are many houses who are quite up-to-date in their methods and perfectly familiar with prevailing conditions. It is, however, surprising to find how many important manufacturers and merchants are still of the opinion that Canadian orders can be obtained by the simple process of circularizing Canadian firms and awaiting results. They fail to appreciate the absolute necessity of getting into personal touch with their clients and correspondents.

In past times it is quite likely that British goods were so well known in all parts of the empire that correspondence varied by very occasional intercourse sufficed to maintain a connection. Indeed it is held that certain amount of trade is still controlled in some parts of the empire through the medium of correspondence or through the indirect intervention of shipping and exporting houses. Any one familiar with Canada is, however, aware that trade of this description has been non-effective for many years past. The active canvassing of Canadian markets by American and other agents and travellers, and the universal advertising of their goods in the Canadian press, alone furnish factors which have contributed to alter the former order of things. Many competitors of Great Britain, particularly the Americans, manufacture varieties of goods which are specially adapted to the particular requirements of Canadian markets. Very few British firms advertise in Canada at all, and many take no trouble to ascertain the particular requirements of Canadian consumers.

MORE UP-TO-DATE METHODS REQUIRED.

Many British houses acknowledge that the adoption of more up-to-date measures are necessary and in the last few years an increasing number of firms have awakened to the necessity of making a personal investigation of Canadian markets or of having an active resident agent on the spot. Constant cases are coming to our notice where firms are sending out representatives to visit the Dominion and to subsequently make such arrangements as may be found desirable for the continuance of a connection. We are constantly having interviews with representatives of firms about to undertake such trips and apparently we are able to furnish them with information and advice which they find of much practical value.

TRADE POINTS FOR CONSIDERATION.

In some cases of course where similar goods are being manufactured in Canada to a considerable extent there is no prospect of securing business. In certain lines there are also special circumstances which render it more convenient for Canadians to obtain supplies from the United States. It is, however, evident that United Kingdom houses should be able to command a much larger share of the import trade of the Dominion than they control at the present moment. It is also apparent that Great Britain is handicapped in this direction by the absence of resident consuls or commercial agents in the Dominion, while her competitors have such officials whose special duty it is to keep their merchants and shippers posted as to the conditions, requirements and fluctuations of Canadian trade.

There seems to be a growing impression in this country that British traders should be provided with similar machinery and it is understood that the Board of Trade proposes shortly sending out a representative to Canada to inquire into that matter.

SUBJECTS OF SPECIAL INQUIRY.

Following the usual custom I beg to offer some detailed remarks regarding a few special matters which have been the subject of attention during the past year.

CHEESE.

I recently had some conversation with the secretary of the Home and Foreign Produce Exchange, Limited, with the object of ascertaining if any features of interest to Canadian shippers had occurred recently. As there are several points, the secretary kindly promised to put them in writing and I now beg to submit the following report furnished by the cheese committee of the exchange:

HOME AND FOREIGN EXCHANGE, LIMITED,
HIBERNIA CHAMBERS, LONDON BRIDGE,
LONDON, S.E., March 6, 1906.

There are several features worthy of note which have become prominent during the 1905-1906 season.

TRANSPORTATION OF CHEESE.

The first point to which reference must be made is the excellent manner in which the London steamers have carried the cheese, and the cool condition in which the goods have been landed. The cool air system of ventilation has proved a tremendous improvement over the old method.

STORAGE.

The housing of the cheese on this side at a temperature of 55° during the summer and about 48-50° during winter months, has contributed in a large measure to the elimination of strong flavour so common in past years. Added to this the facilities of cold storage at a temperature of 42° offered by the Surrey Commercial Dock Co., have been found advantageous from time to time, the extra charge for this accommodation being fully justified.

All these things have contributed to keep Canadian cheese mild in flavour and its popularity as an article of food has largely increased in consequence. Both shippers and importers are yearly paying greater attention to the handling of their goods than ever before and they are reaping the benefit of their precautions.

COLOUR.

Many factory men either do not understand colouring or are too stinting in the use of the colouring material. Some of the cheese coming from many of the good factories are so pale that it requires a strong light to discover if any colouring matter has been put in at all. This should be seen to next season.

BOXES.

It is greatly to be regretted that no improvement has taken place in the boxing of the cheese. A large percentage arrive broken, and it is hardly necessary to point out that the contents are immediately depreciated in value, and a pecuniary loss is sustained. There is less excuse than ever for such a state of things, as the carriers perform their services in a better way than heretofore. It can only be attributed to false economy on the part of the factory men. This is a matter which should have the serious attention of the Department of Agriculture.

MARKED WEIGHTS.

The system which obtains in some factories of scribbling the weights in pencil upon the boxes is one which is condemned on all sides. Endless trouble and annoyance is

caused and the system has nothing to recommend it. The weights should be stencilled upon the boxes and it would be a good thing if some regulation were made rendering such stenciling compulsory.

STOCKS.

In the report which was submitted by this sub-committee last year attention was drawn to the unreliability of the estimates of the stocks of cheese held in Canada, and suggestions were made that the figures should be collected by an official of the Canadian government. There is a strong feeling in favour of the adoption of such a course, which would in the long run be beneficial to all engaged in the trade, both in Canada and in this country. If possible some steps should be taken in this direction during the coming season.

Signed by order and on behalf of the cheese committee.

C. J. HIGGINSON,
Secretary.

CANNED GOODS.

Few features of special interest have transpired in connection with the Canadian trade in canned fruits and vegetables.

The establishment of a branch in London of the Canadian Cannery, Limited, should in due course be a powerful factor in developing a greater demand for some varieties of Canadian goods. At present, however, it would appear that probably 90 per cent of the trade is in gallon apples. Some little business is being established in other lines, but this is very gradual. There seems to be a general opinion among the trade that Canadian packers are still careless in their methods and that in many lines the standard of quality of Canadian goods is inferior to that of the favourite American brands.

Canadian goods have also to compete against the established trade secured by American packers by dint of many years of introductory work and the expenditure of large sums in advertising. Prices in many lines have been at a level which would not be profitable to Canadian packers *e.g.*, Italian tomatoes continue to be sold at such low figures that they have driven many other competitors out of the market.

INEFFECTIVE LABELLING.

In many instances Canadian goods suffer from ineffective labelling and in this connection it has been suggested that it would be a practical step for the Cannery Association to adopt one attractively labelled brand for the output of all their canneries destined for the United Kingdom trade instead of continuing to utilize the numerous individual brands of the different members of the association. Some of these labels are insignificant and their diversity tends to create confusion.

• CANADIAN GOODS IN FAVOUR.

However it is believed that Canadian goods are advancing in public favour and with the adoption of still better methods and the devotion of particular attention to the requirements of this market there can be little doubt that there is a considerable future ahead for this important Canadian industry. The use of glass packages continues to become more general and there is a considerable section of the public which will not purchase goods packed in tins, preferring to pay higher prices rendered necessary by the substitution of glasses for cans. Canadian packers should find it advantageous to adopt glass in connection with the superior grades of certain fruits and vegetables.

FRUIT PULPS.

Prices generally in this branch of the trade have ruled low and quotations offering were not attractive to Canadian shippers.

EVAPORATED APPLES.

The consumption of evaporated apples makes steady progress, but there have been few Canadian goods brought into London lately. It is understood that owing to the partial failure of the apple crop in some districts of the Dominion, comparatively few apples were evaporated last autumn in Canada.

APPLES.

At the request of the Department of Agriculture, I brought to the attention of the trade the system of apple associations which has been adopted in Ontario in connection with domestic trade and which Canadian fruit growers are desirous of having extended to the export trade in fruit to this country. By this system, the packing and marketing of apples instead of being conducted by a number of small farmers in a particular district, is carried on by an association of these fruit growers. The apples are delivered to a central department and packed in an approved manner under official inspection. It is claimed that this system has resulted in a great improvement in the standard of quality of the fruit and has also been more satisfactory to the growers.

TRADE IN FRUIT BROKERS' HANDS.

Up to the present, the trade in Canadian apples in the United Kingdom has been almost wholly in the hands of the large fruit brokers and salesmen and most of the fruit shipped has been more or less on consignment. As a prominent feature of the new scheme entails the payment of cash for the fruit it can be imagined that the proposals do not appeal to most of the large fruit importers and as long as some Canadian shippers are willing to ship fruit on consignment it is natural to anticipate that the trade generally will prefer to obtain their supplies in that manner. With few exceptions, the London firms who were communicated with gave little encouragement to the adoption of the association system.

One large firm of fruit dealers, however, decided to send out a representative to look into the matter, upon the lines suggested by the Department of Agriculture. This representative spent some time in Ontario and negotiations resulted in the purchase of several thousand barrels of apples from the associations upon whom he called. The firm expresses themselves as greatly pleased with the association's methods and at my request have confirmed this in a letter from which the following extract is taken:—

‘We sent our representative to Canada this last season to buy apples and are favourably impressed with the system adopted by the Ontario Apple Association, the pack of which we consider infinitely more reliable than the individual growers packing themselves, and we shall give preference and support to the association pack in the future.’

This, however encouraging, is only an individual opinion, and in view of the lukewarm support of the majority of the trade, I suggested to the department that a practical step would be to send over several representative Canadian fruit growers and shippers to visit the various large centres of the United Kingdom and endeavour to interest the trade in the adoption of this method. There can be little doubt that the prices of Canadian apples are unfavourably affected by the enormous quantities of fruit which are annually dumped into the United Kingdom at one time, instead of supplies being held in storage and shipments regulated according to the condition of the market.

SHOULD HAVE REPRESENTATIVES.

A well known authority in the fruit trade gave as his opinion that Canadian shippers in addition to controlling supplies in Canada, ought to have representatives

S385—8

at the large United Kingdom seaports to supervise the distribution of the fruit and also to control and check the volume of supplies sent forward. Mention should be made of the exceptionally fine display of British Columbia apples which was on view at the autumn exhibition of the Royal Horticultural Society. Considerable attention was given to the fruit by the London press and the interest raised should be of considerable benefit in attracting British capital for the development of the fruit growing industry of the province.

HARRISON WATSON.

CITY TRADE BRANCH.

REPORT BY CANADIAN REPRESENTATIVE.

(*Mr. Harrison Watson.*)

78 BASINGHALL STREET,
LONDON, E.C., ENG., January 22, 1907.

MALT.

As the result of an intimation received from a Canadian company manufacturing malt that they would like to develop business in the United Kingdom, we made some extensive inquiries into the possibility of the trade and in this connection consulted a number of the leading firms handling malt who are known as Malt Factors. A detailed report on the subject has already been published. Consequently it will suffice to state here that the majority of the firms consulted, although prepared to inquire into the matter, did not hold out much encouragement. The transportation of malt is beset with many difficulties, the chief of which is the absorption of moisture which has a most adverse effect upon the value of the shipment.

MALT TRADE IN THE UNITED KINGDOM.

Many attempts have been made by foreign countries, more particularly Germany, to obtain a share of the malt trade in the United Kingdom, but it is understood that these endeavours have been almost invariably unsuccessful. The provision of special air-tight packages is essential for the transportation of malt. This is an expensive matter, and even then it is stated that after all possible precautions had been taken, the quality of the malt is necessarily affected to some degree. The general consensus of opinion was that a much more hopeful and profitable trade for Canada would be the increased production of the varieties of barley suitable for the requirements of English maltsters. There is, as a result of the present large demand for special kinds of barley by brewers of all countries, great competition and suitable varieties, we are informed, command high prices.

CASEIN.

At the request of a Canadian correspondent, inquiries were made regarding the prospects of doing business in this country. The demand is mainly for the cheap varieties and these are supplied from the Argentine and other sources and laid down in the United Kingdom at prices which are not only unattractive but unprofitable to Canadian makers. It is understood that skimmed milk can be more profitably used for stock-feeding and other purposes in Canada than in producing casein. The uses for the higher and more expensive grades of casein are limited. We, however, induced several United Kingdom houses to enter into correspondence with our Canadian inquirers.

MANUFACTURES OF FOOD.

Attention has been called in previous reports to the apparently inexhaustible demand existing in this market for almost all kinds of manufactures of wood. The

United Kingdom has drawn most of its supplies in the past from the United States, but in recent years there has been a falling off in the quantity of American goods available for export, owing, doubtlessly, to the ever increasing home consumption and to the gradual exhaustion of the timbers suitable for such purposes. Owing to this and to the increased knowledge of the forestry wealth of the Dominion there has, for some time past, been a desire on the part of the trade to look to Canada as a possible supplier of wood manufactures.

INQUIRIES FOR WOOD.

During the past year this office has received a large number of inquiries from importers seeking supplies of manufactures of wood of nearly every description. These have included furniture, doors, sashes, mouldings, dowels, implement, broom and tool handles, washboards, shooks, flooring, veneer, curtain poles, billiard cues, lacrosse sticks, &c., &c. Some few intimations which we have received from Canadian manufacturers of such goods seeking export trade and to which some publicity has been given, have resulted in a large number of replies, and it is apparent that there is a very large opening for development of trade in this country in most of the lines enumerated.

It is to be feared that latterly the volume of actual trade has been limited owing to the particular conditions prevailing in Canada where the active demands of the home markets have been so heavy as to leave but little surplus stock for export purposes. It appears somewhat curious that still greater development in the wood-working industry does not take place in Canada. The immense timber resources of the country and the almost universal prevalence of cheap water power, furnish natural facilities for the development of this industry which must be almost unequalled.

The existence of certain and definite markets for the products of the factories in this and other countries should attract further capital for the erection of additional establishments. Even taking into consideration the fact that Canada does not possess sufficient quantities of some of the timbers largely used in the United States and elsewhere in the production of certain varieties of wooden goods, there remains a large number of goods in which a ready sale must exist for many times the quantity at present being turned out.

SOME CANADIAN PATTERNS UNSUITABLE IN UNITED KINGDOM.

It should of course be taken into consideration that many patterns of goods in vogue in Canada are quite unsuitable for the different requirements of this country. This is a matter, however, that could easily be regulated by the adoption of different models for export trade. Indeed this is an absolute necessity because there have been many instances where attempts to introduce goods into this market without any special attention to its particular requirements have been attended with failure and loss. Most British manufacturers and merchants seeking supplies are ready to furnish samples of what they require.

COD ROES.

Some months ago we received an application from a firm in Hull regarding the prospects of obtaining supplies of salted cod roes from Canada. Our correspondents pointed out that there is a large consumption of these roes in the United Kingdom and that they themselves could handle quantities if a suitable source of supply could be arranged.

Under these circumstances, in addition to ordinary publicity, some special inquiries were made on the subject. It appeared, however, that at the time there were no firms in Canada actually putting up cod roes. We were informed that it was the habit of the fishermen on the deep sea grounds to dump the roes into the water along with the other offal and it appeared impossible to induce them to clean and preserve the roes for salting purposes.

Canada appears to possess great facilities for the establishment of an industry in this article and some greater attention has latterly been devoted to the matter. Indeed

it would appear that in several other branches of the Canadian fishing industry there is a great waste of materials which if properly treated would be of considerable commercial value.

WOOD SPIRIT.

Several inquiries have reached us this year as to the nature of the production of wood spirit in Canada. These inquiries have come from British firms handling wood spirit and also in many cases acetate of lime. The industry seems to be developing in Canada and there are several new projects for the production of wood spirit. Upon some of our Canadian correspondents informing us that they would like to take up the matter, we have placed them in touch with firms in this country who are buyers and prepared to take supplies from Canada if satisfactory arrangements can be made.

MINERALS.

The fine display of the mineral resources of Canada made at international and other exhibitions where Canada has been represented have attracted a good deal of notice. We receive a number of inquiries from firms seeking supplies of particular minerals and metals which are known to exist in Canada. With the more universal appreciation of the great mineral wealth of the Dominion there is, however, an exaggerated idea as to the extent to which development has already taken place. We find many cases in which inquirers are disappointed to learn that deposits which they thought to be already worked and producing are practically untouched. In several instances where Canadians have applied to us to place them in touch with firms in this country buying particular kinds of minerals, it has subsequently turned out that they merely sought purchasers for undeveloped properties and not for the product of their mines. There is a very limited market in the United Kingdom for undeveloped mineral properties, but on the other hand, a very large trade in minerals of almost all kinds.

PHOSPHATES.

In consequence of a recent application from Canada, some inquiry has been made as to the condition of the phosphate market in this country. Some years ago Canada did a considerable trade in the United Kingdom. Owing, however, to the discovery of large deposits of phosphates in other countries which could be more cheaply worked, prices fell to a level which were unprofitable to Canadian shippers, and the trade gradually decreased, and for some time past practically ceased to exist. Under the circumstances we have consulted several firms who are interested in phosphates, and from opinions expressed it would seem that there is a fair prospect of a revival of the Canadian phosphate trade if more up-to-date methods of mining are adopted.

TWO OPINIONS *re* PHOSPHATES.

We reproduce, for the benefit of those interested, copies of two reports received:—

1. *Report from a London firm.*

‘The position of the phosphate market is briefly as follows: The imports into Europe of Florida rock (which material, as you know, drove Canadian out of the market), have steadily increased, until last year they reached the total of 566,000 tons high grade, testing 77 per cent minimum, and 227,000 tons pebble phosphate, testing $6\frac{1}{2}$ per cent.

‘Large quantities of high grade phosphates have also been imported from Tennessee, U.S.A., and Christmas and Ocean Islands, in the Pacific ocean.

‘Notwithstanding this, the world’s consumption of superphosphate is increasing at such a rate that to-day demand for high grade phosphate exceeds the supply, and competent judges are of opinion that the shipments from Florida, owing partly to exhaustion of deposits and partly to increased home demand in America, will from now fall off.

‘This is even more evident with regard to Tennessee phosphate, while Christmas and Ocean Islands find their natural outlet in Japan and Australia, where the superphosphates trade is growing by leaps and bounds.

‘Owing to competition between the American shippers prices have not advanced to anything like the extent which might have been expected, but whereas Florida phosphate 77 per cent was readily obtainable last summer at 6½d. to 6¾d. per unit, c.i.f. u.k., to-day’s price is 7¼d.

‘We know that even at 7¼d. per unit, 80 per cent Canadian, cannot in the ordinary way be put on the market here with profit to the producer, but we understand that in mining for mica, quantities of apatite are raised and (except the small amount which suffices for local requirements), are thrown on the dumps. It, therefore, seems to us that the time has arrived when the practicability of shipping Canadian phosphate should again be considered, and, if you decide to refer the matter to the Department of Mines at Ottawa, we will be happy to furnish you with any further information you may require.’

2. *Report from a Glasgow firm.*

‘As to what you say regarding the prospects of mining phosphate in Canada to advantage, if the phosphate is still there in quantity we see no reason why with energy and up-to-date methods it should not take its place among the sources of supply.

‘Since the days when Canada used to ship considerable quantities prices have gone down very considerably, but on the other hand the markets are much more numerous and the quantities sold annually have increased enormously. From Tunis some 6 to 8 years ago not a ton of phosphate had been shipped, and last year about 600,000 tons were shipped to various places, even though the quality of this did not average over 60 per cent, and the price probably not over 5d. per unit c.i.f. on the average. This mine in Tunis, moreover, laid down a railway of about 160 miles from the mines to the seaboard, fitted up all the latest improvements for mining, drying, shipping, &c.; furnished their own locomotives and wagons, and still have been able to mine at a profit and pay a substantial dividend.

‘Large quantities have come in recent years from Oceana and Christmas Island, where the freights cost more than double what it would be from Canada, and they also mine at a profit.

‘In former days Canadian phosphate analysed 75 to 85 per cent, and if this quality can still be obtained a much higher price than for 60 per cent could be obtained.

‘Christmas Island, which runs 80 to 85 per cent, fetches 8d. to 8¾d. per unit c.i.f., or about 50s. to 55s. per ton, while Algerian and Tunisian, testing about 60 per cent, doesn’t fetch over 25s. c.i.f., and still leaves a substantial profit when mined in quantity.

‘Were Canadian miners to follow the example of Tunis, Florida, &c., in their methods of mining and shipping there is no reason why they should not do so profitably.

‘The old Canadian phosphate was hard and required practically no drying, which has to be done both with Carolina and Florida.

‘The crux of the matter lies in using the most improved methods and in shipping large quantities.’

The director of the Imperial Institute, to whom the inquiry was also referred, kindly made some independent inquiries which confirm the opinions expressed in these letters.

As the matter has only recently been taken up it is impossible to offer any opinion as to what may result. It appears, however, that the question hinges on the ability of Canadian shippers to compete profitably with phosphate reaching this country from other sources.

GYPSUM.

After a lapse of some time we again instituted inquiries as to the prospect of Canadian shippers of gypsum being able to do business in this country. Some years

ago the matter was pretty thoroughly investigated. The result showed that there are large supplies on this side of gypsum easily attainable to British consumers, and that the article could be laid down in the United Kingdom at prices which were altogether out of the reach of Canadian shippers. An important factor in this condition of affairs was the absence of cheap transportation from Canada. Recent investigation shows no alteration in the situation. Gypsum is if anything cheaper than it was a few years ago, and the figures at which British firms are buying supplies would be altogether unprofitable to Canadian shippers.

TARIFF AND CUSTOMS.

The new certificate regulations issued by the Minister of Customs at the time of the adoption of the anti-dumping legislation, undoubtedly created a great deal of confusion in the United Kingdom, and the purport of the new arrangements was misunderstood by many. During the year we have received constant applications relating to these invoice regulations. The publication by the High Commissioner of a minute dealing with various points raised by public bodies in this country, helped to clear away a great deal of misapprehension, and the adoption of the combined certificates has also simplified matters.

It is, however, apparent from the endless variety of points still raised that the subject is an intricate one. We also receive a large quantity of tariff inquiries. The scope of Canadian trade is so largely increasing that the desirability of amplifying the index to the tariff might deserve consideration. There are apparently a number of articles in which trade is being done that are not individually specified in the index, and applications for more definite information constitute a considerable proportion of the inquiries made.

QUEBEC COMMERCIAL TRAVELLERS' TAX.

The introduction by the Quebec provincial government of a tax on commercial travellers has created considerable irritation among business men, and this legislation has been the cause of much unfavourable criticism. Under these circumstances I consider it my duty to report the various representations which have been made on the subject during the past few months.

Many persons who have called here hold that it is an anomaly for the Canadian government to state that they welcome British import trade, and have for that purpose created the preferential tariff, when, upon the other hand, as soon as British houses endeavour to take advantage of this preference by sending out representatives they are immediately confronted by a heavy tax. As might be expected, people in this country fail to understand that the tax is purely a provincial one, and attribute it to Dominion legislation.

Even when the circumstances have been explained, they hold that the distinction is immaterial, because in any case the tax has to be paid if they wish to visit Montreal, the commercial metropolis of the Dominion. Quite a few firms have stated that they are instructing their representatives to avoid the province of Quebec altogether, and almost all complain that in their estimation taxes of this description form an obstacle to the development of Anglo-Canadian trade.

EMIGRATION.

Although the main object of this office is to deal with commercial work, a considerable number of persons apply here for information about emigrating to Canada. It has, therefore, been considered advisable to keep a comprehensive supply of emigration literature of all kinds, and there has been a considerable distribution of the same. Although inquirers are referred to the Commissioner of Emigration, we often furnish preliminary advice and information to persons calling at this office.

A large proportion seek information about farming, but there have been quite a few inquiries from skilled operatives such as electrical engineers, mechanics, leather

dressers, woodworkers and other branches of trade. At present no information is available for the benefit of such persons.

IMPERIAL INSTITUTE.

There has not been much of special interest to report regarding the Canadian section of the Imperial Institute during the past year, because arrangements have been in progress for the complete re-organization of the Canadian display. I have, however, been in the habit of going to the institute several times a week, as circumstances permitted. At the present time the Canadian Commissioner of Exhibitions and his staff are engaged in the re-organization of the section, and the whole display is being practically renewed upon a greatly improved scale. When completed the exhibit should be a great credit to Canada, and of much practical value to persons seeking information about the products and resources of the Dominion.

This office continues to be associated with the Imperial Institute, and the display there should be of interest to many of our inquirers in the city who will be directed to visit the institute in order to examine samples and specimens of Canadian products in which they are interested. It is contemplated to utilize a portion of our premises at Basinghall street for display purposes. The space available here is very limited, and the exhibition must necessarily be confined to some characteristic examples of the wealth of the Dominion and to samples of special goods which may be sent over from time to time for some specific purpose. There is, however, a considerable amount of wall space which could advantageously be utilized for the display of photographs. As the room destined for exhibition purposes presents a bare appearance, at present, it is hoped that steps may be taken in the near future towards fitting it up.

HARRISON WATSON.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(*Mr. W. A. MacKinnon.*)

SUN BUILDING, CLARKE ST., BRISTOL, ENG.,
December 31, 1906.

EGG CASES.

My attention has more than once been called to the fact that considerable loss occurs through the careless handling of packages containing eggs. It has been suggested that much of this might be avoided if every egg case were clearly stamped on top 'this side up with care.' Since this could be effected at an extremely small cost, I am inclined to endorse the suggestion, in the hope that an improvement would result.

BUTTER BOXES.

A somewhat similar suggestion has been made with regard to butter boxes. Complaints are heard to the effect that very many of these are covered with tops that do not fit exactly, but project more or less irregularly. These projections are apt to receive blows, or to catch on other boxes, drays, or in the hatchways of steamers. In many cases parts of the tops are thus torn off, and the butter more or less damaged before repairs can be effected. Shippers are, of course, quite aware that the covers should always fit neatly, and that butter boxes should be encased in cotton or canvas as a further protection both from damage and from dirt.

APPLE BOXES.

While on the subject of packages it may be worth while to call attention to the necessity of using reasonably strong material, well put together, for apple boxes. I have recently seen some from Ontario in which the covers were not more than a quarter of an inch thick, and of wood that was absolutely 'dead,' so that the slightest pressure was sufficient to snap it, either with the grain or against it. Quite a number of the sides and covers of the consignment in question were broken on arrival here, while some had been mended, probably before going on board ship. Such defects not only result in immediate damage to the goods, but also ruin the appearance of the consignment, and thus deprive the shipper of what might otherwise have been a good advertisement.

INFERIOR FRUIT IN BOXES.

It cannot be too often repeated, though it might be now considered an axiom of the trade, that only particularly choice, well coloured, and well developed specimens of any given variety (and indeed only of the finer varieties), will repay the additional labour and other charges connected with packing in boxes. All common varieties, and all 'No. 1' specimens should come forward in ordinary barrels. Choice fruit may do well in boxes, and the very finest would repay the trouble of wrapping, or even of shipping in compartment cases.

W. A. MacKINNON.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. MacNamara.*)

MANCHESTER, ENG., January 7, 1907.

STOCK OF PROVISIONS AT LIVERPOOL.

Estimate of the stock of provisions, &c., in the port of Liverpool, on December 31, 1906; together with the figures at the corresponding date last year, and also of last month:—

	December 31, 1906.	November 30, 1906.	December 30, 1905.
Bacon. boxes	13,389	9,782	13,286
Hams. "	2,825	1,379	3,382
Shoulders. "	439	1,275	948
Butter. cwt.	7,904	10,825	4,818
Cheese. boxes	90,611	103,807	94,775
Lard (prime steam western) tierces	3,677	1,266	5,705
Lard (imported pure refined lard) in tierces, firkins, or other packages. tons	566	454	1,291
Lardine and compound. tons	38	5	88

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(Mr. C. E. Sontum.)

CHRISTIANIA, NORWAY, January 4, 1907.

ARTIFICIAL RUBBER.

A druggist at Stockholm, Sweden, has made an invention that may prove to be of great importance. He is reported to have succeeded in producing a stuff, which in most cases will take the place of genuine rubber, while it costs only one-third as much. He has already obtained a patent on his invention. Although the idea is not new the invention itself is quite independent. The new stuff has been given the name Zakin-rubber, and there is already being manufactured stamps, leather imitations, gas tubing, driving belts for machinery, &c., from it.

No rubber or caoutchouc is used in its manufacture. The ingredients of which it is made belong exclusively to the vegetable kingdom, and it may be produced in unlimited quantities.

Also for the automobile industry this new invention will be of importance, as Zakin of a special elastic nature may be pumped into the tyres in place of air, whereby they become exceedingly durable, and at the same time the elasticity remains just as good as with air-filling. A tire filled with Zakin may be penetrated without influence on the use of the tyre. Zakin has also been tried for use in vacuum brakes and proves to excel the genuine rubber. Experiments have proved that Zakin is seven times stronger than genuine rubber, and what is not of less importance, the air has no influence on its keeping qualities, so it will not crack like rubber. A large Zakin-rubber factory is to be built in the near future. The name of the inventor is Mr. Z. Olsson.

PAPER INDUSTRY OF NORWAY.

(Translation from the Norwegian trade paper 'Farmand'.)

'It was anticipated in the beginning of the year that the many new machines which would be started for the making of "news" paper would increase the production beyond the increase of consumption. This has, unfortunately, become only too true, for an over-production of "news" paper has existed during the year, which has made its influence felt on the prices. Towards the middle of the year these gradually weakening, until they suddenly became quite demoralized, and have fallen lower than before. There is no prospect of an improvement. This applies particularly to "printing" and "news," but as these make more than one-half of the Norwegian export of paper, it will be easily understood that this drop in price is of great concern to the mills.

'As to wrapping papers, the export markets have on the whole been firm and rising, excepting natural glazed (glazed ochre), which has been selling at low prices. Better grades of wrappings have all been firm and rising, particularly for "sealing" and "kraft" (sulphate) papers, for which considerable better prices are obtained now than during the first part of 1906.

'As to new mills or extensions of old ones, not less than ten machines have been started in Norway during 1906, while one old machine has been sold abroad. Six of these machines are to make thin wrappings, tissue and cap-papers, and there has of late been a declining tendency in the price of this class of papers. But the consumption of the same is increasing rapidly. Of the other machines one is for "news," two for "grease-proof" and one for "printings."

NORWEGIAN INDUSTRIES DURING 1906.

The industries working principally for the home trade have been generally well employed during the year, particularly ship builders, engineering works and textile mills. The great rise in a number of raw materials has, however, tended to reduce the

profit more or less, as the manufacturers have rarely been able to advance the prices of their productions in proportion. With the exception of a long strike among the bakers, and a strike at some quarries, the country has, during 1906, been singularly free from serious labour disputes.

C. E. SONTUM.

AUSTRALIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(*Mr. J. S. Larke.*)

THE EXCHANGE, SYDNEY, AUSTRALIA, December 15, 1906

TRADE CONDITIONS.

The weather last month has been all that could be desired. The rain, with exceptional placés, has been abundant. Wool is coming in in increasing quantities, but not so much as was anticipated. There are intimations that the total yield will not be as large as the first estimates. Wheat harvesting is in progress and so far the yields warrant an expectation of fourteen bushels to the acre, or a total of twenty-eight million bushels for New South Wales. With the exception of butter all produce, and indeed nearly every line of exports from Australia, is bringing a high price. Butter though low, is yet profitable. The imports for Australia for the first ten months of the year were £37,030,927, as against £30,911,063 last year. The exports show a greater increase, being £51,477,810 as against £39,006,918 for the previous year. A very large amount of the increase—nearly seven and a half million pounds—was due to gold, but the exports of merchandise were over five million pounds sterling, showing a remarkable improvement in the trade of the country, all the more remarkable owing to the large reduction in the value of wool shipped as yet.

NEW ZEALAND.

The increase in the exports of New Zealand are proportionately greater than those of Australia. For the first nine months of the present year the increase in exports was £2,034,567, and in imports £1,187,808. The increase in exports covers every important line of New Zealand produce except timber and grain, wool and sheep skins being responsible for more than one-half of the total. The figures for the two years were :—

	Exports.	Imports.
1904-5..	£ 15,664,811	£ 12,387,313
1905-6..	17,709,378	13,575,121

A great deal of this remarkable expansion is due to the high prices now prevalent for produce, but a portion of it is due to the increase in the production of the country.

TRADE CATALOGUES.

I received this week a case of catalogues and a few others by mail. They represent the manufactures of one hundred and thirty-nine firms. I find that of these, forty-four firms are or have been represented in this country. With twenty-two others on the list I have had correspondence, with a view to their exportation but which so far has not resulted in business. Other firms must have been waited upon by Australians who have visited Canada. Every industry represented in the list has been reported upon with the exception of two. These represent articles made by firms which have recently begun business with Canada. I have not had time to go through the whole of the catalogues but have submitted one or two to firms here for consideration. The serious obstacle to any firm entertaining a proposition for business is the uncertainty of the Canadian firm being able to fill orders within a reason-

able time. With the case of catalogues and others received by mail I received two letters from firms represented therein, of which the following are extracts:—

(1.) 'We beg leave to say that we have nothing at present to spare for export, so are not in need of the services of a representative in your country, to sell our various lines of manufacture.'

(2.) 'At the present time we are so overtaxed with orders that it would be impossible for us to look after any foreign trade.'

What I should like to get from any firm in the list is an assurance that they will be in a position, not merely to supply one order but to supply orders if they can be obtained. This is the more requisite from the fact that some of the firms whose catalogues have been sent to me informed me a year ago that they were not in a position at that time nor likely to be for some time longer, to push for Australian trade.

APPLES.

The *Moana* brought nearly four thousand cases of apples. They arrived in excellent condition, were free from disease or fruit pests and were an exceedingly fine lot. None, however, came from Canada. The efforts made by importers here to secure fruit from Canada were not successful. The largest shipment was made by a single orchardist from the State of Washington, who came out here himself to look into the market. He brought a few varieties that were too tender for this market and many of his apples were too large. The prices will not net him as much as he hoped for and would have done had he avoided these conditions. He is selling them at from 12s. to 17s. per case, is abundantly satisfied with the prospects here and is making arrangements for the continuation of the trade. He ships to London as well as to the eastern United States, and the fact that he proposes hereafter to ship large quantities to Australia makes it pretty clear that he finds this the best market. It is to be regretted that Canada appears to be in no position to take advantage of the conditions as yet. I have had inquiries respecting fruit from Ontario. For good coloured fruit, known as five tiers, that is, packed five apples across the width of a bushel case, \$2.50 would be readily paid at Vancouver. Unfortunately the Ontario fruit has proven to be affected by Codlin moth, and disease to so large an extent that no importer cares to take the risk of sending an order for them. From quotations which I have seen it would appear that British Columbia fruit should bring a higher price when shipped to Australia than shipped to the Northwest in competition with Ontario fruit this year. In the case no surplus can be obtained from British Columbia, it is worth the consideration of any Ontario exporter or orchardist whether he cannot secure fruit clean, well packed and shipped so that he could meet the conditions here required and realize a better price than by exporting to England in good seasons.

POTATOES.

The Northern Rivers and Queensland crop of potatoes, which were marketed here in some quantities in November, was an unusually good one, but the prices increased in New Zealand until the end of November, when they were quoted in Auckland as high as £18 per ton. The potatoes from New South Wales have now materially reduced the price. It is singular that Vancouver firms have not taken advantage of the market, as no Vancouver potatoes were shipped here in good order, and I am afraid that those sent to New Zealand either arrived too late or arrived in such bad order as to be a loss. There appears to be room for a really good firm to enter into the trade of fruit and potatoes at the proper season. It would be necessary for such a firm to have arrangements made for an agent here, with cable communication, as the business would have to be done promptly by cable.

HOPS AND MALT.

I notice statements of hops being shipped from British Columbia to England. If these hops are of high grade the conditions of trade would apparently warrant

their being sold here. Last year 398,139 lbs., valued at £14,738, were imported from Great Britain, and 332,972 lbs., valued at £17,123, from the United States. The total importation for the year was 1,279,362 lbs. valued at £62,763. The freight to England from British Columbia would be higher than to Australia, and in view of the large importations into Australia the price secured presumably would be lower. The quotations now for New Kent hops are 1s. 10d. to 2s. per lb.; Californians are quoted at 1s. 5d., in both instances the duty paid. The duty is 6d. per lb. This will enable a British Columbia grower, knowing the quality of his hops, to form an estimate of what he ought to get if shipped here. One point must not be overlooked. It is not likely that the first shipment will bring the prices that its merits warrant, but when once a brand is made known on the market and its value arrived at by experience, it will secure its actual worth. Malt is also imported from England. Last year the importations were 66,085 cntls. valued at £51,899. The prices to-day are 8s. 9d. to 9s. 3d. per bushel for English malt. The duty is 6s. per cntl. Local malt is quoted at 6s 3d. to 6s. 6d. per bushel.

METHYLATED SPIRITS.

On January 1 next methylated spirits will be free. The Department of Customs is now framing regulations governing the introduction of such spirits. Owing to the cheap spirit produced from the refuse in the refining of sugar it is doubtful if Canadian manufacturers can meet the prices. I should be very glad to have quotations from any Canadian manufacturer and ascertain what could be done.

SUGAR.

The estimate of the Australia sugar crop for 1906-7 is 175,000 tons from Queensland, and 22,000 from New South Wales. It is probable that for the first time for some years there will be some sugar that will be exported. There are some conditions that may affect the yield, but the probability is that there will be a small quantity for Canadian buyers.

GRASS SEED.

I have called attention to the cessation of the export of grass seed to New Zealand last year. I have been informed that the prices in Canada last year were too high for export. This year there will be some shipments but not very large, as the Canadian crop is not a good one. Upon the return of a good season, New Zealand again will be the market for a good deal of the Canadian surplus.

ENAMELLED-WARE.

Advices have been received that the German and Austrian manufacturers of enamelled-ware have increased their prices, which will go into effect on January 1 next. Other European manufacturers are expected to adopt this course. The new discount is fixed at 67 per cent. It is probable that this discount will not be strictly observed, as contracts are now solicited ahead at 70, but at the latter figure this is an increase in price of 33½ per cent. British enamelled-ware is gaining ground in this market. Owing to the very high prices of raw material and wages, it is questionable if it will put the Canadian manufacturer in a very much better position to compete in this market, particularly as all the factories engaged in the business appear to be pretty fully employed.

CUSTOMS DECISIONS.

The following customs decisions will be of interest to Canadian exporters to Australia :—

Marking Pipes and Pipe Cases.—The following case was recently brought under notice : The wooden part and stem of certain pipes are made in France. The pipes

are sent to England where they are silver mounted. When mounted the pipes are put up for sale in cases made in Austria and marked 'Sterling Silver.' It has been decided that in this instance the following marking must appear on the cases: 'London' (after the words 'sterling silver.') 'Pipe made in France.' 'Case made in Austria.' If the silver mounting on the pipes bears the English hall mark the words 'made in France' must be marked on the wooden part of the pipe.

Marking Steinway Pianos.—Messrs. Steinway & Sons, piano manufacturers, have worke at both New York and Hamburg. As regards some of the instruments which they manufacture, the frames are cast in the United States of America, and are shipped to Hamburg to have the action and cases fitted thereto. Such an instrument has been imported into the Commonwealth marked 'Steinway & Sons, New York and Hamburg.' As the piano was partly manufactured at each place stated, the marking is not a false description within the meaning of the Commerce Act.

Marking of Tinned Fish.—Norwegian sprats are, at the present time, tinned and marked 'Norwegian Smoked Sardines.' This is a misdescription and the importers have been notified that the description must be altered to conform to fact. They have asked for permission to use the words 'Sprats' or 'Poissons,' and as either will correctly describe the goods, the permission has been granted.

Messrs. C. and E. Morton export to Australia Trefavenne sardines tinned in Portugal and marked 'Sardines a l'huile.' The French description is misleading as to the country of origin of the goods, and the exporters have been informed that the words 'packed in Portugal' should appear on the label.

Definition of Jewellery.—For the purpose of the Commerce Act, jewellery may be taken to *comprise* articles which, apart from their practical utility, possess a further value, either primarily or secondarily, for ornament, whether wholly or partly composed of precious metal or stones or of imitations thereof.

J. S. LARKE.

MANCHESTER.

REPORT OF COMMERCIAL AGENT

(Mr. P. B. MacNamara.)

CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., January 15, 1907.

EGG IMPORTS.

The Board of Trade returns give the following quantities and values of eggs imported during the eleven months ending November 30, 1906:—

	Gt. Hund.	Value.
Russia	6,710,061	£2,172,386
Denmark	3,469,891	1,498,828
Germany	2,326,565	835,653
Belgium	2,233,290	892,493
France	1,417,192	591,196
Canada	187,783	86,052
Other countries	976,539	325,947

For many years continental countries have had a monopoly of egg shipments to Great Britain, but they will now have a rival in Australia. A large consignment of October eggs reached England a few days ago from that country, and upon being tested proved to be in excellent condition. It is said that for some time the Australian government has been experimenting with a view to preserving eggs, and that perfect success has crowned its efforts.

OXYGENIZED MEAT.

The following is an epitome of an article that recently appeared, dealing with a new method of preserving meat, and which is believed will revolutionize the meat trade. It is being promoted by influential Sydney people, and they claim it will supersede the freezing chamber, and in support of this claim it is pointed out that it costs from 60 to 70 shillings a ton to freeze meat, whereas under the oxygenized treatment the cost is from 8 to 10 shillings a ton. A further important consideration is that while the cost of an ordinary freezing plant to do a given amount of work is £20,000, the cost of an oxygenizing plant to do the same amount of work is only £5,000.

Experiments prove that meat treated in this way, will be fresh and sweet and with flavour unimpaired at the end of seventy days. Some has been kept for sixteen weeks. The method is simple. The carcasses are placed in an hermetically sealed chamber, which is then charged with oxygen gas up to a certain pressure, for a period of from six to eight hours, according to the bulk under treatment. They are then ready for shipment and although not absolutely necessary, the temperature should be kept at about 60°. It is said that this process will allow of mutton, beef, game, and fish being placed upon the markets in the best condition and at a small cost.

QUOTE PRICES.

It is essential that Canadians wishing to sell goods in England should quote prices c.i.f. if possible. Recently I have had my attention called to cases in which the English buyer was asked to state the price he would give. This of course he refused to do, having no desire to act as buyer and seller. The markets of the world are knocking at his door, and prices and samples are constantly in evidence. Nothing will enlist his attention more quickly than samples and c.i.f. prices, and much time is saved, and this latter may be a most important consideration, for the goods may be needed as quickly as possible.

DECLINE OF WHEAT GROWING.

The Agricultural Committee of the Tariff Commission has issued a report, and in it points out, that the production of wheat in the United Kingdom which from 1841-45 was sufficient for 24 million persons, or nearly 90 per cent of the population, has since that time steadily declined, until home grown wheat now feeds little more than 4½ millions or 10·6 per cent of the population.

The importations of dairy produce have increased about 140 per cent during the last 30 years.

APPLES AT LIVERPOOL.

Messrs. Woodall & Co. report under date January 12, 1907, that arrivals for the week were 25,127 barrels. Total receipts for season to date 710,124 barrels as against same period last year of 714,842 barrels. Owing to the small supplies the demand was active and prices generally improved, although lower than might reasonably be expected. Greenings showed badly, being scalded, evidently caused by frost and consequently ruled low.

The following prices were obtained :—

	Firsts.	Seconds and Slack.
Baldwins....	16/ to 21/	12/ to 15/
Greenings...	13/ to 20/	10/6 to 15/
Russets....	19/ to 26/	15/6 to 18/6
Davis....	17/ to 19/	13/ to 15/
Spies....	17/ to 20/	10/ to 14/6

THE BRITISH TRADE BOOM.

According to the Board of Trade returns, issued recently, imports in December were £54,673,982 and the exports £31,409,175, the former showing an increase of £1,553,496, and the latter an increase of £2,756,981, as compared with December, 1905. The exports for the year 1906 as compared with 1905, show an increase of £42,967,976, and the imports increased £45,856,299 in the same period.

P. B. MACNAMARA.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(*Mr. J. B. Jackson*).

NORTH BRITISH AND MERCANTILE BUILDINGS.

EAST PARADE, LEEDS, ENG., January 15, 1907.

WOOLLENS.

There is very much in the present state of the woollen trade of the West Riding pointing to a boom. Last year's demand was much above the average in almost all branches, and the demand has remained very steady and continuous. A notable feature of the industry for some months past has been the extraordinary demands of China, whilst those of Japan has likewise been encouraging. The present Chinese requirements are so extensive and varied, that it can only be assumed that China, following in the lead of her progressive neighbour, is about to adopt the western style of dress.

This would certainly seem to be the case in relation to the army, as some of the largest orders are for army cloth, similar to that which the Japs obtained, viz.:—a plain dyed heavy woollen. The rest of the demand mainly comprise cotton warp meltons, vicunas in black and blue, and plain worsted serges, of a coarse quality.

If China is really adopting the western style of dress, it means that a market of enormous proportions will be opened up for the Yorkshire woollen manufacturers; especially, for those of Dewsbury and Batley.

LACE GOODS.

The value of Nottingham production shipped to the United States during the year 1906 amounted to \$6,760,202, as compared with \$5,619,386 in the year 1905; this result is mainly accounted for by the considerable improvement in lace goods, which forms above five-sixths of the total exports, and not since the year 1882 have the figures under this head reached such a high level. The advance in lace goods over 1905 is \$1,377,451.

The result of last year's trade is highly satisfactory, when it is borne in mind that twenty years ago the amount of hosiery exported to the United States from Nottingham approximated \$2,000,000; whereas last year, owing to the enormous factories erected in the United States, it has depreciated to \$223,727.

The export of gloves also represented an enormous increase, the total, \$38,293, as against \$2,670 in the year 1905.

STEEL AND IRON.

Activity in iron is unchanged, furnaces are yielding their fullest output, and mills and forges are occupied unceasingly in treating the product. Engineering firms report a buoyant business, especially in textile machinery. There was shipped from the Leeds district to the United States last year, goods close upon one and a half million dollars in value, principally in textile and other machinery.

Edge tool firms are booking very favourable orders from Canada. At Middlesbrough the shipments of pig iron are very large for foreign account, and there has been a resumption of deliveries on old orders for America, 5,500 tons being despatched last week.

The steel trade is stronger in some descriptions, as well as finished iron; prices are as follows:—

	£	s.	d.
Steel ship plates.....	7	10	0
Angles.....	7	2	6
Iron bars.....	£8 to 8	10	0
Iron ship plates and angles.....	7	15	0
Steel rails.....	6	12	6

NATIONAL TRADE MARKS.

With a view to giving some adequate protection against fraud, an Irish trade mark has just been registered by the Irish Industrial Development Association, Limited, under the provisions of Section 62 of the Trade Marks Act, 1905. The mark, which is an old Irish design, with the motto printed in Gaelic, 'Made in Ireland,' can now be legally affixed to all Irish goods, and is a guarantee that they come from that country.

I have repeatedly urged in former reports the advisability of there being a trade mark and design common to Canada, and to be affixed to all goods therefrom. One has only to study the advances in trade made by Denmark, under the Danish Trade Mark, which adequately protects the goods of that country from fraud in the British market, to foresee its advantages to Canadian trade.

Evidently the Irish exporters are fully alive to the fact that the poorer classes of imported goods, especially eggs and butter, are sold as Irish, and naturally, they are determined to stamp out this misrepresentation.

I would suggest that a Canadian trade mark consisting of the Maple Leaf, in which should be inserted 'Made in Canada,' as a suitable trade mark to protect our products from misrepresentation and fraud.

JNO. B. JACKSON.

ST. KITTS, NEVIS AND VIRGIN ISLANDS.

REPORT OF COMMERCIAL AGENT.

(Mr. S. L. Horsford.)

ST. KITTS, January 12, 1907.

EXPORTS OF ST. KITTS.

I have the honour to forward the following statement of the produce exported from this presidency for the year ended December 31, last, with a comparative statement of the corresponding exports for the years 1905, 1904 and 1903, taken from the official records just published:—

Sugar.

	1906.	1905.	1904.	1903.
Tons, raw Muscovado.. . . .	14,674	12,116	11,933	13,223
Tons, Vac. Pan.. . . .	524	229	291	288
Total.. . . .	15,198	12,345	12,224	13,511

Molasses.

Puncheons.. . . .	3,020	3,084	2,893	2,695
-------------------	-------	-------	-------	-------

Rum.

Puncheons.. . . .	214	282	230	205
-------------------	-----	-----	-----	-----

Cotton.

Weight in pounds.. . . .	326,456	263,778	55,625	22,880
--------------------------	---------	---------	--------	--------

So far as the sugar and molasses are concerned, the following account of the destination of the shipments will be of interest:—

Canada.

	1906.	1905.	1904.	1903.
Sugar.. . . .	11,267	9,939	11,092	8,967
Molasses.. . . .	2,064	2,228	1,704	1,485

United Kingdom.

Sugar.. . . .	3,741	1,561	875	1,842
Molasses.. . . .	160	116	420	333

U. S. America.

Sugar..	672	2,505
Molasses..	625	546	613	559

Other Countries.

Sugar.	190	173	257	197
Molasses.	171	194	156	318

The large increase in the sugar crop of St. Kitts for last year was undoubtedly greatly due to the favourable and seasonable weather experienced and the absence of any climatic disturbances, but the improved varieties of canes introduced some years ago had also a considerable effect in increasing the yield per acre, as in no instance had the cultivated area been extended.

EXPORTS FROM NEVIS.

With regard to Nevis, although in the account the shipments from that island have not been shown separately from those from St. Kitts, it is known that the returns there have been a good deal below the average owing to several estates having abandoned sugar in favour of cotton, of which latter, there has been a large area planted.

The shipments of molasses have been very disappointing, as instead of keeping pace with the increase in the sugar output, they were less last year by 64 puncheons than they were in 1905, although the sugar crop of the latter year was smaller than in 1906 by some 2,800 tons. Here again, the improved varieties of cane may have had their effect by causing an improvement in the crystallizable quality of the juice, and lessening the amount of the resultant glucose.

COTTON INDUSTRY.

With respect to cotton, the rapid development of the industry, and the very hopeful prospect which it holds out as a valuable adjunct to the staple of both islands, as well as being the mainstay of Anguilla, are most encouraging features. The increase in the acreage under cultivation in St. Kitts has in no way lessened the acreage under sugar, as the cotton is planted on the cane lands as an intermediate crop, and being of rapid growth, the same fields are again utilized for cane, a condition of things which only our very rich soil could render possible in any case.

SUGAR CROP.

The prospects for a good sugar crop for the present year are very hopeful, as there has been most seasonable weather during the best growing months, and everywhere the fields are luxuriant and promising.

VISIT OF CANADIAN TRADE DELEGATION.

I am pleased to learn that delegates from the principal Boards of Trade of the Dominion propose visiting these islands during next month, with a view of promoting trade and bringing about closer relations with Canada. I need hardly say that the members of the deputation may look forward with confidence to a most cordial and hearty reception, and every facility will be afforded them for studying the conditions and conferring with our people so that the objects of their visit may be realized to the fullest extent. I have always advocated such interchange of visits as the best means towards a better understanding of our mutual relations, and of securing an intimate knowledge of trade requirements and conditions, and I feel sure that the contemplated visit will be attended with the happiest results.

S. L. HORSFORD.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(Mr. E. D. Arnaud.)

GAZETTE BUILDING, ST. JOHN'S, January 22, 1907.

CANADIAN AGENTS FOR AMERICAN GOODS.

According to a statement made recently in a local newspaper there have been some complaints from certain purchasers of American manufactures in this market that the prices they have been asked to pay for these goods have been increased in consequence of having to make use of the services of Canadian agents, and paying them a commission on the sales instead of being allowed the opportunity of giving orders direct to the manufacturers in the United States. As a result it is claimed that orders for these goods have been placed in Germany and Great Britain possibly for the reason that the article required could be obtained on more favourable terms than from Canadian manufacturers of the same goods. The attention of the American Consul here has been directed to the matter with the object of having Newfoundland treated as distinct from the maritime provinces of Canada in the appointment of representatives for United States manufacturing concerns, and pointing out the strong objections that the buyers here entertain towards the present arrangement. Whether these complaints are well founded or not, or are likely to have any influence with American manufacturers by inducing them to take steps to remove the objections urged, it may be well for Canadian manufacturers to make a note of the above, and endeavour as far as possible to turn the situation to their own advantage. This can probably best be done through the appointment of local agents who would then have an object in pushing the sales of Canadian made goods, and thus reduce the demand for the American article. In any case it can hardly be to the advantage of Canadian trade that American made goods should find their way into this market through the assistance of Canadian middlemen, although no doubt it is done to the benefit of the individuals concerned.

E. D. ARNAUD.

MEXICO.

REPORT OF COMMERCIAL AGENT.

(Mr. A. W. Donly.)

APARTADO, 91B

MEXICO CITY, MEX., January 19, 1907.

FINES ON SHIPMENTS.

Notwithstanding my remarks for the information of shippers, published in Monthly Report, November, 1905, p. 889, I hear of continued cases of carelessness or ignorance on the part of shippers from Canada to Mexico in regard to making proper manifests and a consequent frequency in fines imposed by the customs authorities here for faulty or erroneous declarations.

CONFUSION IN WEIGHTS.

One of the most prolific causes of confusion is that of weights. Practically all duties collected under the Mexican tariff are specific, the basis varying, according to the article, between gross, legal and net. When the duty is collected on the gross weight the matter is generally simple enough. In said case the duty is charged upon the full weight of the article, plus all interior and exterior wrapping, packing and casing.

The confusion arises when it is a question of deciding between legal and net weights. For instance, canned butter and cheese almost invariably are declared at their net weights, that is, the total weight of the butter or cheese inside of all the cans, whereas the duty is collected on the legal weights of these articles, which includes the weight of the cans in which they are packed. Woollen goods, on the contrary (which pay a varying rate according to the weight of the square metre of goods, the heavier and coarser grades paying a less rate), are assessed on their net weight, and to properly arrive at this it is necessary that they be weighed without the small boards on which the different pieces are wound. If this is not looked after at point of origin it is necessary for the customs broker to unwrap and reweigh each and every bolt, and the confusion and extra work caused thereby must be patent to anyone. The net weight and the square measurement of each piece should be declared when the pieces in shipment are of different weight.

Legal weight is the weight of the package exclusive of the outside casing or tare. Excelsior or paper, used to fill up spaces in a box, between packages, is also considered as tare and not charged for when assessing duties on articles paying on legal or net weights.

CONSULAR INVOICES.

Considerable difficulty also is caused by the failure on the part of shippers to comprehend what is meant by a consular invoice. All shipments of merchandise to this country must be accompanied by a consular invoice, while shippers seem to think they are complying with the requirements when they send along simply a certified invoice. A consular invoice, to be such, must be certified to by the foreign consul or vice-consul (in this case Mexican) in the country where the shipment originates.

FORMS FOR CONSULAR INVOICE.

At the end of this report will be found the form approved by the Finance Department for consular invoices, and I would suggest that persons or firms making frequent shipments here would have a supply printed. The maximum width of form permitted is 26 inches; its length may be whatever the necessities of the case demand. Second sheets, simply ruled and not printed, may be pasted at the bottom of the first sheet in order that all the packages and articles of any one shipment may be certified to under one consular invoice. This form may be printed in English and the weights in pounds, though could they be given in kilograms it would be preferable, as it would simplify the work of the customs broker at the port of entry.

CHANGES ON CONSULAR INVOICE.

Should an error be made in a consular invoice and a change be necessary, a letter should at once be addressed to the consul who certified to the invoice, giving reasons for the change requested. The consul should note thereon the change, and the letter should then be immediately forwarded to the customs broker at port of entry in Mexico. If the change is made before the invoice is certified to by the consul, the letter is not necessary. These changes only refer to changes in the number of packages and values. Other errors may be rectified by a simple letter to the customs broker.

PROPER DOCUMENTS TO ACCOMPANY SHIPMENT.

The shipper should send the original bill of lading to the final consignee, or if the goods are consigned to order through a bank, he should not fail to see that it is properly endorsed. The two copies of the bill of lading should be forwarded to the customs broker at port of entry, together with the certified consular invoice and one copy thereof. The customs broker should also receive a commercial invoice and a packing list.

AVOIDING FINES.

To avoid fines and serious delays in the despatch of goods and their arrival at destination, all of the foregoing paragraphs should be given careful attention and the instructions therein contained carried out to the letter.

TABLE OF CONSULAR FEES.

Below I give the table of fees that Mexican consuls are authorized to collect for certifying consular invoices and other papers. The amounts are given in Mexican pesos, the consuls being authorized to collect their equivalent in the currency of the country to which they are accredited:—

For the certification of each lot of consular invoices—

- | | |
|---|--------|
| A. If the value of the declared goods on the bill of lading is not over \$100, Mexican currency, or its equivalent in currency of the country where the certification is made.. | \$2 00 |
| B. If over \$100, but not over \$500, as above specified.. . . . | 4 00 |
| C. If over \$500, but ont over \$1,000, as above specified., . . . | 6 00 |
| D. Exceeding the limit mentioned in 'C' for each \$1,000, Mexican currency, or fraction thereof, or its equivalent in the currency of the country where the certification is made.. . . . | 2 00 |

E. If the bill of lading is presented for its certification two days after the departure of the steamer carrying the goods, double the rates mentioned in the above articles will be charged.
F. The certification of consular invoices covering national currency in pieces of \$1 each will be charged according to A, B, C, or D, of this schedule.
G. The certification of consular invoices covering any other kind of silver or gold coins, national or foreign, or bank notes of banks established under the banking law, provided these invoices do not cover any other commodity...		Free
For certificates of whatsoever nature issued to captain of the steamer of shipper or merchandise.		4 00
When of said certificates duplicate and triplicate copies shall be required for each extra copy.		2 00
For certification of one set of corrections covering errors in manifests.		4 00
For certification of each lot of corrections covering errors noted by shippers after legalization of invoices.		4 00

INVOICE of the following effects which the subscriber remits in (name, kind and nationality of the vessel) to the consignment of (name of the consignee of the merchandise) of the town or city of _____, of the Republic of Mexico.

Mark of each package.	Number of each package.	Number of packages in figures.	Kind of package.	Gross weight of each package in letters.	Total net weight of effects, in letters, assessed as net.	Total weight, in letters, of effects assessed as legal.	Total length of the merchandise in letters.	Width of the merchandise in letters.	Number of pieces, pairs or thousands in letters, of effects assessed by number.	Name, kind and material of the merchandise.	Point of origin of the merchandise.	Value of each lot of merchandise.

Sum total of packages in figures and letters.

I declare, or swear (as the case may be) that the value assigned to the merchandise is the true one.

(Place and date).

(Signature of shipper.

TRINIDAD AND TOBAGO.

REPORT OF COMMERCIAL AGENT.

(Mr. Edgar E. Tripp.)

PORT OF SPAIN, TRINIDAD, January 16, 1907.

TRINIDAD EXPORTS.

The exports of produce of the colony for year ending December 31, were as follows:—

1906—	Sugar, bags, 508,098.
	Molasses, puns, 3,225; tces., 266; brls., 102.
	Rum, puns, 1718.
	Coffee, lbs., 17,120.
	Cocoa, lbs., 24,906,190.
	Asphalt, tons, raw, 102,348; epurée 16,813; dried, 4,347.
	Manjak, tons, 1,177.
	Cocanuts, No., 12,385,289
	Copra, bags, 19,789.
	Bitters, cases, 20,480.
1905—	Sugar, bags, 280,335.
	Molasses, puns, 3,088; tces, 178; brls., 165.
	Rum, puns, 349.
	Coffee, lbs., 12,510.
	Cocoa, lbs. 42,539,525.
	Asphalt, tons, raw, 84,531; epurée, 14,637.
	Manjak, tons, 800.
	Cocanuts, No., 11,292,767.
	Copra, bags, 11,190.
	Bitters, cases, 21,776.

SUGAR AND COCOA CROPS.

Sugar was the largest crop for many years; cocoa the smallest. As I have before explained, the former industry is almost entirely in the hands of absentee proprietors, and fluctuations in the quantity produced do not therefore immediately affect local conditions. With cocoa it is quite different. The plantations are the property of residents, and the greater part of the proceeds of the crop is spent in the colony. The deficiency calculated at present prices amounts for the past year to over £500,000, which sum has consequently been short calculated in the colony. Much inconvenience and, in many cases, distress has resulted, with a dislocation and stagnation in trade more severe than has been experienced for a long time.

This has necessarily been reflected in the revenue, the receipts from customs duties, sales of Crown lands, &c., having proved considerably short of the estimates. Municipal as well as Imperial taxation has of late years increased a good deal, but a revision of the tariff with a further increase may shortly be looked for unless agricultural and commercial matters take an upward turn. I am pleased, however, to learn that the prospects in the country are now generally favourable, and, given fair weather, that the coming cocoa crop may in some measure make up for the shortage on the last.

THE FRUIT INDUSTRY.

The new industry—fruit—is progressing slowly, but I think surely. Shipments of bananas and oranges are now made regularly to the United Kingdom, and arrive in good order, although the voyage is a fortnight. This is very little under the time occupied from here to Halifax or St. John by the Pickford & Black steamers, and suggests that a similar trade with Canada might be developed to mutual advantage in the near future.

TRINIDAD IMPORTS FROM CANADA.

The imports from the Dominion during the last quarter of 1906 were above the average in most important items. I have several times drawn attention to the large trade done here in soap, and I am pleased to note that Canada is now securing some share of it—for the first time more than that of the United States, and only second to England. More of the light Canadian buggies ought to be sold here. The Americans appear to be doing nearly all this trade. They have established one or two agencies and always have a few traps on hand to choose from. The manufacturer at a distance who requires money sent with order, or draws against documents for goods that the purchaser has never seen, can hardly hope to compete in the circumstances.

VISIT OF CANADIAN DELEGATION.

Much interest is evinced in the forthcoming visit of delegates from the boards of trade of the principal Canadian cities, and suitable arrangements are being made for their reception and entertainment. It is hoped that, in addition to strictly business meetings, time will permit of the delegates seeing for themselves something of the agricultural and manufacturing resources of the colony. In any case their visit to the West Indies should have good practical results.

EDGAR TRIPP.

NOTE.—'Special' means in the case of Imports, 'Imports for Home Consumption,' in the case of Exports 'Exports of Domestic Produce and Manufacture.'

aThe figures for Mexico include coin and bullion.

*Figures are for the years 1905, 1906 and 1907.

TARIFF CHANGES.

COMMONWEALTH OF AUSTRALIA.

No. 1.— Act No. 14, assented to October 12, 1906, relating to Duties of Customs.

1. This Act may be cited as the Customs Tariff, 1906.

2. In lieu of the duties of Customs imposed by the Customs Tariff, 1902, on the dutiable goods specified in the schedule to this Act, duties of Customs shall, from the 28th day of August, 1906, at half-past four o'clock in the afternoon, according to the standard time in the State of Victoria or from such later dates as are mentioned in the said schedule as regards particular items, be imposed on the dutiable goods specified in Part I. of the schedule, in accordance with the rates of duty set out therein. The goods specified in Part II. of the first schedule shall be free of Customs duty.

3. The duties of Customs specified in the schedule to this Act shall be charged, collected and paid to the use of the King for the purposes of the Commonwealth on the dutiable goods specified in the said schedule and imported into Australia after the time from which the said duties are imposed or imported into Australia before that time and not entered for home consumption until after that time.

THE SCHEDULE.

Part I.—Import Duties.

Fixed Rates.	Duties.
Stripper harvesters... ..each	£16; and on and after Sept. 7, 1906, each, £12.
Strippers... ..each	£8; and on and after Sept. 7, 1906, each, £6.
Metal parts of stripper harvesters and strippers...per lb.	2½d.; and on and after Sept. 7, 1906, per lb., 1¾d.
Ad valorem Rates.	
Stump jump ploughs... ..ad val.	25 per cent
Disc cultivators... ..“	25 “
Winnowers, horse and other power... ..“	25 “
Combined corn sheller husker and bagger... ..“	25 “
Combined corn sheller and husker... ..“	25 “
Drills—	
Fertilizer... ..“	25 per cent on and after Sept. 7, 1906.
Seed... ..“	“
Grain and attachments thereto... ..“	“
Ploughs, other... ..“	20 per cent
Plough shares... ..“	20 “
Harrows... ..“	20 “
Chaff cutters and horse gear... ..“	20 “
Cultivators other than disc... ..“	20 “
Scarifiers... ..“	20 “

Corn shellers... ..“	20 “
Corn huskers... ..“	20 “

Part II.—Free Goods.

Manufactures of metal viz.:—

Hand-worked rakes and ploughs combined.

Hay tedders.

Maize harvesters.

Maize binders.

Mould board plates in the rough and not cut into shape.

Potato sorters.

Potato raisers or diggers.

Sub-surface packers.

II.—Act No. 17, assented to 12th October, 1906, relating to the preferential treatment of goods imported from the South African Customs Union.

1. This Act may be cited as the Customs Tariff (South African Preference), 1906.

2. From and after the 1st day of October 1906, at 9 o'clock in the forenoon, according to the standard time in the State of Victoria, duties of Customs on the dutiable goods specified in the schedule shall, when those goods are imported from and are the produce or manufacture of any of the British South African colonies or protectorates which are included within the South African Customs Union, be in accordance with the rates of duty specified in the fourth column of the said schedule. Provided that nothing in this Act shall have the effect of imposing any duty on any goods which are free of or exempt from duty under the Customs Tariff, 1902.

3. The rates of duty specified in the fourth column of the schedule shall be charged, collected and paid to the King for the use of the Commonwealth on all goods subject to those rates imported into Australia after nine o'clock in the forenoon on the 1st day of October, 1906, or imported into Australia before that time and not entered for home consumption until after that time.

THE SCHEDULE.

‘N.E.I.’ means not elsewhere included in this schedule or the Customs Tariff, 1902.

‘Proof’ has reference to spirit of a strength equal to that of pure ethyl alcohol compounded with distilled water, so that the resultant mixture at a temperature of 60° Fahrenheit has a specific gravity of 0.9198 as compared with that of distilled water at the same temperature.

Import Duties on Goods Produced or Manufactured in the British Colonies or Protectorates which are included within the South African Customs Union.

FREE LIST.

The Free List is substituted by the following :—

Imports.

Bran, crushed food and oil cake.

Horses and ponies, cattle including sheep and goats, swine and poultry.

Machinery worked by steam or water power, excepting locomotives.

Metals, raw and manufactured, if for purposes of ship-building.

Seeds and plants for agricultural purposes also prepared manures.

All goods, not being contraband, and for export through bond to other countries or other districts in North Borneo.

Exports.

Coffee.

Copra.

Cultivated rubber.

Fruit and vegetables.

Gambier and pepper (to December 31, 1907).

Salt-fish.

All goods, not being contraband, the produce of other countries, imported for export through bond to other countries or other districts in North Borneo.

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, &c., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

Canadian Commercial Agents.

Australasia.....	J. S. Larke, The Exchange, Sydney, agent for New South Wales, Queensland and New Zealand.
	D. H. Ross, P.O. Box 140, Melbourne, agent for Victoria, South Australia, Western Australia and Tasmania.
China.....	H. J. Craig, 18 Szechuen Road, Shanghai.
France.....	A. Poindron, 101 Rue Réaumur, Paris.
Great Britain.....	P. B. Ball, Room 39 and 40, Central House, Birmingham.
	J. B. Jackson, cor. of E. Parade and Greek Street, Leeds, agent for Leeds and Hull.
	P. B. MacNamara, Canada Chambers, 36 Spring Gardens, Manchester.
Japan.....	W. A. MacKinnon, Sun Buildings, Clare Street, Bristol.
Mexico.....	Alex. MacLean, No. 14 Bund, Room B, Yokohama.
Newfoundland.....	A. W. Donly, Apartado, 91B, Mexico, D.F., Mexico.
Norway.....	E. D. Arnaud, Gazette Building, Water Street, St. John's.
South Africa.....	C. E. Sontum, Grubbegd, No. 4, Christiana, Norway, agent for Sweden and Denmark also.
West Indies.....	John A. Chesley, Rhodes Buildings, Cape Town, Cape Colony.
	G. Eustace Burke, Kingston, Jamaica.
	R. Bryson, St. John, Antigua, agent for Antigua, Montserrat and Dominica.
China, Japan and Corea..	S. L. Horsford, St. Kitts, agent for St. Kitts, Nevis and the Virgin Islands.
	Edgar Tripp, Port of Spain, Trinidad, agent for Trinidad and Tobago.
	W. T. R. Preston, Trade Commissioner, Poste Restante, Hong Kong.

Canadian High Commissioner's Office.

Great Britain.....	W. L. Griffith, Secretary, 17 Victoria Street, London, S.W., England.
	Harrison Watson, Canadian representative, City Trade Branch, 73 Basinghall Street, London, E.C., England.

Canadian Immigration Agents.

Belgium.....	D. Tréau De Coeli, 29 Rue de Souci, Antwerp.
France.....	Paul Wiallard, 10 Rue de Rome, Paris.
Great Britain.....	Mr. J. Bruce Walker, Assistant Superintendent of Emigration, 11-12 Charing Cross, London, S.W.
	Mr. A. F. Jury, Old Castle Buildings, Preeson's Row, Liverpool.
	Mr. G. H. Mitchell, 43 Cannon Street, Birmingham.
	Mr. H. N. Murray, Exeter.
	Mr. L. Burnett, York.
	Mr. John Webster, 35-37 St. Enoch Square, Glasgow.
	Mr. John McLennan, Aberdeen.
	Mr. E. O'Kelly, 17-19 Victoria Street, Belfast.

SOUTH AFRICA.

REPORT OF ACTING COMMERCIAL AGENT.

*(Mr. W. T. R. Preston.)*RHODES BUILDING, CAPE TOWN,
P.O. Box 668,

January 7, 1907.

HOW SOUTH AFRICANS DO BUSINESS.

I was not aware, until pursuing an investigation, of the mode or manner in which business is done between South Africa and the great purchasing markets of the world.

While very many orders are sent direct to either traders or manufacturers in Great Britain, Canada and the United States, the shipments are almost invariably made through commission agents, I found fairly considerable quantities of Canadian cheese in the wholesale and retail establishments in South Africa; in every instance, however, so far as my investigation has taken place, this staple Canadian commodity has not come direct from Canada, but has been purchased in London.

COMMISSION AGENTS.

In going through the English market it is only fair to assume that it must pass through the hands of one or two middlemen or commission agents, thus increasing the cost of the articles in question to the buyer in South Africa. In reply to an inquiry in one large establishment as to why the cheese was not purchased direct in the Canadian market, the proprietor informed me that a neighbouring merchant had upon one occasion made his purchase of cheese in Canada, but the cheese arrived here in an unsatisfactory condition, due, he believed, to the indifferent manner in which the Canadian merchant had selected the consignment. In consequence of this a very natural prejudice had arisen in regard to dealing directly with Canadian merchants.

CARE IN SHIPPING GOODS.

This is another illustration of the absolute necessity of the greatest possible care being taken in the transactions of business with a foreign country. One such mistake as this on the part of a careless shipper or dealer is liable to create unfair prejudice against Canadian merchants generally, and the trade of the Dominion of Canada must in the long run suffer.

CANADIAN COMMISSION BUSINESS SUGGESTED.

This naturally brings up the question as to whether a profitable commission business might not be established at one of the centres of Canadian trade with a view of endeavouring to get possession of the trade which is now transacted by London and New York commission merchants. Just as soon as mutual confidences could be established between such a Canadian house and the business interests of South Africa, an opportunity would certainly be afforded for the development of considerable trade and commerce.

W. T. R. PRESTON.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(Mr. E. D. Arnaud.)

GAZETTE BUILDING, ST. JOHN'S. January 31, 1907.

NEWFOUNDLAND SLATE INDUSTRY.

'Papers have been filed by a company,' states a St. John's evening paper, 'which has acquired the slate quarries at Birchy Cove, Bay of Islands. They have been partly developed already by an American syndicate. The new company has a capital of \$300,000, and the slate in the deposit is said to be equal to the best in the Pendhyn quarries in Wales. Fifteen expert Welsh slate miners have arrived with \$12,000 worth of machinery. Next month 35 more miners will come, there are 30 Newfoundlanders now employed on the quarry and 60 more will be taken on later. This promises to be one of the largest industries in the colony in a short time.'

Assuming that the foregoing information is correct, the item should be of interest to Canadians who according to the trade returns of 1905, are importers to the extent of \$93,238, of which \$82,513 came from the United States. In the interests of inter-colonial trade it may be desirable to see what can be done by the consumers in Canada of this product towards turning their attention to this source of supply, so that it may if possible take the place of what is now procured in the United States and other countries abroad.

The fact that these deposits of slate are conveniently situated on the west coast close to the tide-water, and in reach of water carriage by the St. Lawrence to Montreal and other inland cities of Canada, should make the conditions very favourable for the development of a considerable trade with the Dominion in this article, provided of course that the quality of the slate is satisfactory and the price not in excess of the foreign product.

HERRING FISHERY.

A few facts in regard to the winter herring fishery on the west coast of this colony which has recently been brought to a close, may be of some interest to Canadians, being gathered from the official report of the Inspector of the Customs protection service of Newfoundland.

Sixty-five American vessels carried away :

47,957 brls. salt, bulk.

4,132 brls. pickled.

18,260 brls. frozen.

Valued at \$268,596.

Forty-one British (Canadian and Newfoundland) vessels carried away :

24,005 brls. salt, bulk.

10,982 brls. pickled.

10,900 brls. frozen.

Valued at \$183,548.

Making a total export of \$452,144.

There were about 2,000 men engaged in the work, of whom 1,600 belonged to Newfoundland or Canada.

Owing to the keen competition of the Canadian and Newfoundland vessels to obtain cargoes, the price obtained reached a higher figure than in previous seasons when the American vessels had almost a monopoly of the business, and about the middle of December the price was up to \$2.50 and \$3 per barrel.

EXPORTS OF FISH AND ESTIMATED VALUES.

A comparative statement of the fishery from 1902, giving the quantity of fish exported with the estimated values in each year will show that the present season has been the most remunerative one for the fishermn by a vry considrable amount.

Year.			Value.
1902—62	American vessels—80,302 brls.	\$361,324
35	British	49,941 "	
1903—58	American	56,858 "	331,114
35	British	29,907 "	
1904—67	American	85,073 "	185,937
11	British	11,368 "	
1905—46	American	45,780 "	146,577
39	British	38,871 "	
1906—65	American	70,349 "	452,144
41	British	45,887 "	

E. D. ARNAUD.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. MacNamara.*)

MANCHESTER, February 2, 1907.

STOCK OF PROVISIONS AT LIVERPOOL.

Estimates of the stock of provisions, &c., in the port of Liverpool on January 31, 1907, together with the figures at the corresponding date last year, and also of last month :—

Bacon.....	Boxes.	12,260	13,389	13,094
Hams.....	"	3,222	2,825	3,326
Shoulders.....	"	319	439	485
Butter.....	Cwt.	8,472	7,904	5,397
Cheese.....	Boxes.	77,774	90,611	84,938
Lard (prime steam western)				
	Tierces.	2,597	3,677	3,192
Lard (imported pure refined lard) in tierces, firkins or other packages.....	Tons.	871	566	1,599
Lardine and compound.....		43	38	155

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B., YOKOHAMA, January 22, 1907.

BRITISH COLUMBIA SALMON.

The salted salmon market opened for the season with the arrival of the first shipment from Canada on the 5th of December. There were some 10,400 cases of about 400 pounds weight each. The season is said to have been favourable; and the quality in this case excellent.

THE TEA AND SILK TRADE.

The steamship *Tartar* of the Canadian Pacific line left port on the 19th instant, with about ten thousand packages of tea, the half of which was for Canada. She carried also about eighteen hundred bales of silk. The Canadian route appears to be much in favour for the transportation of silk and tea.

DAMAGED BUTTER AND CHEESE.

At the close of the summer and autumn butter season of 1905 I was able to report that not one complaint had been heard against the quality of Canadian butter; and this circumstance was taken as evidence of the unvarying excellence of its quality. Now, following the butter season of 1906, a much less favourable report has to be made. Throughout the season from time to time complaints were heard, but were regarded as merely casual and not such as to materially affect the good reputation which Canadian butter had gained. Perhaps this lenient view was a mistake, and that the acceptance of such complaints and persistently reporting them would have had the effect of keeping the butter producers on the qui vive, and their product up to the mark.

However that may be, there is serious complaint now made with good cause. One firm whose custom it is very desirable to keep because of the wide distribution of their trade, received their fall and early winter supply in the consignments, September and October. They opened up the first in November, and relying upon previous good quality commenced forwarding it to customers without opening the boxes. In due course complaints came, boxes were being returned, and the usual unpleasantness in such cases followed.

Recognizing that this office was interested, they invited me to view the condition of things. Box after box, promiscuously selected, showed mould over the butter surface, some throughout, and in every case of mould the repellant flavour permeated the mass. The best of it did not indicate that the butter had ever been of first-rate quality.

Subsequently, about the holiday week, the second consignment was put on trial, with the like result. Mould and taint made the butter in great part unfit for table use. Part of the supply, received at the same time, was in pound blocks in parchment paper. The odour from these was that of old tallow; unbearable from butter.

ALLEGED BAD PACKING.

Respecting the packages, they were dirty and old, looking as though they had seen long service, and presented a shabby appearance as piled up in the warehouse. If such

a thing were in practice as using butter boxes twice, I should say these must have been used a long time and often, which would perhaps be one way of accounting for the foul state of the contents.

There is a complication of damage flowing from this misadventure, in this particular case.

1st. The direct loss, which must fall somewhere.

2nd. The loss and inconvenience of the failure of the holiday and winter supply.

3rd. The vexatious disappointment of regular customers depending upon regular supply.

4th. And not least, the earthquake shock to confidence in Canadian butter.

OTHER COMPLAINTS.

Another firm informs me that their butter from Canada had not been satisfactory this season, that their customers had frequently complained; and this, with the liability to delay by being held over from one steamer to the next at Vancouver, together with higher freight rates than from San Francisco and Australia, had made the latter outlook preferable. A few days after, I saw a dray load, 56 pound boxes Australian butter (the boxes looking new and clean) unloading into the firm's godown. This closing of the butter season of 1906 contrasts badly with that of 1905.

Yet another purveying house, with strong Australian and American relations, induced to try Canadian goods, find themselves supplied at the same inconvenient season with cheese to the extent of some four thousand pounds, which was to be of the best quality, but all of which is unfit for sale. The cheese were twin cased, and between every pair there was adhesion and decay. Evidently the cheese had heated, and as the damage was old the goods never should have been shipped. Apples and butter forming part of the same order gave great satisfaction. But because of the cheese a continuance of the Canadian connection is in doubt.

STAPLE FOOD CROPS.

The average rice and barley crop for ten years ending with 1906, according to official statistics is given at 42,546,706 koku (koku 5 bush.) rice, and 19,306,229 koku barley. The crop of these cereals for 1906, partly estimated, is put at 46,830,409 for rice, and 20,284,762 for barley. Therefore although there was partial failure of crop in some parts, and doubtless some local scarcity, the food supply upon the whole shows the people to be better off than in the average year.

THE TEA TRADE.

The total quantity of tea which passed through the Yokohama and Kobe Tea Investigating Stations from the opening of the tea season down to the end of December last is given in the following table with the figures for similar periods during the four previous years:—

Yokohama.

	Chests.
1906..	153,722
1905..	168,928
1904..	204,260
1903..	173,890
1902..	159,210

Kobe.

	Chests.
1906..	101,533
1905..	122,891
1904..	164,630
1903..	152,990
1902..	146,718

From these returns it would appear that the tea crop, as represented by both shipping ports, has been lighter than the average. This year, however, the port of Shizuoka became available for the shipping of tea; and must have had the effect of reducing the output of Yokohama.

THE FLOUR SUPPLY OF THE FAR EAST.

The native press comments upon the report that the Chinese Eastern Railway Company is about to take an active part in Russian competition against the United States in supplying flour to the markets in the far east. For the purpose, a subsidy is to be granted to the Chinese Eastern Railway by the Russian government. The output of the flour mill at Harbin is to be increased from 120,000 to 200,000 poods (a pood about 40 lbs.), and agencies of the mill are to be established at Nagasaki, Shanghai, Kobe and Fusan.

Discussing the resumption of flour export to China and Japan, suspended during the war, Vladivostock exchanges report that 400,000 poods of flour of Russian grinding were in course of shipment. Arrangements for the export of flour had been completed with the co-operation of the commercial agencies of the Chinese Eastern Railway. The fact of this considerable export (says Ussuriskaya Zhien) serves as a significant indication that Russian flour can compete with American on the eastern market in view of the far inferior quality of the latter to the Russian product. The chief defect of American flour is its heaviness and moisture, due to the admixture of Indian corn.

An American flour prospector lately in this country is quoted as saying that 'the duty on flour, recently raised by the Japanese government to 56 cents per hundred pounds, is encouraging the construction of flour mills in Japan, which is easily explained when it is understood that the duty on wheat is but 21 cents, as against 56 on flour. Japan imports about 5,000,000 sacks of flour from America each of recent years, at a valuation of about \$5,000,000. Although the Japanese are building flour mills of their own, it does not necessarily follow that all this flour importation will be cut off, as the demand for flour in that country will probably grow.'

It is to be remarked upon the situation as it is, however, that upon the list of scores of new enterprises and enlargements occupying public attention, flour milling does not appear. Excepting for the purpose of milling within the sphere of Japanese influence in China, with the view to which there has been some company formation, flour milling does not at present seem to afford much inducement. The tariff discrimination in favour of wheat, considerable though it is, has not yet been accepted as assuring in that respect a protective policy.

COMMERCIAL AND INDUSTRIAL EXPANSION.

According to investigations made by the Department of Agriculture and Commerce the number of new companies formed since the conclusion of peace up to the end of August last was 3,896. Their aggregate capital, including the increase of the capital of previously existing companies, amounted to 700 million yen. In September and October, companies with capital approaching in aggregate to 200 million yen were formed. So that the total increase of the capital of companies since the war is 900 million yen.

PORK MOVEMENT IN JAPAN.

With the view to supplying the foreign and home markets with ham, bacon, corned pork, and so on, the Tokyo and surrounding provincial business men have started a company to be known under the style of the 'Japan Ham Manufacturing Company.' This company will be inclusive of the Japan Ham Manufacturing Company and the celebrated curing station at Kamakura that turns out 'Kamakura ham' on a comparatively large scale.

The capital of the company is placed at yen 1,000,000, three-fifths of which are reserved for the promoters, who thus show their faith in the business. Present conditions show that Canadian pork in any of its several varieties is not yet in sufficiently advanced quantity to overflow towards the Oriental market. But reported production of pork in Japan should not weaken Canadian anticipations. The conditions of stock growing and feeding are such here that the most that can be accomplished will be little more than aid in the creation of a market that must look for its supply from without.

COST OF LABOUR IN JAPAN.

The Department of Finance shows the advance that has taken place in the cost of labour in Japan since 1903. The figures relate to Tokyo only, and are brought down to March, 1906.

	1906 sen	1905 sen	1904 sen	1903 sen
Carpenters.	95	85	80	85
Tillers.	85	74	70	71
Plasterers.	92	93	90	88
Roofers.	90	88	87	60
Cotton-ginners.	87	50	46	42
Ship-carpenters.	88	83	82	48
Type-setters.	55	52	47	39
Bricklayers.	95	87	75	82
Makers of house-fittings	80	75	76	65
Makers of clogs	60	47	43	52
Boot-makers.	55	51	51
Tailors.	60	57	56	62
Common labourers.	45	43	43	..

(1 sen equal $\frac{1}{2}$ cent.)

(1 yen equal 50 cents.)

(1 tsubo equal 3.958 sq. yards.)

The greater advance appears to be in the building trades, which may therefore be regarded as the more active. The *Economic Magazine*, a Japanese periodical, in this connection says that in Japan houses of the better kind are scarcely ever built for letting. A Japanese in good position considered it, and does still consider it, unbecoming to live in a hired house. But no such scruple applies to people of restricted means or to the lower middle, and lowest classes. These can not afford to own the buildings they inhabit, and it results that, Tokyo for example, contains a vast number of small residences which can be rented for sums varying from 4 to 30 or 35 yen, monthly. The landlords of such tenements usually receive a great return on the capital invested by them. The great majority of them own tracts of land, which they purchased years ago at low figures, and which they now let for building purposes at a rate representing from 8 to 10 per cent of the present market price of the land. Take, for instance, land purchased at 4 yen per tsubo seven years ago, is now worth 10 yen. (That is about the ratio in any of the favourite suburbs). Then the rent for building purposes is put at $12\frac{1}{2}$ sen per tsubo per month, which represents 10 per cent of the present market price and $37\frac{1}{2}$ per cent of the original price. The rough rule with regard to houses built on such land is that the rent must be such as to amount in three years to the cost of the building. Hence if 750 yen be spent on the building—a fair average figure for the class of house being considered—the rent is 20 yen per month in round figures, and adding the ground rent, the tenant has to pay 26 yen.

Now that insurance is possible at tolerably low rates of premium, landlords are becoming content with a return of 20 per cent on their capital, but regard it a poor business unless they realize that percentage on the whole property—house and land

together, all taxes being paid by the landlord. During the past two years eligible investments in commerce and industry have been comparatively scarce; and at the same time, suburban lands purchased originally at low rates have been brought within easy reach by electric railways. A great deal of building has consequently been done on the above terms, and thus the appreciation shown by the table is easily understood.

It may be suggested by this record of building that there should be importation of lumber. This class of building however is for native use exclusively; and only native lumber, cut to enter into construction to the best advantage, is used.

ACHIEVEMENTS WITH COLD STORAGE.

A British steamship of the Houlder line arrived at Nagasaki ten days ago from Buenos Ayres, en route to Vladivostock. She left the Argentine port on October 26, with a cargo of frozen meat consigned to the Russian government. Nagasaki is only her second port of call, the first being Durban where she coaled, and she has taken coal again at Nagasaki.

The Houlder line has a fleet of fourteen ships engaged in the Australian and South American trade. According to statements made by the steamer's officers, Buenos Ayres is in a very prosperous condition at present.

MONTHLY RETURN OF FOREIGN TRADE.

The following is a comparative statement of the value of some of the principal items of export and import between Canada and Japan, as shown by the Monthly Return, for the eleven months ending November 30, of the present and the previous year:—

EXPORT TO CANADA.

	1906.	1905.
Silk (raw)	\$165,473	\$ 40,373
Silk tissues, habutæ	283,506	194,594
Silk tissues, kaiki (incl. cotton mixture)	10,925	26,976
Silk handkerchiefs	138,071	206,700
Cotton tissues	4,532	4,204
Mats and matting for floor (Hanagoza)	38,001	59,765
Porcelain and earthenware	88,563	84,733
Lacquered ware	9,440	10,058
Straw plaits	1,776	3,462
Rice	121,004	105,779
Camphor	6,623	10,244

IMPORTS FROM CANADA.

	1906.	1905.
Flour	\$70,500	\$52,054

The 'principal items' given in the Monthly Return number only twenty-three of imports and twenty-six of exports. For information respecting the lesser and numerous items making up the aggregate of trade the Annual Report has to be awaited.

SALT IMPORTATION.

By a convention of salt dealers held at Osaka lately, it was represented to the authorities that the salt industry in Korea and Manchuria was making such progress as to assure formidable competition with the corresponding industry in Japan. The industry in Japan is in the relation of a government monopoly. The salt manufactured is taken by the government and sold to the dealers, through whose hands it passes to the retailers and enters into consumption. The revenue derived from this source by the

government is said to be less than anticipated, and the convention advanced the idea that under impending competition from Korea and Manchuria there would be lacking profit for the government and for the trade. The result of this pessimistic outlook is naturally the want of another source of revenue; and the Osaka *Asahi* (*Morning News*) indicates that it may be found in dropping the monopoly of salt and taking up sugar instead, and that it is probable action to that effect will be taken by the Imperial legislature at its coming session.

Inquiry from Canada, as to the market for salt in this country, under the impression that there is a large importation from the United States, is answered to the effect that the entire importation for the last past three years is slightly under \$100,000 per year, chiefly from England, and that the importation from the United States is insignificant. The Salt Monopoly Bureau does not import directly, but through the medium of a German firm from Germany, a British firm from Great Britain, and an American firm from the United States. These firms having been salt importers before the enactment of the government monopoly, were subsequently retained as the channel of importation; and it may be understood that they are prepared to buy salt wherever they can get it to the best advantage.

A FUTURE FOR BARLEY AND HOPS.

That the demand for beer is increasing year after year in Japan is commonly remarked in connection with brewery company investments. There are two confessed drawbacks to the brewery business. The first is that the malt has to be imported; the second, that there is now since the war a revenue tax equivalent to 10 cents per gallon. Even subject to these drawbacks, the president of the Nippon Brewery Company says that 'the amount of export to foreign countries is a matter of great congratulation.'

This tax levied by the government, the president says, 'landed many companies in financial difficulty, and their inability to continue to make ends meet forced upon them a policy of amalgamation. Yet there are companies that must fail if this high rate of taxation is continued, for in face of American competition the export trade will be lost.' In proof of this he said that 'as a matter of fact a certain brewery in America was supplying beer, practically free of charge, in Hong Kong, with the view to secure the market in that country. Therefore, it was advisable for the Japanese brewers as a matter of cold-blooded commercial policy, to lower the price so as to checkmate this and all such foreign competition; but, so long as the present high rate of taxation was continued, this policy could not be carried out.' Arguing in favour of investment in brewery securities, the president said that he would be responsible for the statement that 'the export of beer if properly cultivated would form an item next to raw silk,' of which the annual export amounts to about sixty millions of dollars.

Should this rosy anticipation be half realized in the course of the present generation, the quantity of malt and hops that will be required should invite the attention of the farmers of British Columbia and Alberta, since Japan is not likely to become to any extent a producer of either.

ALEX. MacLEAN.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(Mr. W. A. MacKinnon.)

SUN BUILDING, CLARKE ST., BRISTOL, ENG.,
January 31, 1907.

PROMPT MEASURES BRING BUSINESS.

A recent occurrence illustrates the importance of using the same energy and despatch in connection with the export trade which are characteristic of Canadian business men in handling local trade. A report from this office indicated that there was an opening for certain lines of woodenware. In response, some inquiries were received from Canadian firms, one of which stated that they were sending forward samples of the goods required. No sooner had this fact been intimated to one of the importing firms than they inquired by telephone to ascertain whether the samples had been received and could be inspected at the Commercial Agency. The reason for urgency was that the firm in question had intended placing an order for similar goods that very day, and were anxious that the business should go to Canada rather than elsewhere. This may lead to large and continued orders. The incident shows once more the necessity for furnishing commercial agents with the fullest information as to prices and terms, and when possible with adequate samples; also the vital importance of promptitude in all such matters.

THE LABOUR SITUATION IN 1906.

Among reviews of the past year, none are more interesting than those which deal with labour and the state of employment during the year. It is satisfactory to note on the whole a prevailing tone of optimism, leading to hopeful views of the prospects for the coming twelve months. Appended are some notes from a recent review.

EFFECTS ON VARIOUS TRADES.

The general state of employment in 1906 showed a marked improvement compared with the previous year. The upward movement in employment which commenced in March, 1905, has since been almost continuous, but the ship-building disputes on the Clyde and Tees somewhat affected the percentage of unemployed in the last quarter of 1906. By the end of the year, however, employment in most of the principal industries had become good, and in a number of them it was very brisk.

Coal Mining.—Coal mining, which showed little change in 1905 as compared with 1904, improved considerably, and the average weekly number of days worked by the pits was higher in 1906 than in any year since 1901.

Cotton.—The cotton industry maintained in 1906 the high level of employment which characterized the year 1905, and even to some extent improved on it, and in the other textile trades employment was good, or fairly good, throughout the year.

Iron, steel, &c.—The pig iron, iron and steel, and engineering industries made marked progress throughout 1906, and in the last-mentioned trade the mean percentage of members of trade unions unemployed was lower than in any year since 1900. The tinsplate trade which fell off in the spring of the year, had by the end of it returned to the high level of employment which obtained in 1905. The ship-building industry also improved, and employment was better than in any year since 1901, although it was seriously affected by disputes in the latter months.

Building.—The building trade, however, remained very dull, and although, judging from the percentage of trade union carpenters and plumbers employed, it was better than in the two preceding years, yet the present state of employment is still unsatisfactory.

PERCENTAGE OF UNEMPLOYED.

Returns relating to about 600,000 members of trade unions show that the mean percentage of members unemployed at the end of each month of 1906 was 4·1 as compared with 5·4 in the previous year, and 6·5 in 1904. The mean monthly percentage unemployed in 1906 (4·1), was about equal to the average for the previous ten years (4·04), and was lower than in any year since 1901.

TRADE DISPUTES.

During 1906 there was a considerable increase in the amount of industrial disturbance as compared with other recent years. The number of disputes recorded as commencing during the year was 458, involving 215,446 workpeople, and the aggregate duration of all disputes in progress during the year was 2,989,000 working days. The number of workpeople affected by disputes in 1906 was above the average for the previous ten years (178,494), while the aggregate duration, though higher than the average of the period of 1901-5 (2,783,000 working days), was well below that for the period 1896-1900 (7,010,000 working days). The greatest loss of time occurred in the metal, engineering and ship-building trades. This was chiefly due to the disputes in the ship-building industry on the Clyde and the Tees, involving over 20,000 workpeople.

THE COMMERCIAL SITUATION.

Speaking generally, business promises well for the coming year. Most trades show a decided hopefulness of spirit, though some have not yet felt any appreciable advantage from the better times which have been so much discussed of late. Jewellers, silversmiths and others whose trade consists mainly in luxuries, complain that they have lost much business owing to the increasing popularity of motoring. The keeping of motors has led to the curtailment or abandonment of other and older forms of luxury.

AGRICULTURE.

In spite of the most unusual weather, consisting of a cold rainy spring, followed by a particularly warm summer, and almost a drought in August and September, it would appear that agriculture on the whole has had a very satisfactory year of it. True, this result is only obtained by balancing certain phenomenally successful districts against others which have had a poor season. In the southern half of Great Britain conditions have been extremely favourable for the green crops, while tillage and seeding operations have gone ahead in a most gratifying manner. In the north excessive rainfall and frequent low temperatures have had an adverse effect on both crops and farm operations, the keeping quality of the potato crop being particularly damaged. Comparing the past year with 1905, the *Times* gives the following interesting figures:—

	1906.	1905.	1906 compared with 1905.	
			Increase.	Decrease.
	Acres.	Acres.	Acres.	Acres.
Corn crops.....	7,057,558	7,054,232	3,326	
Green crops.....	3,081,989	3,077,042	4,947	
Clover and rotation grasses.....	4,440,746	4,477,518		36,772
Flax.....	263	441		178
Hops.....	46,722	48,967		2,245
Small fruit.....	80,226	78,825	1,401	
Bare fallow.....	314,552	349,313		34,761
Total arable land.....	15,022,056	15,086,338		64,282
Total permanent grass.....	17,244,734	17,200,494	44,240	
Total cultivated area.....	32,266,790	32,286,832		20,042

AVERAGE YIELD PER ACRE.

More interesting still to Canadian readers will be the figures showing the estimated average yield per acre of various crops in Great Britain during 1906, compared with the ten years preceding. They are as follows:—

	1906.	Average of 10 years 1896-1905.	1906 compared with 1905.	
			Increase.	Decrease.
	Bushels.	Bushels.	Bushels.	Bushels.
Wheat.....	33·66	31·22	0·88	
Barley.....	34·58	33·04	0·67	
Oats.....	40·55	38·92	2·39	
Beans.....	34·73	28·59	2·45	
Peas.....	30·21	26·61	4·50	
Potatoes.....	6·06	5·78		0·12
Turnips and Swedes.....	14·26	12·98	0·48	
Mangels.....	19·79	18·70		0·53
Hay from clover, sainfoin, etc.....	29·21	29·06	0·49	
Hay from permanent grass.....	22·51	23·49	0·80	
Hops.....	5·26			8·95

LIVE STOCK.

All reports, both local and general, agree that 1906 was a phenomenal year for stock raisers. Without going into detail, it may be said that while horse-breeding has had a comparatively unfavourable season, the breeding of cattle has been successful beyond all precedents. To quote the *Times*: 'Never in the history of the export trade have the demand and prices approached in dimensions and liberality those experienced during the year 1906.' The Shorthorn breed has been by far the most popular, and for this South America has been quite the most extensive purchaser. Again quoting the *Times* review: 'It seems hardly too much to say that every Shorthorn bull and heifer of eligible pedigree and merit has been claimed for the Argentine.' The highest individual figure was £3,000 paid for the championship Shorthorn bull at the Royal show, Bapton Viceroy; this animal failed, unfortunately, to pass the tuberculine test at Buenos Ayres, and was, therefore, slaughtered on arrival. The total export trade showed 5,460 cattle of the value of £319,919 up to the end of November, as against 3,789 head of the value of £185,203, for the corresponding period of 1905.

SHEEP BREEDING.

Here again the export trade has been unusually active and extensive, while the home markets have been particularly generous also. It may be mentioned that the championship yearling at the Royal show, which brought the record price of 1,450 guineas, and an entire flock of sheep from Lincolnshire, numbering some 950 head, both went to the same Argentine purchaser who bought the champion Shorthorn bull.

ARGENTINE—CANADA'S COMPETITOR.

The attention of Canadian breeders and importers should be called to a serious consideration of the efforts being made by their Argentine competitors to secure the very

best that this country can produce, with a view to improving the ultimate commercial position of the Argentine in the world's markets.

NEW DOCKS FOR SOUTHAMPTON.

The following item appeared recently in the press:—

'The Southampton Docks and Harbour Board had before them on Thursday, plans from the London and South Western Railway Company, providing for the immediate construction of a deep water dock. At low tides the new dock will contain 40 feet of water, and will be the deepest basin in Europe. Four leviathan Cunarders can be accommodated at one time at every state of the tide. The dock will be an open one, without gates or locks, and with an entrance 300 feet wide.'

WHITE STAR BOATS FOR SOUTHAMPTON.

Almost simultaneously with the above, came the announcement that the White Star line will shortly make Southampton its English port of call in connection with the Royal mail service to New York on Wednesdays. The significance of these two items should not be lost sight of in Canada. They indicate the increased importance of southern ports of the United Kingdom; whether or not this increase will be at the expense of northern ports, time alone will show, but meanwhile, the value of the southern ports, including those of the Bristol channel, to the Canadian export and import trades should be borne in mind by those interested; nor should it be taken for granted, as has been too much the case in the past, that Liverpool, London and Glasgow afford the only natural destinations for Canadian produce.

W. A. MacKINNON.

MEXICO.

REPORT OF COMMERCIAL AGENT.

(*Mr. A. W. Donly.*)

APARTADO, 91B, MEXICO CITY, MEX., February 9, 1907.

A NEW INTERNATIONAL HIGHWAY.

The dream of four centuries is now an accomplished fact and the ports of Salina Cruz on the Pacific ocean and of Coatzacoalcas (now Puerto, Mexico) on the Mexican gulf side, united by the Tehuantepec National Railway, are open to the world's commerce. The first car of foreign freight, consisting of sugar from the Hawaiian Islands (was unloaded from the *Arizonan* at Salina Cruz, on January 23, and having crossed the isthmus in bond was, on the 25th, loaded on board the *Lewis Luckenbach* at Puerto, Mexico, with Philadelphia as its destination.

THE OFFICIAL INAUGURATION.

The official ceremonies in connection with the inauguration of international traffic via the Tehuantepec isthmus route, were presided over by President Diaz, who was accompanied on the trip by members of his cabinet, the diplomatic and consular corps and others, to the number of about two hundred, who went from this city for the purpose of witnessing such an auspicious event in the country's progressive history. The whole party were guests of Sir Weetman D. Pearson, head of the large English contracting firm of S. Pearson & Son, Limited, which has, for the past seven years, been engaged in the gigantic task of reconstructing the railway and making deep water harbours where before none existed. It certainly must have been an occasion of justifiable pride to Mexico's great ruler that it was given to him to see, during his adminis-

tration, the fulfilment of the dreams and hopes of the rulers and statesmen of the previous four centuries. The arrival of the *Arizonan* and the *Luckenbach*, the unloading of the former's cargo of 7,000 tons of sugar, its quick shipment across the isthmus and reloading in the hold of the latter, mark an epoch of no mean importance in the world's commerce. It is confidently predicted that long ere the completion of the Panama canal the advantages of this route will be so well recognized as to insure it, for all time, a large and profitable share of the trade between east and west.

HISTORY OF THE ROUTE.

Hernan Cortez, the Spanish *conquistador*, was the first person of whom we have record to recognize the importance of this route. He built a military road from ocean to gulf that remained in use for a hundred years, and even conceived the idea of an interoceanic canal, surveying the Coatzacoalcos river and urging the Emperor, Charles V. of Spain, to make this the route to the East Indies.

In the eighteenth century, by order of the Spanish Viceroy, a survey was made, the engineers reporting that 'it would not be a work of great difficulty, nor excessively costly, to effect a communication between the two seas across the isthmus,' and in 1814 the Spanish Cortes authorized the construction of 'a canal across the Isthmus of Tehuantepec in preference to Nicaragua and Panama.'

As at this time the country was in the midst of its revolt from Spain, soon after (1821) throwing off the Spanish yoke, and as the young republic was neither financially nor otherwise able to give its attention to such matters, due to restlessness and a continual succession of revolutions, the subject was not revived until the time of President Santa Ana (1842), who granted a concession to a Mexican, José de Garay, to open a route across the isthmus, either building a canal or using 'railway and steam carriages.'

This concession, after several transfers, was finally declared forfeited in 1851, and from then until 1882 various concessions were granted with the same object in view, but the results were practically nil, only twenty-two miles of railway being completed.

It was after this that the Mexican government decided to build the road on its own account, and after dealings with many contractors, both native and foreign, it was finally completed by the Hon. Chandos Stanhope, late in the year 1894.

THE PEARSON PERIOD.

Though the road was now completed and trains operated from ocean to gulf, its physical condition was anything but satisfactory, and besides, the receipts did not meet the expenses of operation. The rails were too light for engines and trains of heavy tonnage; the bridges were but wooden trestles, and the roadbed, very imperfectly ballasted, was subject to continual washout. Besides, if the route were ever to be anything more than an unimportant local line it would be necessary to construct adequate ports, at either terminus, which could accommodate large ocean-going craft. Salina Cruz, the Pacific terminal, was nothing but an open roadstead, whilst only boats of shallow draught could pass the bar at the mouth of the Coatzacoalcos river, on which the gulf port of the same name is situated.

The firm of S. Pearson & Son, Ltd., was already most favourably known in Mexico on account of its successful solution of the difficulties besetting the drainage of the valley and city of Mexico and the construction of the port works at Vera Cruz, and due to its most successful handling of these most difficult undertakings the government entered into a contract with this firm to reconstruct the roadbed, lay it in heavy steel, and to construct harbour works provided with all modern appliances for the rapid handling of heavy cargoes at the terminals. Besides the contract the firm made a partnership agreement with the government for a period of fifty-one years, for the operation of the railway and the ports already mentioned. The fact of a government entering into an agreement of this kind with a foreign firm is an eloquent tribute to said firm in respect alike of its integrity and business acumen.

The first Pearson contract was entered into in 1898, the one at present in force being concluded and approved by congress in 1902, from which date the fifty-one years partnership agreement is to run. Messrs. Pearson & Son have been actively engaged in their work of construction and reconstruction for seven years, and the result of their labours is a railroad laid throughout in 80-pound rails, with ample side track accommodation, a roadbed well ballasted, first-class engines and rolling stock, both passenger and freight and sufficient of it to handle three-quarters of a million of tons of freight annually; harbours at either terminus with 33 feet of water alongside the wharfs, and berths along the wharfs for eight large ocean steamers at one time. Besides there are immense warehouses for the storage of freight, should such be necessary, though under ordinary conditions all freight will be handled direct from steamer to car and car to steamer. The cranes for loading and unloading are all worked by electricity, and no facility conceived by man's ingenuity for the better handling of cargo is wanting.

INTERNATIONALITY OF THE ROUTE.

Sir Weetman Pearson, in his remarks at the inaugural ceremonies, said: 'There will be a fair field and no favour, all ships will be treated with perfect equity and equality.' This semi-official statement, coming as it does from the partner of the government in the road's operation, must be gratifying to all concerned. The Mexican government, out of its own pocket and without one cent of outside financial assistance, creates a commercial highway of world-wide importance, and then says to one and all alike, 'use the highway I have created, there will be no favouritism.'

Such is Mexico's contribution towards the freer interchange of products between countries, herself a country even yet unknown and misunderstood by the vast majority of the Teutonic race, which is only too ready to classify her in the same category as those Latin-American states whose names are synonymous with revolution and lack of progress.

MAGNITUDE OF THE UNDERTAKING.

The history of the Panama canal is replete with heartaches and international ill-feeling that under different conditions might have resulted in something more serious than a bloodless revolution and a secession of a state from the parent union.

What a different story is that of the surmounting of the difficulties in connection with the construction of the Tehuantepec railway and the ports at its termini. No borrowed foreign money, no Panama canal stock and sorrowing creditors, no international difficulties to be smoothed out, and though the region through which it passes is unhealthy tropical jungle, not even can a comparison between the two be drawn as to the number of lives sacrificed for its accomplishment.

To one who does not know the character and topography of the country through which it passes and the enormously heavy rainfall, it is hard to convey an adequate idea of the difficulties which the contractors were obliged to face. Suffice it to say that they were faced and vanquished, to the credit of all concerned, and the necessary millions were supplied from the country's own exchequer. Considerable expenditure must yet be made before all the plans are completed, and the exact figures of the cost to date have not been given out, but it is well known that up to the present the cost has fallen very little short of one hundred million pesos.

The heaviest and most costly part of the whole has been the port works at Salina Cruz where an open coast line has, by the construction of huge sea walls, or breakwaters, been converted into a deep water harbour. Immense single rocks, weighing from thirty to fifty tons each, have been taken from the quarries, carried on trains to the ocean side and there let into place by the use of huge travelling cranes. Besides the harbour itself a commodious dry dock has been constructed at Salina Cruz.

On the Gulf side, at Puerto, Mexico, the work was of much less magnitude. The river itself forms a large natural harbour, up which ships of deep draught can sail for a considerable distance. The only problem was a bar at the river's mouth which impeded the passage of boats drawing more than twelve feet. By dredging and the con-

struction of jetties projecting for a considerable distance into the sea, deep water has been obtained, and the action of the river's current through the narrow channel formed by the jetties will prevent the bar from re-forming. At present there are twenty-five feet of water on the bar, and the dredging will be continued until the desired depth is obtained. Similar works were constructed at the gulf port of Tampico some fifteen years ago, and they have proved entirely successful.

LENGTH OF THE RAILWAY.

The railroad is 190 miles long, exclusive of its 60 miles of side tracks. Sir Weetman said, in his inaugural remarks, that the road would be double-tracked throughout so soon as the traffic demanded it, which he confidently expected would be within the next seven years, and perhaps within the next five.

SAVING IN TIME AND DISTANCE.

The average saving in distance from Asia and the Pacific ports of the United States and Cuba to the Atlantic coast of North America and Europe is about 1,250 miles via Tehuantepec as against the Panama route. The ordinary freight steamer, sailing ten knots per hour, would thus save five days in time by taking the shorter route. Counting one day for a boat to pass the canal and two days for cargo to be transhipped from boat to boat via the Isthmus of Tehuantepec, a net saving of four days in favour of the latter route would result, and it is calculated that the cost of transportation at Tehuantepec will not be more, if indeed as much, as the sum of the canal dues at Panama plus the expenses of running the vessel an extra four days.

From this, it will be very easy for Canadians to realize the great advantages that may accrue to Canadian commerce by the mobilization of this new highway for the handling of their commerce between east and west. Many low-priced commodities that cannot now be handled all rail across the continent may well be shipped via this route with an immense saving in time, at least, over the long and tedious journey through the straits of Magellan.

A. W. DONLY.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. E. Sontum.*)

CHRISTIANIA, NORWAY, February 8, 1907.

MARKET FOR FIR PLANKS IN DENMARK.

I note from the consular reports, that the Danish shipbuilders have commenced to buy fir-planks ready sawn instead of as earlier to saw up the planks themselves from logs of large dimensions, 11" and above that. Such planks command a fair price, about 67 cents per cubic foot, c.i.f., Danish harbours. The conditions are, as a rule, that the planks shall be narrow-cut, free from splints and large injurious knots, as straight as possible and of average length, about 30 feet. The dimensions vary between 5" x 2½" and 3". Special weight is laid on exact and even sawing.

DANISH RAILWAY PLANS.

The Danish government proposes to build not less than 32 new railways. If the proposal goes through the length of the Danish government railways will be in-

creased with 539 kilometres and the private roads with 857 kilometres. The building of the railways is supposed to be carried out during a term of 13 or 14 years at an yearly expense of about 4 million kroner (\$1,070,000).

Of particular interest it is to note, that the Danish government proposes to seek the expenses herewith partially covered by an assessment of those that profit by the new railways through the raise in the value of their property. As soon as a railway is opened for traffic an estimate is to be taken how much in property-value the railway has added to each farm or other lands and part of this increase is to be paid by the owners to the railway company, either in cash or in installments with interest added after a stipulated scale.

MANUFACTURE OF TANNING MATERIALS.

Something quite new for Sweden is the manufacture of tanning materials. The first and only factory was started about four months ago by Messrs. Tillberg & Co. at Västervik, and they have already got a large trade for their product, not only in Sweden but in still larger quantities they export to Norway, Denmark, Germany, and England especially for the latter country's prospects are very good for a growing demand. The company has commenced the erection of a still larger plant calculated to produce twice that manufactured at present.

By this new process it is possible to better utilize the tanning material in the bark and by vacuum boiling at a low temperature, it may be extracted purer than in any other way. Thereby also a better leather may be produced, smoother and more pleasant, besides better water-resisting. Further, the tanning process is done in a much shorter time, and finally, a lot of work and expense is saved. The very best results are supposed to be obtained by mixing the Swedish spruce-extract and 'guebracho.'

The factory already now uses about 10,000 pounds of spruce-bark per day, and when their new buildings get ready, it is estimated that the consumption of bark will be about two million pounds per year.

INDUSTRIES OF NORWAY.

In the year 1900 there was in Norway 3,175 industrial plants in operation, with 79,457 workingmen. The number of horse-powers was 199,388. In 1905 the number of plants had increased to 3,729, with 86,524 workingmen and 280,918 horse-powers, of which for water 201,591 and for steam 70,778.

C. E. SONTUM.

SOUTH AFRICA.

REPORT OF ACTING COMMERCIAL AGENT.

(*Mr. W. T. R. Preston.*)

RHODES BUILDING, CAPE TOWN,
P.O. Box 668,

January 21, 1907.

SOUTH AFRICAN FRUIT.

I have just had an opportunity of investigating very fully a shipment of South African fruit intended for the London market. The fruit consisted of pears, plums and peaches. It was all packed in small boxes measuring 12 inches by 18 inches by 3½ deep. The boxes contained on an average from 18 to 24 of each fruit. All the fruit

was wrapped separately in tissue paper, carefully packed on the top, bottom and sides of the cases with fine wood shavings. All boxes containing fruit found to be up to the standard agreed upon by the Fruit Growers' Association were stamped signifying that the fruit had passed the government inspection. It consisted of two classes, 'selected' and 'specially selected.' Pears $3\frac{1}{4}$ inches in diameter were passed as 'selected' and all above that as 'specially selected' fruit. Plums and peaches were classified, not exceeding $2\frac{1}{4}$ inches in diameter as 'selected,' and those measuring $2\frac{1}{2}$ inches as 'specially selected' fruit. Five per cent of every shipment is carefully inspected both as to size and for the presence of blemishes. Fruit is allowed to be shipped at the owner's risk which does not reach the minimum standard referred to above, but no stamp or label is put on the cases indicating government inspection.

SOUTH AFRICAN FRUIT PACKAGES.

All the fruit, however, which I had an opportunity of examining, justifies the statement that the fruit growers and fruit packers in South Africa thoroughly understand the importance of properly grading and packing the fruit, so that it will stand a good chance of being favourably received on the British market. It is quite evident that the efforts of the Minister of Agriculture are being ably seconded by both fruit growers and fruit dealers. The manner in which the fruit is being packed is most commendable, and furnishes an object lesson which might well be taken to heart by those interested in the shipping and packing of Canadian fruit for export. The fruit packers of South Africa long since realized that it is more profitable to ship in small than in large cases, an example which all interested in the export apple trade of Canada might find profitable to follow.

FRUIT TRADE OF CAPE COLONY AND NATAL.

The fruit trade of Cape Colony and Natal is practically in its infancy, but both of these colonies realize that the only possible hope of securing favourable consideration on the London market is to maintain high standards in respect to the character of their exports. In conversation with the Minister and the officials of the Department of Agriculture I learned that they all realize that there is a unlimited market in London for colonial products, and at the same time they recognize that it is useless to attempt to cultivate that market with any other than the best fruits that can be grown in this country. Here again is another object lesson which Canadian exporters might well take notice of.

From my acquaintance with the London market I am satisfied that a very large and profitable business can be done between South Africa and Great Britain with these fruits, more especially as they will be placed on the British market at a time when there will be no other fruits of a similar character from any other country in the world. These fruits are retailed in London, under ordinary circumstances, at from twelve shillings (\$3.00) to fifteen shillings (\$3.75) a box.

The chief drawback attendant on the shipment of fruits from South Africa to Great Britain is an invariable drop in the market prices immediately following the arrival of a few extra tons in London. Upon this phase of the question it appears evident that if some kind of arrangement could be made say between South Africa and Canada whereby cold storage accommodation could be erected in London for the storage of the products of the interested colonies, and thus provide for placing of these natural products on the British market, with a view of meeting the demand from time to time, a very much higher price could be secured. In this way a glut in the market could always be avoided, and the amount of cash that would be received for perishable products to Great Britain by the respective countries would be enormously greater than under the present system.

Any one who understands the peculiar characteristics of the rise and fall of prices in London can appreciate the force of this suggestion. I am taking the liberty of mentioning the possibility of South Africa and Canada joining in such an arrangement,

in view of the fact that the respective climatic conditions in each country would prevent any competition on the London market between these countries. The Canadian fruit season is at a different time of the year altogether to that when South African fruit is marketable. To Canada alone such a provision as is outlined would affect not simply the fruits of the Dominion, but would have a most important bearing on the dairy and meat exports to Great Britain as well.

FRUIT CASES.

There is an opening here apparently for a profitable business in the manufacture of cases for the fruit export trade. The boxes now being used are 12 by 18 inches, and 3½ inches deep, made in such a way so that the bottoms and tops do not fit closely, or, in other words, leaving room for ventilation. They are made of pine, very light, the wood being only about ⅛ths of an inch. The present supply comes from Sweden, laid down here at a cost of about five cents per box, including 15 per cent customs duty.

W. T. R. PRESTON.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(*Mr. J. S. Larke.*)

THE ROYAL EXCHANGE, SYDNEY, AUSTRALIA, January 21, 1907.

AUSTRALIAN TRADE STATISTICS.

The statistics of the trade and operations of the year 1906, are not yet available, but at the close of the year the Department of Customs issued an estimate of the imports and exports for 1906, and also the actual trade of the previous years. This may be interesting, and is as follows:—

	Imports.	Exports.	Total trade.
1901	£44,555,511	£49,696,172	£94,251,683
1902	42,222,874	43,915,087	86,139,961
1903	38,825,682	48,250,112	87,075,794
1904	37,020,842	57,485,915	94,566,757
1905	38,346,731	56,841,035	95,187,766
1906	44,600,000	68,250,000	112,850,000

The rapid increase of exports indicates that the imports of the present year should exceed those of 1906. Something of the increase in imports is due to the advanced prices for nearly all articles imported. The prices have gone up slowly but steadily and importers have accepted them without any complaint. The prospects of trade for the year 1907 are excellent. Though neither the harvest nor the yield of wool will come up to earlier anticipations, the harvest of New South Wales is estimated at 24,000,000 bushels, a million less than the figures set down in October last. This will give 13,000,000 bushels for export. It is anticipated that the total surplus for export of Australia will amount to 40,000,000 bushels. The arrivals of wool at the seaport of New South Wales for the first six months of the wool year is already in excess of that for a similar six months of the previous year. The exports from Australia for that period have exceeded the exports for the six months of the previous year, though those for New South Wales are as yet over 31,000 bales less.

COMMONWEALTH REVENUE.

Indicative of the general prosperity of the country are the increases in the revenues of the states. That for New South Wales for the last six months of the year was in excess of the revenue for a similar period of 1905 by £846,395; Queensland shows an excess of £150,991; Victoria and South Australia show proportionate increases. The business failures for 1906 show a record of lightness. While profits of business generally have been reduced, the larger business done and a reduction of bad debts has enabled traders to do a fairly profitable trade. Prices of wool for higher grades are higher at the beginning of this year than at any time for some years, while those of poorer qualities are firm. With the exception of wheat prices of exportable products of Australia are high, some of the metals phenomenally so. The prospects, therefore, of the year 1907 are exceedingly good, the rainfall upon the whole making excellent prospects for plenty of water and pasturage over the larger area of the country.

• NEW ZEALAND.

In my last report I gave the exports and imports of New Zealand for the first nine months of the last year, which showed that it has participated in the general prosperity of Australasia. Up to last week it suffered from very dry weather, which at one time threatened to be serious. In the lighter lands it has diminished the crops and so threatened the pasturage that there was a rush of lambs for slaughtering for shipment. Last week very heavy rain set in, which in some places resulted in floods and did some damage. It will, however, restore the pastures and maintain the island's production of dairy products and meat for export. The figures which have been recently published show that while the quantity of land under crops has not increased during the last six years to a very large extent, the increase of land put down into grass has increased in that time by over a million and a half acres. Last year there was a considerable increase in land put under crop as compared with the previous year. The yield of grain, however, is likely to be lower. On the whole the prospects of the trade of New Zealand for 1907 are excellent.

AUSTRALASIAN POTATO CROP

In consequence of the dry time reports were sent out that the potato crop of New Zealand would again be a failure. British Columbia exporters are aware that they neglected to take advantage of the market, both in New Zealand and Australia, and it may be that in consequence of these reports, expectations may be induced that New Zealand is still a good market or will become one for next year. It is not possible to export with profit at the present time. The crop of New Zealand so far is coming in fairly well, and if need be Australia could ship on better terms than could Canada. It is too early to give any indication of what may be the condition of the market a year hence. For the past two years New Zealand, which has grown about one-third of the crop of potatoes produced in Australasia has had a poor crop, mainly through disease. I have seen no reports of the disease so far this year, and it is possible that the dry weather may to some extent be an advantage in preventing the spread of this disease.

MARKET FOR CANADIAN POTATOES.

Canadian exporters should get into touch with reliable firms in case there should be a demand for Canadian potatoes in October next. They must remember that the shipments of this present year have arrived in such bad order that it has cast a doubt upon the Canadian trade. Potatoes, during the drought of 1902-3, arrived from British Columbia in such excellent condition that they attained a high reputation. They were shipped, some of them in bags and others in a better form, in cases, but even those in bags were unquestionably sound. They were thoroughly matured, however, and shipped direct from point of growth, so that they had not the extra knocking about that results

from picking them up in a city market. It must be remembered, too, that in some portions of New South Wales two crops of potatoes can be raised in a year and that in Queensland the crop is gathered at the close of the Australian winter.

These potatoes would be put upon the market in October, and it is quite possible that owing to the high prices at that period last year, a larger acreage may be sown in the northern part of this state and in Queensland. If the crop be good there would be no demand for Canadian potatoes, even should the crops of Tasmania, Victoria and New Zealand—the larger producers—be deficient. The business, therefore, must be done by cable as only possibilities can be indicated for any period ahead, as the crop in the northern part of New South Wales and Queensland, though looking well in the earlier part of the winter, may prove a failure in September.

CANADIAN CATALOGUES MADE USE OF.

I am utilizing the catalogues of Canadian manufacturers recently sent me to make the business concerns of Sydney more intimately acquainted with the productions of Canada. Personally and by letter I have called the attention of the largest houses to these catalogues.

So far only a portion of such firms have examined them but as the result I anticipate that some one hundred and fifty Canadian firms will have letters of inquiry sent from buying houses here. The inquiries will mainly relate to furniture, rubber goods, saddlery and carriage materials, engines and machinery, brushes, glassware and brass goods.

DIRECT BUYERS.

It should be noted that these inquiries emanate from houses desiring to buy directly from the manufacturers. I have continuously advised that there is little hope of business being done except through a direct representative or a commission agent. There are, however, firms who want to deal directly without the payment of any intervening commission. Failing to understand this, I have found Canadian firms have occasionally defeated the efforts to secure direct business by appointing a commission agent on receipt of such an inquiry from this country. The approach of the commission agent has been resented by the firms who have been endeavouring to do without him. The inquiries for the present will be limited to a request for catalogues, prices and discounts, with information as to the method of shipment. Special attention should be given to the information thus supplied.

CORRESPONDENCE.

Correspondence should be prompt. If the full information asked for cannot be given by the outgoing mail, a letter of acknowledgment should be sent, with a statement that further advices will follow as soon as the information desired can be secured. I have found that some houses have refused to look at the catalogues on the grounds that previous attempts at communication with Canadian firms have failed even to secure an acknowledgment. Promptness in replying to letters, particularly where there is a mail on an average only once in a fortnight and it requires nearly three months between the time a letter is sent and the time when a reply can be received, is of the greatest importance.

PRICES IN SHIPPING TO AUSTRALIA.

The catalogues are sometimes accompanied by prices and sometimes without any reference to prices whatever. Owing to the increasing cost of manufacture, the Canadian exporter is justified in not making firm quotations for business for any length of time ahead, and where prices have been sent I have always advised inquirers that they cannot be depended upon for any length of time. In a few cases these prices have been carefully prepared, but in only these few cases are they of any value. The quotations are for goods delivered at the railway station of the manufacturer. No

attention is paid to such figures here. What is demanded is a knowledge of what the goods will cost at ship's side in an Australian harbour and in order to know that the prices must be quoted, first, f.o.b. at New York, secondly, when asked for, in Sydney via Vancouver, and a third route which is becoming popular is shipments by the White Star Line via Liverpool, England.

The chief lines of railway in Canada can get through quotations to Sydney and though the rates of freight are sometimes higher by this route than via New York, yet the regularity of the arrival of this line of steamers induces Australian buyers to pay a little more for freight than by the more irregular lines from New York City. The Canadian who wishes to secure trade in this country must give to this question of freights the closest attention. I have met the objection again and again that 'it is no use trying to do business with Canada. We made the attempt, the prices and the goods will be all right, but the freight killed it.' In the majority of such cases the Canadian exporter appears to have put his goods upon the nearest railway station and allowed the station agent to determine the manner in which they should be carried to this country.

FREIGHTS TO AUSTRALIA.

Transportation is a vital element in the trade with this country. The chief difficulty that Canadian exporters have laboured under is that they ship in comparatively small parcels, while countries having an established trade ship in car-load lots where there is inland carriage to be faced. These small parcels are also charged maximum prices for handling them in New York. The consequences are that where all other things are favourable the goods are so loaded down with these charges that the Australian buyer never makes a repetition of his order. What would be of great value to Canada would be organization that would take charge of shipments for this country, combine the smaller shipments into car lots, keep in touch with the fluctuating freight rates and enable the Canadian shipper to get to this market on the very best terms.

There are New York houses which do this shipping trade, but as they are also commission firms they are not favourably regarded by either the direct buying houses or by the commission agents in this country. The manufacturer who ships through them is, after a little time, called upon to pay a selling commission, and the purchaser in Australia is asked for a buying commission. If these are not paid the shipping firms naturally use influence to turn the trade in a direction where such commissions are paid, hence what is asked for by the parties above referred to is a shipping firm, pure and simple, which neither acts as a buying or a selling agent. The cost of transportation is intimately connected with packing, hence with the rate of freight and the prices there should be given the number of articles in a package and the cubic contents of the package. The Australian buyer, upon receiving such information, can ascertain the cost of the goods landed here and hence make comparisons with other offers which he has and enable him to determine where to place his orders to the best advantage.

WHERE BUSINESS CANNOT BE ENTERTAINED.

Since the above portion of the report was written, I have been informed that one good firm has written to seventy-eight Canadian manufacturers for catalogues, price lists, &c. Many of these firms were selected from a directory and some of them will not desire to do business in this country, and others will be unable to do so. For example, a Canadian firm of glass stainers has been communicated with by a firm of glass stainers here. The articles required are tumblers, wine-glasses, pitchers, &c., which the Canadian firm does not make. Wherever a firm cannot do business it should courteously reply to the communication, stating that it does not desire to export, and recommend the best Canadian firm who could supply the goods required. In this way Canadian interests can be very greatly advanced, for a local opinion thus given would have very considerable weight with the Australian buyer.

INTERESTING BOYS IN AGRICULTURE.

The tendency of the population to centre in cities is greater in Australia than it is in Canada. According to the census of 1901, 35 per cent of the population of New South Wales resided in the city of Sydney; 41 per cent of the population of Victoria in Melbourne, and 44 per cent of South Australia in the single city of Adelaide. To-day the percentage is still greater. The government of the state of New South Wales has, therefore, felt the necessity of encouraging settlement upon the land. The Educational Department has taken up the work with a good deal of vigour. In the rural districts this is done by interesting the teachers in the subject. Very many of the schools have sufficient grounds adjoining to be divided up into small experimental plots, which are devoted to the cultivation of grain, vegetables and flowers, under the supervision of the teacher. Teachers who are specially interested in this department of their work are commended in the reports of the inspectors, which contributes to promotion and an improvement in their salaries.

INTERESTING TEACHERS.

To further aid such teachers the department has provided for a series of summer schools, one of which is at the Agricultural College of the state, situated near Richmond. One hundred teachers are permitted to attend a summer school lasting three weeks, during their mid-summer holidays, in which lectures and practical exemplifications of the agricultural aspect of primary education, elementary work in dairying, fruit and flower growing, animal industry and irrigation are given. The teachers who desire to undertake this course make application a month or two previously, and if more should apply than the limited number, a selection is made by the inspectors of the district, who are guided by the interest which the applicants have previously taken in the subject. The teachers pay their own travelling expenses but are provided with board and lodgings at the college by the government, with the exception of towels, sheets, blacking brushes, &c., which they must bring with them or obtain. Each teacher is presumed to select the subjects most serviceable to the locality in which he resides.

RURAL CAMP SCHOOLS FOR BOYS.

For the purpose of attracting the boys of the city to the country, for the past two years rural camp schools for city boys have been conducted with very great success. Twelve units of twelve, each unit under the charge of a teacher, are taken into the country, where they camp. The department provide tents, blankets and waterproof sheets and rations. Each boy pays the expense of travelling and contributes 1s. a day for rations. The schools of this state where there are two or more teachers, are provided with a savings bank department, and boys who are selected to attend these camp schools are encouraged to save up their money through these savings banks for this purpose. Provision in many of the schools is made for the children of such parents as desire to go to these camps and are unable to contribute their share of the expense. The boys are medically examined as to their physical fitness for the school, but in case any sickness should occur the government provide a hospital under the charge of the district government medical officer. The boys visit farms and orchards in the district, where they witness the practical carrying on of the dairying, horticulture or agricultural operations and explanations are given to them of the operations which they witness. The camps have been reported to be admirably conducted, the boys feeling under obligation to so behave themselves that the residents of the neighbourhood who welcome them will welcome future visits.

CONTINUATION SCHOOL.

It has attracted so many of the pupils of these camp schools to country life that the department has made a further provision by the establishment in Sydney of a con-

tinuation school. It has utilized the building and grounds of what was formerly a training college for this purpose. The buildings can be easily adapted to the work, and grounds—25 acres in extent—will give room for practical training. It is intended to be a link between the primary school and the agricultural college at Richmond, but in case boys should not desire to go to the agricultural college, it will give them sufficient knowledge to enter upon an agricultural life intelligently.

A two years course is proposed, it being intended that the course shall be divided into three main sections: (1) A continuation of the general English education; (2) a course in science bearing on agricultural and manual training; and (3) field instruction in practical agricultural operations. The time of the students will be divided approximately equally between these three sections.

The buildings already on the ground will be utilized for lecture rooms and laboratory, and the residential portion will be set apart for the accommodation of a limited number of boy boarders. It is expected that about thirty students will be received in the institution. Boys on admission must be at least fourteen years of age, and will be required to furnish evidence that they have completed a course equal to that prescribed for the sixth class in public schools or that they have passed the senior or junior university examination. It is proposed to make the school to a large extent self-supporting, and with this object in view a fee of two guineas a quarter will be charged for day students and an additional fee of six guineas, making eight guineas in all, per quarter, for students in residence.

It will thus be seen that the whole system provides a series of graded schools for interesting the youth of the city in the country, and must tend to offset the rush of population to the cities, as well as to raise the standard of agricultural operations.

J. S. LARKE.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(*Mr. J. B. Jackson.*)

NORTH BRITISH AND MERCANTILE BUILDINGS,

EAST PARADE, LEEDS, ENG., February 20, 1907.

APPLES.

During the past season the predominant feature has been the large quantities of Canadian apples which have been received in this district by local buyers, direct from Canadian packers. At least 50,000 barrels have been shipped into this district, direct through the medium of the information supplied by the Government Weekly Report, and of the British Inquiries inserted therein.

This is but the beginning of a direct trade which will increase with larger volume during each succeeding year. The apples received direct have also been much better packed and graded than those that have been bought by local men at the auction rooms at the ports.

GOOD CONDITION OF APPLES.

The apples received here this year, with very few exceptions, have been excellent both in quality, packing and grading; in fact, the apples opened out here in as fine a condition and with as perfect a flavour as when picked in the Canadian orchards. Slacks were entirely eliminated, and consequently no bruised or disfigured fruit.

To inspect Canadian apples in the warehouse, or in the merchants' stalls, alongside of the miserably-packed fruit from the United States, was an inspiration to a Canadian, and proved conclusively that the Canadian packer has at last fully grasped the vast possibilities of this market, when catered for in the proper manner.

CANADIAN PACKERS CONGRATULATED.

Canadian exporters to this district are to be congratulated upon the efficient and business-like manner in which they have placed Canadian apples, not only as the best flavoured and most desirable fruit of its kind on the English market, but as the only apples entering England in large quantities, where the packing and grading is of the best.

Good prices have been obtained by the Canadian exporter to the inland cities, better than at the ports; whilst the different dealers are jubilant at the prices realized, the saving of the middleman's commission and travelling expenses, and with the vision of larger trade and profits during the next season are ready at the earliest moment to make full and complete arrangements for next season.

BOXES IN FAVOUR IN LEEDS.

I have often in the past stated as my opinion that the finest of Canadian apples would be very acceptable here if packed in boxes, as especially at this time of the year, many people are rather chary at buying a whole barrel. On account of my suggestions, an Ontario packer has shipped here direct some 300 boxes of 'Baldwins'; and as I was rather interested in seeing the outcome of this venture, I inspected the fruit at the fruit market in this city. I found a most presentable looking box, in fact, I think a little better than was necessary, measuring about 2 feet long by 1 foot wide, and weighing about 50 lbs., containing on an average about 125 apples. The boxes were filled with the finest 'Baldwins' I have seen this season, and arrived here in perfect condition. Each box was nicely stencilled and inside a large card the same size as the box, attractively got up, represented the contents as 'Choicest Canadian Apples,' with the name and address of the shipper. The prices being received, are from 6s. to 6s. 6d. per box.

This innovation is intended to meet a long-felt want in supplying shopkeepers who have a better class of customers in the principal suburbs surrounding this city. This shipper deserves to be congratulated for having placed on the market the best Canadian-boxed apples which have ever appeared in this district.

The New Zealand apples always arrive in boxes and are most carefully and tastefully packed. But one of the large wholesale men said to me to-day:—

'In the neatness of these Canadian boxes, quality of apples, and style of packing, Canada has far outdone New Zealand.'

FINANCIAL ASPECT OF THE WOOL TRADE.

The following article from the special correspondent of 'The Yorkshire Post,' in the woollen and worsted district, will, I am sure, be read with interest by the Canadian woollen men:—

'The more one thinks of the wool trade and the prices that are ruling, the greater becomes the surprise that things are moving so smoothly and confidently. Many a woolman said in 1900 and 1901 that we should never see high prices again, but it is perhaps in order now to ask, When are we to have low prices? Nobody desires to see good greasy combing back at 6d. per lb., for that is neither good for producer nor consumer. Users of wool, yarn, and fabrics are buying to-day a thousand times more lustily than they did when prices were in some cases half what they are to-day. But a 5 per cent bank rate raises the question of its bearing upon the wool trade, and it is worth while just now to consider its relation to current prices, and the prospect of the trade being able to get on comfortably without fear of any set-back.

INCREASED COST OF WOOL.

'It is obvious that when wool is costing double what it did in the nineties, the amount of capital required to lift the same number of bales is vastly different. I may give here the yearly total since 1859 of the colonial supply, the average cost per bale, and an approximate total of the money which it represents. Schwartzes' figures may be relied upon, and the following table shows the amount of money required to lift simply the Australian and the Cape wool clip:—

Year.	Total bales.	Avg. value per bale.			Total value. £
		£	s.	d.	
1895.. .. .	2,270,000	11	0	0	24,970,000
1896.. .. .	2,134,000	12	0	0	25,608,000
1897.. .. .	2,108,000	11	10	0	24,242,000
1898.. .. .	1,982,000	12	5	0	24,280,000
1899.. .. .	1,908,000	14	10	0	27,666,000
1900.. .. .	1,596,000	13	10	0	21,546,000
1901.. .. .	1,962,000	10	10	0	20,601,000
1902.. .. .	1,933,000	11	15	0	22,713,000
1903.. .. .	1,685,000	13	10	0	22,747,000
1904.. .. .	1,572,000	14	10	0	22,794,000
1905.. .. .	1,842,000	15	15	0	29,011,000
1906.. .. .	2,071,000	17	0	0	35,207,000

'We have not yet reached the height at which wool was selling in December, 1899, but the wool trade is now absorbing considerably more capital than it did in that memorable year, cross-breds being considerably dearer than they were then, and this year, I am positive, will break all records in the amount required to lift the wools which are and will be available.

'The wool trade proper differs from many more in the quickness of payments. Wool sold by auction has to be paid for on or before the prompts become due, a fortnight being the extent of the custom of the trade. It is also very common to find spinners willing to pay for a delivery of tops a few days or a week after the bags have been weighed in and checked, it being the basis of many a transaction to pay quickly.

'This is an advantage both to the spinner and topmaker, for, in broad Yorkshire parlance, "there is nowt like shaking t' brass poke in the eyes of a top-maker to get him to tak a farthing less." It is well known in Bradford that many top-makers have to seek the aid of the bank in their business, and not unfrequently this works to the injury of the trade. Men buy frequently double the weight of wool which they can lift with their own money, the consequence being they have to seek financial aid in order to lift the wool. This practically means putting half their purchases into "pawn," and scores of times prices have been helped down by a forced sale, for when a bank requests either a topmaker or spinner to reduce his overdraft in a slack time it is certain that some cheap tops can be picked up. When, as at present, wool and tops are moving most rapidly, forced realizations are unknown; but when everybody is filled up, and wool and tops begin to accumulate, things soon become a little shaky.

'Last May and June, when the trade was carrying its full share of the last world's clip, a little financial difficulty was experienced in more quarters than one, and many think that in the coming season this may be repeated. If, it is argued, the burden reached straining point in the middle of 1906, what can we expect when the trade carries upon its back another big increase? But "sufficient unto the day is the evil thereof." The manufacturing world is more hungry for wool than it has ever been, and the trade is nothing near filled up, nor are bank balances anything near exhausted. Users will find the "brass" if they want the wool, and banks

will not refuse help when they see the money is required for real, legitimate trade purposes.

HEALTHY CONDITION OF WOOLLEN AND WORSTED INDUSTRIES.

'In taking a broad survey of the situation, it is impossible to overlook the fact that the woollen and worsted industries were never in a healthier state than they are to-day. I have not so much fear about cash being wanted to lift all the wool grown, as about the weight of the wool which will come on to the market. What men buy they will pay for readily, but it will be the surplus, if such it can be called, which will test the buying resources of the trade. It is extremely difficult to say if to-day's rates are going to continue intact through the next six months, or whether the weight of offerings will break prices. My own view is that the trade is able to lift all the wool that is grown, providing the quantity offered is not rushed too heavily upon consumers.

'The trade cannot be gorged week after week, and month after month, without time for digestion; it is the possible forcing on to the market of large weights of the raw material which causes a little uneasiness. There is a stronger feeling of safety in to-day's values than there can possibly be if prices are forced to a higher level, and this should be guarded against. Prices this last two months have responded because of the hungry state of users, and a romping trade is assured for the next six months, but I don't think that after a while users are going to tread upon each other's toes for the raw material as they recently have done. Some seem to think that the top has not yet been reached, but the wisest heads in the trade make no secret about their opinions, and express themselves in favour of current rates remaining steady, in preference to a rush being made, to be followed by a serious fall.'

CANNED MEATS, &C.

I am informed that the trade in canned meats is daily improving, and that grocers are beginning to buy new supplies, it being reported that the public are now becoming tired of their vegetarian cheese and fish diet, and are again casting longing eyes towards the 'flesh pots' discarded so unceremoniously after the publication of the American meat scandals.

I am assured that there will be, in all probability, an excellent market for the best classes of canned meats in the near future, with a strong preference for Canadian goods.

BACON.

Canadian brands of bacon and hams are much more in evidence in this district than American, especially is this the case with regard to hams for boiling. You find them in almost every shop, and are now known as 'Canadian,' and are never referred to as 'American.'

The wholesale merchants are looking for very large shipments from Canada during the next few months, and although on account of the supplies of Canadian bacon and hams being so plentiful: prices are slightly lower as compared with the American; still I am of the opinion that it is good business for our Canadian packers to sell at reasonable prices as they apparently are doing, and by this means they are gradually capturing a very large share of the trade from the American shippers.

EARTHENWARE.

Some ten or eleven years ago special efforts were made by many firms in the South Yorkshire pottery district to build up a Canadian trade in general earthenware, but partly owing to the wrong methods which they admit they adopted at this time, they evidently met with very little success; and one by one they had to withdraw from that market. Profiting by their previous experiences, these firms are about to make another attempt to introduce their goods into Canada, and have decided to

form a selling combination among themselves, and divide Canada up into districts and appoint a leading hardware store in each district to act as the sole representative of the combination. By this network of agents they are confident that they will make a big inroad upon the large imports of continental earthenware goods which are imported into Canada at the present time.

HAY.

The trade in Canadian hay has so much promise in this district that any advice given by old experienced dealers is well worth considering by Canadian shippers. A large hay dealer in this district advises as follows :—

‘Canadian shippers could almost double their profits on their hay shipments, if instead of only sending ‘Clover’ hay by itself, they would intermix with it either ‘Timothy’ or ‘Ryegrass.’ The public here do not take to clover hay by itself; its peculiarity lies in its broad hollow stalks, when in the stacks it is more bulky than either Timothy or Ryegrass, but once it is put under hydraulic pressure, the moisture seems to dry in, and in this way it is very deceptive, both as regards its appearance and weight. Ryegrass and Timothy, however, are ‘wirey’ or ‘fibrey,’ and when put through the same process they absorb the moisture and maintain their weight throughout; especially is this the case when the hay is chopped, so that the horses can eat the same from their nose-bags.’

Mixed Canadian hay of this description will easily fetch from £4.10 to £5 per ton at any port on the east coast of England.

CUTLERY.

I am informed that a very large amount of German cutlery, razors, &c., is shipped from Germany to Sheffield, and is there exported and sent to Canada as Sheffield goods. Canadian buyers cannot be too careful in seeing that the goods are stamped from Sheffield, and especially that they are dealing with well-known Sheffield firms.

PIG IRON.

If the Canadian people would only make their pig iron more uniform so as to approach the Swedish standard, they would get fifty per cent more for it in this country than they are getting at present. The present grades of Canadian pig iron which are arriving at Liverpool are of exceptionally high order, and English manufacturers always give Canadian pig iron the preference over the common warrant iron produced at Middlesborough.

It is not practicable for Canadian exporters to transact direct business with the buyers at this side, as is done in many kinds of Canadian produce, but there are many opportunities for extending the trade with Liverpool and other ports. The system the local firms prefer to work upon, is to sample the metal in Liverpool and then analyse it in their own shops.

They are almost unanimous in stating that if Canadian exporters would only make a closer study of the requirements of the British market, and produce a more uniformly graded metal, their trade would increase ten-fold, and the prices would soon approximate to the prices for Swedish iron.

Prices are at present :—

	Per ton.
Middlesborough warrant.	54s. to 60s.
Canadian.	110s.
Swedish.	130s. to 200s

JNO. B. JACKSON.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. MacNamara.)

CANADA CHAMBERS, 36 SPRING GARDENS,

MANCHESTER, ENG., February 15, 1907.

CANADIAN WHEAT IMPORTS DOUBLED.

It will be gratifying to all lovers of Canada to learn from the following figures taken from the trade and navigation returns, that the imports of wheat from Canada to the United Kingdom for the year ending December 31, 1906, almost doubled as compared with the preceding year, and that she has moved up to fourth place in the great wheat exporting countries of the world :—

	1905.		1906.	
	Cwts.	Value (£)	Cwts.	Value (£)
Russia.....	24,703,200	9,142,146	15,017,500	5,224,904

	97,622,752	35,279,931	92,967,200	32,676,185

RUSSIAN WHEAT EXPORTS DECREASE.

The exports from Russia during 1906 have fallen off nearly 40 per cent compared with shipments during 1905, whilst Canada's exports increased over 40 per cent in the same period. The cultivation of grain in Russia has been the mainstay of agriculture in that country, and the competition with America for first place in supplying the markets of the world is well pronounced. In the past 25 years the cultivation of wheat has advanced from 29 to 46 million acres. The average yield per acre is among the lowest of the wheat growing countries of the world, and during the last 20 years it has been below nine bushels at different times. The prices at present prevailing in Manchester market are as follows :—

No. 1.—Northern Manitoba	6s. 9½d. to 6s. 10d. per 100 lbs.
No. 2—“ “	6s. 8d. to 6s. 8½d. “
Russian	6s. 5d. to 6s. 6d. “

ALLEGED SALMON FRAUDS.

The complaint is still made by British dealers interested in the sale of British Columbia salmon that the fraud to which I referred in Report No. 79, July 31, 1905, viz., the substitution of Alaska salmon for British Columbia has not abated, and that it proves a great loss to Canada. My informant assures me that British Columbia salmon of all grades reaches this country without mark of origin on the tin, and

in almost all cases without marks other than an identifying mark on case in which shipped, corresponding with mark on B. L. for identification.

STAMPING OF TINS SUGGESTED.

There would be no possibility of fraud if the tins were stamped with a letter identifying the river, as after the tin is filled it could not be branded. The great part of the Alaska fish that contribute to the fraud is caught by large firms owning vessels adequately fitted up for catching and canning the fish on board, and hence it is effected at little cost as compared with cost to canners. This class of salmon is plentiful, large quantities are caught, but the quality is much inferior being coarse and hard, neither can it compare in the matter of cleanliness with that put up in the canneries, as the space on ship is limited as well as the fresh water supply. The best quality of Alaska red salmon is selected to carry out the fraud, and a label bearing 'British Columbia Salmon,' without any other mark is put on in England. This salmon is bought from 17s. to 17s. 6d. per case, and is put in competition with genuine British Columbia salmon at 22s. to 22s. 6d.

In many cases the fraud is discovered, and complaints, returns and cancel of orders follow, yet a great quantity reaches the consuming public upon whom the fraud is constantly perpetuated. Last season's pack of British Columbia salmon is very small, and has not yet reached this market. Prices in consequence will be higher as best quality is very scarce indeed. One large firm is short 10,000 cases on existing contracts, and other firms are situated similarly.

PRICES OF FRASER RIVER SALMON.

The following prices prevail for Fraser River salmon:—

Best Talls.	23s. 6d. per case of 4 doz.
Best Flats.	27s. 6d. to 28s. per case.
Half-pound Flats	37s. 6d. to 38s. per case of 8 doz.

It is a matter of the utmost importance to the British Columbia canneries, and to the honest dealer in this country, that the tins should be branded.

APPLES AT LIVERPOOL.

The arrivals of both Canadian and American apples at Liverpool have been somewhat irregular and the quality in some cases not such as desired, showing indications of damage by frost. The prices realized, however, showed a hardening owing to competition of buyers, and that stocks were low was quite apparent. Reliable parcels will always realize good prices. The following prices were obtained on the 13th inst :

No. 1.	s. d.		No. 2 and Slacks.

BRITISH TRADE INCREASING.

The Board of Trade returns for January, issued recently, show that the value of imports was £60,540,508, being an increase of £7,066,175 compared with January, 1906, and the exports,, £35,070,607, being an increase of £4,295,796 over the same period.

P. B. MacNAMARA.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(Mr. E. D. Arnaud.)

GAZETTE BUILDING, ST. JOHN'S, February 23, 1907.

CUSTOMS RETURNS.

The Customs Returns of Newfoundland for the year ended June 30, 1906, are now made public, and the figures they contain regarding Canadian trade with the Colony seem worthy of consideration by manufacturers and exporters of the Dominion who desire to increase their trade in this market. The most noticeable feature in connection with these returns is the fact that while the exports from Newfoundland to Canada show an increase of \$641,321, the imports from Canada have fallen off \$583,630 in the same period.

CANADIAN IMPORTS OF FLOUR DECREASE.

Of the above total increase in the exports to Canada the item of dry codfish accounts for \$455,704, while the imports of flour from Canada amount to 83,736 brls., valued at \$536,863 less than they did for the previous year. The difference in the price between American and Canadian flour in favour of the former is sufficient to account for the large falling off noted above, all the facts in connection with this trade being well understood both by the sellers as well as buyers.

There are still many articles of Newfoundland in which Canada might make a better showing with a little more attention to the requirements of this market, and an examination of the following comparative statement of some of the principal items of imports may be useful to show Canadian exporters what progress, if any, they are making to supply the demands of the trade of the colony.

NOTE.—'Special' means in the case of Imports, 'Imports for Home Consumption,' in the case of Exports, 'Exports of Domestic Produce and Manufacture.'

α The figures for Mexico include coin and bullion.

*Figures are for the years 1905, 1906 and 1907.

NEW TARIFFS.

During the month under review there have been distributed from this department to all the principal Customs-houses and Boards of Trade throughout the Dominion, copies of all foreign and colonial tariffs and supplements thereto, as furnished during that period by the International Customs Tariff Bureau, which are always available for reference by those interested therein, resident at the principal centres of trade. The following British and Colonial are supplemental to those published in the departmental Annual Report, 1893, and the quarterly and monthly reports since published, and comprise all additions thereto or changes therein, so far as the department has authentic advice.

MAURITIUS.

IN FORCE JANUARY 1, 1907.

Schedule B. to Ordinance No. 29 of 1895.

(Consolidated Customs' Tariff.)

As modified by Ordinances No. 19 of 1896 and 1 of 1904 in regard to Spirits, plain or compounded (Item No 135), Ordinance 25 of 1904 amending Ordinance 50 of 1899 in regard to alcohol in Wine, and No. 50 of 1899 as regards Wines (Item No. 159) Champagnes and sparkling Wines, Tea and Carcasses of all Animals. Ordinance No. 5 of 1898 and Proclamation No. 44 of 1906 regarding *ad valorem* rates. Ordinance No. 39 of 1898 as regards Vinegar. Ordinance No. 51 of 1898 as regards Petroleum (Item 112) and Salt (Item 126). Ordinance No. 24 of 1900 repealing Item 6 of Schedule C. Ordinance 16 of 1900 as regards Bullion and all alcoholic preparations; duty on butted and stemmed and Rodrigues Tobacco, No. 35 of 1900, and 2 of 1901 imposing additional tax of 2 cents per 100 kilos on sugar exported; No. 17 of 1901 amending various items. Ordinance 13 of 1903 amending Item 9 of Schedule C. of Ordinance 29 of 1895 as regards exemption on Wearing apparel and Item 138 of Schedule B. of Ordinance 29 of 1895 as regards duty on Sugar imported; Ordinance 31 of 1903 amending Ordinance 13 of 1903 as regards duty on Sugar candy and sugar refined imported. Ordinance 14 of 1905 amending Items 147 and 114 of Schedule B. to Ordinance 29 of 1895 as regards duty on Tobacco and paper Cigarette. Ordinance 21 of 1904 imposing a surcharge of 20 per cent on all goods imported except rice, dholl, lentils, salt fish, wheat flour and Indian corn flour which are subjected to 4 per cent surcharge only.

21	Copper on which duty has been paid on importation, stripped off vessels.
22	Quinine and its salts.
23	Cinchona and its official preparations as defined in the British and French pharmacopeias

* Abrogated by Ord. 34 of 1900. †Ord. No. 17 of 1901.

PROHIBITIONS.

Vine plants affected with any disease or brought from a place beyond the limits of this Island, where any disease of vine plants is existing or is supposed to exist or may hereafter exist.—Ord. 4 of 1882 and Proc. No. 9 of 1888.

Base or counterfeit coin.—Ordinance 28 of 1892, Schedule II.

Articles of foreign manufacture, and any package of such articles, bearing any names, brands or marks, being, or purporting to be, the names, brands or marks of manufacturers resident in the United Kingdom.

Indecent, obscene, seditious or inflammatory prints, paintings, books, cards, lithographic or other engravings, or other indecent, obscene, seditious or inflammatory articles.—Ord. 17 of 1901.

Infected cattle, sheep or other animals.

Cast-off clothes.—Ordinance No. 22 of 1883, Article 59.

Goods referred to in Article 14 of the Merchandise Marks Ordinance, 1888.

Dangerous goods.—Referred to in Ordinance No. 18 of 1896, Article 59.

Mongoose.—Ordinance 10 of 1905—and any animals, birds, reptiles, goods or articles which may be prohibited by Proclamation issued under said Ordinance.

RESTRICTIONS.

The shell of the "tortue de mer" or "green turtle," known as "kahouane" and turtle oil, cannot be landed, removed or imported into Mauritius from any of its Dependencies, except in virtue of a special permit issued by the Collector of Customs in Mauritius.—Ordinance No. 21 of 1871.

Foreign reprints of copyright Works are admitted under His Majesty's Order in Council dated 1st April, 1853, but they are liable to a poundage of 20 per cent. upon their estimated value.—Ordinance 24 of 1851 in force from 14th December, 1895, by Proclamation dated 13-12-95.

Articles liable to be excluded from the Colony under Chapt. VI of the Quarantine Regulations made under Ord. No. 24 of 1901.

If any goods are imported or brought into Mauritius contrary to any of the Prohibitions or Restrictions mentioned in the above Tables, the same shall be forfeited.

TARIFF CHANGES.

BRITISH INDIA.

I.—PROHIBITION TO IMPORT CERTAIN COTTON SEED.

(Notification—By the Government of India, Department of Commerce and Industry, No. 5103-79, dated the 3rd July, 1906.—Customs Circular No. XI. of 1906.)

In exercise of the powers conferred by section 19 of the Sea Customs Act, 1878 (VIII. of 1878), the Governor General in Council is pleased to prohibit the bringing by sea or land into British India of American or West Indian cotton seed except such as has been fumigated to the satisfaction of the Customs-Collector.

II.—PROHIBITION TO IMPORT COCAINE BY POST.

(Notification—By the Government of India, Department of Commerce and Industry, No. 9227-75, dated the 29th November, 1906.—Customs Circular No. XII. of 1906.)

In exercise of the power conferred by section 19 of the Sea Customs Act, 1878 (VIII. of 1878), the Governor General in Council is pleased to prohibit the bringing by sea or by land into British India of cocaine by means of the post; and to restrict its importation by any other means to cases in which it is imported by persons, or by their authorized agents, who have been specially permitted to import the drug by a Local Government or Administration.

III.—AMENDED TARIFF VALUATIONS OF CERTAIN COTTON GOODS.

(Notification—By the Government of India, Department of Commerce and Industry, No. 10098-11, dated December 21, 1906.—Customs Circular No. XIII. of 1906.)

In exercise of the power conferred by section 7 (1) of the Cotton Duties Act, 1896 (II. of 1896), and in supersession of the Notifications in this department, No. 7514, dated the 15th December, 1905, and No. 4820-4, dated the 19th June, 1906, the Governor General in Council is pleased to fix, for the descriptions of cotton goods hereunder specified, tariff values as follows, with effect from the 1st January, 1907.

V.—AMENDED SCHEDULE IV. OF THE INDIAN TARIFF ACT.

(Notification—By the Government of India, Department of Commerce and Industry, No. 10123-30, dated December 22, 1906.—Customs Circular No. XV. of 1906.)

In exercise of the powers conferred by sections 22 and 23 of the Sea Customs Act, 1878 (VIII. of 1878), in modification of the tariff values fixed by the Indian Tariff Act, 1894 (VIII. of 1894), as amended by the Indian Tariff Act (1894) Amendment Act, 1896 (III. of 1896), and as further altered from time to time by notifications of the Governor General in Council, the Governor General in Council is pleased to fix, with effect from the 1st January, 1907, for the articles specified in column 2 of the schedule hereto annexed, the tariff values stated in column 4 of the said schedule.

Provided that nothing in this notification shall affect any additional duty imposed under the powers conferred by sections 8A and 8B of the Indian Tariff Act, 1894 (VIII. of 1894), as amended by the Indian Tariff Act Amendment Act, 1899 (XIV. of 1899), the Indian Tariff (Amendment) Act, 1902 (VIII. of 1902), the Indian Tariff (Amendment) Act, 1903 (XII. of 1903), and the Indian Tariff (Amendment), Act, 1904 (XI. of 1904).

SCHEDULE IV.—(Import Tariff.)

GENERAL DUTIES.

No.	NAMES OF ARTICLES.	Tariff Valuation. R. a.	Duty.
<i>Animals, Living.</i>			
1	Horses, cattle, sheep and all other living animals of all kinds.....		Free.

Metals and Manufactures of Metals.

- 13 Hardware and cutlery, including ironmongery and platedware, and also including machinery, tools and implements to be worked by manual or animal labour. [*Exceptions, which are free:* (i) Water-lifts, sugar-mills, oil presses and parts thereof, and any other machines and parts of machines ordinarily used in processes of husbandry, or for the preparation for use or for sale of the product of husbandry, which the Governor General in Council may, by notification in the *Gazette of India*, exempt; (ii) the following agricultural implements, when constructed so that they can be worked by manual or animal power, namely, winnowers, threshers, mowing and reaping machines, elevators, seed crushers, chaff cutters, root cutters, horse and bullock gears, ploughs, cultivators, scarifiers, harrows, clod crushers, seed drills, hay tedders and rakes; (iii) the following dairy appliances, when constructed so that they can be worked by manual or animal power, namely, cream separators, milk sterilizing or pasteurizing plant, milk aerating and cooling apparatus, churns, butter dryers and butter workers; (iv) the following articles used in the manufacture of cotton, namely, bobbins (warping), forks for looms, healds, heald cords, heald knitting needles, laces, lags and needles for dobbins, pickers (buffalo and others), picking bands, picking levers, picking sticks (over and under), reed pliers, reeds, shuttles (for power looms), springs for looms, strappings, and weft forks; (v) box backs and swells and rough unshaped bobbin ends, when imported by or on behalf of a manufacturer or mill owner, and certified by him to be intended exclusively for use in his mill]. *Ad valorem.* 5 p.c.
- 14 Machinery, namely, prime-movers and component parts thereof, including boilers and component parts thereof; also including locomotive and portable engines, steam rollers, fire engines, and other machines in which the prime mover is not separable from the operative parts. Free.
- Machinery (and component parts thereof), meaning machines or sets of machines to be worked by electric, steam, water, fire or other power not being manual or animal labour, or which before being brought into use require to be fixed with reference to other moving parts; and including belting of all materials for driving machinery. Free.

Provided that the term does not include tools and implements to be worked by manual or animal labour, and provided also that only such articles shall be admitted as component parts of machinery as are indispensable for the working of the machinery and are, owing to their shape or to other special quality, not adapted for any other purpose.

NOTE.—Machinery and component parts thereof of substances other than metal are included in this entry.

- 15 Metals, unwrought and wrought, and articles made of metals—

	Wool, articles made of, including felt.....	<i>Ad valorem.</i>	5 p.c.
78	All other articles, manufactured or unmanufactured, not described in this Schedule.....	"	"

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, &c., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

Canadian Commercial Agents.

Australasia.....	J. S. Larke, The Exchange, Sydney, agent for New South Wales, Queensland and New Zealand.
	D. H. Ross, P.O. Box 140, Melbourne, agent for Victoria, South Australia, Western Australia and Tasmania.
China.....	H. J. Craig, 18 Szechuen Road, Shanghai.
France.....	A. Poindron, 101 Rue Réaumur, Paris.
Great Britain.....	P. B. Ball, Room 39 and 40, Central House, Birmingham.
	J. B. Jackson, cor. of E. Parade and Greek Street, Leeds, agent for Leeds and Hull.
	P. B. MacNamara, Canada Chambers, 36 Spring Gardens, Manchester.
	W. A. MacKinnon, Sun Buildings, Clare Street, Bristol.
Japan.....	Alex. MacLean, No. 14 Bund, Room B, Yokohama.
Mexico.....	A. W. Donly, Apartado 2029, Mexico, D.F., Mexico.
Newfoundland.....	E. D. Arnaud, Gazette Building, Water Street, St. John's.
Norway.....	C. E. Sontum, Grubbegd, No. 4, Christiania, Norway, agent for Denmark also.
South Africa.....	John A. Chesley, Rhodes Building, Cape Town, Cape Colony.
West Indies.....	G. Eustace Burke, Kingston, Jamaica.
	R. Bryson, St. John, Antigua, agent for Antigua, Montserrat and Dominica.
	S. L. Horsford, St. Kitts, agent for St. Kitts, Nevis and the Virgin Islands.
	Edgar Tripp, Port of Spain, Trinidad, agent for Trinidad and Tobago.
China, Japan and Corea.	W. T. R. Preston, Trade Commissioner.

Canadian High Commissioner's Office.

Great Britain.....	W. L. Griffith, Secretary, 17 Victoria Street, London, S.W., England. Harrison Watson, Canadian representative, City Trade Branch, 73 Basinghall Street, London, E.C., England.
--------------------	--

Canadian Immigration Agents.

Belgium.....	D. Tréau De Coeli, 29 Rue de Souci, Antwerp.
France.....	Paul Wiallard, 10 Rue de Rome, Paris.
Great Britain.....	J. Bruce Walker, Assistant Superintendent of Emigration, 11-12 Charing Cross, London, S.W.
	A. F. Jury, Old Castle Buildings. Preeson's Row, Liverpool.
	G. H. Mitchell, 43 Cannon Street, Birmingham.
	H. N. Murray, Exeter.
	L. Burnett, York.
	John Webster, 35-37 St. Enoch Square, Glasgow. John McLennan, Aberdeen. E. O'Kelly, 17-19 Victoria Street, Belfast.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA
AND TASMANIA.

(*Mr. D. H. Ross.*)

STOCK EXCHANGE BUILDING,
MELBOURNE, January 28, 1907.

PURE FOOD ACTS.

In Victoria—as well as in other states—the importation of foods is governed by Pure Food Acts, the administration of which is carried out by the various boards of health. Few of the pure food regulations have any bearing upon Australian imports from Canada. In regard to any particular article, full particulars can be obtained by Canadian shippers upon making application to the Superintendent of Commercial Agencies, Ottawa, to whom the Victorian Pure Food Act and regulations have been forwarded.

PRESERVATIVES PROHIBITED IN IMPORTED CHEESE.

According to the regulations recently enforced by the Victorian Department of Public Health under the state Pure Food Act, the conditions under which articles of food can be imported are clearly defined. In some instances a certain amount of preservatives and colouring matter are permissible, but even then the proportion of such additions must be clearly printed on a label attached to the package containing the goods. No preservative other than common salt is permitted in cheese.

The Victorian regulation dealing with cheese reads as follows: 'The addition to cheese, whole milk cheese, skim milk cheese and cream cheese of foreign fat, or of any preservative substance other than common salt, or of colouring substances, other than harmless vegetable colouring substance, is hereby prohibited.'

Canadian cheese in jars—for export to this great distance—is stated to have contained a small addition of preservatives, and importers doubt if it can be successfully carried without preservatives. Canadian cheese exporters have given the Australian trade every consideration, and it is regretted that the business has not proved remunerative, chiefly owing to the question of slow and indifferent transportation facilities.

AUSTRALIAN ONIONS.

The state of Victoria produces the bulk of the onions grown in Australia. Some early varieties are already on the market, and a few small shipments were made by the *Miowera*, which sailed on January 21 for Vancouver. Brown Spanish onions will be available a few weeks hence, and numerous inquiries have been received in Melbourne from Canadian produce importers for shipments to be made in February, March and April for points as far east as Winnipeg. Present indications point to a crop of between 20,000 and 25,000 tons in Victoria, of which some 5,000 tons have been sold for forward delivery.

AUSTRALIAN DRIED FRUITS.

Some three years ago, at my instance, samples of Victorian dried fruits to be forwarded to Vancouver and Winnipeg wholesale grocery houses, but the prices were not sufficiently attractive to cause business. The conditions promise to be better this year, as the growth of the fruit at the Mildura irrigation district is said to be phenomenal.

Early in April next it is estimated that there will be a large surplus of choice clean lexia raisins—packed in 56-lb. boxes—available for export at a f.o.b. Melbourne price of about ($2\frac{1}{8}$ to $2\frac{1}{4}$ d.) $4\frac{1}{4}$ to $4\frac{3}{8}$ cents per lb. Mildura fruit is well packed and much cleaner than European. Other lines, such as dried apricots, peaches and currants are being for the present absorbed locally, but at times Vancouver importers of dried fruits should find this market worth their attention.

AUSTRALIAN WOOL.

The demand at the regular sales in Melbourne, Sydney, Adelaide and Brisbane continues strong for all classes of Australian wool. The buyers are competing well for all suitable staple, and the influence of United States buyers is this season especially noticeable. A specially fine sample of scoured wool realized $24\frac{1}{2}$ d. (say 49 cents) per lb., which is a record for Victoria this year. The sales of Australian wool from July 1, 1905, to date are given as follows:—

	Bales.
Victoria	379,902
New South Wales.	486,646
South Australia	102,900
Queensland.	57,016
Total.	1,026,464

With the exception of some irregularity in comebacks and fine crossbreds, the market is firm, especially for merinoes. The latest Victorian sales realized from 10 to 15d. (20 to 30 cents) for greasy merino, $20\frac{1}{2}$ to $24\frac{1}{2}$ (41 to 49 cents) for scoured merino, and 12 to 15d. (24 to 30 cents) per lb. for greasy comeback and crossbred. Inferior qualities were sold at lesser rates.

AUSTRALIAN INVENTION FOR TREATING FLAX.

Monthly Report, July, 1906, page 99, contained a brief description of a new Australian process of treating flax which has aroused some interest in Canada and the United States. By this mail, I am sending samples of flax fibre to the Superintendent of Commercial Agencies, Ottawa, produced by the methods described. The fibre was obtained from flax that had given a fully ripened crop of seed—being then deemed worthless—but it is claimed that the Australian process of treatment restores to the fibre those qualities said to be deficient in seed bearing straws.

ADDITIONAL PARTICULARS REGARDING FLAX TREATMENT.

At the request of several correspondents, further details relative to the Melbourne process of treating flax fibre are sent herewith. Sheaves of straw are immersed in a hot neutral solution for about one hour, after which the flax is passed through rollers during which it is sprayed, by steam force, with a sepcial solution and then with clean water. The flax is then dried and the straws broken and scutched in the usual manner. Each bath holds about 336 lbs. of fibre, and the cost of the solution (here) does not exceed 48 cents. The same bath may be used repeatedly, thus reducing the cost of the operation. Frequent use of the same bath somewhat darkens the fibre, but for some purposes this is little or no detriment. The light fibre can be used for many purposes without further bleaching treatment, which is frequently an expensive process. It is claimed by the inventors that their process can be carried on continuously, independent of weather conditions, and also that the fibre is produced so cheaply that it will ultimately—to a great extent—take the place of other fibres after meeting the world's demand for linum flax. The registered number of the Canadian patent is 10194, and the holders of the patent are the inventors, Messrs. Rogers & Whitehead, Clarke street, South Melbourne.

POTATO GRADING MACHINES.

A prize of £50 was recently offered by the Victoria Department of Agriculture for a machine which would most effectively, cheaply and rapidly perform the work of grading potatoes and onions without bruising or damaging them, and which would leave each grade separated and ready for bagging. The trial took place in Melbourne, and a dozen machines were tried, with the result that the judges recommended that the prize should be withheld for the present and that the competition should be extended for a few months. The most successful results were obtained by local makers, but the machines were rather crude in construction, although several original ideas, capable of development, were introduced. Manufacturers of grading machines in Canada might be interested in this competition which, preferably, calls for a machine which would separate potatoes and onions into three grades, although this requirement is not absolutely essential.

CANADIAN CANNED SALMON.

The quality of last season's shipments of canned salmon from British Columbia has given every satisfaction to importers. Owing to the comparatively cool summer, the demand for salmon—and all kinds of canned fish—has been much below normal, and distributors carry large stocks. The approach of the lenten season is sure to stimulate the demand for all kinds of canned fish, especially for inland districts.

CANNED LOBSTERS.

Some Nova Scotian canned lobsters of the highest qualities are being sold in Australia against inferior (so called) lobsters from foreign sources of supply. This high class trade can only be developed to a certain point, and then only through the excellent representation which the line is receiving at this end by which every Australian city is exploited.

AUSTRALIAN EXPORTS TO VANCOUVER.

Evidence of the increasing trade between Australia and Vancouver was afforded by the booking of passengers and cargo by the R.M.S. *Miwera*, which sailed from Sydney on January 21. Considering the time of the year, the steamer had a fairly large passenger list, and her cargo space was largely occupied with shipments of lumber, jams, furs, skins, pelts frozen mutton, onions, butter and other products.

CANADIAN TRADE DIFFICULTIES.

In consequence of continued advances in the cost of raw materials—such as iron, steel and lumber—and the heavy domestic demand for all kinds of goods, the Australian agents of Canadian manufactures are experiencing much difficulty in securing orders. Each successive mail from Canada brings advices of higher prices being demanded by manufacturers in many lines, doubtless in sympathy with similar conditions prevailing in the United States. With a strong home demand, there is less disposition on the manufacturers' part to exert themselves in the export business, and Australian importers complain—and not without good reason—of the exceedingly slow deliveries of orders forwarded. In some lines of shelf hardware and other goods, orders from the Commonwealth are being diverted to Europe—particularly to Germany—with the view of lesser cost and much quicker deliveries. For the reasons given, I was last week made aware of the fact that a Canadian carriage factory had recently, by cable, declined an order for nearly 200 vehicles ordered by a Melbourne firm to be built to Australian specifications.

STEAMER FROM NEW YORK ON FIRE.

The steamer *Irish Monarch*, which sailed from New York on November 5, with a full cargo of United States and Canadian goods, for Melbourne, Sydney and New Zealand ports, arrived at this port with her cargo on fire. Considerable damage was done, and the salvaged cargo is now being sold by auction at Port Melbourne.

D. H. ROSS.

AUSTRALIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(Mr. J. S. Larke.)

THE EXCHANGE, SYDNEY, AUSTRALIA, January 29, 1907.

AUSTRALIAN RAILWAYS.

The aggregate mileage of the railways of Australia is 13,691 miles; New Zealand, 2,393. The extensions of the last three or four years have been relatively small. The average annual increase in New South Wales for the last three years has only been 293 miles, while that of Victoria has been 58 miles, that of Queensland 337 miles, and South Australia, Western Australia and Tasmania have added 9, 173, and 7 miles to their respective mileages. Railway construction in New South Wales, Victoria and West Australia is contemplated upon a larger scale than for some time. The capital expended upon roads of the several states is as follows:—

New South Wales.....	£ 43,626,063
Victoria.....	41,426,648
Queensland.....	22,200,838
South Australia	13,610,520
Western Australia	9,965,940
Tasmania	3,976,713
Total	£134,756,722

An aggregate increase for the last year of £1,028,883 is thus shown, while in New Zealand, during the same period, there was an increase of £1,088,381. The operations of the railways of 1905-6 return an unusually large surplus over the cost of management and interest upon the capital expended. The figures for the several states are:—

	Net Earnings.	Interest on Capital.	Net Result.	
	£	£	£	
N. S. Wales.....	1,926,407	1,541,427	384,980	Surplus.
Victoria.....	1,571,417	1,472,397	99,020	"
Queensland.....	682,727	881,414	198,687	Deficit.
S. Australia.....	585,380	474,955	110,425	Surplus.
W. Australia.....	432,691	348,467	84,224	"
Tasmania.....	68,587	142,793	74,206	Deficit.
Total.....	5,267,209	4,861,453	405,756	Surplus.

In 1904-5 there was an aggregate deficit on all the states railways of £401,509. In 1903-4 the deficit was £730,818. The gratifying improvement in the revenue is due to the increased prosperity of all the states, following upon the cessation of the drought and the extension of agriculture to what were pastoral districts.

PROSPECTS OF TRADE.

The rainfall for January, upon which so much depends, has been good. Sections that were suffering somewhat have had plentiful rains, and others sufficient for the immediate needs, with prospects of more to come. This practically ensures a good winter for stock, and will enable the farmers to prepare the land in good time for sowing their crops.

POPULATION OF NEW SOUTH WALES.

The population of New South Wales is now estimated at 1,530,940, which is an increase for the year of 34,890. This increase is due to excess of births over deaths of 25,895, and excess of arrivals over departures of 8,995.

TOO MANY COMMISSIONS.

In the majority of instances it is impossible for a Canadian manufacturer to secure a market in this country except by direct representative or a commission agent on the spot. It is possible, however, to pay too many commissions. When in Canada I agreed to find a representation for a manufacturer in this country and succeeded in doing so, but after some correspondence I was advised that the matter had been transferred to the head office in the United States, which had made an arrangement with a New York export firm. This export firm, I am now advised, not having a branch in Australia, arranged with an Australian house to handle the goods, but this Australian house has no equipment for selling these articles. It in turn has transferred the business to a commission man. The consequence is that there are three commissions to be paid, where at the outside there should be but one. So far no business has resulted, and there is some doubt if, under the circumstances, very much is likely to be done. In the close competition that prevails in the export trade, there are few lines of manufactures that will stand such a loading as this.

PRICES.

There is rather an increased demand for hops. Californians have been sold at 10d. per lb. in bond. It is probable that British Columbia has no spare hops, but the prices will give growers some indication of what might be realized in this market.

WOOL SALES AND SHEEP SKIN MARKET.

The wool sales have been characterised by firm prices for first-class wool, but rather weaker for inferior sorts.

The sheep skin market has been unchanged for some little time. The quotations at the last sales were: for merino three-quarters to full wools, 6½d. to 8¾d., exceptional lines sold at 9½d.; cross breeds, fine, 8¾d., coarse 7½d. The prices of hides have also undergone little change. Butchers hides, which are not those usually exported to Canada, are the only ones sold at last sales.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B., YOKOHAMA, February 15, 1907.

TRADE BETWEEN CANADA AND JAPAN.

From time to time, and upon the evidence available, I have had to account for the smallness and the seeming inactivity of export trade from Canada to Japan by the statement, in substance, that Canada was not yet prepared to figure largely in the Oriental trade. This statement, applicable to recent years, may now be further considered in respect of its applicability to the present time, and to the year now being entered upon.

ALBERTA WHEAT.

The fall wheat development in Alberta in 1905, greatly interested the market here. That crop, currently stated at 2,000,000 bushels, gave rise to expectations that came far short of being fully realized. Information received from Alberta official sources disclosed the chief reason why, by giving the actual quantity at 689,019 bushels, and describing the greater quantity as 'a newspaper estimate.' This less or actual quantity was mostly absorbed by the active home demand largely created by the influx of settlers who for a year or two cannot be self-supplying. In this way the quantity of flour available for export to the Orient, heretofore insufficient to attract the attention of this market, was but scantily, if at all, increased by the fall wheat crop of that year. Some specific quantities, however, did reach the Orient, and these gave the assurance that ultimately Western Canadian flour would become a capable competitor with that from the Western States. As to ultimate supply in this market from Canada, there needs to be no doubt now. The present question is as to what we may expect from the crop of 1906.

CANADIAN FLOUR TRADE IN JAPAN.

At the present time, fully four months after the close of harvest, no remarkable tendency to push Canadian flour towards this market has been discoverable. What is the reason? The answer to this question must be found in the correspondence of interested parties.

A broker, operating between Canada and the Orient, who is a valued correspondent of this office, under date November 29, says:—

'Flour.—It seems impossible to make any kind of a start in this season's business. I have cabled offers repeatedly to Kobe and Yokohama buyers, our people being particularly anxious for business, and to this end have made concessions, in price, in order to get things started, but the gist of all our replies goes to show that our prices will not compete. Our connections at Kobe have been making every effort to get our goods started, and while their customers readily admit the superiority of the quality of our brands, they complain that prices preclude business being done, in other than a limited way. This makes it not a question of supplies, for our millers claim to be prepared to accept orders for regular shipments, but one of price altogether.'

This is the general tenor of the commission merchants' complaint respecting this market. He is in a hurry, and it is this market that is at fault in that it does not rise

to his prices. Clearly the broker in Canada does not offer his goods at a low price here, because he can get a higher price at home or elsewhere. His assurances that he has quantity will not impress the market, unless he can conform to its prices. His price shows that whatever quantity he may have, he has no surplus that he is obliged to market here at prices that are acceptable to the exporter at Washington and Oregon ports.

PRICES OF FLOUR.

Another correspondent, interested in grain and flour, under date January 18, writes more reasonably as follows:—

‘The prices for flour are of course dependent on the grades. Canadian mills are quoting \$3.60 per bbl, c.i.f., Japan, but this price is likely to be raised almost immediately. Seattle and Sound mills are quoting from \$3.47½ to \$3.57½ per bbl. for their flour, which seems to suit the trade better as far as Chinese ports are concerned. At present Canada tributary to the Pacific is, as far as flour is concerned, in rather a backward condition. In order to compete successfully in Japan a certain grade of flour has to be ground, and to make same in any quantities it is necessary to make a large percentage of “Patent.” Excessive local competition make the sale of this “Patent” difficult, and in consequence the small mills at present situated tributary to the coast find themselves unable to keep running steadily, their trade being necessarily of a somewhat spasmodic nature.

When a firm with plenty of capital can get in here and build a large mill and run their own elevators so that they are able to export both wheat and flour, and can force their patent flour on to the local market so that mills from the east find it unprofitable to compete, they will in our opinion find a fine business accruing to them in the near future. They will be able to grind either hard or soft wheat and take full advantage of the larger production Alberta is expecting. We do not hide the fact that it needs capital, and patience for a year of two.’

LOW GRADE FLOUR WANTED.

This correspondent takes into account a point that is not generally thought of when referring to flour production. Canadian wheat is of a high degree of excellence; it therefore yields in the grinding a comparatively small percentage of low grade flour. This market takes mainly low grade flour; hence the small quantity of Canadian flour acceptable to this market, in proportion to the quantity of grain grown or the bulk of flour ground. The correspondent does not state the percentage of ‘Patent’ and lower grade flours that a given quantity of grain yields. No doubt something depends upon the degrees of quality in grain, but the percentage is placed somewhere between 60 and 70 of ‘Patent’ or best. This leaves only between 30 and 40 per cent of the grain to supply the two or three low grades suitable for sale here.

This will lead the interested reader to the reflection that when a comparatively small quantity of wheat is grown, and only between thirty and forty per cent of the flour which it produces is available at a price acceptable to this market, assuming that it were all ready to come here, it would be a light factor in competition with the cargo quantities constantly ready for delivery at Washington and Oregon ports. But even of that limited percentage of low grade flour, only a small proportion is seriously offered here, since the quotations persistently rule higher than those of similar grades from the American Pacific ports.

THE OUTLOOK PROMISING.

It is not necessary to burden a report, which has limitations as to space, with quotations from correspondence and from other sources to the effect that the flour export capacity of British Columbia and Alberta is yet in its infancy. The informa-

tion I have, from those interested, indicates that they are getting ready. Some are building mills, or enlarging old ones. And others are building elevators at the railway points to receive the grain from the farmers. But the whole tenor of this is inconsistent with the present readiness in quantity and facilities which, the commission operators complain, is not responded to in the Japanese market.

With all this lack of sufficient readiness to offer acceptable business to this market, it is most unfair to place the default here, in face of the fact that there was last year a sensible increase in the importation of flour from Canada, and that that increase was simply the immediate response of this market to the small but significant increase of wheat recently grown in Alberta.

At this date of writing I am informed by firms who have made inquiry for supplies, which would be on a large scale if the demand could be met, that in both wheat and flour the prices asked by Canada do not admit of present business. The opportunity, however, fortunately, offers one exception just in time to mention it, a leading importing house having received acceptable quotations in wheat, from a Canadian firm, which on this side will involve a large deal, if on the other side the circumstances are equal.

There is reason to expect that this market will take up Alberta and British Columbia wheat and flour as rapidly as the increase of production will furnish it. But necessarily it must compete with wheat and flour from the United States. Should Canadian prices continue, as heretofore, above the competing level, the obvious implication will be that Canada, even to the Pacific, fortunately has a better market than this.

WHEAT MARKET IN JAPAN.

There is a marked revival of interest in wheat since the tariff increase upon flour. And right along with it comes the relative difficulties in the way of importation from Canada. The lack of elevator facilities at the coast is given by the trade here as a ground of uncertainty in shipping. Then there is doubt about the transportation facilities. Grain must come, if at all, in some approach to cargo quantities, and the export point must be Vancouver. The only regular liners available at that port are Canadian Pacific steamships. The rapid service of the *Empress* boats cuts the time in port too short to admit of grain cargo to way ports. This leaves the grain carrying to the smaller *Tartar*, and *Athenian*, with the *Monteagle* at present temporarily off the route. Therefore the merchants who are inquiring into wheat importation from Canada are at the outset impressed with an unreadiness in the matter of facilities, as well as in that of price, for export to this country.

CONDENSED MILK.

Since the adverse tariff, formerly prohibitory upon Canadian condensed milk, has been reduced to the level of that enjoyed by competing countries, Canadian manufacturers should take this field largely to themselves. Amongst the many and varied new enterprises cropping up in this country of late, none has proposed to undertake the manufacture of condensed milk. Vernacular contemporaries say that Mr. Ogawa, a wealthy farmer at Tanakamura, Shizuoka Prefecture, noting the increasing demand for condensed milk in Japan, which demand is at present supplied mainly by the 'Eagle,' 'Golden Shield' and 'Nestle' brands, and ascertaining that there is only one establishment in Japan which is engaged in manufacturing condensed milk (and that only on a small scale), decided to start the business. He visited America for the purpose of studying the process of manufacture, but failed to learn anything, as the details were kept from him. He again visited America in company with an expert official from the Department of Agriculture and Commerce, and not only succeeded in learning the process, but returned with machinery and plant of the latest type. He is now establishing a factory at his village.

TRADE SOURCES OF JAPAN.

The export and import trade, classified as to the various countries concerned, is as follows :—

Exports to	1906.	1905.
	Yen.	Yen.
Korea.....	24,729,000	26,619,000
China.....	121,091,000	98,682,000

ANNUAL RETURNS OF FOREIGN TRADE.

The following is a comparative statement of the value of some of the principal items of export and import between Canada and Japan, as shown by the Monthly Returns, for the year ending December 31.

<i>Export to Canada.</i>	1906.	1905.
Silk (raw).....	\$406,516	\$ 40,373
Silk tissues, habutae.....	303,987	216,764
Silk tissues, kaiki (including cotton mixture) ...	10,925	28,738
Silk handkerchiefs.....	140,394	220,451
Cotton tissues.....	4,532	4,303
Mats and mattings for floor (Hanagoza).....	41,493	64,045
Porcelain and earthenware.....	97,838	92,235
Lacquered ware.....	10,606	10,110
Straw-plaits.....	1,776	3,462
Rice.....	144,025	120,409
Camphor.....	6,951	10,244
Tea.....	454,664	449,336
<i>Import from Canada.</i>		
Flour.....	81,821	52,054

The 'principal items' given in the Monthly Return number only twenty-four of imports and twenty-five of exports. For information respecting the lesser and numerous items making up the aggregate of trade the Annual Return has to be awaited.

IMPORTING AUSTRALIAN MEAT.

Representatives of the Teikoku Cold Storage Company at Osaka are said by the current news to have entered into a contract with the representatives of the Australian Meat Companies' Trust covering the sole agency for the sale of their meat in this country. The intention is to import Australian mutton, beef, &c., in cargo or part cargo quantities, and keep it in cold storage for distribution as the market may call for it. The 'average' price delivered, subject to customs duty, is stated at 3½d. stg. per lb. At this cost it will afford a handsome profit to the trade here, where Australian mutton, choice parts, now retails in the meat shops at 35 and 36 yen, or say 18 cents gold, per lb. The Teikoku or Imperial Cold Storage Company, with a capital of 3,000,000 yen and headquarters at Osaka, proposes to establish branches at Tokyo, Yokohama, and other large centres, their business being general cold storage and the manufacture of ice. This cold storage importation of meat from Australia had its origin in a revolt against the high retail prices charged by the butchers, the Kobe meat club leading the way.

It may be thought that the live stock growers and dealers of British Columbia and Alberta should be as ready and as enterprising as those of Australia, being over two thousand miles nearer, and that they would be contesting the ground with their Antipodean rivals; but they are yet to be heard from.

THE TOKYO EXHIBITION.

It is announced that the opening ceremony will take place on March 20 on the exhibition ground. Over 17,000 prominent persons will be invited to the ceremony, after which a garden party will be held. The exhibition will continue until the corresponding date in July.

THE WEALTH OF JAPAN.

According to the financial department the wealth of Japan in 1906 was estimated as follows:

	Yen.
Land.	6,023,771,000
Buildings.	1,962,363,000
Furniture.	976,300,000
Railways.	283,127,000
Merchandise.	289,855,000
Mineral materials.	58,578,000
Sundries.	3,946,813

Note.—1 yen equals 50 cents.

IMPORTATION OF THOROUGHBREDS.

The officers of the Government Bureau for Horse Improvement have recently brought home ten English thoroughbred horses, to be used as breeders. They are valued from 3,000 to 10,000 yen each. Seven of them will be taken by the Horse Administration Bureau, two by the Kagoshima stud, and one by the Iwate stud. Shortly before this, other lots of this class of horse arrived, some from the continent of Europe, and some from the United States.

ALEX. MACLEAN.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. E. Sontum.*)

CHRISTIANIA, NORWAY, March 1, 1907.

INTERNATIONAL EXHIBITION OF TRADE PAPERS AT COPENHAGEN.

An international exhibition of trade-papers and periodicals is to be held at Copenhagen from May to June this year. The exhibition will be divided in two classes, viz:—

1. Trade-papers, embracing the following groups: Architecture, manufacturing, finance, fisheries, insurance, industries, technics, engineering, handicraft, commerce, harbour affairs, farming, law, forestry, navigation, traffic, mail, custom affairs and science.

2. Periodicals, embracing the following groups: Philanthropy, social questions, home industries, church affairs, women's suffrage, literature, military affairs, fashions, music and theatre, official publications, school affairs, sport and tourist affairs and entertainment.

BEER IN DRY STATE.

A Danish engineer by the name of Maardt is reported to have succeeded in producing a beer-pulp with a very small water contents, and therefrom makes beer bricks, which contain the very same elements in the same proportions as is contained in the Danish white beer. The bricks, which are brown in colour, will keep for almost any length of time. They may therefore be exported to all parts of the world.

When beer is to be made, the bricks are wrapped in a piece of sheeting and put into a vessel with water at the boiling point. With a small part of the pulp is dissolved a little yeast, which thereafter is poured into the vessel, the whole is put away for 48 hours, when one will have the most excellent beer. The yeast will cause possible impurities to be rinsed away and at the same time creates a layer of carbonic acid over the beer, which makes it remain sterile. If the beer thus produced is bottled and well corked it will keep for two or three months even in the warmest summer time.

Also Bavarian beer may be prepared in this manner, the process then being a little different. A patent on the invention is applied for.

WOOD-PULP.

The Norwegian trade paper, *Farmand*, writes under February 23, about the present situation of the wood-pulp market: The percentage of this year's production of mechanical wood-pulp in Norway and Sweden which is unsold, is quite exceptionally small, and the market is very firm in consequence. One of the big pulp-dealers had to pay some days ago Kr. 34.00 (\$9.07) net, f.o.b. for a parcel of 300 tons to complete a cargo. Makers are now mentioning Kr. 34.00 to 35.00 (\$9.07 to \$9.33) as their idea of price. The consumers being unaccustomed to this level, are trying to hold back,

It would not surprise us if makers were this year to be approached with regard to contracts for delivery over 1907 much earlier than usual. Our impression is, that makers would be well advised, if, under the conditions actually prevailing in their market, they were to refuse to entertain such proposals, until the autumn is well advanced. If they are to get a decent profit on their production from logs purchased this winter, the level of value must be at least Kr. 35.00 to 36.00 (\$9.33 to \$9.60) net, f.o.b. per ton stavepacked, and the statistic position fully warrants such a level.

THE WOOD TRADE.

The relative position of Norway and Sweden as exporters of floorings will be seen from the following figures, which are cubic metres:—

Year.	Norway,	Sweden.	Total for both Countries
1906.	640,782	544,263	1,185,045
1905.	558,670	586,705	1,145,375

The falling off in Swedish shipments of floorings is fully explained by the large increase in the shipments of sawn wood from 3,959,678 cubic metres in 1905 to 4,200,928 cubic metres in 1906. The Swedish mills obtained in 1906 so splendid prices for their battens, &c., that it did not pay for them to go to the trouble of planing so much as in previous years. The Norwegian export of sawn wood, on the other hand, only increased from 588,310 cubic metres in 1905 to 606,395 cubic metres in 1906.

C. E. SONTUM.

SOUTH AFRICA.

REPORT OF ACTING COMMERCIAL AGENT.

(*Mr. W. T. R. Preston.*)

RHODES BUILDINGS, CAPE TOWN,

P.O. Box 668,

February 16, 1907.

DUTY ON CATALOGUES.

My attention has been directed, principally by those handling agricultural machinery, that Canadian manufacturers frequently send to this country, charges prepaid, packages of catalogues and printed matter for distribution by the agencies or firms handling their goods. In almost all cases these various kinds of printed matter are not put through the Customs. This is due to the fact that the duty on printed matter coming into the Customs Union of South Africa is charged at the rate of 2d. per lb. Notwithstanding the fact that in many cases the printed matter in question, on account of its excellent character, does not enter into competition with the South African printing offices. But the agents have informed me that they cannot go to the expense of paying this enormous duty for the pamphlets in question.

QUOTATIONS FOR BOXES.

An application has been received at this office for quotations for the supply of boxes to the extent of 35,000 to 50,000 per month, firms quoting must be prepared to compete against Norwegian and Swedish manufacturers. The sizes of the boxes are as follows: 13 in. x 9 in x 8 in., 16½ in. x 8½ in. x 9¾ in., 13 in. x 10½ in. x 8¾ in., 13 in. x 9½ in. x 8½ in.

The communication is from the New Zealand Transvaal Chemical Company, Limited, P.O. Box 1829, Johannesburg.

FOREIGN REPRESENTATIVES IN SOUTH AFRICA.

Nearly all the Canadian manufacturers of agricultural implements believe that it is only necessary for them to send circulars and prints of their implements in order to introduce them into South Africa. On the other hand, during a recent journey to Bloomfontein, Durban and East London, I came across practical representatives of German and United States agricultural implements manufacturers, who were engaged in personally explaining the advantages and conveniences of the implements which they were endeavouring to sell. This places the Canadian manufacturers of agricultural implements at a disadvantage.

I do not know that it is necessary to enlarge upon the subject matter other than to say, that if Canadian manufacturers of agricultural implements desire to see their goods introduced into South Africa they must make arrangements for an occasional visit to this country of practical and experienced machinists or commissioners to assist in presenting to the farming population of this country the advantages claimed for their respective implements.

The introduction of modern agricultural machinery into South Africa is in its infancy. Representatives of German and United States manufacturers see the importance of having expert canvassers to personally interview prospective purchasers. Under these circumstances they will certainly gain not only temporary but a permanent advantage over Canadian competitors. I am quite assured that there will be during the next few years a very extensive demand for modern agricultural machinery here.

W. T. R. PRESTON.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(*Mr. W. A. MacKinnon.*)

SUN BUILDING, CLARKE ST., BRISTOL, ENG.,
February 28, 1907.

THE CHEESE MARKET.

A recent report on the cheese situation is as follows:—

‘The present remarkable condition of the cheese market is of serious importance to the middle and working classes. Prices have been rising in the wholesale market for some months; the open market is nearly bare of supplies; the limited stocks that are warehoused belong to a few large speculators; many retail shops cannot supply their requirements, and there are warnings that the retail price per pound may go up another penny during this month.’

THE PRICE OF CHEESE.

A fortnight ago there were only 108,000 boxes of cheese in London public warehouses, equal to about four weeks’ supply. One of the largest wholesale firms expressed an opinion that before March the first quotations would reach 70s. per cwt. That this estimate was not very far wrong is shown by to-day’s market report in the *Times*, which states that ‘the quotation for Canadian generally ranges from 67s. to 68s., and a possibility of a further advance is being discussed, owing to the comparatively reduced stocks to cope with consumption the next two months.’

CHEESE IN STOCK.

On February 1, 1905, there were 316,000 boxes of Canadian cheese in stock in London, Liverpool and Bristol; the current market price was then 53s. per cwt. On February 1, this year, the corresponding stock was 313,000 boxes, and the current market price was 6s. 5d. The rise was equal to £12 per ton, making a difference to the public in retail shops of 1½d. per pound.

CAUSES OF SCARCITY.

A London journal suggests the four following causes as having operated to bring about the present short supply:—

1. The exceptionally fine summer, which produced greatly increased consumption.
2. The tinned meat scare, which drove thousands of households to substitute cheese.
3. The year's improved trade, which enlarged the buying powers of the workers.
4. The operations of a couple of very large firms which have practically 'cornered' the present warehoused supplies.

THE MARKING OF PACKAGES.

My attention has been called to a recent consignment of Canadian eggs, which arrived in Bristol with absolutely no marks on the packages beyond the number '40.' Insufficient marking causes great inconvenience and annoyance to all who have to handle such goods, but what I wish to bring particularly to the notice of exporters is the fact that by not fully marking their goods they lose a most excellent free advertisement. The firm which shipped these eggs might just as well have had their full name and address advertised in every town and in every store to which even a single case might find its way.

W. A. MacKINNON.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. MacNamara.*)

STOCK OF PROVISIONS AT LIVERPOOL.

MANCHESTER, March 2, 1907.

Estimate of the stock of provisions, &c., in the Port of Liverpool, on February 28, 1907, together with the figures at the corresponding date last year, and also of last month:—

	Feb. 28, 1907.	Jan. 31, 1907.	Feb. 28, 1906.
Bacon Boxes.	17,587	12,260	16,356
Hams "	5,639	3,222	5,049
Shoulders "	2,182	310	2,025
Butter Cwts.	8,222	8,474	6,417
Cheese Boxes.	75,225	77,774	60,895
Lard (prime steam western) . Tierces.	3,104	2,597	3,647
Lard (imported pure refined lard), in tierces, firkins, or other packages. Tons	1,197	871	1,951
Lardine and compound Tons.	80	43	186

P. B. MacNAMARA.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(*Mr. J. S. Larke.*)

THE ROYAL EXCHANGE, SYDNEY, AUSTRALIA, February 18, 1907.

TRADE OF NEW SOUTH WALES.

The trade of the state of New South Wales for the year 1906 has been published by the statistical department of the state. Taking the returns for a series of years, beginning with 1902, they show a remarkable development:—

	Imports.	Exports.
1902..	£15,024,535	£15,975,129
1903..	13,977,917	18,861,213
1904..	13,133,857	23,089,785
1905..	14,485,123	24,493,530
1906..	19,434,201	31,018,274

This trade does not include the inter-state trade, which is also given, and shows great increases. The imports show an increase in the five years of four and a half million pounds, but the exports were doubled. The exports of 1902 were below the average of five previous years, but were above those of 1896, in spite of the destruction of crops and stock. For the month of January the trade has still maintained its development, being for the month:—

Imports..	£1,560,746
as against..	1,093,356 for January, 1906.
Exports..	3,486,107
as against..	2,568,357 for January, 1906.

an increase of £917,750 for the month. On this basis, the surplus of exports over imports for 1907 will amount to the eleven and a half million pounds which was the surplus of 1906.

The exports show increases in all the great lines of pastoral and agricultural products and minerals, with the exception of lead and silver-lead, which show a very trifling decrease. The prices of these leading products are well maintained and there appears to be a much larger proportion of the crop of wool and of wheat to come to the market this year than was the case last year.

The month of January has been characterized by, on the whole, excellent rains, and though the weather has been erratic, it has not affected disadvantageously any crops. The prospects for the year still continue to be as fair as they were at the beginning.

NEW ZEALAND.

The prosperous condition of affairs in New Zealand is unchanged. As indicating the conditions, the Post Office Savings Bank received over one million pounds of deposits more than withdrawals during the past year. The deposits in the banks increased by nearly a million and a half at the same time. The advances of the banks to their customers increased in the year from £16,217,944 to £17,748,923, an increase of over a million and a half in the twelve months. The revenues of the state have also swelled, and the probabilities are that for the twelve months there will be a surplus of nearly a million sterling. Trade is reported to be a little quiet, but this is usual at

this time of the year. The prospects for the year are very good, as there has been during the first month of the year an increase of the exports of the primary products of the islands.

MINERAL PRODUCTION.

The value of the mineral production for 1905 for Australia is given as £24,922,232 and of New Zealand as £3,622,786. The following table is the production of the several states and New Zealand for that year:—

State.	Gold.	Silver and Silver-lead	Copper.	Tin.	Coal.	Other Minerals.	Totals.
	£	£	£	£	£	£	£
New South Wales.	1,165,013	2,494,052	527,403	226,110	2,003,461	481,042	6,897,081
Victoria.	3,173,744	4,100	11,159	79,000	93,392	3,361,455
Queensland.	2,517,295	69,176	503,547	297,454	155,477	183,326	3,726,275
South Australia.	85,555	3,110	470,324	21,972	71,590	652,551
West Australia.	8,305,054	44,278	16,266	86,840	55,312	47,491	8,555,841
Tasmania.	312,380	246,888	757,226	362,670	44,194	5,771	1,729,129
Commonwealth.	15,559,641	2,861,704	2,274,766	1,006,205	2,337,504	882,612	24,922,332
New Zealand.	2,093,936	120,542	17	838,531	569,760	3,622,786
Australasia.	17,653,577	2,982,146	2,274,783	1,006,205	3,176,035	1,452,372	28,545,118

The increase in the production of minerals is remarkable when it is remembered that gold, which constitutes a good deal more than half of the total production, has been mined for over fifty years, and though it shows a diminution in some of the states, yet taken as a whole last year shows a greater yield than in any previous year, and is more than double that of ten years ago. Recent finds in Victoria indicate that these resources have not been exhausted in the older states, and the probability is of rich finds in Western Australia. The number of men employed in this mineral production was not given for last year, but the probability is that at least 140,000 were thus occupied. While the quantity of minerals produced is increasing the returns per head employed is diminishing. Mining is becoming a settled industry in which the great mass of workers are employees of the firms. More and more the industry requires capital for its development. The return per head is, however, greater than it was fifteen or twenty years ago.

FOREIGN INDEBTEDNESS DIMINISHING.

As a result of this increase in the primary productions and the prosperity which Australia and New Zealand are now enjoying, the indebtedness of Australasia to British investors is steadily diminishing. Though the debts of the states have increased, the amount held in Britain is less by over four million sterling than three years ago, and it is estimated that while ten years ago over three-fourths of the loans and investments in public companies which drew their remuneration from Australia and New Zealand were the property of British investors, the proportion has now been reduced to one-third. The foreign indebtedness is still very large, amounting to about three hundred and seventy millions sterling, requiring sixteen million pounds per annum to meet the interest upon the public and private borrowing. Since 1903 the surplus of exports over imports, as shown by the trade returns, enables Australia to meet the interest and to secure an average of nearly five million pounds per annum to reduce its liabilities.

TRADE INQUIRIES.

As a result of securing an examination of the catalogues of manufacturers forwarded to me, the last mail carried some two hundred letters of inquiries, with a view to direct trade between Canadian manufacturers and Australian buyers. The present mail carries also a very considerable number. I have been advised of some fifty, but other firms have also written without informing me to whom their inquiries have been sent. Some of these inquiries are from business firms in the larger towns of the interior, who directly import to meet a large share of their requirements. If the Canadian manufacturers can meet the conditions of the trade, there should be some extension of Canadian exports here.

MAILS.

It is to be regretted that the delays in the mails by the San Francisco steamers have increased in both number and extent. In the past they were chiefly due to one steamer, and it was trusted that the overhaul which the fleet received in Sydney would enable them to keep time. Unfortunately this has not proven to be the case. The *Ventura*, which is now thirty-two days out, has not yet arrived at this port. Under ordinary circumstances, the letters by her would have had answers conveyed by the *Aorangi*, which carries this report, but it is now uncertain when replies will go forward.

EUCALYPTUS.

In Monthly Report, November, 1906. p. 809, I referred to certain varieties of the gum trees of Australia for vehicle timbers. Some United States papers have recently called attention to the value of these woods, and some statements have been made which are of doubtful correctness. It might be concluded that these timbers would grow in Canada and grow very much more rapidly and still preserve their qualities of strength, hardness and toughness. There are certain varieties of these trees which, undoubtedly, would grow where the peach tree flourishes or even where the climate is a little severe, but the Spotted Gum and the Ironbark are not likely to endure any climate so severe as Canada, and these are the two varieties desirable for vehicle construction. No doubt if they withstood the climate they would grow faster in the good soil and moist climate of Canada than they do where found in Australia, but it would be found that the quicker growth would mean a deterioration in the quality of the timber. It has been so found in New Zealand. It is absurd, therefore, to expect what some United States papers have contended that 'they will produce as good timber in twenty years as the oak does in two hundred.' The timbers, under the conditions of Australian growth, are exceedingly valuable, but it is doubtful if the quality could be reproduced in Canada, though it is possible that they would grow along the coast of southern British Columbia or Vancouver island, and perhaps in Southern Ontario.

FISH CURING.

Some time ago a system of preserving fish was patented in Australia, Great Britain and the United States, but no protection was taken out in Canada. A short time ago the Fisheries Department of this state made an investigation into its merits, and the experts of the department believe the process to be one of considerable value. It is exceedingly simple and not expensive. The fish are immersed in a tank, through which a stream of salt water, which has percolated through bone charcoal, is kept in circulation. At the one end of the tank is the reservoir of bone charcoal through which the water filters, and at the other end the water passes out through a series of sponges and sand, which collects the mucus of the fish and enables the water to

be re-used. In Sydney the salt water used was water from the ocean. The fish lie in the tank five or six hours. The process is described in the United States patents, which can easily be obtained in Canada. It is not claimed that this process alone will preserve the fish for any length of time. Cool storage in addition is required, but the fish do not require to be frozen, hence the cells of the flesh are not burst and the full flavour of the fish is retained. A test of fish which have been preserved in cool storage in this way for several days has been made by the fisheries experts, who assert that the flavour cannot be discerned from fish that had been freshly caught. Canadian fishermen can make an experiment, which would not be costly, and thus satisfy themselves of the value of the process.

J. S. LARKE.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. MacNamara.*)

CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., March 15, 1907.

FLOUR IMPORTS INTO GREAT BRITAIN.

The flour imports of Great Britain for the years 1905 and 1906 taken from the Trade and Navigation returns shows that Canada holds second place, and while all the great flour exporting countries except one show diminished exports to Great Britain in 1906, as compared with 1905, Canada's exports have increased thirty-three per cent. There is an enormous opportunity for increasing the shipments of flour to this country by catering to the quality required in the different sections, and no reason exists, that the leading country in exporting flour should not be shorn of part of its great trade, if Canadian millers will only study the situation. This is all the more necessary as it is said the western millers will in the near future meet a vigorous competitor for the supply of flour to the Orient in the Japanese, as the development of the flour-making industry in Japan is increasing rapidly, and that within six months native millers will be producing all the flour wanted.

PRICES OF FLOUR.

The price of flour fluctuates but little, the ruling prices at present, as obtained from a prominent firm, being for 280 pounds first patents, 23s. 6d. and for XX, 20s. 6d. The latter quality is in greater demand at this time, as bakers have reduced the price of bread, and are using a cheaper flour, and in consequence the best patents are not in such great demand, as a reduction of $\frac{1}{2}$ d. per 4-pound loaf means 4s. on a 280 pound sack of flour. The quality required in Manchester is really a special article, the bakers as a rule are experts in bread-making and judges of flour, and no substitution can be practised upon them, for it is recognized by the trade that Manchester is the most critical market in Great Britain. The annual output of British flour mills is stated to be 30,000,000 sacks.

GREAT BRITAIN'S FLOUR IMPORTS.

BALED HAY.

From the best information obtainable there is a glut in the market at the present, due chiefly to continental shipments and local supply, and in consequence prices are expected to rule lower for the Canadian imported article. The advent of motor carriages has had a depressing effect, and it is stated that the dealers are experiencing very diminished trade.

The quality best esteemed is timothy and clover mixed, pressed in the usual Canadian bale, which gives every satisfaction, and in this connection it is important that special care should be taken in pressing hay for export, as it is apt to be brought into disrepute, if proper watchfulness over the packers is not exercised. There is very little Canadian hay in stock and not much being offered. Prices realized at Liverpool last week were 85s. to 87s. 6d. per ton for best timothy and clover mixed.

STEAMSHIP FACILITIES.

The steamship *Manchester Importer* of the Manchester Liners, Limited, reached this port last week with a record cargo of Canadian manufactures and produce. She also made a record in the matter of discharging and again loading for St. John, both operations being completed within a week. This steamship company affords the Canadian public a bi-weekly service from St. John and Halifax to Manchester in the winter, and during the summer season a ten-days' service from Montreal and Quebec. Manchester being the centre of a very much congested population it offers the best distributing facilities in Great Britain.

SMOKELESS COAL.

Considerable publicity is given by the local press to a reported invention for depriving soft coal of its most objectionable feature, smoke, by abstracting the oils said to produce it, and calling the resulting article coalite, which is something-like coke in appearance, but bulkier and of far greater and purer combustion, and which can be furnished at one-third the present cost of coal. It is stated that the King has seen its properties tested with a professor at hand. The shares of the company controlling the scheme have advanced from £1 to £30, but neither the material nor the shares are in the market. The presumption is that the by-product is of great value, but of what nature is not divulged. Five acres of land near Manchester have been purchased, and large works will be erected shortly for its production.

APPLES AT LIVERPOOL.

Messrs. Woodall & Co. report under date of March 2, 1907, that the arrivals for five weeks preceding were 151,635 barrels and 18,397 boxes. Total receipts to date 935,578 barrels, as against same period last year of 865,648 barrels, boxes computed at three to a barrel. A larger proportion than usual of Maine fruit has arrived in a doubtful and wasty condition. This state is not attributed to the effects of frost, but to an inherent weakness. Canadians are reported short of size and in many cases quality, spies especially being scarce, inferior and tender, while most greenings are scalded.

The following prices were obtained:—

Canadian.

	Firsts.		Seconds and Slack.	
Baldwins.	18s.	to 25s. 6d.	12s.	to 18s. 6d.
Russetts.	19s.	to 26s. 6d.	13s. 6d.	to 16s.
Davis.	16s. 9d.	to 20s.	13s.	to 15s.
Spy.	17s.	to 21s.	10s. 6d.	to 17s.
Stark.	18s.	to 18s. 9d.		

Nova Scotian.

Baldwins.	13s.	to 15s. 3d.	11s. 9d.	to 12s.
Davis.	14s.	to 14s. 6d.	12s.	to 12s. 3d.

BRITISH TRADE RETURNS.

The Board of Trade returns for February which were issued recently, show that the whole trade of the United Kingdom is still flourishing. The imports for the month were £52,927,347, an increase of £5,440,094 on last year, and the exports £32,073,345, as against £23,771,123.

P. B. MACNAMARA.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(Mr. E. D. Arnaud.)

GAZETTE BUILDING, ST. JOHN'S, March 19, 1907.

The Budget Speech of the Finance Minister for Newfoundland which was delivered on 15th inst., contains much information that will no doubt prove of considerable interest to Canadians.

The Customs Revenue for 1905-1906 was \$2,335,238, an increase of \$39,278 over the previous year. The imports and exports for the fiscal year 1905-1906 were \$10,414,274 and \$12,086,276 respectively. Both show fair increases over the previous year. The balance of trade in favour of the Colony for the past seven years has been \$8,821,587.

PRINCIPAL COMMODITIES EXPORTED.

The principal commodities exported during the fiscal year 1905-6 were as follows:—

	Quantity.	Value.
Dried cod (quintals*).. . . .	\$ 1,481,025	\$ 7,864,719
Seal skins (No.).. . . .	283,400	314,048
Seal oil (tuns).. . . .	3,741	297,430
Herring, pickled (brls.).. . . .	66,716	208,264
Herring, frozen and bulk (brls.).. . .	79,314	135,601
Lobsters (cases of).. . . .	31,328	376,490
Salmon, pickled (tierces).. . . .	4,924	88,005
Salmon, fresh (lbs.).. . . .	251,156	17,931
Whale oil (tuns).. . . .	3,780	222,761
Whalebone..	27,140
Lumber (ft.).. . . .	13,404,000	176,157
Iron (tons).. . . .	768,430	768,430
Copper.. . . .	71,054	375,520
Pyrites.. . . .	53,974	334,075
Slate.. . . .	3,262	38,163

The estimated value of the output of the local factories is placed at over \$2,000,000. The revenue for the year ended June 30, 1906, is put down at \$2,660,805.29, and the expenditure as \$2,591,235.50, leaving a surplus of \$69,569.79.

PUBLIC DEBT.

The gross public debt on June 30, 1906, was \$22,705,508.33, and net debt of \$21,249,989.42 with a reserve fund of \$450,000. At the end of May, 1906, the deposits in the Colonial Savings Banks are stated to be \$2,000,000, while those in the three Canadian Chartered Banks are put down at \$4,500,000. The total estimated savings of the people are given at 10½ millions, which indicates pretty fairly the prosperous condition of the people as a whole.

* Average value per quintal was \$5.31, the highest for the past 10 years.

TARIFF CHARGES.

In order to provide against the dumping of foreign goods into Newfoundland, and to protect the revenue as well as the local manufacturers, the following duties are to be made specific instead of ad valorem:

Cut and pressed nails.	1 cent per pound.
Shoe brads and tacks.	$\frac{1}{2}$ "
Galvanized nails.	$\frac{1}{3}$ "

Packages containing these goods will also be subject to duty.

The duty on soda and fancy biscuits is to be reduced from 3 cents to $1\frac{1}{2}$ cents per pound, the government having reason to believe that the price has been unduly raised in consequence of the formation of a trust by the local biscuit makers.

BANK TAX.

It is proposed to place the following special tax upon the Canadian banks now doing business here:

Bank of Montreal.	\$5,000
Bank of Nova Scotia.	3,000
Royal Bank of Canada.	2,000

This is to be in addition to the tax they already pay to the city of St. John's for municipal purposes.

INSURANCE COMPANY TAX.

Accident insurance and guarantee companies are to pay \$50 a year each, and become subject to the control of the Finance Minister, while express companies are to render annual returns to the minister of the amount of money they bring into or send out of the colony.

SEAL FISHERY.

On the 11th inst., twenty-three steamers left this port having on board 3,831 men to prosecute the sealing on the ice-fields off this coast. Until the return of the first of these vessels to port it is not likely that any reliable information will be had as to the success or otherwise of this industry. It is estimated that at least a million and a half dollars are invested in the steamers and their outfit. Last year the vessels brought back 341,836 sealskins, valued at \$607,544.

E. D. ARNAUD.

GENERAL COMMERCIAL INFORMATION

IMPORTS OF PRINCIPAL FOODSTUFFS INTO GREAT BRITAIN.

QUANTITIES of Butter, Cheese, Bacon, Hams, Fish and Eggs, Imported into Great Britain during the *months* of February and the *twelve months* ended February 28, in the Years 1905, 1906 and 1907. (*From British Returns.*)

NOTE—'Special' means in the case of Imports, 'Imports for Home Consumption,' in case of Exports, 'Exports of Domestic Produce and Manufacture.'

αThe figures for Mexico include coin and bullion.

*Figures are for the years 1904, 1905 and 1906.

NEW TARIFFS.

During the month under review there have been distributed from this Department to all the principal Custom-houses and Boards of Trade throughout the Dominion, copies of all foreign and colonial tariffs and supplements thereto, as furnished during that period by the International Tariff Bureau, which are always available for reference by those interested therein, resident at the principal centres of trade. The following British and Colonial are supplemental to those published in the departmental annual report, 1893, and the quarterly and monthly reports since published, and comprise all additions thereto or changes therein, so far as the department has authentic advice.

CANADA.

THE CUSTOMS TARIFF, 1907.

AN ACT RESPECTING THE DUTIES OF CUSTOMS.

HIS Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:—

1. This Act may be cited as *The Customs Tariff*, 1907.

2. In this Act, and in any other Act relating to the customs, unless the context otherwise requires,—

- (a) 'M. ft.' represents and has the meaning of the words 'one thousand feet board measure.'
- (b) 'n.o.p.' represents and has the meaning of the words 'not otherwise provided for'
- (c) 'gallon' means an Imperial gallon;
- (d) 'ton' means two thousand pounds avoirdupois;
- (e) 'proof,' 'proof spirit' or 'proof spirits,' when applied to wines or spirits of any kind, means spirits of a strength equal to that of pure ethyl alcohol compounded with distilled water in such proportions that the resultant mixture shall at a temperature of sixty-two degrees Fahrenheit have a specific gravity of 0.9187 as compared with that of distilled water at the same temperature;
- (f) 'gauge,' when applied to metal sheets or plates or to wire, means the thickness as determined by the Imperial Standard Gauge;
- (g) 'in diameter,' when applied to tubing, means the actual inside diameter;
- (h) 'sheet,' when applied to metals, means a sheet or plate not exceeding three-sixteenths of an inch in thickness;
- (i) 'plate,' when applied to metals, means a plate or sheet more than three-sixteenths of an inch in thickness;
- (j) 'p.c.' in any one of the tariff columns in Schedule 'A' to this Act represents and has the meaning of the words 'per centum, ad valorem;'
- (k) 'free' in any one of the said tariff columns means that the goods opposite which the word appears, and to which the tariff in the said column applies, may be imported and taken out of warehouse for consumption in Canada, without duty;
- (l) 'iron' includes 'steel;'
- (m) 'rolled iron' or 'rolled steel' means iron or steel hot rolled only.

2. The expressions mentioned in section 2 of *The Customs Act*, whenever they occur herein or in any Act relating to the customs, unless the context otherwise requires, have the meaning assigned to them respectively by the said section 2; and any power conferred upon the Governor in Council by *The Customs Act* to transfer dutiable goods to the list of goods which may be imported free of duty or to reduce the rates of duty on dutiable goods is not hereby abrogated or impaired.

3. Subject to the provisions of this Act and of *The Customs Act*, there shall be levied, collected and paid upon all goods enumerated, or referred to as not enumerated, in Schedule 'A' to this Act, when such goods are imported into Canada or taken out of warehouse for consumption therein, the several rates of duties of Customs, if any, set opposite to each item respectively or charged on goods as not enumerated, in the column of the tariff applicable to the goods, subject to the following conditions, viz.:—

(1) The rates of customs duties, if any, set forth in column 1, 'British Preferential Tariff,' shall apply to goods the produce or manufacture of the following British countries when imported direct from any British country:—

- (a) the United Kingdom;
- (b) the British colony of Bermuda;
- (c) the British colonies commonly called the British West Indies, including the following:—
 - the Bahamas;
 - Jamaica;
 - Turks and Caicos Islands;
 - the Leeward Islands (Antigua, St. Christopher-Nevis, Dominica, Montserrat, and the Virgin Islands);
 - the Windward Islands (Grenada, St. Vincent and St. Lucia);
 - Barbados;
 - Trinidad and Tobago;
- (d) British Guiana;
- (e) British India;
- (f) Ceylon;
- (g) Straits Settlements;
- (h) New Zealand;
- (i) Cape of Good Hope;
- (j) Natal;
- (k) Orange River Colony;
- (l) Transvaal;
- (m) Southern Rhodesia;
- (n) any other British colony or possession admitted to the benefit of the British Preferential Tariff in Canada, in the manner hereinafter provided;

(2) The rates of customs duties, if any, set forth in column 2, 'Intermediate Tariff,' shall apply to goods the produce or manufacture of any British or foreign country to which the benefits of such Intermediate Tariff shall have been extended in the manner hereinafter provided, when imported direct from such foreign country or from a British country;

(3) The rates of customs duties, if any, set forth in column 3, 'General Tariff,' shall apply to all goods not entitled to admission under the Intermediate Tariff or under the British Preferential Tariff;

(4) Proof of origin, as prescribed by the Minister of Customs, shall be furnished with the bill of entry at the custom house for goods admitted to entry under any of the tariffs in Schedule 'A'; and the decision of the Minister of Customs shall be final as to the tariff or surtax applicable in any case to imported goods by reason of their origin;

(5) Goods for which entry is claimed under the Intermediate Tariff must be bona fide the produce or manufacture of a country which has been admitted to the benefits of the Intermediate Tariff;

(6) Every manufactured article to be admitted under the British Preferential Tariff must be bona fide the manufacture of a British country entitled to the benefits of the British Preferential Tariff, and a substantial portion of the value of the manufactured article must have been produced by labour in one or more of such countries.

4. The Governor in Council may, by order in council,—

- (a) extend the benefit of the British Preferential Tariff to any British country not named in paragraph (1) of section 3, and from and after the publication of such order in council in the *Canada Gazette* the British Preferential Tariff shall apply to goods the produce or manufacture of such British country, subject to the provisions of this Act;
- (b) withdraw the benefit of the British Preferential Tariff from any British country (other than the United Kingdom) which has received the said benefit; and from and after the publication of such order in the *Canada Gazette*, the General Tariff or the Intermediate Tariff, as mentioned in the said order, shall apply to goods the produce or manufacture of such British country subject to the provisions of this Act;
- (c) from time to time, in consideration of benefits satisfactory to the Governor in Council, extend the benefit of the Intermediate Tariff, in whole or in part, to any British or foreign country the produce or manufactures of which have previously been subject to the rates of customs duties set forth in the General Tariff, and from and after the publication of such order in the *Canada Gazette*, the rates of duty set forth in the Intermediate Tariff, so far as they are mentioned in the said order, shall apply to goods the produce or manufacture of such British or foreign country, when imported direct from such foreign country or from a British country, subject to the provisions of this Act; and
- (d) withdraw the benefit of the Intermediate Tariff from any country to which it has been extended, and from and after the publication of such order in the *Canada Gazette*, the rates of Customs duties set forth in the General Tariff shall apply to goods the produce or manufacture of such country, subject to the provisions of this Act.

5. On and after a date to be named by the Governor in Council, in a proclamation published in the *Canada Gazette*, the British Preferential Tariff shall apply only to goods brought into Canada by ship direct to a Canadian seaport.

6. In the case of articles exported to Canada of a class or kind made or produced in Canada, if the export or actual selling price to an importer in Canada is less than the fair market value of the same article when sold for home consumption in the usual and ordinary course in the country whence exported to Canada at the time of its exportation to Canada, there shall, in addition to the duties otherwise established, be levied, collected and paid on such article, on its importation into Canada, a special duty (or dumping duty) equal to the difference between the said selling price of the article for export and the said fair market value thereof for home consumption; and such special duty (or dumping duty) shall be levied, collected and paid on such article, although it is not otherwise dutiable.

Provided that the said special duty shall not exceed fifteen per cent ad valorem in any case;

Provided also that the following goods shall be exempt from such special duty, viz.:—

- (a) goods whereon the duties otherwise established are equal to fifty per cent ad valorem;
- (b) goods of a class subject to excise duty in Canada;
- (c) sugar refined in the United Kingdom;
- (d) binder twine or twine for harvest binders manufactured from New Zealand hemp, istle or tampico fibre, sisal grass or sunn, or a mixture of any two or more of them, of single ply and measuring not exceeding six hundred feet to the pound.

Provided further that excise duties shall be disregarded in estimating the market value of goods for the purposes of special duty when the goods are entitled to entry under the British Preferential Tariff.

2. 'Export price' or 'selling price' in this section shall be held to mean and include the exporter's price for the goods, exclusive of all charges thereon after their shipment from the place whence exported directly to Canada.

3. If at any time it appears to the satisfaction of the Governor in Council, on a report from the Minister of Customs, that the payment of the special duty by this section provided for is being evaded by the shipment of goods on consignment without sale prior to such shipment, the Governor in Council may in any case or class of cases authorize such action as is deemed necessary to collect on such goods or any of them the same special duty as if the goods had been sold to an importer in Canada prior to their shipment to Canada.

4. If the full amount of any special duty of customs is not paid on goods imported, the customs entry thereof shall be amended and the deficiency paid upon the demand of the collector of customs.

5. The Minister of Customs may make such regulations as are deemed necessary for carrying out the provisions of this section and for the enforcement thereof.

6. Such regulations may provide for the temporary exemption from special duty of any article or class of articles, when it is established to the satisfaction of the Minister of Customs that such articles are not made or sold in Canada in substantial quantities and offered for sale to all purchasers on equal terms under like conditions, having regard to the custom and usage of trade.

7. Such regulations may also provide for the exemption from special duty of any article when the difference between the fair market value and the selling price thereof to the importer as aforesaid amounts only to a small percentage of its fair market value.

7. Articles which are the produce or manufacture of any foreign country which treats imports from Canada less favourably than those from other countries may be subject to a surtax over and above the duties specified in Schedule 'A' to this Act, such surtax in every case to be one-third of the duty specified in the General Tariff in the said schedule.

2. Any question arising as to any foreign country or goods coming under the operation of this section shall be decided by the Minister of Customs, whose decision shall be final.

3. The Governor in Council may make regulations for carrying out the purposes of this section, and may, by order in council, from time to time suspend the surtax from application to the goods of any country.

8. Notwithstanding anything in this Act, fish and other products of the fisheries of Newfoundland may be imported into Canada free of customs duty until otherwise determined by the Governor in Council, by order published in the *Canada Gazette*.

9. Fish caught by fishermen in Canadian fishing vessels, and the products thereof carried from the fisheries in such vessels, shall be admitted into Canada free of duty under regulations by the Minister of Customs.

10. On the materials set forth in Schedule 'B' to this Act, when used for consumption in Canada for the purpose specified in that schedule, there may be paid, out of the Consolidated Revenue Fund, the several rates of draw-back of customs duties set opposite to each item respectively in that schedule, under regulations by the Governor in Council.

11. The importation into Canada of any goods enumerated, described or referred to in Schedule 'C' to this Act is prohibited; and any such goods imported shall thereby become forfeited to the Crown and shall be destroyed or otherwise dealt with as the Minister of Customs directs; and any person importing any such prohibited goods, or causing or permitting them to be imported, shall for each offence incur a penalty not exceeding two hundred dollars.

12. Whenever, from or as a result of a judgment of the Supreme Court or Exchequer Court of Canada, or of any superior court, or circuit, district or county court in Canada, it appears to the satisfaction of the Governor in Council that with regard to any article of commerce there exists any conspiracy, combination, agreement or arrangement of any kind among manufacturers of such articles or dealers therein to unduly promote the advantage of the manufacturers or dealers at the expense of the consumer, the Governor in Council may admit the article free of duty, or so reduce the duty thereon as to give the public the benefit of reasonable competition in the article, if it appears to the Governor in Council that such disadvantage to the consumer is facilitated by the duties of customs imposed on a like article.

2. Whenever the Governor in Council deems it to be in the public interest to enquire into any conspiracy, combination, agreement or arrangement alleged to exist among manufacturers or dealers in any article of commerce to unduly promote the advantage of the manufacturers or dealers in such article at the expense of the consumers, the Governor in Council may commission or empower any judge of the Supreme Court, or of the Exchequer Court of Canada, or of any superior court or county court in Canada, to hold an inquiry in a summary way and report to the Governor in Council whether such conspiracy, combination, agreement or arrangement exists.

3. The judge may compel the attendance of witnesses and examine them under oath and require the production of books and papers, and shall have such other necessary powers as are conferred upon him by the Governor in Council for the purpose of such inquiry.

4. If the judge reports that such conspiracy, combination, agreement or arrangement exists in respect of such article, the Governor in Council may admit the article free of duty, or so reduce the duty thereon as to give to the public the benefit of reasonable competition in the article, if it appears to the Governor in Council that such disadvantage to the consumer is facilitated by the duties of customs imposed on a like article.

13. Nothing in this Act shall affect *The French Treaty Act, 1894*, or chapter 3 of the statutes of 1895, intituled *An Act respecting Commercial Treaties affecting Canada*.

14. *The Customs Tariff*, chapter 49 of the Revised Statutes, 1906, is repealed.

15. All orders in council placing articles on the free list or reducing rates of duties, and all other orders in council and departmental regulations inconsistent with any of the provisions of this Act, are repealed.

16. This Act shall be deemed to have come into operation on the thirtieth day of November, one thousand nine hundred and six, and to apply and have applied to all goods imported or taken out of warehouse for consumption on or after that day, and to have also applied to goods previously imported for which no entry for consumption was made before that day, except as otherwise provided in this Act: Provided that goods which were imported or taken out of warehouse for consumption and on which duty was paid on or after the thirtieth day of November, one thousand nine hundred and six, and prior to the thirty-first day of March, one thousand nine hundred and seven, in accordance with the rate of duty set forth as payable on such goods in the resolutions respecting the duties of customs introduced in the House of Commons on the twenty-ninth day of November, one thousand nine hundred and six, shall not be subject to further payment of duty by reason of such rate of duty having been increased by any resolution or amendment introduced subsequently to that in accordance with which such duty was paid.

SCHEDULE A.

GOODS SUBJECT TO DUTY, AND FREE GOODS.

GROUP 1.

Animals, Agricultural Products, Fish and Provisions.

Tariff Items.	British Preferential Tariff.	Intermediate Tariff.	General Tariff.
sulphate of; sal amoniac and nitrate of ammonia; cyanide of potassium, cyanide of sodium and cyanogen bromide, for reducing metals in mining operations; antimony salts, viz.:—tartar emetic, chlorine and lactate (antimonine); arsenous oxide; oxide of cobalt; oxide of tin; bichloride of tin; tin crystals; oxide of copper; precipitate of copper, crude; sulphate of copper (blue vitriol); verdigris or subacetate of copper, dry; sulphate of iron (copperas), sulphate of zinc; chloride of zinc; sulphur and brimstone, crude or in roll or flour; cream of tartar, in crystals or argols; tartaric acid crystals; chloride of lime and hypochlorite of lime, in packages of not less than twenty-five pounds weight; iodine, crude; bromine; phosphorus; sulphide of arsenic.	Free.	Free.	Free.
209 Potash, chlorate of, not further prepared than ground; potash, muriate, sulphate and bichromate of, crude; saltpetre or nitrate of potash; red and yellow prussiate of potash.....	Free.	Free.	Free.
209a Potash, pearl ash and caustic potash:—			
1. When in packages of not less than twenty-five pounds weight each.....	Free.	Free.	Free.
2. When in packages of less than twenty-five pounds weight each.....	10 p.c.	12½ p.c.	15 p.c.
210 Peroxide of soda; soda, sulphate of, crude, known as salt cake; barilla or soda ash; silicate of soda in crystals or in solution; bichromate of soda; nitrate of soda or cubic nitre; sal soda; sulphide of sodium; nitrate of soda; arseniate, binarsenate, chlorate, bisulphite and stannate of soda; prussiate of soda and sulphite of soda.....	Free.	Free.	Free.
210a Caustic soda:—			
1. When in packages of not less than twenty-five pounds weight each.....	Free.	Free.	Free.
2. When in packages of less than twenty-five pounds weight each.....	10 p.c.	12½ p.c.	15 p.c.
211 Alumina and chloride of aluminum, or chloralum	Free.	Free.	Free.
212 Sulphate of alumina or alum cake; and alum in bulk, ground or unground, but not calcined..	Free.	10 p.c.	10 p.c.
213 Acid, acetic and pyroligneous, n.o.p., and vinegar:—per gallon of any strength not exceeding the strength of proof.....	10 cents.	12½ cents.	15 cents.
—and in addition thereto, for each degree of strength in excess of the strength of proof...	1½ cents.	1¾ cents.	2 cents.
Provided that the strength of proof shall be held to be equal to six per cent of absolute acid, and shall be determined in the manner prescribed by the Governor in Council.			
214 Acid, acetic, crude, and pyroligneous crude, of any strength not exceeding thirty per cent..	15 p.c.	22½ p.c.	25 p.c.
215 Stearic acid.....	12½ p.c.	17½ p.c.	20 p.c.
216 Nitric acid and all other acids, n.o.p.....	15 p.c.	20 p.c.	22½ p.c.
217 Sulphuric and muriatic acid.....			
per one hundred pounds.	17½ cents.	22½ cents.	25 cents.
218 Acid phosphate, not medicinal.....	12½ p.c.	17½ p.c.	20 p.c.
219 Sulphuric ether, chloroform, and solutions of peroxides of hydrogen.....	15 p.c.	22½ p.c.	25 p.c.
219a Non-alcoholic liquid preparations for disinfecting, dipping or spraying, n.o.p.....	20 p.c.	25 p.c.	25 p.c.
220 All medicinal, chemical and pharmaceutical preparations, compounded of more than one substance, including patent and proprietary preparations, tinctures, pills, powders, troches, lozenges, syrups, cordials, bitters, anodynes, tonics, plasters, liniments, salves, ointments, pastes, drops, waters, essences and oils, n.o.p.:—			
(a) When dry.....	20 p.c.	25 p.c.	25 p.c.
(b) All other.....	50 p.c.	50 p.c.	50 p.c.

SCHEDULE A—Continued.

Tariff Items.	British Preferential Tariff.	Intermediate Tariff.	General Tariff.

291 Bags in which cement or lime mentioned in the next preceding item is imported.....	15 p.c.	20 p.c.	20 p.c.
292 Gypsum, crude (sulphate of lime).....	Free.	Free.	Free.
293 Plaster of Paris, or gypsum, calcined, and prepared wall plaster, the weight of the package to be included in the weight for duty.....per one hundred pounds.	8 cents.	11 cents.	12½ cents.
294 Plaster of Paris, or gypsum, ground, not calcined	10 p.c.	12½ p.c.	15 p.c.
295 Clays, including, China clay, fire clay and pipe clay not further manufactured than ground; ganister and sand; gravels; earths, crude only.....	Free.	Free.	Free.
296 Flint, ground flint stones; felspar, fluorspar, magnesite; soap stone, cliff, chalk, China, or Cornwall stone, ground or unground; refuse stone, not sawn, hammered or chiselled nor fit for flagstone, building stone or paving....	Free.	Free.	Free.
297 Silx or crystalized quartz, ground or unground	Free.	Free.	Free.
298 Pumice, calcareous tufa, pumice stone and lava, not further manufactured than ground.....	Free.	Free.	Free.
299 Burr-stones, in blocks, rough or unmanufactured not bound up or prepared for binding into millstones.....	Free.	Free.	Free.
300 Crucibles of clay, sand or plumbago.....	Free.	Free.	Free.
301 Curling stones, and handles therefor.....	Free.	7½ p.c.	10 p.c.
302 Lithographic stones, not engraved.....	12½ p.c.	17½ p.c.	20 p.c.
303 Grindstones, not mounted, and not less than thirty-six inches in diameter.....	10 p.c.	12½ p.c.	15 p.c.
304 Grindstones, mounted or not, n.o.p.....	17½ p.c.	22½ p.c.	25 p.c.
305 Flagstone, sandstone and all building stone, not hammered, sawn or chiselled, and marble and granite, rough, not hammered or chiselled...	10 p.c.	12½ p.c.	15 p.c.
306 Marble, sawn or sand rubbed, not polished; granite, sawn; flagstone and all other building stone, sawn or dressed; and paving blocks of stone.....	15 p.c.	17½ p.c.	20 p.c.
307 Marble and granite, n.o.p., and all manufactures of marble or granite, n.o.p.....	30 p.c.	32 p.c.	35 p.c.
308 Manufactures of stone, n.o.p.....	20 p.c.	27½ p.c.	30 p.c.
309 Roofing slate, per square of one hundred square feet.....	50 cents.	70 cents.	75 cents.
310 Slate mantels and other manufactures of slate, n.o.p.....	20 p.c.	27½ p.c.	30 p.c.
311 Slate pencils and school writing slates.....	15 p.c.	22½ p.c.	25 p.c.
312 Asbestos in any form other than crude, and all manufactures thereof.....	15 p.c.	22½ p.c.	25 p.c.
313 Plumbago, not ground or otherwise manufactured.....	5 p.c.	7½ p.c.	10 p.c.
314 Plumbago, ground, and manufactures of, n.o.p., and foundry facings of all kinds.....	15 p.c.	22½ p.c.	25 p.c.

SCHEDULE A—Continued.

Tariff Items.		British Preferential Tariff.	Intermediate Tariff.	General Tariff.
315	Carbons over six inches in circumference.	Free.	Free.	Free.
316	Electric light carbons and carbon points, of all kinds, n.o.p.	22½ p.c.	32½ p.c.	35 p.c.
316a	Incandescent lamp bulbs and glass tubing for use in the manufacture of incandescent lamps, and mantle stocking for gas light.	5 p.c.	7½ p.c.	10 p.c.
317	Glass cut to size adapted for use in the manufac- ture of dry plates for photographic purposes, when imported by the manufacturers of such dry plates for use exclusively in the manufac- ture thereof in their own factories.	Free.	Free.	Free.
318	Common and colourless window glass.	7½ p.c.	12½ p.c.	15 p.c.
319	Glass, in sheets, and bent plate glass, n.o.p. . . .	17½ p.c.	22½ p.c.	25 p.c.
320	Plate glass, not bevelled, in sheets or panes not exceeding seven square feet each, n.o.p.	7½ p.c.	10 p.c.	10 p.c.
321	Plate glass, not bevelled, in sheets or panes ex- ceeding seven square feet each, and not ex- ceeding twenty-five square feet each, n.o.p. . .	15 p.c.	25 p.c.	27½ p.c.
322	Plate glass, n.o.p.	22½ p.c.	30 p.c.	35 p.c.
323	Silver glass, bevelled or not and framed or not. .	22½ p.c.	30 p.c.	35 p.c.
324	German looking-glass plate (thin plate), unsil- vered or for silvering.	12½ p.c.	17½ p.c.	20 p.c.
325	Stained or ornamental glass windows.	20 p.c.	27½ p.c.	30 p.c.
326	Glass demijohns or carboys, bottles, decanters, flasks, phials, glass jars and glass balls, lamp chimneys, glass shades or globes; cut, pressed, moulded or crystal glass tableware, decorated or not; blown glass tableware and other cut glassware.	20 p.c.	30 p.c.	32½ p.c.
326a	Articles of glass, not plate or sheet, designed to be cut or mounted; and manufactures of glass, n.o.p.	15 p.c.	20 p.c.	22½ p.c.
327	Spectacles, eyeglasses, and ground or finished spectacles or eyeglass lenses.	20 p.c.	27½ p.c.	30 p.c.
328	Spectacle and eyeglass frames, and metal parts thereof.	15 p.c.	17½ p.c.	20 p.c.

GROUP 8.

Metals, and manufactures thereof:

329	Ores of metals of all kinds.	Free.	Free.	Free.
330	Antimony, or regulus of, not ground, pulverized or otherwise manufactured.	Free.	Free.	Free.
331	Bismuth, metallic, in its natural state.	Free.	Free.	Free.
332	Ore of cobalt.	Free.	Free.	Free.
333	Cinnabar; quicksilver; radium.	Free.	Free.	Free.
334	Kryolite or cryolite (ore).	Free.	Free.	Free.
335	Manganese, oxide of.	Free.	Free.	Free.
336	Tea lead.	Free.	Free.	Free.
337	Lead, old, scrap, pig and block.	10 p.c.	15 p.c.	15 p.c.
338	Lead, in bars and in sheets.	15 p.c.	22½ p.c.	25 p.c.
339	Lead, manufactures of, n.o.p.	20 p.c.	27½ p.c.	30 p.c.
340	Type for printing, including chases, quoins and slugs, of all kinds.	12½ p.c.	17½ p.c.	20 p.c.
341	Babbit metal and type metal, in blocks, bars, plates and sheets.	10 p.c.	15 p.c.	15 p.c.
342	Phosphor tin and phosphor bronze in blocks, bars, plates, sheets and wire.	5 p.c.	7½ p.c.	10 p.c.
343	Tin, in blocks, pigs, bars, plates or sheets; tin strip waste, and tin foil.	Free.	Free.	Free.
344	Tinware, japanned or not, and all manufactures of tin, n.o.p.	15 p.c.	22½ p.c.	25 p.c.
345	Zinc dust, zinc spelter and zinc in blocks, pigs, bars, rods, sheets and plates; sal ammoniac skimmings; and seamless drawn tubing of zinc .	Free.	Free.	Free.
346	Zinc, manufactures of, n.o.p.	15 p.c.	22½ p.c.	25 p.c.
347	Yellow metal, in bolts, bars and sheets, for use in the construction or repairs of vessels.	Free.	Free.	Free.
348	Brass and copper, old and scrap, or in blocks, ingots or pigs; copper in bars and rods, in coil or otherwise, not less than six feet in length,			

SCHEDULE A—Continued.

Tariff Items.	British Preferential Tariff.	Intermediate Tariff.	General Tariff.
unmanufactured; copper in strips, sheets or plates, not polished, planished or coated; brass or copper tubing, in lengths of not less than six feet, and not polished, bent or otherwise manufactured.....	Free.	Free.	Free.
348a Works of art in bronze, cast from models made in Canada and designed by sculptors domiciled therein, under regulations by the Minister of Customs.....	Free.	Free.	Free.
349 Brass in bars and rods, in coil or otherwise, not less than six feet in length, and brass in strips, sheets or plates, not polished, planished or coated.....	5 p.c. 7½ p.c.	7½ p.c. 10 p.c.	10 p.c. 12½ p.c.
350 Brass wire, plain.....	7½ p.c.	10 p.c.	12½ p.c.
351 Copper wire, plain, tinned or plated.....	20 p.c.	27½ p.c.	30 p.c.
352 Brass and copper nails, tacks, rivets and burrs or washers; bells and gongs, n.o.p.; and manufactures of brass or copper, n.o.p.....	Free.	Free.	Free.
352a Bells, when imported for use of churches only...	Free.	Free.	Free.
353 Aluminum ingots, blocks, bars, rods, strips, sheets or plates; aluminum tubing in lengths of not less than six feet, not polished, bent or otherwise manufactured.....	Free.	Free.	Free.
354 Manufactures of aluminum, n.o.p.....	15 p.c.	22½ p.c.	25 p.c.
355 Britannia metal in pigs, blocks or bars; nickel, nickel silver, and German silver, in ingots or blocks, n.o.p.....	Free.	Free.	Free.
356 Nickel, nickel silver and German silver, in bars and rods, and also in strips, sheets or plates...	Free.	Free.	Free.
357 Britannia metal, nickel silver, Nevada and German silver, manufactures of, not plated, n.o.p.....	17½ p.c. 5 p.c.	27½ p.c. 7½ p.c.	30 p.c. 10 p.c.
358 Anodes of nickel, zinc, copper, silver or gold...	Free.	Free.	Free.
359 Gold and silver, in ingots, blocks, bars, drops, sheets or plates, unmanufactured; gold and silver sweepings; and bullion fringe or gold fringe.....	Free.	Free.	Free.
360 British and Canadian coin and foreign gold coin.	Free.	Free.	Free.
361 Gold, silver and aluminum leaf; Dutch or schlag metal leaf; brocade and bronze powders.....	15 p.c.	25 p.c.	27½ p.c.
362 Articles consisting wholly or in part of sterling or other silverware, nickel-plated ware, gilt or electro-plated ware, n.o.p.; manufactures of gold and silver, n.o.p.....	22½ p.c.	30 p.c.	35 p.c.
363 Platinum wire and platinum in bars, strips, sheets or plates.....	Free.	Free.	Free.
364 Diamond dust or bort and black, for borers...	Free.	Free.	Free.
365 Composition metal and plated metal, in bars, ingots or cores, for the manufacture of watch cases, jewellery, and of filled gold and silver seamless wire.....	5 p.c.	7½ p.c.	10 p.c.
366 Watch actions and movements, and parts thereof, finished or unfinished, including winding bars and sleeves.....	10 p.c.	12½ p.c.	15 p.c.
367 Watch cases, and parts thereof, finished or unfinished.....	20 p.c.	27½ p.c.	30 p.c.
368 Clocks, watches, time recorders, clock and watch keys, clock cases, and clock movements.....	20 p.c.	27½ p.c.	30 p.c.
369 Chronometers and compasses for ships.....	Free.	Free.	Free.
370 Rollers, copper, adapted for use in calico printing.....	Free.	Free.	Free.
371 Spurs and stilts, adapted for use in the manufacture of earthenware.....	Free.	Free.	Free.
372 Blast furnace slag.....	Free.	Free.	Free.
373 Scrap iron and scrap steel, old and fit only to be remanufactured, being part of or recovered from any vessel wrecked in waters subject to the jurisdiction of Canada.....	Free.	Free.	Free.
374 Iron or steel scrap, wrought, being waste or refuse, including punchings, cuttings or clippings of iron or steel plates or sheets having been in actual use; crop ends of tin plate bars, or of blooms, or of rails, the same not having been in actual use..... per ton.	50 cents.	90 cents.	\$1

SCHEDULE A—*Continued.*

Tariff Items.	British Preferential Tariff.	Intermediate Tariff.	General Tariff.
But nothing shall be deemed scrap iron or scrap steel except waste or refuse iron or steel fit only to be remanufactured in rolling mills or furnaces; provided that articles of iron or steel, damaged in transit, if broken up under customs supervision and rendered unsaleable except as scrap, may be entered for duty as scrap.			
375 Iron in pigs, iron kentledge, and cast scrap iron; ferrosilicon, ferromanganese, and spiegeleisen per ton.	\$1.50	\$2.25	\$2.50
376 Iron or steel billets, weighing not less than sixty pounds per lineal yard; ingots, cogged ingots, blooms, slabs, puddled bars; and loops or other forms, n.o.p., less finished than iron or steel bars but more advanced than pig iron, except castings. per ton.	\$1.50	\$2.25	\$2.50
377 Rolled iron or steel angles, tees, beams, channels, girders and other rolled shapes or sections, not punched, drilled or further manufactured than rolled, n.o.p. per ton.	\$4.25	\$6.00	\$7.00
378 Bar iron or steel, rolled, whether in coils, rods, bars or bundles, comprising rounds, ovals and squares, and flats; steel billets, n.o.p.; and rolled iron or steel hoop, band, scroll or strip, twelve inches or less in width, number thirteen gauge and thicker, n.o.p. per ton.	\$4.25	\$6.00	\$7.00
379 Rolled iron or steel beams, channels, angles, and other rolled shapes, of iron or steel, not punched, drilled or further manufactured than rolled, weighing not less than thirty-five pounds per lineal yard, not being square, flat, oval or round shapes, and not being railway bars or rails. per ton.	\$2.00	\$2.75	\$3.00
379a Flat eye bar blanks, not punched nor drilled, and universal mill or rolled edge plates of steel over twelve inches wide for use exclusively in the manufacture of bridges or of steel structural work, or in car construction per ton.	\$2.00	\$2.75	\$3.00
380 Boiler plate of iron or steel, not less than thirty inches in width, and not less than one-quarter of an inch in thickness, for use exclusively in the manufacture of boilers under regulations by the Minister of Customs.	Free.	Free.	Free.
381 Rolled iron or steel plates, not less than thirty inches in width and not less than one-quarter of an inch in thickness, n.o.p. per ton.	\$2.00	\$2.75	\$3.00
382 Rolled iron or steel sheets or plates, sheared or unsheared, and skelp iron or steel, sheared or rolled in grooves, n.o.p.	\$4.25	\$6.00	\$7.00
383 Skelp iron or steel, sheared or rolled in grooves, when imported by manufactures of wrought iron or steel pipe for use only in the manufacture of wrought iron or steel pipe in their own factories.	5 p.c.	5 p.c.	5 p.c.
384 Rolled iron or steel sheets and strips, polished or not, number fourteen gauge and thinner, n.o.p.; Canada plates; Russia iron; terne plates and rolled sheets of iron or steel, coated with zinc, spelter or other metal, of all widths or thicknesses, n.o.p.; and rolled iron or steel hoop, band, scroll or strip, number fourteen gauge and thinner, galvanized, or coated with other metal, or not, n.o.p.	Free.	5 p.c.	5 p.c.
385 Chrome steel.	10 p.c.	12½ p.c.	15 p.c.
386 Rolled iron or steel, and cast steel, in bars, bands, hoop, scroll, strip, sheet or plate, of any size, thickness or width, galvanized or coated with any material or not, and steel blanks for the manufacture of milling cutters, when of greater value than three and one-half cents per pound.	Free.	5 p.c.	5 p.c.

SCHEDULE A—Continued.

Tariff Items.	British Preferential Tariff.	Intermediate Tariff.	General Tariff.
387 Swedish rolled iron and Swedish rolled steel nail rods, under half an inch in diameter, for the manufacture of horseshoe nails.	Free.	Free.	Free.
387a Steel in bars or sheets, to be used exclusively in the manufacture of shovels, when imported by manufacturers of shovels. per ton.	\$2.00	\$2.75	\$3.00
388 Iron and steel railway bars or rails of any form, punched or not, n.o.p., for railways, which term for the purposes of this item shall include all kinds of railways, street railways, and tramways, even although they are used for private purposes only, and even although they are not used or intended to be used in connection with the business of common carrying of goods or passengers. per ton.	\$4.50	\$6.00	\$7.00
388a Iron or steel railway bars or rails, which have been in use in the tracks of railways in Canada, and which have been exported from Canada and returned thereto after having been re-rolled, and weighing not less than fifty-six pounds per lineal yard when re-rolled, and which are to be used by the railway company importing them on its own tracks, under regulations prescribed by the Minister of Customs.	25 p.c.	25 p.c.	25 p.c.
Provided that the value for duty of such re-rolled rails shall be the cost of re-rolling the same.			
Provided also that whenever the Governor in Council is satisfied that a mill adapted and equipped for re-rolling such rails in substantial quantities has been established in Canada, the Governor in Council may by order in council to be published in the 'Canada Gazette,' abolish the duty specified in this item, and thereupon all such rails when imported shall be subject to such duty as otherwise provided in the Customs Tariff.			
389 Railway fish-plates and tie-plates. per ton.	\$5.00	\$7.00	\$8.00
390 Switches, frogs, crossings and intersections for railways.	20 p.c.	30 p.c.	32½ p.c.
391 Iron or steel bridges, or parts thereof; iron or steel structural work, columns, shapes or sections, drilled, punched or in any further stage of manufacture than as rolled or cast, n.o.p.	22½ p.c.	30 p.c.	35 p.c.
392 Springs, axles, axle bars, n.o.p., and axle blanks, and parts thereof, of iron or steel, for railway, tramway or other vehicles.	22½ p.c.	30 p.c.	35 p.c.
393 Forgings of iron or steel of whatever shape or size or in whatever stage of manufacture, n.o.p.; and steel shafting, turned, compressed or polished; and hammered, drawn or cold rolled iron or steel bars or shapes, n.o.p. . . .	20 p.c.	27½ p.c.	30 p.c.
393a Round polished steel shafting, in bars not exceeding two and one-half inches diameter. . .	17½ p.c.	22½ p.c.	25 p.c.
394 Cast iron pipe of every description. per ton.	\$6.00	\$7.00	\$8.00
395 Wrought or seamless iron or steel tubes for boilers, n.o.p., under regulations prescribed by the Minister of Customs; flues and corrugated tubes for marine boilers.	Free.	Free.	Free.
396 Seamless steel tubing, valued at not less than three and one-half cents per pound; rolled or drawn square tubing of iron or steel, adapted for use in the manufacture of agricultural implements.	Free.	5 p.c.	5 p.c.
397 Tubes of rolled iron or steel, not joined or welded not more than one and one-half inch in diameter, n.o.p.	Free.	Free.	Free.
398 Wrought or seamless iron or steel tubing, plain or galvanized, threaded and coupled or not, over four inches in diameter, n.o.p.	10 p.c.	12½ p.c.	15 p.c.

SCHEDULE A—*Continued.*

Tariff Items.	British Preferential Tariff.	Intermediate Tariff.	General Tariff.
399 Wrought or seamless iron or steel tubing, plain or galvanized, threaded and coupled or not, four inches or less in diameter, n.o.p.	20 p.c.	30 p.c.	35 p.c.
400 Iron or steel pipe or tubing, plain or galvanized, riveted, corrugated or otherwise specially manufactured, including lock joint pipe, n. o.p.	20 p.c.	27½ p.c.	30 p.c.
401 Wire bound wooden pipe.	15 p.c.	22½ p.c.	25 p.c.
402 Iron or steel fittings for iron or steel pipe, of every description.	20 p.c.	27½ p.c.	30 p.c.
403 Wire, crucible cast steel, valued at not less than six cents per pound.	Free.	5 p.c.	5 p.c.
403a Steel wire valued at not less than two and three-quarters cents per pound when imported by manufacturers of rope for use exclusively in the manufacture of rope; and also wire rope for use exclusively for rigging of ships and vessels—under regulations by the Minister of Customs.	Free.	Free.	Free.
404 Galvanized iron or steel wire, curved or not, numbers nine, twelve and thirteen gauge.	Free.	Free.	Free.
405 Buckthorn strip fencing, woven wire fencing, and wire fencing of iron or steel, n.o.p., not to include woven wire or netting made from wire smaller than number fourteen gauge nor to include fencing of wire larger than number nine gauge.	10 p.c.	12½ p.c.	15 p.c.
406 Wire of all metals and kinds, n.o.p.	15 p.c.	17½ p.c.	20 p.c.
407 Wire, single or several, covered with cotton, linen, silk, rubber or other material, including cable so covered.	20 p.c.	27½ p.c.	30 p.c.
408 Wire rope, stranded or twisted wire, clothes lines, picture or other twisted wire and wire cable, n.o.p.	17½ p.c.	22½ p.c.	25 p.c.
409 Wire cloth or wove wire, and wire netting, of iron or steel.	20 p.c.	27½ p.c.	30 p.c.
410 Coil chain, coil chain links, and chain shackles of iron or steel, five-sixteenths of an inch in diameter and over.	5 p.c.	7½ p.c.	10 p.c.
411 Malleable sprocket or link-belted chain.	Free.	Free.	Free.
412 Iron or steel nuts, washers, rivets, and bolts, with or without threads; nut, bolt and hinge blanks; and T and strap hinges of all kinds, n.o.p. per one hundred pounds.	75 cents.	75 cents.	75 cents.
and.	10 p.c.	20 p.c.	25 p.c.
413 Screws, commonly called 'wood screws,' of iron or steel, brass or other metal, including lag or coach screws, plated or not, and machine or other screws, n.o.p.	22½ p.c.	30 p.c.	35 p.c.
414 Iron or steel cut nails and spikes (ordinary builders'); and railroad spikes. per one hundred pounds.	30 cents.	45 cents.	50 cents.
415 Composition nails and spikes and sheathing nails	10 p.c.	12½ p.c.	15 p.c.
416 Wire nails of all kinds, n.o.p. per one hundred pounds.	40 cents.	55 cents.	60 cents.
417 Nails, brads, spikes and tacks of all kinds, n.o.p.	20 p.c.	30 p.c.	35 p.c.
418 Wire cloth, or woven wire of brass or copper.	17½ p.c.	22½ p.c.	25 p.c.
419 Needles, of any material or kind, and pins manufactured from wire of any metal, n.o.p.	20 p.c.	27½ p.c.	30 p.c.
420 Buckles and clasps of iron, steel, brass or copper, of all kinds, n.o.p. (not being jewellery).	20 p.c.	27½ p.c.	30 p.c.
421 Bird, squirrel and rat cages, of wire and metal parts thereof.	22½ p.c.	30 p.c.	35 p.c.
422 Trawls, trawling spoons, fly hooks, sinkers, swivels, sportmen's fishing bait and fishing hooks, n.o.p.	22½ p.c.	30 p.c.	35 p.c.
423 Skates of all kinds, roller or other, and parts thereof.	22½ p.c.	32½ p.c.	35 p.c.
424 Guns, rifles, including air guns and air rifles not being toys; muskets, cannons, pistols, revolvers, or other firearms; cartridge cases, cartridges, primers, percussion caps, wads, or other ammunition, n.o.p.; bayonets, swords,			

SCHEDULE A—Continued.

Tariff Items.	British Preferential Tariff.	Intermediate Tariff.	General Tariff.
fencing foils and masks; gun or pistol covers or cases, game bags, loading tools and cartridge belts of any material.....	20 p.c.	27½ p.c.	30 p.c.
425 Knife blades or blanks, and table forks of iron or steel in the rough, not handled, filed, ground or otherwise manufactured.....	5 p.c.	7½ p.c.	10 p.c.
426 Knives and forks and all other cutlery, of steel, plated, or not n.o.p.....	20 p.c.	27½ p.c.	30 p.c.
427 Agate, granite or enamelled iron or steel ware..	22½ p.c.	32½ p.c.	35 p.c.
428 Iron or steel hollow ware, plain black, or coated, n.o.p.; and nickel and aluminum kitchen or household hollow-ware, n.o.p.....	20 p.c.	27½ p.c.	30 p.c.
429 Machine card clothing.....	17½ p.c.	22½ p.c.	25 p.c.
430 Patterns of brass, iron, steel or other metal, not being models.....	20 p.c.	27½ p.c.	30 p.c.
431 Plates engraved on wood, steel, or other metal and transfers taken from the same; engravers' plates of steel, or other metal, polished, for engraving thereon.....	15 p.c.	17½ p.c.	20 p.c.
432 Stereotypes, electrotypes and celluloids, for almanacs, calendars, illustrated pamphlets, newspapers or other advertisements, n.o.p., and matrices of copper shells for such stereotypes, electrotypes and celluloids.....	per square inch. 1 cent.	1¼ cents.	1½ cents.
433 Stereotypes, electrotypes, celluloids and bases for the same, composed wholly or in part of metal or celluloid, n.o.p., and copper shells for such stereotypes, electrotypes and celluloids, per square inch.	½ cent.	½ cent.	½ cent.
433a Matrices for stereotypes, electrotypes and celluloids described in item 433, per square inch.	½ cent.	½ cent.	½ cent.
434 Lamp springs and clock springs.....	7½ p.c.	10 p.c.	10 p.c.
435 Lamps, side-lights and head lights, lanterns, chandeliers; gas, coal oil, or other lighting fixtures, including electric light fixtures, or metal parts thereof; lava or other tips, burners, collars, galleries, shades and shade holders	20 p.c.	27½ p.c.	30 p.c.
436 Gas meters and finished parts thereof.....	22½ p.c.	30 p.c.	35 p.c.
437 Safes, doors for safes and vaults; scales, balances, weighing beams, and strength testing machines of all kinds.....	20 p.c.	27½ p.c.	30 p.c.
438 Locomotives and motor cars, for railways and tramways; and automobiles and motor vehicles of all kinds.....	22½ p.c.	30 p.c.	35 p.c.
439 Fire engines and fire extinguishing machines, including sprinklers for fire protection.....	22½ p.c.	30 p.c.	35 p.c.
440 Sewing machines and parts thereof.....	20 p.c.	27½ p.c.	30 p.c.
441 Typecasting and typesetting machines and parts thereof, adapted for use in printing offices.....	12½ p.c.	17½ p.c.	20 p.c.
441a Typewriters.....	17½ p.c.	22½ p.c.	25 p.c.
442 Printing presses, lithographic presses, and type making accessories therefor, also machines specially designed for ruling, folding, binding, embossing, creasing, or cutting paper or cardboard when for use exclusively by printers, bookbinders and by manufacturers of articles made from paper or cardboard—including parts thereof composed wholly or in part of iron, steel, brass or wood.....	5 p.c.	10 p.c.	10 p.c.
443 Newspaper printing presses, of not less value by retail than fifteen hundred dollars each of a class or kind not made in Canada.....	Free.	Free.	Free.
444 Mould boards or shares, or plough plates, land sides, and other plates for agricultural implements, when cut to shape from rolled plates of steel, but not moulded, punched, polished or otherwise manufactured.....	Free.	Free.	Free.
445 Mowing machines, harvesters, self binding or without binders, binding attachments, reapers and complete parts thereof, not including shafting.....	12½ p.c.	17½ p.c.	17½ p.c.

SCHEDULE A—Continued.

Tariff Items.	British Preferential Tariff.	Intermediate Tariff.	General Tariff.
446 Cultivators, ploughs, harrows, horse-rakes, seed drills, manure spreaders, weeders and wind-mills and complete parts thereof, not including shafting.....	12½ p.c.	17½ p.c.	20 p.c.
447 Portable engines with boilers, in combination, horsepowers and traction engines, for farm purposes; wind-stackers, and threshing machine separators; including baggers, weighers and self-feeders therefor, and finished parts thereof for repairs.....	15 p.c.	17½ p.c.	20 p.c.
448 Hay loaders, potato diggers, fodder or feed cutters, grain crushers, fanning mills, hay tedders, farm, road or field rollers, post hole diggers, snaths; and other agricultural implements, n.o.p.....	15 p.c.	22½ p.c.	25 p.c.
449 Axes, scythes, sickles or reaping hooks, hay or straw knives, edging knives, hoes, rakes, n.o.p., and pronged forks.....	15 p.c.	20 p.c.	22½ p.c.
450 Shovels and spades of iron or steel, n.o.p.; shovel and spade blanks, and iron or steel cut to shape for the same; and lawn mowers....	20 p.c.	30 p.c.	32½ p.c.
451 Stoves of all kinds, for coal, wood, oil, spirits or gas.....	15 p.c.	22½ p.c.	25 p.c.
451a Stove urns of metal, and dovetails, chaplets and hinge tubes of tin for use in the manufacture of stoves.....	5 p.c. 15 p.c.	7½ p.c. 25 p.c.	10 p.c. 27½ p.c.
452 Belt pulleys of all kinds for power transmission.	15 p.c.	25 p.c.	27½ p.c.
453 Telephone and telegraph instruments, electric and galvanic batteries, electric motors, dynamos, generators, sockets, insulators of all kinds; electric apparatus, n.o.p.; boilers, n.o.p.; and all machinery composed wholly or in part of iron or steel, n.o.p.; and iron and steel castings, and iron or steel integral parts of all machinery specified in this item.....	15 p.c.	25 p.c.	27½ p.c.
454 Manufactures, articles or wares of iron or steel or of which iron and steel (or either) are the component materials of chief value, n.o.p....	20 p.c.	27½ p.c.	30 p.c.
455 Anchors for vessels.....	Free.	Free.	Free.
456 Ingot moulds; glass moulds of metal.....	5 p.c.	7½ p.c.	10 p.c.
457 Iron sand or globules or iron shot, and dry putty, adapted for polishing glass or granite, or for sawing stone.....	Free.	Free.	Free.
458 Locomotive and car wheel tires of steel, in the rough.....	Free.	Free.	Free.
459 Steel bowls for cream separators, and cream separators.....	Free.	Free.	Free.
460 Sundry articles of metal as follows, when for use exclusively in mining or metallurgical operations, viz.:—Diamond drills, not including the motive power; coal cutting machines, except percussion coal cutters; coal heading machines; coal augers; rotary coal drills; core drills; miners' safety lamps and parts thereof, also accessories for cleaning, filling and testing such lamps; electric or magnetic machines for separating or concentrating iron ores; furnaces for the smelting of copper, zinc and nickel ores; converting apparatus for metallurgical processes in metals; copper plates, plated or not; machinery for extraction of precious metals by the chlorination or cyanide processes; amalgam safes; automatic ore samplers; automatic feeders; retorts; mercury pumps; pyrometers; bullion furnaces; amalgam cleaners; blast furnace blowing engines; wrought iron tubing, butt or lap welded, threaded or coupled or not, over four inches in diameter; and integral parts of all machinery mentioned in this item.....	Free.	Free.	Free.
461 Machinery and appliances of iron or steel, of a class or kind not made in Canada, and elevators, and machinery of floating dredges, when for use exclusively in alluvial gold mining..	Free.	Free.	Free.

SCHEDULE A—Continued.

Tariff Items.	British Preferential Tariff.	Intermediate Tariff.	General Tariff.
461a Iron or steel pipe not butt or lap welded, and wirebound wooden pipe, not less than thirty inches internal diameter, when for use exclusively in alluvial gold mining.....	5 p.c.	7½ p.c.	10 p.c.
462 Blowers of iron or steel of a class or kind not made in Canada, for use in the smelting of ores, or in the reduction, separation or refining of metals; rotary kilns, revolving roasters and furnaces of metal of a class or kind not made in Canada, designed for roasting ore, mineral, rock or clay; furnace slag trucks and slag pots of a class or kind not made in Canada.....	Free.	Free.	Free.
462a Briquette-making machines.....	Free.	Free.	Free.
463 Machinery of every kind and structural iron and steel, when imported under regulations prescribed by the Minister of Customs, for use in the construction and equipment of factories for the manufacture of sugar from beet root..	Free.	Free.	Free.
464 The following articles and materials, under regulations prescribed by the Minister of Customs, viz.:—			
(a) All tools and machinery not manufactured in Canada up to the required standard, necessary for any factory to be established in Canada for the manufacture of rifles for the Government of Canada.....	Free.	Free.	Free.
(b) All materials or parts in the rough, unfinished, and screws, nuts, bands and springs, to be used in rifles to be manufactured at any such factory for the Government of Canada.....	Free.	Free.	Free.
465 The following articles and materials when imported by manufacturers of automatic gas buoys and automatic gas beacons, for use in the manufacture of such buoys and beacons for the Government of Canada or for export, under regulations prescribed by the Minister of Customs, viz.:—Iron or steel tubes over sixteen inches in diameter; flanged and dished steel heads made from boiler plate, over five feet in diameter; hardened steel balls, not less than three inches in diameter; acetylene gas lanterns and parts thereof; and tobin bronze in bars or rods.....	Free.	Free.	Free.
466 Surgical and dental instruments of metal; surgical needles; X-ray apparatus and parts thereof; surgical operating tables for use in hospitals; and microscopes valued at not less than \$50 each by retail.....	Free.	Free.	Free.
467 Machinery, of a class or kind not made in Canada, and parts thereof, for the manufacture of twine, cordage, or linen, or for the preparation of flax fibre.....	Free.	Free.	Free.
468 Machinery, of a class or kind not made in Canada, and parts thereof, specially adapted for carding, spinning, weaving, braiding, or knitting fibrous materials, when imported by manufacturers for such purposes.....	10 p.c.	10 p.c.	10 p.c.
469 Well-drilling machinery and apparatus of a class or kind not made in Canada, for drilling for water, natural gas and oil, and for prospecting for minerals, not to include motive power.....	Free.	Free.	Free.
470 Iron or steel masts, or parts thereof, and iron or steel beams, angles, sheets, plates, knees and cable chain, for wooden, iron, steel or composite ships and vessels; and iron, steel or brass manufactures which at the time of their importation are of a class or kind not manufactured in Canada, when imported			

SCHEDULE A—*Continued.*

Tariff Items.		British Preferential Tariff.	Intermediate Tariff.	General Tariff.
	for use in the construction or equipment of ships or vessels, under regulations prescribed by the Minister of Customs.....	Free.	Free.	Free.
471	Rolled round wire rods in the coil, of iron or steel, not over three-eighths of an inch in diameter, when imported by wire manufacturers for use in making wire in the coil, in their own factories.....	Free.	Free.	Free.
472	Materials which enter into the construction and form part of cream separators, when imported by manufacturers of cream separators to be used in their own factories for the manufacture of cream separators.....	Free.	Free.	Free.
473	Rolled steel for saws and for straw cutters, not tempered or ground nor further manufactured than cut to shape, without indented edges....	Free.	Free.	Free.
474	Steel springs for the manufacture of surgical trusses, when imported by manufacturers of surgical trusses for use exclusively in the manufacture thereof in their own factories..	Free.	Free.	Free.
475	Crucible sheet steel, eleven to sixteen gauge, two and one-half to eighteen inches wide for the manufacture of mower and reaper knives, when imported by the manufacturers thereof for use exclusively in the manufacture of such articles in their own factories.	Free.	Free.	Free.
476	Steel of number twenty gauge and thinner, but not thinner than number thirty gauge, for the manufacture of corset steels, clock springs and shoe shanks, when imported by manufacturers of such articles for use exclusively in the manufacture of such articles in their own factories.....	Free.	Free.	Free.
477	Steel of number twelve gauge and thinner, but not thinner than number thirty gauge, for the manufacture of buckle clasps, bed fasts, furniture casters, and ice creepers, when imported by manufactures of such articles, for use exclusively in the manufactures of such articles in their own factories.	Free.	Free.	Free.
478	Steel of numbers twenty-four and seventeen gauge, in sheets sixty-three inches long, and from eighteen inches to thirty-two inches wide, when imported by the manufacturers of tubular bow sockets for use exclusively in the manufacture of such articles in their own factories.....	Free.	Free.	Free.
479	Flat steel wire, of number sixteen gauge or thinner, when imported by the manufacturers of crinoline or corset wire and dress stays, for use exclusively in the manufacture of such articles in their own factories.	Free.	Free.	Free.
480	Steel strips and flat steel wire when imported into Canada by manufacturers of buckthorn and plain strip fencing, for use exclusively in the manufacture of such articles in their own factories; and barbed fencing wire of iron or steel.....	Free.	Free.	Free.
481	Steel wire, Bessemer soft drawn spring, of numbers ten, twelve and thirteen gauge, respectively, and homo steel spring wire of numbers eleven and twelve gauge, respectively, when imported by manufacturers of wire mattresses, to be used exclusively in the manufacture of such articles in their own factories.....	Free.	Free.	Free.
482	Wire, of brass, zinc, iron or steel, screwed or twisted, or flattened or corrugated, for use in connection with nailing machines for the manufacture of boots and shoes, when imported by manufacturers of boots and shoes, to be used exclusively for such purposes in their own factories.....	Free.	Free.	Free.

SCHEDULE A—Continued.

Tariff Items.	British Preferential Tariff.	Intermediate Tariff.	General Tariff.
483 Stereotypes, electrotypes and celluloids of newspaper columns in any language other than French and English, and of books, and bases and matrices and copper shells for the same, whether composed wholly or in part of metal or celluloid.....	Free.	Free.	Free.
484 Cups, brass, being rough blanks, for the manufacture of paper shells or cartridges, when imported by manufacturers of brass and paper shells and cartridges, for use exclusively in the manufacture of such articles in their own factories.....	Free.	Free.	Free.
485 Brass caps, adapted for use in the manufacture of electric batteries.....	Free.	Free.	Free.
486 Iron tubing, lacquered or brass covered, not over two inches in diameter, and brass trimmings, when imported by manufacturers of iron or brass bedsteads for use exclusively in the manufacture of such articles in their own factories.....	Free.	Free.	Free.
486a Iron tubing, lacquered or brass covered, not over two inches in diameter, and brass cased rods and brass trimmings, when imported by manufacturers or carriage rails for use exclusively in the manufacture of such articles in their own factories.....	Free.	Free.	Free.
487 Tagging metal, plain, japanned or coated, in coils, not over one and a half inch in width, when imported by manufacturers of shoe and corset laces for use exclusively in the manufacture of such articles in their own factories..	Free.	Free.	Free.
488 Nitrate and acetate of lead, not ground; platinum and black oxide of copper, for use in the manufacture of chlorates and colours.....	Free.	Free.	Free.
489 Platinum crucibles.....	Free.	Free.	Free.
490 Platinum retorts, pans, condensers, tubing and pipe, and preparations of platinum, when imported by manufacturers of sulphuric acid for use exclusively in the manufacture or concentration of sulphuric acid in their own factories.	Free.	Free.	Free.
491 Steel balls, adapted for use on bearings of machinery and vehicles.....	Free.	7½ p.c.	10 p.c.
492 Steel wool.....	5 p.c.	7½ p.c.	10 p.c.

GROUP 9.

Wood and manufactures thereof.

493 Corkwood, or cork bark, unmanufactured.....	Free.	Free.	Free.
494 Manufactures of corkwood or cork bark, n.o.p., including strips, shives, shells and washers of cork.....	15 p.c.	17½ p.c.	20 p.c.
495 Corks manufactured from corkwood, over three-fourths of an inch in diameter measured at the larger end.....per pound.	4 cents.	5 cents.	5 cents.
496 Corks, manufactured from corkwood, three-fourths of an inch and less in diameter measured at the larger end.....per pound.	6 cents.	8 cents.	8 cents.
497 Cane and rattans, not manufactured; osiers or willows, and bamboos, unmanufactured, and bamboo reeds, not further manufactured than cut into suitable lengths for walking sticks or canes, or for sticks for umbrellas, parasols or sunshades.....	Free.	Free.	Free.
498 Cane, reed or rattan, not further manufactured than split, n.o.p.....	7½ p.c.	10 p.c.	10 p.c.
499 Sawdust of wood, of all kinds.....	Free.	Free.	Free.
500 Logs and round unmanufactured timber, handle, heading, stave and shingle bolts, n.o.p.; firewood, hop poles, fence posts and railway ties.	Free.	Free.	Free.
500a Heading and stave bolts, and staves in the rough, of poplar.....	15 p.c.	17½ p.c.	20 p.c.

SCHEDULE A—Continued.

Tariff Items.		British Preferential Tariff.	Intermediate Tariff.	General Tariff.
501	D shovel handles, wholly of wood.....	10 p.c.	12½ p.c.	15 p.c.
502	Mexican saddle trees and stirrups of wood, tree-nails; hub, last, wagon, oar and gun blocks, and all like blocks or sticks, rough hewn, or sawn only; fellos of hickory or oak, not further manufactured than rough sawn or bent to shape; staves of oak, sawn, split or cut, not further manufactured than listed or jointed; shingles of wood; spokes of hickory or oak, not further manufactured than rough turned, and not tenoned, mitred or sized, and scale board for cheese.....	Free.	Free.	Free.
503	Planks, boards, clapboards, laths, plain pickets and other timber or lumber of wood, not further manufactured than sawn or split, whether creosoted, vulcanized, or treated by any other preserving process, or not.....	Free.	Free.	Free.
504	Planks, boards and other lumber of wood, sawn, split or cut, and dressed on one side only, but not further manufactured.....	Free.	Free.	Free.
505	Sawn boards, planks and deals planed or dressed on one or both sides, when the edges thereof are jointed or tongued and grooved.....	17½ p.c.	22½ p.c.	25 p.c.
506	Manufactures of wood, n.o.p.....	17½ p.c.	22½ p.c.	25 p.c.
507	Veneers of wood, n.o.p., not over three thirty-seconds of an inch in thickness.....	10 p.c.	12½ p.c.	15 p.c.
507a	Veneers of oak, rosewood, mahogany, Spanish cedar and walnut, not over three thirty-seconds of an inch in thickness.....	5 p.c.	7½ p.c.	7½ p.c.
508	Mouldings of wood, plain, gilded or otherwise further manufactured.....	17½ p.c.	22½ p.c.	25 p.c.
509	Vulcanized fibre, kartavert, indurated fibre, and like material, and manufactures of, n.o.p....	17½ p.c.	22½ p.c.	25 p.c.
510	Churns, n.o.p., brooms, whisks, washboards, pounders and rolling pins.....	15 p.c.	17½ p.c.	20 p.c.
511	Fishing rods, walking sticks and walking canes, of all kinds.....	20 p.c.	27½ p.c.	30 p.c.
512	Picture frames and photograph frames, of any material.....	20 p.c.	27½ p.c.	30 p.c.
513	Umbrella, parasol and sunshade sticks or handles, n.o.p.....	15 p.c.	17½ p.c.	20 p.c.
514	Coffins and caskets, and metal parts thereof...	17½ p.c.	22½ p.c.	25 p.c.
515	Show-cases, of all kinds, and metal parts thereof.	22½ p.c.	30 p.c.	35 p.c.
516	Blinds of wood, metal or other material, not textile or paper.....	20 p.c.	27½ p.c.	30 p.c.
517	Window shade or blind-rollers.....	22½ p.c.	30 p.c.	35 p.c.
518	Billiard tables, with or without pockets, and bagatelle and other game tables or boards, cues, balls, cue racks, and cue-tips.....	22½ p.c.	30 p.c.	35 p.c.
519	House, office, cabinet or store furniture of wood, iron, or other material, in parts or finished; wire screens, wire doors and wire windows; cash registers; window cornices and cornice poles of all kinds; hair, spring and other mattresses; curtain stretchers, furniture springs and carpet sweepers.....	20 p.c.	27½ p.c.	30 p.c.

GROUP 10.

Cotton, flax, hemp, jute and other fibres, and silk, wool, and manufactures thereof.

520	Batts, batting and sheet wadding of wool, cotton or other fibre, cotton warps and cotton yarns, dyed or not, n.o.p.....	17½ p.c.	22½ p.c.	25 p.c.
521	Grey cotton fabrics and fabrics of flax, unbleached, n.o.p.....	15 p.c.	22½ p.c.	25 p.c.
522	White cotton fabrics, and fabrics of flax, bleached, n.o.p.; tailors' hollandes of linen and towelling of linen or cotton in the web, coloured or not.....	17½ p.c.	22½ p.c.	25 p.c.

SCHEDULE A—Continued.

Tariff Items.		British Preferential Tariff.	Intermediate Tariff.	General Tariff.
523	Fabrics of cotton or flax, printed, dyed or coloured, n.o.p.....	25 p.c.	30 p.c.	32½ p.c.
524	Cotton duck, grey or white, weighing over eight ounces per square yard.....	15 p.c.	17½ p.c.	20 p.c.
524a	Seamless cotton or linen duck, in circular form, of a class or kind not made in Canada, for use in the manufacture of hose pipe.....	Free.	Free.	Free.
525	Stair linen, diaper, doylies, tray cloths, sheets, quilts, counterpanes, towels and pillow cases, of cotton or linen; uncoloured damask of linen or cotton in the piece, including uncoloured table cloths or napkins of linen or cotton....	20 p.c.	27½ p.c.	30 p.c.
526	White and cream coloured lace and embroideries, of cotton or linen.....	12½ p.c.	17½ p.c.	20 p.c.
527	Jeans, sateens and coutils, when imported by manufacturers of corsets and dress stays, for use exclusively in the manufacture of such articles in their own factories.....	12½ p.c.	17½ p.c.	20 p.c.
528	Webbing, non-elastic, when imported by manufacturers of suspenders for use exclusively in the manufacture of such articles in their own factories.....	12½ p.c.	17½ p.c.	20 p.c.
529	Prunella cloth of wool.....	Free.	Free.	Free.
530	Bolting cloth, not made up.....	Free.	Free.	Free.
531	Cloth such as is used for covering the outside of books, when imported for use exclusively in binding books, under regulations by the Minister of Customs.....	Free.	Free.	Free.
532	Coir and coir yarn; raw cotton or cotton wool not dyed; cotton yarns, number forty and finer.....	Free.	Free.	Free.
533	Waste or shoddy from cotton, woollen or other fabrics or from yarn or thread, machined, garnetted or prepared for use.....	7½ p.c.	10 p.c.	12½ p.c.
534	Cotton yarn, polished or glazed, when imported by manufacturers of shoe laces for use exclusively in the manufacture of such articles in their own factories.....	Free.	Free.	Free.
535	Cotton sewing thread in hanks.....	10 p.c.	12½ p.c.	15 p.c.
536	Cotton or linen thread, n.o.p.; crochet and knitting cotton.....	17½ p.c.	22½ p.c.	25 p.c.
537	Manufactures of cotton, hemp or flax, or of which cotton, hemp or flax is the component material of chief value, n.o.p.....	25 p.c.	30 p.c.	35 p.c.
538	Manufactures of jute, n.o.p.....	15 p.c.	• 22½ p.c.	25 p.c.
539	Fibre, Mexican, natural, and tampico or istle and vegetable fibres; fibrilla, flax fibre and flax tow; grass, manilla, Esparto or Spanish, and other grasses, and pulp of, including fancy grasses, dried but not coloured or otherwise manufactured; moss, Iceland, and other mosses, seagrass and seaweed, crude or in their natural state, or cleaned only; and kelp.	Free.	Free.	Free.
540	Hemp, dressed or undressed.....	Free.	Free.	Free.
541	Oakum of jute or hemp.....	Free.	Free.	Free.
542	Jute or hemp yarn, plain, dyed or coloured....	Free.	Free.	Free.
543	Linen yarn for the manufacture of towels and damask, when imported by manufacturers of such articles for use exclusively in the manufacture of such articles in their own factories.	Free.	Free.	Free.
544	Binder twine or twine for harvest binders.	Free.	Free.	Free.
544a	Articles which enter into the cost of the manufacture of binder twine or twine for harvest binders, when imported for such use exclusively by manufacturers who manufacture such twine only.....	Free.	Free.	Free.
545	Jute and jute butts; jute cloth, as taken from the loom, not coloured, cropped, mangled, pressed, calendered, nor finished in any way; and jute canvas, uncoloured.....	Free.	Free.	Free.
546	Jute cloth, uncoloured, not further finished than cropped, bleached, mangled or calendered.....	7½ p.c.	10 p.c.	10 p.c.

SCHEDULE A—Continued.

Tariff Items.		British Preferential Tariff.	Intermediate Tariff.	General Tariff.
547	Sail twine and canvas, of hemp or flax, when to be used for boats' and ships' sails.....	5 p.c.	5 p.c.	5 p.c.
548	Twine and cordage of all kinds, n.o.p.	20 p.c.	22½ p.c.	25 p.c.
549	Hammocks, lawn tennis nets, sportsmen's fish nets, and other articles manufactured of twine, n.o.p.	20 p.c.	27½ p.c.	30 p.c.
550	Sails for boats and ships.....	15 p.c.	22½ p.c.	25 p.c.
551	Horse clothing of jute, shaped or otherwise manufactured.....	20 p.c.	27½ p.c.	30 p.c.
552	Bags or sacks of hemp, linen or jute, and cotton seamless bags.....	15 p.c.	17½ p.c.	20 p.c.
553	Lamp wicks.	17½ p.c.	22½ p.c.	25 p.c.
554	Wool and the hair of the camel, alpaca, goat, and other like animals, not further prepared than washed, n.o.p.; noils, being the short wool which falls from the combs in worsted factories; and worsted tops, n.o.p.	Free.	Free.	Free
555	Wool, viz.:—Leicester, Cotswold, Lincolnshire, Southdown combing wools, or wools known as lustre wools and other like combing wools, such as are grown in Canada....per pound.	2 cents.	2½ cents.	3 cents.
556	Worsted tops made from such wools as are mentioned in the next preceding item.....	10 p.c.	12½ p.c.	15 p.c.
557	Yarns, woollen and worsted, n.o.p.	20 p.c.	27½ p.c.	30 p.c.
558	Yarns, composed wholly or in part of wool, worsted, the hair of the goat, or like animal, n.o.p., costing thirty cents per pound or over, when imported on the cop, cone or tube, or in the hank, by manufacturers of woollen goods for use exclusively in their own factories.....	12½ p.c.	17½ p.c.	20 p.c.
559	Wool or worsted yarns, when genapped, dyed or finished and imported by manufacturers of braids, cords, tassels, buttons and fringes for use exclusively in the manufacture of such articles in their own factories.	Free.	Free.	Free.
560	Yarns spun from the hair of the alpaca, and mohair yarn.....	Free.	Free.	Free.
561	Lastings, mohair cloth, or other manufactures of cloth, woven or made in pattern of such size, shape or form, or cut in such manner as to be fit only for covering buttons, when imported by manufacturers of buttons for use exclusively in the manufacture of such articles in their own factories.....	Free.	Free.	Free.
562	Oiled silk, and oiled cloth, and tape or other textile, india-rubbered, flocked or coated, n.o.p.	20 p.c.	27½ p.c.	30 p.c.
563	Women's and children's dress goods, coat linings, Italian cloths, alpacas, orleans, cashmeres, henriettas, serges, buntings, nun's cloth, bengalines, whip cords, twills, plains or jacquards of similar fabrics, composed wholly or in part of wool, worsted, the hair of the camel, alpaca, goat, or like animal, not exceeding in weight six ounces to the square yard, when imported in the grey or unfinished state for the purpose of being dyed or finished in Canada, under regulations prescribed by the Minister of Customs.....	15 p.c.	22½ p.c.	25 p.c.
564	Felt, pressed, of all kinds, not filled or covered by or with any woven fabric.....	15 p.c.	22½ p.c.	25 p.c.
565	Blankets, composed wholly of pure wool.....	22½ p.c.	30 p.c.	35 p.c.
566	Flannels, plain, not fancy; fabrics of wool or of cotton and wool, commonly described and sold as lustres, mohair, alpaca and Italian linings.	22½ p.c.	30 p.c.	35 p.c.
567	Fabrics, manufactures, wearing apparel and ready-made clothing, composed wholly or in part of wool, worsted, the hair of the goat, or other like animal, n.o.p.; cloths, doeskins, cassimeres, tweeds, coatings, overcoatings and felt cloth, n.o.p.	30 p.c.	35 p.c.	35 p.c.

SCHEDULE A—*Continued.*

Tariff Items.	British Preferential Tariff.	Intermediate Tariff.	General Tariff.
568 Undershirts, drawers and knitted goods, n.o.p.	22½ p.c.	30 p.c.	35 p.c.
568a Socks and stockings of all kinds.....	25 p.c.	32½ p.c.	35 p.c.
569 Stockinettes for the manufacture of rubber boots and shoes, when imported by manufacturers of rubber boots and shoes, for use exclusively in the manufacture of such articles in their own factories.	10 p.c.	12½ p.c.	15 p.c.
570 Mats, door or carriage, other than metal, n.o.p.	25 p.c.	30 p.c.	35 p.c.
571 Carpeting, rugs, mats and matting of cocoa, straw, hemp, or jute; carpet linings and stair pads.....	17½ p.c.	22½ p.c.	25 p.c.
572 Turkish or imitation Turkish or other floor rugs or carpets; and carpets, n.o.p.....	25 p.c.	30 p.c.	35 p.c.
573 Enamelled carriage, floor, shelf, and table oil-cloth, linoleum, and cork matting or carpets.	25 p.c.	32½ p.c.	35 p.c.
573a Church vestments of any material.....	12½ p.c.	17½ p.c.	20 p.c.
574 White cotton bobinet, plain, in the web.....	15 p.c.	22½ p.c.	25 p.c.
575 Embroideries, n.o.p.; lace, n.o.p.; braids n.o.p.; fringes, n.o.p.; cords; elastic, round or flat; garter elastic; tassels; handkerchiefs of all kinds; lace collars and all manufactures of lace; nets and nettings of cotton, linen, silk or other material, n.o.p.; shams and curtains, when made up, trimmed or untrimmed; corsets of all kinds; linen or cotton clothing, n.o.p.....	25 p.c.	32½ p.c.	35 p.c.
576 Silk, raw or as reeled from the cocoon, not being doubled, twisted or advanced in manufacture in any way; silk cocoons and silk waste.	Free.	Free.	Free.
577 Silk in the gum or spun, when imported by manufacturers of silk underwear or of woven labels, for use exclusively in the manufacture of such articles in their own factories.	Free.	Free.	Free.
578 Spun silk not coloured, n.o.p.; silk in the gum not more advanced than singles; tram or thrown organzine, not coloured.....	10 p.c.	12½ p.c.	15 p.c.
579 Sewing and embroidery silk; silk twist, and silk floss.....	17½ p.c.	22½ p.c.	25 p.c.
580 Black mourning crapes.....	12½ p.c.	17½ p.c.	20 p.c.
581 Velvets, velveteens, silk velvets, plush and silk fabrics.....	17½ p.c.	27½ p.c.	30 p.c.
582 Ribbons of all kinds and materials.....	22½ p.c.	32½ p.c.	35 p.c.
583 Manufactures of silk or of which silk is the component part of chief value, n.o.p.....	30 p.c.	35 p.c.	37½ p.c.

GROUP 11.

Miscellaneous.

584 Asphalt or asphaltum, solid; bone pitch, crude only; and resin or rosin in packages of not less than one hundred pounds.....	Free.	Free.	Free.
585 Coal and pine pitch, burgundy pitch; and coal and pine tar, crude, in packages of not less than fifteen gallons.....	Free.	Free.	Free.
586 Coal, anthracite; anthracite coal dust; coke. . .	Free.	Free.	Free.
587 Bituminous slack coal, such as will pass through a three-quarter inch screen, subject to regulations prescribed by the Minister of Customs.	per ton.	12 cents.	14 cents.

SCHEDULE A—Continued.

Tariff Items.		British Preferential Tariff.	Intermediate Tariff.	General Tariff.
	officers and men of His Majesty's Imperial navy, for their own personal use or consumption, on board their own ships.	Free.	Free.	Free.
709	Articles and other goods, the growth, produce or manufacture of Canada, returned to the exporter thereof after having been exported without having been advanced in value or improved in condition by any process of manufacture or other means; also quick-silver flasks, and other metallic receptacles for holding liquids, and oyster pails, after having been once exported from Canada.	Free.	Free.	Free
	Provided that the said articles and goods are returned within five years from time of exportation, subject to regulations prescribed by the Minister of Customs;			
	Provided also that any article or goods described in this paragraph, upon which an allowance of drawback has been made, shall not be admitted to entry except upon payment of duties equal to the drawback allowed;			
	Provided further that any of such goods or articles manufactured in bond or under Excise regulations in Canada and exported shall not be admitted to entry except upon payment of the Customs or Excise duties to which they would have been liable had they not been exported from Canada.			
710	Coverings, inside and outside, used in covering or holding goods imported therewith, shall be subject to the following provisions, viz.:—			
	(a) Usual coverings, containing free goods only; usual coverings, except receptacles capable of holding liquids, containing goods subject to a specific duty only, n.o.p.	Free.	Free.	Free.
	(b) Usual coverings, containing goods subject to any <i>ad valorem</i> duty, when not included in the invoice value of the goods they contain.	15 p.c.	20 p.c.	20 p c.
	(c) Provided that usual coverings containing goods subject to any <i>ad valorem</i> duty, if included in the invoice value of the goods they contain, and not charged separately on the invoice, shall be subject to the same rate of duty <i>ad valorem</i> as the goods they contain, and may be combined with the goods for valuation and duty on the Customs entry;			
	(d) Provided further that receptacles capable of holding liquids, when containing goods subject to a specific duty, shall be charged with the rate of duty to which the same would be subject if imported separately, except when the coverings and the goods contained therein are rated together in the Tariff item;			
	(e) Provided further that usual coverings designed for use other than in the <i>bona fide</i> transportation of the goods they contain, shall be charged with the rate of duty to which the same would be subject if imported separately;			
	(f) Provided also that the term coverings in this paragraph shall include packing boxes, crates, casks, cases, cartons, wrapping, sacks, bagging, rope, twine, straw or other articles used in covering or holding goods imported therewith, and the labour and charges for packing such goods, subject to regulations prescribed by the Minister of Customs.			

SCHEDULE A—*Concluded.*

Tariff Items.	British Preferential Tariff.	Intermediate Tariff.	General Tariff.
711 All goods not enumerated in this schedule as subject to any other rate of duty, and not otherwise declared free of duty, and not being goods the importation whereof is by law prohibited.....	15 p.c.	17½ p.c.	20 p.c.
Provided that duty shall not be deemed to be provided for by this item upon dutiable goods mentioned as 'n.o.p.' in any preceding tariff item;			
Provided further that when the component material of chief value in any non-enumerated article consists of dutiable material enumerated in this schedule as bearing a higher rate of duty than is specified in this tariff item, such non-enumerated article shall be subject to the highest duty which would be chargeable thereon if it were composed wholly of the component material thereof of chief value, such 'component material of chief value' being that component material which shall exceed in value any other single component material in its condition as found in the article.			

SCHEDULE B.

GOODS SUBJECT TO DRAWBACK FOR HOME CONSUMPTION.

Item No.	Goods.	When Subject to Drawback.	Portion of duty (not including special duty or dumping duty) payable as Drawback.

1008	Spiral spring steel.....	When used in the manufacture of railway spiral springs.....	99 “
1009	Steel.....	When used in the manufacture of cutlery, files, augers, auger bits, bit braces, hammers, axes, hatchets, scythes, reap- ing hooks, hoes, hay or straw knives, agricultural forks, hand rakes, skates, stove trimmings, bicycle chain and windmills.....	99 “
1010	Cloths, of wool, cotton, silk, ramie or unions, fifty inches or over in width and weighing not more than seven ounces per square yard, not rubbered or made waterproof.....	When used in the manufacture of mackintosh clothing.....	50 “
1011	Botany yarn, single, numbers thirty and finer, on mule cops, tubes or cones, or in hanks, dry spun on the French or Belgium systems, in white only, not doubled or twisted..	When used in the manufacture of socks and stockings and Jersey cloth.....	99 “
1012	Hat and cap linings.....	When used in the manufacture of hats and caps.....	99 “
1013	Fabrics of silk and satin, em- broidered or embossed chiffon, casket gimps and fringes.....	When used in the manufacture of burial caskets and burial robes.....	65 “

SCHEDULE B—*Concluded.*

Item No.	Goods.	When Subject to Drawback.	Portion of duty (not including special duty or dumping duty) payable as Drawback.
1014	Glass in sheet and in plate.....	When used in the manufacture of bent plate glass, bent sheet glass and silvered mirror plate	50 per cent.
1015	Rolled angles of iron or steel, nine and ten gauge, not over one and one-half inches wide.	When used in the manufacture of bedsteads.	99 “
1016	Stearine and caseine	When used in the manufacture of leather.....	99 “
1017	Lap welded tubing of iron or steel, not less than 2½ inches in diameter, threaded and coupled or not, testing one thousand pounds pressure per square inch.....	When used in casing water, oil and natural gas wells.....	99 “
		When used for transmission of natural gas under high pressure from gas wells to points of distribution.....	50 “
1018	Machinery imported after 1st July, 1906, and prior to 1st July, 1908, and other articles not machinery.....	When entering into the cost of tin plate, terne plate, and black sheets of iron and steel, number fourteen gauge or thinner.....	99 “
1019	Bituminous coal.....	When imported by proprietors of smelting works and converted at the works into coke for the smelting of metals from ores.....	99 “
1020	Galvanized wire netting, of a class or kind not made in Canada.....	When used in traps for the fisheries.....	99 “

SCHEDULE C.

PROHIBITED GOODS.

- 1201 Books, printed paper, drawings, paintings, prints, photographs or representations of any kind of a treasonable or seditious, or of an immoral or indecent character.
 - 1202 Reprints of Canadian copyrighted works, and reprints of British copyrighted works which have been copyrighted in Canada.
 - 1203 Coin, base or counterfeit.
 - 1204 Oleomargarine, butterine or other similar substitutes for butter, and process butter or renovated butter.
 - 1205 Tea adulterated with spurious leaf or with exhausted leaves or containing so great an admixture of chemical or other deleterious substances as to make it unfit for use.
 - 1206 Goods manufactured or produced wholly or in part by prison labour, or which have been made within or in connection with any prison, jail or penitentiary; also goods similar in character to those produced in such institutions, when sold or offered for sale by any person, firm or corporation having a contract for the manufacture of such articles in such institutions or by any agent of such person, firm or corporation, or when such goods were originally purchased from or transferred by any such contractor.
 - 1207 Animals suffering from any contagious disease.
 - 1208 Metallic trading checks in circular form.
 - 1209 Any goods—(a) which, if sold, would be forfeited under the provisions of Part VII. of the Criminal Code; or,
 - (b) manufactured in any foreign state or country which bear any name or trade mark which is or purports to be the name or trade mark of any manufacturer, dealer or trader in the United Kingdom or in Canada, or in any other British Country, unless such name or trade mark is accompanied by a definite indication of the foreign state or country in which the goods were made or produced;
- Provided that for the purposes of its item if there is on any goods a name which is identical with or a colourable imitation of the name of a place in the United Kingdom or in Canada, or in any other British Country, such name, unless it is accompanied by the name of the state or country in which it is situate, shall, unless the Minister decides that the attaching of such name is not calculated to deceive (of which matter the Minister shall be the sole judge), be treated as if it was the name of a place in the United Kingdom or in Canada, or in any other British Country.
- 1210 Posters and hand-bills depicting scenes of crime or violence.
 - 1211 Stallions and mares of less value than \$50 each.

Prohibited Goods. (Page 1487.)

APPENDIX TO THE CUSTOMS TARIFF, 1907.

No. 1.—THE DUMPING CLAUSE.

The Provisions of the Customs Tariff, 1907, in regard to Special Duty or Dumping duty are as follows:—

6. In the case of articles exported to Canada of a class or kind made or produced in Canada, if the export or actual selling price to an importer in Canada be less than the fair market value of the same article when sold for home consumption in the usual and ordinary course in the country whence exported to Canada at the time of its exportation to Canada there shall, in addition to the duties otherwise established, be levied, collected and paid on such article, on its importation into Canada, a special duty (or dumping duty) equal to the difference between the said selling price of the article for export and the said fair market value thereof for home consumption; and such special duty (or dumping duty) shall be levied, collected and paid on such article although it is not otherwise dutiable.

Provided that the said special duty shall not exceed fifteen per cent *ad valorem* in any case;

Provided also that the following goods shall be exempt from such special duty, viz.:—

- (a) Goods whereon the duties otherwise established are equal to fifty per cent *ad valorem*;
- (b) Goods of a class subject to excise duty in Canada;
- (c) Sugar refined in the United Kingdom;
- (d) Binder twine or twine for harvest binders manufactured from New Zealand hemp, istle or tampico fibre, sisal grass, or sunn, or a mixture of any two or more of them, of single ply and measuring not exceeding six hundred feet to the pound.

Provided further that excise duties shall be disregarded in estimating the market value of goods for the purposes of special duty when the goods are entitled to entry under the British Preferential Tariff.

2. 'Export price' or 'selling price' in this section shall be held to mean and include the exporter's price for the goods, exclusive of all charges thereon after their shipment from the place whence exported directly to Canada.

3. If at any time it appears to the satisfaction of the Governor in Council, on a report from the Minister of Customs, that the payment of the special duty by this section provided for is being evaded by the shipment of goods on consignment without sale prior to such shipment, the Governor in Council may in any case or class of cases authorize such action as is deemed necessary to collect on such goods or any of them the same special duty as if the goods had been sold to an importer in Canada prior to their shipment to Canada.

4. If the full amount of any special duty of customs is not paid on goods imported, the customs entry thereof shall be amended and the deficiency paid upon the demand of the collector of customs.

5. The Minister of Customs may make such regulations as are deemed necessary for carrying out the provisions of this section and for the enforcement thereof.

6. Such regulations may provide for the temporary exemption from special duty of any article or class of articles, when it is established to the satisfaction of the Minister of Customs that such articles are not made or sold in Canada in substantial quantities and offered for sale to all purchasers on equal terms under like conditions, having regard to the custom and usage of trade.

7. Such regulations may also provide for the exemption from special duty of any article when the difference between the fair market value and the selling price thereof to the importer as aforesaid amounts only to a small percentage of its fair market value.

Regulations by Order in Council and by the Department of Customs respecting Invoices, Entries, and Special Duty:—

1. Invoices in duplicate properly certified shall be delivered at the Custom House with the bills of entry for all imported goods.

2. Every such invoice shall contain a sufficient and correct description of the goods, and in respect of goods sold by the exporter shall show in one column the actual price at which the articles have been sold to the importer, and in a separate column the fair market value of each article as sold for home consumption in the country of export.

3. The *price* and *value* of goods in every case aforesaid are to be stated as in condition packed ready for shipment at the time when, and at the place whence, the goods have been exported directly to Canada.

4. When the value of goods for duty purposes is determined by the Minister of Customs under the provisions of the Customs Act, by reason of the goods being exported or imported under unusual conditions, the value so determined shall be held to be the fair market value thereof.

5. In making Customs Entry the 'special duty' may be shown by itself in the 'net duty' column of the entry on the line below the article subject to special duty or on the line below continuous numbers of articles subject to special duty.

6. Goods of a class or kind made in Canada are subject to special duty, when sold for exportation to Canada at a less price than for home consumption in the country of export, whether such goods be otherwise free of duty or subject to specific or *ad valorem* duties—with the exceptions stated in Clause 6 of the Tariff as hereinbefore quoted.

7. *By Regulations in force from May 1st, 1907.*—Under the special duty provisions of the Customs Tariff, the special duty is not to apply in the following cases, viz.:—

(a) In respect of iron and steel, rolled, drawn or polished when the difference between the fair market value and the selling price of such iron and steel to the importer in Canada does exceed five per cent of their fair market value;

(b) In respect of other goods when the difference between the fair market value and the selling price of the goods to the importer in Canada does not exceed seven and one-half per cent of their fair market value.

Provided that the whole difference shall be taken into account for special duty purposes when exceeding five per cent in the case of such iron and steel and when exceeding seven and one-half per cent in other cases.

8. *Bona fide samples admitted without Special Duty.*—Articles of merchandise for use *bona fide* as samples for sale of similar goods are to be admitted without *special* duty—(Subject, however, to *ordinary* duties as heretofore).

9. *Advance in Market Value after purchase of goods by importer not subject to Special Duty.*—The amount of any advance in the market value of goods between the time of their purchase by the importer and the date of their exportation to Canada shall not be subject to special duty after 9th November, 1904, provided the goods have been exported in the usual course and the actual date of purchase established to the satisfaction of the collector by contracts or other sufficient documents produced for his inspection and attested to.

Provided, however, in respect of goods subject to an *ad valorem* duty, that the *ordinary* duty shall be collected (as heretofore) on the fair market value of the goods as at the time of their direct exportation to Canada—under the provisions of Section 58 of the Customs Act.

10. *Rule to be observed (for Special Duty purposes only) in comparing 'Fair Market Value' with 'Export Price.'*—In computing the difference for special duty purposes between the 'Fair Market Value' in the country of export and the 'Selling price to the importer in Canada,' the fair market value of goods is to be estimated on the usual credit basis, except

when the article is universally sold in the country of export for cash only, in which case the fair market value is to be estimated on a cash basis.

Provided that a *bona fide* discount for cash not exceeding two and one-half per cent when allowed and deducted by the exporter on his invoice may be allowed in estimating the fair market value of goods for duty purposes.

Examples

(1) Hats sold for Home Consumption at \$100 on Credit, subject to 8 per cent *Cash* discount, would be liable to special duty if sold to a purchaser in Canada on usual credit at \$92, but would not be liable to special duty if sold to a purchaser in Canada for \$92 Cash.

(2) Machinery sold for Home Consumption at \$100 on Credit, subject to $2\frac{1}{2}$ per cent *Cash* discount, would not be liable to special duty if sold to a purchaser in Canada for \$91 Cash, as the 'difference' does not exceed $7\frac{1}{2}$ per cent after raising the *Cash* price (\$91) by $2\frac{1}{2}$ per cent to its *Credit* equivalent.

No. 2.—REGULATIONS RESPECTING THE SURTAX UNDER THE CUSTOMS LAWS OF CANADA.

The Minister of Customs has decided that articles which are the growth, produce or manufacture of Germany, and any article the chief value of which has been produced in Germany, come under the operation of the Customs Laws of Canada respecting surtax, subject to the following regulations, viz.:—

1. Articles which are the growth, produce or manufacture of Germany, when imported into Canada, shall be subject to a surtax over and above the duties specified in Schedule 'A' to the Customs Tariff, 1907, such surtax in every case to be one-third of the duty specified in the said Schedule.

2. Such surtax shall also apply to any article imported into Canada when the chief value of the article was produced in Germany, although it may have been improved or advanced in value by the labour of another country—notwithstanding the provisions of the British Preferential Tariff and regulations thereunder.

In determining whether or not any article imported into Canada, which has been produced, improved or advanced in value by the labour of any country other than Germany, is subject to the surtax by reason of a portion of the value thereof having been produced in Germany, the fair market value of the article or material grown, produced or manufactured in Germany which has entered into the manufacture of the article imported into Canada, shall be held to be the value produced in Germany within the meaning of the Tariff Act respecting the surtax.

3. Invoices of goods imported into Canada shall be further certified and signed by exporters in all countries in one of the following forms, as hereinafter prescribed, viz.:—

Further Certificate from exporters prescribed to be written, printed or stamped on all invoices of goods for entry under the British Preferential Tariff in Canada, and to be subscribed by the persons heretofore authorized to make and sign 'Preferential Certificates.'

(K)

'Whereas, German goods are subject to a surtax in Canada, I certify that the chief value of none of the articles included in this invoice was produced in Germany.'

(Signature).....Exporter.

Further certificate from exporters (in all countries) prescribed to be written, printed or stamped and subscribed on invoices of goods exported to Canada, except such goods as are admitted under the British Preferential Tariff in Canada:—

(L)

'Whereas, German goods are subject to surtax in Canada, I certify that none of the articles included in this invoice are the produce or manufacture of Germany, and that the chief value of none of said articles was produced in Germany—save and except all articles opposite which the word "Germany" is written on this invoice.'

(Signature).....Exporter.

EXPLANATORY NOTES.

The above certificate 'K' may be added as the last clause in the certificates heretofore authorized for the British Preferential Tariff in Canada, or may be certified to *separately* on the invoice.

The above certificate 'L' may be added as the last clause in the certificates 'M' or 'N' heretofore authorized or may be certified to *separately* on the invoice.

The following illustrations are furnished as to certain cases (amongst others), to which the surtax will apply under the foregoing regulations, viz.:—

(1) Take the case of neckties made in Great Britain or in any other country, from silk fabric manufactured in Germany (out of materials produced in Germany or elsewhere). If the fair market value of the silk fabric as sold by the exporter in Germany to the importer in Great Britain or other country, represents more than fifty per cent of the value of the neckties in condition ready for export to Canada, the neckties would be subject to the surtax.

(2) Take the case of hosiery made in Great Britain or in any other country, from hosiery yarns spun in Germany (from wool produced in Germany or elsewhere). If the fair market value of the hosiery yarn as sold by the exporter in Germany to the importer in Great Britain or other country represents more than fifty per cent of the value of the hosiery in condition ready for export to Canada, the hosiery would be subject to the surtax.

(3) Take the case of velveteen dyed and finished in Germany from materials woven and produced in another country. Such dyed and finished velveteen when imported into Canada would be subject to surtax as a manufacture of Germany.

JOHN McDOUGALD,
Commissioner of Customs.

Department of Customs, Canada.
Ottawa, November 30, 1906.

File No. 62,288.

No. 3.—MEMORANDUM.

DEPARTMENT OF CUSTOMS, CANADA,
OTTAWA, August 20, 1904.

TEMPORARY ADMISSION OF CANADIAN GOODS RETURNED FOR REPAIRS.

By Order in Council of this date, the following Regulations are made and established, in regard to the temporary admission of articles of Canadian manufacture, returned to be repaired in Canada and again exported, viz.:—

REGULATIONS.

Articles of Canadian manufacture may be admitted temporarily without duty, when returned to Canada for repairs and to be again exported; provided, that the articles shall be identified to the satisfaction of the Collector of Customs at the port of re-entry into Canada, and that a sufficient bond for double the amount of the Customs duty be delivered to the Collector as security for the exportation of the articles or payment of duty thereon, within six months from the time of entry.

JOHN McDOUGALD,
Commissioner of Customs.

No. 4.—MEMORANDUM.

CUSTOMS DEPARTMENT,

OTTAWA, 23rd April, 1897.

*Collector of Customs**Port of*.....

You are hereby advised that Machinery or parts of Machines, valued at not less than ten dollars, found necessary to be exported for repairs, and which have been duly exported, may be entered for duty at the value of such repairs if identified upon re-importation within one year—provided application for outward entry and examination at Customs have been duly made. The Certificate of identification endorsed on the export application is to be forwarded with the entry inwards to the Customs Department, Ottawa.

The application for examination and outward entry may be in the following form:—

.....189.....

To the Collector of Customs at.....

Application is hereby made for the examination and entry of the following machinery found necessary to be exported for repairs and valued at not less than \$10—consigned, marked and described as below:—

.....Applicant....

Examined and marked.....189.....

.....Customs Officer.

Identified upon re-importation, this.....189.....

.....Customs Officer.

It will not be necessary to send the application for export to this Department until it is attached to the entry inwards of the machinery returned.

Entries for duty on value of repairs only are not authorized except in the case of *Machinery or parts of Machines* found necessary to be exported for repairs (and valued at not less than \$10) under the foregoing regulations.

JOHN McDOUGALD,

Commissioner of Customs.

No. 5.—THE EXPORT ACT.

EXTRACT FROM CHAPTER 50 OF THE REVISED STATUTES, 1906.

Section 5.

The export in the carcass, or parts thereof, of,—

- (a) deer, except as authorized by regulation of the Governor in Council made under the authority of the Customs Act; and,
- (b) wild turkeys, quail, partridge, prairie fowl and woodcock

is hereby declared unlawful and prohibited, and any such article so attempted to be exported may, on reasonable cause of suspicion of intention to export, be seized by any officer of Customs, and, if such intention is proved, shall be dealt with as for breach of the customs laws: Provided, that this section shall not apply to the export, under such regulations as are made by the Governor in Council, of any carcass or part thereof of any deer raised or bred by any person, company or association of persons upon his or their own lands.

Section 6.

Any person exporting or attempting to export in the carcass, or parts thereof, any deer, wild turkeys, quail, partridge, prairie fowl or woodcock, contrary to the provisions of this Act, shall for each such offence incur a penalty of one hundred dollars, and the article so exported or attempted to be exported shall be forfeited and may be seized by any officer of Customs.

No. 6.—THE FOLLOWING REGULATIONS RESPECTING THE EXPORT OF DEER, SHOT FOR SPORT BY PERSONS NOT DOMICILED IN CANADA, HAVE BEEN MADE AND ESTABLISHED, VIZ.:—

1. Deer when shot for sport under Provincial or Territorial Authority in Canada, by any person not domiciled in Canada may be exported under the following conditions and limitations:—

1. The deer may be exported only at the Customs Ports of Halifax, Yarmouth, Macadam Junction, Quebec, Montreal, Ottawa, Kingston, Niagara Falls, Fort Erie, Windsor, Sault Ste. Marie, Port Arthur, and such other Ports as shall from time to time by the Minister of Customs be designated for the export of deer.

2. The exportation of deer in the carcase or parts thereof (except as to cured deer heads and hides of deer) shall be permitted only during or within fifteen days after the 'open season' allowed for shooting deer under the laws of the Province or Territory where the deer to be exported has been shot.

3. No person shall in one year export more than the whole or parts of two deer, nor shall exportation of such deer be made by the same person on more than two occasions during one calendar year.

4. Deer in the carcase or any part thereof which has been killed in contravention of any Provincial or Territorial law shall not be exported, nor shall any deer in the carcase or parts thereof be exported without the permit of the Collector of Customs accompanying the shipment.

5. A person not domiciled in Canada, who has shot deer for sport and not for gain or hire, under Provincial or Territorial Authority may make an export entry in duplicate of deer in the carcase or parts thereof so shot by him and allowed to be exported—upon subscribing and attesting before a Collector of Customs a Declaration in the following form to be annexed to said export entry, viz.:—

(AS PER FORM IN APPENDIX 'B.')

6. The exporter shall produce his license or permit for shooting deer under Provincial or Territorial Authority to the Collector of Customs before the exportation of the deer and the Collector shall endorse thereon a description of the quantity and parts entered for exportation.

The Collector of Customs at any Customs Port of Entry designated for the Export of Deer, upon receiving the said export entries duly completed, may thereupon under the seal of the Custom House, issue his permit for the exportation of the deer, if satisfied as to the identity of the sportsman and that the exportation is not prohibited.

Memo 1063, B.

JOHN McDOUGALD,
Commissioner of Customs.

DEPARTMENT OF CUSTOMS, OTTAWA, Aug. 18, 1899.

APPENDIX 'B.'

FORM OF DECLARATION TO BE MADE IN CONNECTION WITH THE EXPORT OF DEER, SHOT FOR SPORT BY PERSONS NOT DOMICILED IN CANADA.

I, of
do solemnly and truly declare that the deer in the carcass or parts thereof described in the annexed Export Entry have been shot by me at in Canada, for sport and not for gain or hire, under Authority of the License or Permit issued under Provincial or Territorial Authority herewith exhibited; that I am not domiciled in Canada; that I have not exported directly or indirectly within this calendar year *deer* in the carcass or parts thereof, shot by me in Canada during the present season, except as follows, viz.:—

(1)*.
.....
.....
.....
.....

that the deer described in the annexed Export Entry together with the deer heretofore exported by me within the present calendar year are not parts of more than two deer; and I verily believe that the exportation of the deer described in the annexed entry is not prohibited.

.....
(Signature of the Exporter.)

Declared before me at }
this day of }

.....
Collector of Customs.

(1) * Parts exported and place of exportation.

No. 7.—BOUNTIED ARTICLES PROHIBITED FROM EXPORTATION
WITHOUT REFUND OF BOUNTY.

(UNDER THE CUSTOMS ACT AMENDMENT OF 1907.)

Every person who desires to export any article manufactured in Canada which is subject to a bounty from the Government of Canada when for home consumption and not for exportation including steel blooms and steel billets made in Canada, shall file his written application with the Collector at the nearest Custom House for permission to export the same. Such application shall be accompanied by the affidavit of a person having a knowledge of the facts, setting forth and describing the articles proposed to be exported and establishing to the satisfaction of the Collector that bounty has not been paid and will not be claimed on or in respect of the said described articles, or if bounty has been paid thereon or in respect thereof, that the sum has been refunded to the Government. The Collector may then grant his permission for the exportation of the said described articles. If any such articles be laden in any railway carriage or other vehicle or vessel for the purpose of being exported, without the permission of the Collector of Customs as aforesaid, the same shall be seized and forfeited.

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, &c., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(Mr. J. B. Jackson.)

NORTH BRITISH AND MERCANTILE BUILDINGS,

EAST PARADE, LEEDS, ENG., March 26, 1907.

POTTERY.

The following taken from the report of the Tariff Commission issued on the 23rd of March, 1907, will be of interest in regard to this trade:—

‘The world’s use of pottery ware has undergone great expansion in recent years, but the British pottery industry has not expanded accordingly, and has failed to keep pace with the home demand. Foreign pottery manufactures, however, are largely dependent upon British clays; and the export of this British raw material to foreign pottery manufacturers has more than quadrupled in the last 30 years. The British export trade in pottery has remained practically stationary for the last 25 years, while the export trade of the chief foreign competitors has shown great increase. The United States continues to be our chief export market. But British exports to that country have declined especially since the imposition of the McKinley and Dingley tariffs; and the decline in the last 15 years has been 40 per cent, while German exports to the United States have, on the other hand, increased 160 per cent in the last six years. British exports to Germany have fallen away from the average of the seventies, and are now considerably below the average of the last ten years. In the case of Canada the increase has been 100 per cent in the last 25 years, and has been especially marked since the establishment of preference; in the case of Australia, where there is no preference, there is a heavy decline; and South Africa, where there is a preference, now approaches other self-governing colonies in importance as a market for British pottery. Foreign pottery manufacturers are, however, gaining an increasing hold upon British colonial markets.

British exports to South American markets show an upward tendency, and the increase in the case of the Argentine is most marked in the last two or three years. Germany would also seem to be the most successful in her South American trade.

As regards the home trade, the report draws attention to the steady increase in the importation of foreign pottery in the last 25 years. The imports have nearly doubled in that period, the chief increases being in imports from Germany. The feature of this foreign competition in British home markets, of which the greatest complaint is made in the evidence of manufacturers, is the sale of imported pottery regardless of cost price. Instances are given in which German manufacturers having their own home market secure, disposed of their surplus production at ‘less money than the British manufacturer pays for labour alone upon similar articles.’ This foreign “dumping” is frequently coupled with the piracy of British designs, and the effect upon British trade is often disastrous. British pottery workers have suffered to the extent of 25 per cent in their wages because of short time for some years past, and despite the greatly increased use of pottery ware there are considerably fewer work-people employed in some of the districts now than 20 years ago. Allowing for the effect of the greater use of machinery, it is generally agreed,’ says the report, ‘that foreign competition, and especially dumping, keeps the output of some of the factories down to one-half of their capacity.’

J. B. JACKSON.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

*(Mr. P. B. Ball.)*39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., March 25, 1907.

PHOSPHORUS IN CRUDE ACETYLENE.

A matter which will be of interest to the manufacturers of calcium carbide in Canada is now engaging the serious attention of the British Acetylene Association. The association proposes that merchantable calcium carbide shall in future be of such purity that the crude acetylene generated therefrom shall not contain more than 0.05 per cent by volume of phosphine (phosphoretted hydrogen), with a so-called 'analytical latitude' of 0.01 per cent. The first idea was to make that limit 0.04 per cent, following the lead of the Prussian State Railways and the German Acetylene Association. At a meeting of the International Acetylene and Carbide Committee, however, held in Paris last December, the higher limit was adopted for international trade in carbide; and the British Association has preferred the 0.05 per cent figure.

NEW PATENTS AND DESIGNS BILL.

The text of the new Patents and Designs Bill has now been published, and is intended to prevent the following abuses:—

1. The taking out of patents in the United Kingdom by foreigners, not for the purpose of working them here, but in order to prevent them being worked.
2. The expensiveness of litigation, which makes it possible for a powerful foreign syndicate to crush a comparatively poor British inventor out of existence.
3. The securing of patents in vague, ill-defined terms, especially in the case of chemicals, by foreign syndicates, which makes it possible to initiate litigation on the plea of infringement of patents.
4. The licensing of British manufacturers by foreigners to work a patent on condition that no subsequent improved patent can be used by them for a long term of years.

P. B. BALL.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B., YOKOHAMA, March 15, 1907.

MONTHLY RETURN OF FOREIGN TRADE.

The following is a comparative statement of the value of some of the principal items of export and import between Canada and Japan, as shown by the Monthly Return, for the one month ending January 31, of the present and the previous year:—

Exports to Canada.

	1907.	1906.
Silk tissues, habutae....	\$14,015	\$7,365
Silk handkerchiefs	880	4,630
Cotton tissues	233	276
Mats and mattings for floor (Hanagoza)	11,549	5,121
Porcelain and earthenware	7,523	3,187
Lacquered ware.....	272	194
Tea	23,251	6,304
Rice	31,427	7,362
Camphor	348	1,515

Imports from Canada.

	1907.	1906.
Flour.....	\$3,613	\$12,238

The 'principal items' given in the Monthly Return number only twenty-five of imports and twenty-five of exports. For information respecting the lesser and numerous items making up the aggregate of trade the Annual Return has to be awaited.

GENERAL TRADE RETURNS.

	Principal Imports.		
	For January, 1907, value.	For January, 1906, value.	
	\$	\$	
Flour, wheat.....	199,576	794,227	
Butter.....	1,910	6,067	
Salted salmon.....	107,121	127,509	
Condensed milk.....	71,666	60,179	
Fertilizers.....	1,012,928	532,537	
Leather, sole.....	43,125	90,210	
Lead, pig, ingot and slab.....	49,426	88,354	
Printing paper.....	92,687	140,586	
Cotton duck.....	3,527	7,138	
Cotton prints.....	65,329	33,132	
Cotton satins and Italians.....	68,132	84,422	
White shirtings.....	38,593	94,983	
Gray shirtings.....	31,236	284,387	
Pulp, wood.....	58,503	107,769	
TOTAL IMPORTS.		TOTAL EXPORTS.	
January, 1907, value.	January, 1906, value.	January, 1907, value.	January, 1906, value.

20,177,588	17,111,659	14,190,462	12,491,592

THE RICE MARKET.

It is proposed, at the present session of the Japanese parliament, to increase the tariff upon cleaned rice from the general duty of 32 cents to 50 cents per 133 pounds. Japan besides being a large producer and exporter of rice is also a large importer. The Japanese farmer sells the rice of his own growing, which is of high quality and commands a high price, and buys the imported article because it is cheaper.

Prior to ten years ago the bulk of rice was imported uncleaned. Since that time the uncleaned importation has fallen away to 4 per cent last year. The cause of this change is alleged to be that the profit realized by the trade, upon the cleaned, was about 8 cents per 133 pounds more than upon the uncleaned, or 'paddy.' This proposed increase of duty has a protectionist aspect. The idea is that it will build up the rice-milling industry without increasing the cost of this staple article of food to the Japanese consumer.

At Kobe, the chief rice trading centre, the Imported Rice Dealers' Guild are taking steps to oppose the measure to the utmost, and to that end are inviting the support of the associated guilds. The argument in substance is that the preference for cleaned or hulled rice is a long continued and natural development of trade; that the increase of duty will not create a trade preference for the unhulled product, and will therefore advance the cost of food to the masses.

As affecting the present rice market and the early outlook, much speculation is said to be going on, amongst those who are interested, on account of the anticipated scarcity of supply this year owing to the small quantity of stock which is supposed to have been carried over from last year. Experience during ten years past tends to show that the supply would invariably increase in the year following that in which a smaller supply was available. Last year's supply did not exceed 40 million koku, therefore it is believed that only a small stock has been carried over to this year. Unless, therefore, this year's crops turn out exceptionally good there would be a great increase in the importation of foreign rice. According to official returns the production of rice for 1906 is put at 46 million koku, which is a little more than the normal output, whereas private investigations agree in estimating it at far below the average harvest. At any rate, the general belief appears to exist that a large amount of foreign rice will be imported this year. The quotations for forward delivery have now risen to \$8.50 per koku (nearly 5 bush.) and brisk speculation is going on.

THE COTTON MANUFACTURE.

At the annual general meeting of the Kobe Board of Trade, on the 27th ult., the president in his address remarked that the 'cotton mills of Japan during 1906 had a most successful year, their production being sold out for some months ahead almost all the year round. Large dividends were earned by the better class of spinning mills, and a considerable increase of spindles would be made this year. Prices of yarns dropped somewhat in the summer months, but advanced towards the end of the year. The quantity exported was some 1,000 piculs (1 picul=133 lbs.) less than for 1905, though the value shows an increase of ¥1,500,000. The market generally was in a very healthy condition, and with good demand from China on account of the increase in the price of silver, mills generally are in a most flourishing condition, and one or two have made arrangements in consequence for an increase of capital.' From another source it is held that the cotton spinning industry, which made considerable progress after the Japan-China war, does not indicate so great a relative expansion under the influence of the present speculative mania as some other industries.

The demand for cotton yarn and cotton cloth for home consumption is increasing year after year, and the export mainly to the Asiatic mainland is also increasing. In all respects, there is assurance felt that new companies have a promising future.

IMPROVING POULTRY.

The Department of Agriculture and Commerce is taking measures to promote the breeding of foreign fowl in Japan. In the *Official Gazette* there is an announcement that eggs or chickens will be given to applicants on a system of deferred payments. At present eggs only are available, but in due time fowl also may be obtained. Nine kinds of fowl are at present indicated. It is expected that the scanty varieties hitherto existing in Japan will soon be largely supplemented.

LUMBER IN JAPAN.

The suggestion of Japan as a lumber market is usually met by reference to the timber and lumbering capabilities and opportunities in Hokkaido, meaning the northern of the main islands of Japan. It does not appear that any authoritative survey has been made, or that there are statistics available, of the timber wealth of northern Japan. Occasional reports of operations there, however, if collected and pieced together would give much needed information. For example, the Otaru Lumber Company, Limited, recently held their annual meeting, at which the net earnings were put at 40 per cent, and a dividend of 15 per cent was declared, and a resolution passed to increase the capital from 1,500,000 to 6,000,000 yen.

From the report it is stated that 'the actual operations in the future, the immediate result of what is commonly known as the winter term covering the intervening months between November and April or May the following year, include 1,500,000 railway sleepers and 4,500,000 cubic feet of lumber, and of this lot 600,000 pieces of the former and 130,000 cubic feet of the latter have already been concentrated in a convenient locality, and with marked symptoms of a large demand in the near future a prosperous year is almost assured. Of sleepers, 1,200,000 pieces have already been booked, and of this quantity about one half will be exported to Mexico, and the other to China.

'The forest area available in Hokkaido exceeds 4,000,000 cho (1 cho=2.45 acres), and the yearly lumbering of nearly 200,000,000 cubic feet cannot materially reduce its productive power as these figures are based on the alternate cutting system extending over a period of one hundred years, and which is ample time for the full growth of the trees that are to replace those cut. Needless to say the calculations are all the result of years of study and personal experience devoted to this industry, and the more we go into it the more are we convinced of the very bright future in Hokkaido.'

ALEX. MACLEAN.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No. 14, BUND, ROOM B, YOKOHAMA, March 15, 1907.

Waste and loss in transportation of flour to ports in the Orient, arising from careless handling in course of discharge from the vessel, or from insufficient strength of material of the bags in which the custom of the trade requires that flour should be marketed, has been the subject of much complaint. A judgment of the British court at Shanghai, of interest to the flour trade, was delivered on the 9th of this month. An importing firm operating in Japan and China had received from an American port by a leading transportation company, a consignment of 100,000 sacks of flour. When delivery was made, exception was taken by the consignee firm to the loss from damaged packages, amounting to 3,523 bags. It was provided in the usual printed form of bill of lading that the steamship company should not be responsible in case of loss or damage from the insufficiency of packages. The plaintiffs in the case refused to accept the damaged part of the shipment, and entered suit for Tls. 4,932.20 (1 tael =75 cents), being the value of all the damaged bags at Tls. 1.40 per bag of 49 lbs.

The issue hinged upon three points. The fair percentage of loss; the sufficiency of the bags; and the handling of the property in question. The court held that the

percentage of loss was not fair and reasonable, but excessive and if allowed would go far to impair and destroy trade; further, that the bags were sufficient in strength, being of what was known to the trade as 'standard quality' and in general use; and further, held that the loss in this case was caused by unloading in great haste and in a careless and reckless manner. Judgment was therefore for the amount claimed with costs.

SUGAR FROM SOUTH AFRICA TO JAPAN.

An interesting effort by Japanese interests to promote trade with South America, like such enterprises generally at the outset, is so far likely to call for perseverance and patience. The South American liner *Glenfarg* of the Toyo Kisen Kaisha (Oriental Steamship Co.) arrived at Yokohama recently from Peru with a cargo of raw sugar, about 2,500 tons. In order to induce traffic the company cut the regular rate of thirty shillings per long ton to twenty shillings. The consignees, however, complain that the Peruvian sugar is still unable to compete with that from Java. The cost of Peruvian sugar c.i.f. Japan ports is \$3.20 per 133 lbs., excluding tariff, landing charges, and consumption tax, &c., which, if added, brings the cost up to \$6.40. The cost of Java sugar, including all charges, is about \$5.75 in the present market. Under these circumstances, the future importation of Peruvian sugar is not encouraging.

Sugar refining is regarded as a desirable business, and a rapidly growing one, in this country. The importation of raw sugar for the year 1906 amounted to 23,725,947 yen (1 yen=50 cents), of which nearly four-fifths came from Dutch India.

MERCHANT MARINE CONSTRUCTION.

The shipbuilding business in Japan according to current reports, has been showing unprecedented activity of late. The Mitsui Bishi and Kawasaki yards are full with orders. Owing to the increase of wages and the advance in the price of imported materials necessary for shipbuilding, however, it is said to have been found cheaper to order a steamer from England than to build in Japan, unless a shipbuilding bounty is granted.

PROPOSED SHANGHAI EXHIBITION.

Steps are being taken to arrange for the holding of an international exhibition of foreign manufactures in Shanghai. It is understood, says the *N.C. Daily News*, that the matter is in the hands of the China Association, and it is proposed to secure the co-operation of the Shanghai General Chamber of Commerce, and of the American, German and Japanese Associations. On the receipt of favourable replies from these bodies, there will be no delay in learning the measure of support likely to be secured from manufacturers in the United Kingdom and the British colonies, in Europe, America, and Japan. It should be possible to hold the Exhibition towards the end of 1908.

KOREAN COTTON FOR JAPAN.

The cotton growing prospect in Korea is reported by the newspapers to be very encouraging. Last season a small quantity of upland seed of American growth was sown in an experimental way, covering something less than two hundred acres, by a Japanese company. The return is stated to be exceptionally large, much larger than normal in cotton producing lands, and the quality is described as being well suited for mixture in the spinning of fine yarns, being valued at upwards of 23 yen or \$11.50 per 100 lbs. The present experiments have produced to the value of £400 sterling per acre, which by the same statement is said to be about twice the average return per acre of cotton in the United States.

This, it is admitted, would appear incredible were it not that the crop in question had been cultivated to a degree that was not practicable in the case of the American crop, because of the difference in the cost of labour. It is conceded that large areas in Korea could perhaps not be so highly cultivated as in the case of this experiment. But where labour is so abundant, and its application capable of producing such striking results, the future of the cotton-growing industry cannot be well over-estimated. The estimate for next year is put at 100,000 bales; the prediction therefore is that if 100,000 bales per annum can be produced, half of the present Japanese consumption of American cotton will be grown in Korea.

THE COAL TRADE.

The principal item of cargo by the Canadian Pacific Railway Steamship *Monteagle*, hence to Vancouver on the 9th inst., was some 3,300 tons of coal from Nagasaki. This is not, as some of the newspapers indicate, an incident in the prudent safe-guarding of their coal supply by the company in consequence of the lately prevailing strike at the coal mines in Western Canada. At present prices, coal does not seem to be a likely subject of trade in the early future either way across the Pacific.

SILK PIECE GOODS EXPORT.

The foreign houses in the silk export business appear to be unanimous about organization for the protection of their business interests. The varying conditions of trade are as unsettling in silk as in any other commodity, while the amount of capital turn-over is larger than in any other line of export. A committee appointed by a duly convened meeting are engaged in preparing articles of association and by-laws, which will be submitted to a general meeting to be called later, when the 'Yokohama Silk Piece Goods Association' will take up a general oversight and direction of the silk export business.

A SUGAR BEET COUNTRY.

Heretofore when the development of Manchuria has been the subject of reference in the Japanese press, the production of wheat always loomed large in the prospect. This has lately been varied by citing the success of sugar beet growing and beet sugar factory operation in Siberia. It is further stated that the Russians interested in this business are taking steps to extend beet culture into North Manchuria, with the intention to convert the opium fields to beet growing and by developing the beet sugar manufacture to make it the principal industry, since opium as a commercial article has become subject to prohibition within ten years.

CATTLE BREEDING IN JAPAN.

In the Japanese Imperial Parliament a government bill is under consideration to provide for the better breeding of cattle by fixing a standard to which entire male cattle, described as stud bulls, must conform. In answer to a member, the Vice-Minister of Agriculture and Commerce stated that in examining animals for stud purposes the authorities intended to select bulls more than a year and a half old, exceeding four feet in height, and sound in health and temper. For dairy purposes, the breeding of Ayrshire stock would be encouraged.

Answering another inquiry, the Vice-Minister stated that the Japanese cattle were inferior to the European or American in many respects. The average weight of Japanese cattle, added the Vice-Minister, was 70 to 80 while European or American cattle averaged from 100 to 125 standard. Japanese cattle were also inferior in pulling power, which would compare as 4 to 5 in respect of distance travelled, and as 100 to 150 in respect of load haul, against similar service by European or American

animals. The hides of European cattle were over twice as large as those of Japanese, were stronger, and the price was three times higher. Japanese calves would value from Y20 to Y60, against Y40 to Y150 for European calves. Under the circumstances, the government intended to gradually replace Japanese cattle with European, and this tendency prevailed throughout the empire.

The Vice-Minister stated, in reply to a further question, that at present the inspection of stud bulls was left to the local authorities, but it was proposed to appoint officials in the central government for the supervision of the inspection, in order to get uniformity. The appointment of such officials would cost the government Y20,000 a year. At present there were about 3,464 stud bulls and 600,000 cows in the empire.

THE TOKYO INDUSTRIAL EXHIBITION.

This exhibition is to be opened on the 20th instant and closed on the 31st July. The *Japan Times* says, 'The plan has been laid on a larger scale than the National exhibition held at Osaka in 1903, and this being the first exhibition worthy of the name after the war, the whole nation has eagerly assisted in the effort to make it a success. The remarkable development of the country in commerce and industry after a victorious period of warfare will be fully displayed in the exhibition.'

An enterprising British Columbia milling company entertained for a time the project of making an exhibit and practical baking demonstration on the plan of that of the Canadian government at the Osaka exhibition four years ago. But the expense, involving the taking of a special site and the construction of a building in accordance with the regulations of the exhibition, which was doubtless thought to be too considerable to be undertaken by one firm, in respect of a matter of which immediate competitors also would have the benefit, probably led to the abandonment of the project.

ALEX. MacLEAN.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(*Mr. W. A. MacKinnon.*)

SUN BUILDING, CLARKE ST., BRISTOL., ENG,
March 30, 1907.

PICKLING ONIONS.

There is a large and growing demand in Great Britain for small onions suitable for pickling. Canadian growers have apparently not paid much attention to this market in the past, and I understand that one or two casual efforts to develop it have failed because the size of onions shipped have usually been too large. The proper size can be seen in jars of pickles such as are commonly used here and in Canada. The onions should be shipped (not peeled) in bags holding 100 pounds each. Importing firms can take from 100 to 500 bags at an order, depending upon the condition of the trade, supplies from other sources and so on.

SOURCES OF SUPPLY.

At present most of the pickling onions which are imported come from Egypt, Holland and Belgium. The home-grown article is naturally in high favour, but though the industry is extensively developed in Bedfordshire and other countries, the supply is not nearly sufficient.

PREFERENCE FOR CANADIAN PRODUCT.

I am assured by the importers of this, as of other articles, that if quality and price are nearly equal and supplies can be depended upon to arrive punctually, they would much prefer purchasing in Canada, rather than in any of the countries named. It is suggested that if Canadian growers think seriously of entering this field further useful particulars will be readily furnished by the importers.

GHERKINS.

Similarly there is a considerable demand for a small pickling gherkin. These also have been shipped from Canada, but were too small in size. If this defect is remedied there is thought to be no reason why Canadian should not compete with the French and Dutch gherkins.

CAULIFLOWER.

At present the best supplies of this article are Italian grown, but here again the desire has been expressed to obtain supplies from Canada. If Canadian growers are interested in this or in the above I shall be pleased to hear from them, and to put them in touch with intending purchasers.

W. A. MACKINNON.

SOUTH AFRICA.

REPORT OF ACTING COMMERCIAL AGENCY.

(*Mr. W. T. R. Preston.*)

RHODES BUILDING, CAPE TOWN,
P.O. Box 668,

March 18, 1907.

SCHOOL AND CHURCH FURNITURE.

Inquiries have lately been made here for agencies for school and church furniture, general furniture and steel letter filing cases.

One or two of the correspondents have received replies from Canada which have left the impression on the minds of the parties here that these manufactures in Canada are largely controlled by combines, or such amalgamation of interests in the Dominion, as practically limit competition, if not production as well. The general result of this view becoming prevalent in agencies here is going to be exceedingly detrimental to Canadian manufacturing interests.

The commission agents here, speaking generally, are a live factor in establishing business relations throughout British South Africa. There are of course among these many who are particularly active, and others who do not show a marked characteristic in that particular. It might be well to say that to begin there is a decided preference for colonial goods. But when a commission agent finds that he cannot establish relations with certain Canadian manufacturers, such as the line referred to above, he then makes an effort to get an agency for similar goods either from the United States or Germany. Inasmuch as apparently some instances the Canadian combination or amalgamation have an understanding with the combination or amalgamation in the United States, the agent finds that door closed as well, with the re-

sult that he is forced to get a German agency, and instances which have come to my knowledge I have found this to be the secret of a considerable introduction of German goods.

It perhaps does not come under the purview of a Canadian Government representative to criticise the methods of Canadian manufacturers, and yet this is probably an occasion when it might be pointed out that however necessary it may be considered from a local standpoint to limit production and destroy competition in the home market which is practically under their control, yet to adopt the same methods in a foreign market, which is in no sense under their control, is a policy which can only have disastrous results upon Canadian interests. The subject is one which certainly deserves most careful attention on the part of those interested in these and other businesses which may be directed by a similar policy in Canada.

W. T. R. PRESTON.

MEXICO.

REPORT OF COMMERCIAL AGENT.

(*Mr. A. W. Donly.*)

APARTADO, 91B, MEXICO CITY, MEX., February 9, 1907.

CANADIAN BARLEY FOR MALT.

Previous to the passage of the McKinley Tariff Act in the United States, Canadian barley, due to its superior quality, was in demand in that country for malting purposes. The passage of the Act did not decrease the demand, but it did decrease the supply as the Canadian farmer could not raise barley for that market at a profit when the thirty cent per bushel duty was expected to come from his pocket. The result was that the American brewer was obliged to use an inferior article while the Canadian farmer lost a good customer and this, shortly after, led to a greatly decreased production of malt barley in that part of Ontario which previously had counted upon the American brewer to take his product.

Canada at present produces, perhaps, as many or more bushels of this cereal as she did previous to the enactment of the McKinley tariff, but if this is so it is due to an increased home consumption and not to a large foreign demand. The result today is that when a request for Canadian malt barley comes from a new quarter it is difficult, if not impossible, to supply the demand.

MEXICO AS A MARKET.

In my report of June 28, 1905, I wrote as follows, upon this subject :—

‘Up to the present time all the malt used in Mexican breweries has been imported. Recently a concession has been granted and a large plant is now in course of erection for the manufacture of malt in this city. The plant will be ready to begin operations this coming fall and will have an initial capacity of 600 bushels of barley daily, which later is to be increased to 1,200 bushels. With the superior grade of Canadian barley, so well adapted for malting, and with a regular steamship service from Montreal, Canada should, I believe, practically control the supplying of this demand. There is considerable barley produced in Mexico, but very little of it is adapted to the manufacture of malt. Besides the local price never goes below fifty cents per bushel of 56 pounds and it is generally considerably higher. As the terms

of the concession permit the free importation of foreign barley there would only be the question of freight to reckon with.'

What I then said has been realized and the malt plant in question is at present running at its full capacity of 1,200 bushels daily and will soon be obliged to considerably increase its present capacity.

PROSPECTIVE DEMAND.

During the year 1905 I had some samples of Canadian barley sent me, but they did not seem to be satisfactory and it looked as though this trade would never turn Canadawards. However, last fall, a representative of the company visited Canada and contracted for some sample shipments. These shipments have arrived and I am informed have given satisfaction. The chief and practically the only difficulty in connection therewith seems to be a shortage in supply. If the demand can be supplied in the Canadian market I have no reason to doubt that Canadian barley will hereafter be used to the exclusion of all other. At present some 400,000 bushels would meet the annual demand, but the consumption of beer is fast increasing throughout Mexico and there is no reason to doubt that within a very few years the demand for barley will be many times greater than at present.

RECOMMENDATION TO ONTARIO FARMERS.

I believe that that part of Ontario east of Toronto is the best adapted for its cultivation, and said section is certainly most favourably situated as regards shipping facilities and cheap freight rates. I would, therefore, strongly urge the farmers of that section to increase their barley acreage, knowing that a good and growing and favourably located market is theirs to control.

NO PREFERENTIAL DUTIES.

Mexico concedes absolutely no preferential duties to any country, and, besides, the concession of the malt company allows them free importation, from any country, of barley for malting purposes.

LOCAL PRODUCT, HOW CONSUMED.

There is a very large quantity of barley grown in Mexico but it is entirely unsuited for malting purposes nor it is believed, on account of the climate, that a good malting barley can ever be grown in this republic. The barley produced here is used almost entirely for feeding working stock as no oats are grown in Mexico.

P. B. MACNAMARA.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(Mr. J. S. Larke.)

THE ROYAL EXCHANGE, SYDNEY, AUSTRALIA, March 19, 1907.

NEW SOUTH WALES TRADE.

The Collector of Customs of New South Wales has favoured me with a return of the trade of the past year, for the purpose of affording interesting comparison. I give the similar figures for the year 1905. I sent the latter figures in my report of April last year, but unfortunately it appears to have been lost in transmission.

	1905.	1906.
Imports	£14,485,123	£17,603,503
Exports	£24,493,530	£30,987,132

These figures show a remarkable increase, and are still more remarkable in comparison with the figures of 1904. The increase in both imports and exports are due in 1856—12½

part to the specie and gold included in the above statements. The increase in imports of gold of 1906 over those of 1905 was £692,626, and the increase of exportations of gold was £2,354,455. Deducting the trade in specie and gold bullion it still leaves a striking growth in both imports and exports.

The imports and exports from the principal countries were as follows:—

	Imports.		Exports.	
	1905.	1906.	1905.	1906.
United Kingdom.. . . .	£ 8,602,288	£10,047,928	£10,222,422	£12,174,155
New Zealand.. . . .	1,369,001	2,094,508	934,661	1,300,026
Other British possessions.. . . .	1,079,225	1,351,551	2,574,008	3,625,778
Total British.. . . .	£11,050,514	£13,493,987	£13,731,091	£17,099,959
Belgium.. . . .	222,994	394,805	1,787,163	3,263,310
France.. . . .	138,028	118,173	3,570,246	3,179,531
Germany.. . . .	864,289	1,037,771	2,771,396	2,294,260
United States.. . . .	1,636,069	1,702,428	602,145	2,963,628
Total foreign countries..	£3,434,609	£4,109,516	£10,762,439	£13,887,173

The increase in trade was fairly divided between British and foreign countries, and on the whole fairly divided between the chief countries with which New South Wales does trade. In the case of the increase of exports to Belgium and the United States there seems to be an exception. In the first instance the increase to Belgium is followed by a small decrease to France and Germany, and hence the figures show that Belgium has increased its transit trade with these countries. The increase to the United States is mainly of gold sent to balance trade with Great Britain.

THE CANADIAN SHARE.

	1905.	1906.
Imports.. . . .	£73,443	£150,132
Exports.. . . .	£41,459	£723,308

These figures apparently show a very great increase in the trade, particularly in that of exports from Australia to Canada. The imports do not include imports into the State of Canadian goods from other States.

Portions of New South Wales are more easily supplied from Melbourne and Adelaide than from Sydney, and with the removal of the restrictions between inter-state business there is a tendency of an increase of imports from Canada through other States. It is, therefore, difficult to say, in the absence of details, what is the actual importation of Canadian goods into this State and how great the increase in 1906 was. These details will be supplied at a later date, when obtained. The increase in exports is made up largely of gold sent by the Canadian-Australian steamers and mainly to the United States for the same purpose as the gold sent directly to the United States. It is gratifying to find that there has been clearly some increase of imports from Canada into this State in spite of the inability of so many Canadian manufacturers to supply orders, or even to entertain any proposition for export to this country.

AUSTRALIAN TRADE.

The conditions of trade continue to be very favourable. The weather, upon which the prosperity of the Commonwealth depends so largely, has been most seasonable. Good rains have been followed by a good growth of grass, ensuring feed and water for the winter. The trade for January shows an increase. The imports for that month, 1907, having been £4,179,421 as against £3,221,978 for January, 1906. This is of merchandise. There was some decrease in the importation of gold. The increase in

merchandise was nearly 30 per cent, and was in nearly all the leading articles of trade; the only line in which Canada was interested which showed a decrease, was that of fish. The decrease was of a small amount. The exports showed a still larger actual increase. The total being £7,008,214 for January this year, as against £5,521,024 for January of 1906. Apparently 1907 is to be a year of greater abundance than 1906.

KAURI TIMBER.

A despatch from New Zealand recently published here says:—

‘The Minister of Lands (after a conference with the Kauri Timber Company),’ said, referring to the extent of the Kauri timber supplies, that it seemed to be generally understood that not much more than 10 years’ timber was available for all the mills now in existence. He favoured a scheme to reserve the balance of the remaining timber permanently, and to slacken down the cutting out of the rest, so as not to hasten necessarily the end of the Kauri timber industry.’

Twelve years ago, when I paid my first visit to New Zealand, I found that one of the strong objections to a preferential tariff with Canada was the fear that it might include timber within its provisions, and thus affect the Kauri timber industry of New Zealand, which was then the most important part of its timber trade. I looked as well as I could into the extent of the Kauri timber limits, and the rate of consumption, and I ventured to say that within fifteen years it would cease to be an exportable article from New Zealand, and they would be compelled to import building timber from abroad. The opinion of the Minister of Lands supports the view that was then taken.

Kauri pine has been the chief and almost only rival to Oregon in this market. All the more that with the other New Zealand pines, it has been admitted free under the old Victorian tariff and under the Commonwealth tariff. I have no statistics that will enable me to judge as to the quantity of Kauri that is now imported into Australia, as the return of imports include all New Zealand pines under one head, and the amount of white and red pines have very largely increased during the last ten years. These pines, however, are very poor building material, and are only used in cheap constructions, and the white pine is used largely for the making of butter boxes. I have not on hand either any figures, which show the amount of Kauri yet uncut. The timber lies wholly north of Auckland. In 1905 the forest area of that section of New Zealand was stated to be 1,800,000 acres, and in 1906 it had been reduced to 950,000 acres. These forests, however, are not all Kauri, but include a very considerable variety of timber. Already cargoes of Oregon have been shipped to Wellington and the south of New Zealand. It is quite clear that the Kauri pine, though some quantities will yet come, has ceased to be a rival in the Australian market to the timber of British Columbia.

The mills of British Columbia are not in a position to take advantage of any decrease in competition. They are full of orders at the present time. The latest advices state there was no cargo on the way to Australia and but one vessel sent down to load. It is anticipated that later in the year they will be in a position to accept orders. Steamers have entered very considerably into the trade. A number of Norwegian sailing vessels have also gone north to load with timber. At one time it was supposed to be a necessity to build sailing vessels to carry timber from British Columbia. With the advent of Norwegian ships, and particularly with the probabilities of the trade being done by steamers, the necessity for so doing seems to have passed away.

SATISFACTORY CANADIAN TRADE.

In conversation with the head of one of the largest general implement and machinery houses of Australia, he stated that there had been a remarkable improvement in the business methods of Canadian firms, with the exception of the inability of some to fill orders. He has done business, and still does, with a number of the lead-

ing firms in the United States and Canada and with a few of other countries. He awards the palm for correct business methods to the Massey-Harris Co., of Toronto. In the completeness of their machinery, the methods of packing, attention to all detail and promptness in filling orders he says they excel all with whom he does business. So well is their machinery made and packed that he said that it required but one-half the number of men to put it together and fit it for the field, than he had found necessary previously with the output of one of the most prominent manufacturers in the United States. To such methods are due, largely, the remarkable success which the Massey-Harris Company has secured in Australia and New Zealand. I have had also brought to my notice within the last day or two, similar eulogies passed upon the business methods of the Gutta Percha & Rubber Company, of Toronto, and Messrs. Morice and Sons, of Montreal. Against these two firms I have never had a complaint made from buyers of their goods. The North American Bent Chair Company was accorded very high praise by their largest customer in this State. So highly satisfactory have their goods and methods been, that they have been unable to accept very large orders sent to them. It is a great pleasure to make these statements, as expressions that came to me in a week, in view of the necessity in past years in pointing out the defects in the Canadian business methods. When so many firms have mastered the difficulties that are involved in a trade at such a distance, there are good hopes of a rapid extension of Canadian exports to the southern seas, when manufacturers will have goods to spare for this market.

SEED WHEAT.

Several firms have endeavoured to secure clean No. 1 hard wheat for seed, and so far but one has succeeded in securing a Canadian firm that has undertaken to ship seed grain. One Manitoba firm in writing, states 'that they could not undertake the responsibility of furnishing grain free from the seeds of noxious weeds.' It would seem to me that such seed could be obtained from first-class mills, as they must free wheat from wild oats, or other objectionable ingredients. I should be glad to know if there be a milling firm that could undertake to do this.

LIVE STOCK.

I think upon an average of once a year I have expressed the opinion that there should be a trade in live stock from Canada. The vast number of sheep, cattle, horses and swine in this country require constant replenishing to maintain their quality and, it has always seemed to me, that the Canadian breeders have acquired a stock and the Canadian climate has a vigour that should be valuable here. The first step that may result in a test of this opinion will shortly be made. Mr. Spencer M. Cottee, who is largely connected with the dairying industry of the best parts of this State, has gone to England with the intention of returning through Canada, and will make an examination of the dairy cattle of Canada with a view of purchasing, if he thinks they will be useful in Australia. He carries letters of introduction to prominent government officials of the Dominion and provinces, which it is hoped will enable him to see the best stock that Canada has. His interests are in the production of butter rather than of cheese.

EMIGRATION.

There have been a number of inquiries respecting Canada as a farmer's home by young men, who propose to go there from New Zealand and Australia. The number is not so large as was in the years of the drought. The one interesting feature of the fact is, that some of them are young men who went to Canada four or five years ago, and who were not satisfied and returned to Australia, but are now going a second time with the view of permanent settlement on the land.

OCEAN MAIL SERVICE.

The breakdown of the mail service from San Francisco and the uncertainty surrounding the contract entered into with the British Syndicate for carrying mails via Suez, has again turned public attention to the possibility of a quick mail service to London via Vancouver. The quickening of the Trans-Continental rail service across Canada, and rumours of a fast Atlantic service has led to the hope that with suitable steamships on the Pacific, a twenty-eight days' service could be secured via Canada. Even if this be commercially impracticable, it would seem that it is of great importance to Canada, that larger steamers, better equipped for the service, could be placed on the route. The rush of passengers to England has been largely increased this year by the prosperous condition of affairs in Australia, but so far as I can learn there is no possibility that Canada will receive any increased share of these tourist travellers until a better steamship service is established between the two countries.

INCREASE IN IMPORTS.

As was shown in my report of February 19, the imports into this State had not increased in proportion to the increase in exports, though 1906 shows a fair gain. The results of the large exports are now beginning to show themselves in addition to importations. For the first two months of the year, there was a gain of £700,000 in the importations. The exports show a still larger increase. Increased orders have gone to Canada, but it is doubtful if only a percentage of them can be filled. Canadian manufacturers have adopted the proper policy of promptly advising their customers of their inability to accept an order instead of delaying it for twelve months as was formerly the custom.

UNITED STATES TRADE DISABILITIES.

There has just come into my hands a United States publication which has made an inquiry into the reasons why the export trade of the United States has not grown more rapidly. It published answers to its inquiries from some of the leading manufacturers of the United States, in which the experiences of the correspondents are given.

Some of these correspondents refer to some general causes such as:—

- Lack of transportation facilities.
- Lack of banking facilities abroad.
- Lack of reciprocal relations with foreign countries.
- Imperfection of consular service.

The most important part of their opinions is that the failures are due to personal reasons. These reasons are largely applicable to Canada. I have not seen one to which I have not called attention in my reports which have been sent to the department. But it seems to me that the experience of manufacturers of the United States, who have succeeded, would perhaps receive much greater attention than that given to statements, which are regarded as official theories.

LACK OF APPRECIATION OF FOREIGN TRADE.

The first point made in many of the letters is that the slow growth of the United States exports of manufactures is due to the failure of manufacturers to feel the importance of a foreign market.

A manufacturer, who has succeeded says:—

‘As we look at the matter it is largely a case of where the manufacturer of this country is having about all he can do to take care of the trade in his own country and he is not looking ahead sufficiently far to see that it would be an immense advantage to at the same time be getting a start in foreign countries. The average

manufacturer does not appreciate the length of time it requires to get established in a foreign country, even when all the conditions are favourable.'

This view is repeated by other correspondents, but one states upon this point: 'The theory that American manufacturers have been too prosperous and busy with domestic trade to favour foreign business deserves some attention, but we think that it applies to a very small group of manufacturers.'

Several dwell upon the fact that exports of manufactures must not be regarded as a rainy day expedient, but pursued as a settled policy. All the manufacturers of the United States should unite and harmoniously push for larger business.

LACK OF ATTENTION TO DETAILS.

A very general reason is given that when some trade has been secured, the failure to study details has led to disappointing results and sometimes the cessation of trade altogether. A large house gives this as its experience:—

'The fact that we had received more or less desultory orders from countries, decided us to establish an export department some two and one-half years ago, in an endeavour to increase that demand. Our department found itself very poorly equipped for the proper conduct of such a business. We had in our employ no one who possessed the experience of handling foreign trade, and considered the details in regard to packing of the cases, their contents, measurement and weights as almost needless.

'The attempt to make a few shipments direct brought us in contact with our own custom house, the steamship companies and the foreign custom house. We then realized the necessity of the details previously requested by our foreign purchasers. We found our invoice forms, which were good enough for domestic use, entirely inadequate for foreign demands, and at once devised special blanks for the purpose.

'Our next difficulty lay in getting our factory to realize that when we asked for detailed information in regard to shipments, we did not do it because we were cranks, but because it was essential to the proper conduct of an export business. Time and again they would fail to give us the information which we specifically requested, with a result that shipments were held up at New York City until we could get this information from the factory, or until we had opened and repacked the cases. After some eighteen months of fighting, we have succeeded in making the factory realize the importance of this work, and to-day are having no difficulty with them.'

LACK OF PATIENCE.

Another point dwelt upon is the failure of the United States manufacturers to wait patiently until the results from distant places could be realized. One firm writes: 'As yet the American, as a class, has not developed enough patience to keep him at the problem long enough to satisfactorily solve it.'

Another says: 'We believe the main reason why manufacturers are not getting their share of the foreign business is owing to the amount of detail entailed in the development of it, that is, by furnishing samples, as is oftentimes made necessary, then, being obliged to accept small trial orders, which is rather discouraging for American manufacturers who are in the habit of handling orders for large quantities; further the time required before results are obtained, which discourages the American manufacturer from entering into the foreign trade.'

A third emphasizes the lack of detail and the lack of patient perseverance, as follows: 'As a rule the American manufacturer does not study the needs of the foreign market as he should. He is unwilling oftentimes to extend the usual trade credit, and while giving his foreign customers much consideration when he is dull, he is quite apt to become arbitrary the minute his factory is fully employed.'

LACK OF REPRESENTATION.

The failure of many manufacturers is attributed to the failure to send a personal representative to investigate the needs of the country and to create a market for the goods which are to be sold.

A manufacturer upon this point says: 'Therefore, when the average manufacturer has sought foreign business, it has in most cases been in a desultory manner. A few scattered advertisements are carried in foreign papers, or export mediums, and possibly some connection is established with export houses. It has come to a point with us where we are pretty well satisfied that the only way to handle foreign business is to arrange to have a foreign representative thoroughly familiar with the business on the ground where it is sought to introduce the goods.'

LACK OF RIGHT GOODS.

A manufacturer gives amongst other reasons the slow increase in the export of manufactures to the fact that the goods are not suited to the requirements of the country to which they are sent. This manufacturer can speak from knowledge. Upon first coming to Australia, I came into contact with his goods, and his Australian representative told me he could not sell his goods because the manufacturer had stated that he would not make them as required, adding in his letter, that, 'If we could not make better goods than your country appears to need, we would go out of business. Apparently he has changed his view as the result of experience. He says: 'The American manufacturer does not put forth enough effort to establish a foreign trade, which means that he will not conform to the wants of the foreign buyer in the question of terms and of manufacturing his product and putting it up as nearly as possible in the way the user over there is in the habit of having like articles.'

LACK OF ADVERTISING.

Another manufacturer gives not only the failure of making goods suited to the market but also the failure to properly advertise the goods when made right. He says: 'Were we to express ourselves in a definite manner separately on different classes or lines of goods, we might in some cases attribute the chief reasons for the slow growth of foreign business to the lack of proper advertising and the unwillingness of our manufacturers to adapt their goods and manner of dealing to the demands of the trade in various foreign countries.'

WHAT MUST BE DONE.

Nearly all the correspondents dwell upon the importance of extending the export of United States manufacturing products. They, of course, point out the changes, which the manufacturers wish to make, as indicated at the beginning, in increasing the steamship service to foreign ports, securing reciprocal trade relations and improvement of the consular service, but the correspondents who write on the subject say the latter is doing a valuable work. Though the consuls cannot sell goods, they give information not only in their reports but in reply to requests, which assists materially in gaining markets. Outside of these their first point is that the public must be made to feel the importance of foreign trade. A manufacturer says: 'The handling of foreign trade is a science, at which we can become proficient only after years of study and oceans of experience, for in the export of manufactured goods we are, as a nation, mere novices, and the sooner there is brought about a realization of the great value to this country of a foreign commerce in manufactured articles—a realization of the fact that, directly or indirectly, every single citizen of the United States is benefited thereby, the sooner will public opinion insist upon a change in our commercial policy.'

GIVE PERSONAL ATTENTION.

A number of manufacturers dwell upon the necessity of ceasing haphazard work and give personal attention to the export trade. One writes: 'In order to become a permanent factor in foreign trade, American manufacturers must give closer study to the needs and commercial customs of those markets than it has hitherto been customary for them to give.'

Another one expresses his appreciation of the work that the United States Government through its consular service, is doing, but says: "What the American manufacturer cannot or will not do for himself, or his government, through its consular service, is not likely to do for him."

A fourth, whose failures have been narrated previously, dwells upon the success of his work, when he had given the matter the attention it required: 'As we started to put our own house in order first, we have as yet little fault to find with banking facilities and shipping connections. We have had the satisfaction of seeing our foreign business multiply itself five times, and of receiving from both foreign clients and New York export houses letters thanking us for the attention we give to details and stating that shipments received from us are better handled than from most American manufacturers.'

AN EXPORT DEPARTMENT.

Upon this point a successful house says: 'As far as our experience reaches, it demonstrates that we must have a department, specially equipped for handling this class of business to make anything of a success of it.'

SUITABLE REPRESENTATION.

A firm writes: 'It has come to a point with us where we are pretty well satisfied that the only way to handle foreign business is to arrange to have a foreign representative thoroughly familiar with the business on the ground where it is sought to introduce the goods.'

Another speaking of a line in which the United States manufacturers have admittedly done a large trade in Australia, says: 'We believe that a consultation of the official records will show that the growth of the export business in the machine tool line has been phenomenal and we believe that this is due, not only to the merit of American machine tools themselves in design and workmanship, but also to the fact that representatives of all the large firms, and of most of the less important ones, have repeatedly visited foreign countries and personally inspected their requirements and methods of doing business.'

SELL HIGH GRADE GOODS.

As in Canada the cost of raw material and wages are proportionately higher in the United States than in some of the competitive points in Europe. Under similar conditions it would therefore be impossible to make goods as cheap as say in Germany. To meet this contingency it is recommended that goods of high quality shall be sold. A manufacturer upon this point says: 'Much can be done in foreign countries with systematic work, for when reliable foreign concerns buy high class goods, it is very easy to retain their future trade, even at higher prices than they would pay for competition goods.'

ACT AND ACT NOW.

A number point out that owing to the demands of the home market, manufacturers in the United States are little inclined to seek a market abroad, or to pay any attention to trade when offered to them, but they say that the inevitable reaction must come. A foreign market cannot be developed in a month or even a year, and if action is taken now the probability is that it would be two or three years before there would

be orders that would press upon the capacity of the works. It is easier to get a market when all the world is asking for goods and supplies are not always available quickly. Hence it is necessary if a market is to be secured for the reaction that it shall be sought now. When the reaction comes the competition will be fierce and the goods known will have the advantage.

CONCLUSION.

A manufacturer very wisely sums up the matter in this sentence:—‘To sum it up, in our judgment, it all comes back in the end to the factors of individual initiative and individual effort, without which but little in this world of ours, in any field, has been developed.’

The above does not make reference to the grosser mistakes, that were made at the initiation of both the United States and Canadian foreign trade, but they deal with the prominent principles connected with failure and success. I am glad to know that the Canadian exporters now doing trade here, are doing it quite as well as the average business done from other parts of the world. There are still complaints of delays in filling orders and some other matters, but this applies to all countries alike. The demand appears to exceed the supply, and delays are experienced by Australian importers, no matter where they place their orders.

I have analysed these United States letters because the principles enumerated therein are absolutely essential to success, and I think they will be of interest to Canadian exporters, and those who propose in the future to do trade abroad.

J. S. LARKE.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA
AND TASMANIA.

(*Mr. D. H. Ross.*)

STOCK EXCHANGE BUILDING,
MELBOURNE, March 18, 1907.

COMPETITION WITH CANADIAN SPRUCE.

The importation of Canadian spruce into Australia is receiving a decided check owing to the competition caused by the recent introduction of Manchurian pine from Korea. This lumber is imported in hewn logs and is therefore free of duty, whereas sawn spruce is dutiable at the rate of 15s. (\$3.65) per M. superficial feet. It is impossible to ship spruce in logs from Canadian (Atlantic) ports to Australia owing to the sweating that occurs by reason of the long voyage through the tropics. Manchurian pine is very similar to spruce and is used for the same purposes, such as for making fruit, rabbit and other cases. Representations have already been made to the Department of Trade and Customs, Melbourne, that—in the revision of the Australian tariff in July next—some special consideration will be extended to spruce and other Canadian lumber.

REPATRIATION OF AUSTRALIANS IN SOUTH AFRICA.

Representations have been made to the Commonwealth government that many Australians in South Africa have, for some time past, been in destitute circumstances,

and without means to return to their native land. An arrangement has been made by the government with the commercial agent for New South Wales in South Africa to supervise the repatriation of 1,000 indigent Australians of good character to the Commonwealth. Passages have been secured at £7 per head, and the total expenditure is estimated not to exceed £7,000.

REVISION OF THE AUSTRALIAN CUSTOMS TARIFF.

It is announced that at the next session of the Commonwealth parliament—in July—there will be a revision of the Australian customs tariff. The preliminary details, in connection with the alterations likely to be made, are now being collaborated by the Department of Trade and Customs in Melbourne. It is admitted by both protectionists and free traders that the 1902 customs tariff has to be revised and anomalies rectified.

THE WORLD'S PRODUCTION OF GOLD AND SILVER.

From figures recently published by the director of the United States mint it is estimated that the world's output of gold for 1905 was valued at £77,139,000, the largest contributors being Africa, United States and Australasia in the order named. These three countries produced 75 per cent of the total. In the output of silver British possessions are responsible for only 18 per cent of the total, Mexico and the United States finding more than 70 per cent. The following table will be of interest :—

	Gold, £	Silver, fine ozs.
Africa..	23,232,456	619,620
United States..	18,777,044	56,101,600
Australasia..	17,614,932	12,561,600
Mexico..	3,128,546	54,652,893
Russia..	4,569,777	204,960
Canada..	2,969,794	5,974,875
India..	2,389,295	Nil.
Japan..	682,711	2,409,879
All others	4,474,731	24,814,535
Total, 1905..	77,139,286	157,339,962

The gold yield of Australasia for the succeeding year, 1906, shows a falling off of £734,432, whilst that of the Transvaal alone for the same period increased by £1,347,531. The probability is, therefore, that South Africa will again head the list of the world's gold producers. All the principal silver mining countries show a diminishing output, that for 1905 being valued at £21,000,000 on the basis of 2/8 (65 cents) per oz.

SUGAR PRODUCTION IN AUSTRALIA.

The sugar production in Australia in 1906 has, on the estimates so far available to the Customs Department, exceeded the consumption by 15,000 tons, the comparative figures being 204,634 tons produced and 189,540 tons consumed. For the past three years the production has been gaining on the consumption as is shown by the following figures :—

	Production, tons.	Consumption, tons.
1904..	164,470	193,000
1905..	172,242	186,000
1906 (estimated)	204,634	189,540

Despite the production considerable quantities of sugar are imported, amounting in 1906 to 840,678 cwt. The exports of sugar for the same period amounted to 185,047 cwt. The drawback in duty on sugar used in the production of jam in 1906 amounted to £2,507, representing 8,401 cwts. When production exceeds the local demand, Western Canada is looked to by Australian sugar planters as a market for any surplus available for export.

REDUCTION IN PASSAGE MONEY FOR IMMIGRANTS FROM EUROPE TO AUSTRALIA.

An offer has been made by one of the steamship companies trading between London and Australia to make a reduction in the passage money of approved immigrants from £17 (\$82.73) to £12 (\$58.40), and to half price for children. It is suggested that the various State governments should contribute £4 (\$19.46) to the cost of the passage money, thus leaving only £8 (\$38.93) for each immigrant to pay. These terms would apply especially to agricultural labourers and farmers for the various States. Vigorous efforts are in contemplation to encourage British emigrants to come to Australia rather than settle in foreign countries.

A NEW AUSTRALIAN SIGHT.

The negotiations between the Prime Minister of the Commonwealth and the Premier of the State of South Australia with reference to the transfer of the Northern Territory to the Commonwealth have proved entirely successful. The territory is to come over to the Commonwealth next year. Legislation covering the transfer and a large scheme of development is to be put through the Parliament of the Commonwealth and that of the State of South Australia. The amount of the loan indebtedness by South Australia in connection with the Northern Territory is £3,450,298, which sum will likely form the first national debt of the Federal Government. One of the most important conditions in the transfer of the territory is that of completing the Transcontinental Railway from Oodnadatta, in the south, to Pine Crook, in the north, a distance of about 1,136 miles.

EXPORTS OF TASMANIAN APPLES FOR ENGLAND, 1907.

The first shipment of Tasmanian apples, this season, for England was made on February 22, from which date until April 26 regular weekly shipments have been arranged for. Allotments of cargo space in the various steamers have been made, as follows:—

	Cases.
February shipment.	10,000
March "	252,000
April "	230,000

The freight from Hobart to London and Liverpool varies from 65s. (\$15.81) per ton measurement, equivalent to about 69½ cents per case, by the fast mail steamers via Suez, down to 63 cents via Cape Town, and one steamer carrying over 100,000 cases was fixed at 57 cents per case. For the first time Tasmanian growers have had an opportunity of shipping direct to Antwerp and Hamburg by German steamers at a freight rate of 74½ cents per case. The total exports of apples from Tasmania to the United Kingdom and the continent will probably exceed half a million cases. The season has been excellent and the quality of the fruit is said to be above the average. In Weekly Report No. 130, I gave details with reference to Tasmanian methods of packing apples for export, and other particulars, which should have been of interest to Canadian fruit growers and shippers.

SHIPMENTS OF APPLES FROM MELBOURNE AND ADELAIDE.

Fair shipments of apples for the United Kingdom and the continent have left Melbourne and Adelaide during the last three weeks. Before the season closes it is

expected that the aggregate shipments from the above ports will treble those for the corresponding period of 1906. About 40,000 cases have so far been exported and considerable space has been engaged in steamers for forward delivery.

SIZE OF AUSTRALIAN APPLE CASES.

This is the first season in which the operation of the Australian Commerce Act has been given effect to in regard to exporting apples—or other fruit—to oversea ports. Apples for export are packed in cases measuring (inside) 18 x 14 x 8 $\frac{1}{2}$ inches without divisions. A case of this size is deemed to contain 2,237 cubic inches, and to have a capacity of not less than one Imperial bushel, so that exporters using cases of the standard size may safely mark them as containing 'one bushel net.' A smaller case, half the size of the one just described, may be used but, on account of extra expense, it is not likely to be favoured to any great extent.

AUSTRALIAN COMPULSORY INSPECTION OF FRUIT FOR EXPORT.

The Victorian Agricultural Department has provided a large building on the pier at Port Melbourne as a receiving and inspecting depot for all fruit (grown in this State) intended for export. Shippers, when forwarding a consignment, notify the inspector of their intention to make shipment accompanied with a declaration that the fruit is sound and free from disease. As steamers sail every week, the fruit can be sent to the port at any time for inspection. If the fruit is found to be clean and sound—not otherwise—permission is given to the shippers to export same.

It is optional to the shipper to have the cases stamped as having been passed by the inspector, but the fruit must nevertheless undergo the usual examination by the government officials. If requested, the inspecting officer will mark the cases with the Commonwealth stamp 'approved for export,' and will issue a certificate accordingly. The expenses in connection with the inspection of fruit are defrayed by the Commonwealth government. Next year, it is proposed to make the inspection in large orchards or in localities convenient to the growers when it is considered advisable to do so.

COMMONWEALTH DEFINITION OF DISEASE IN APPLES, ETC.

In the export regulations under the Australian Commerce Act, the definition of 'disease' is of a far-reaching nature, and gives the inspecting officer considerable latitude. The definition which applies to fruit, plants, seeds, maize or potatoes, is as follows:— 'Disease in relation to fruit means any abnormal condition of or in such goods, whether consisting of the presence of or caused by or due to the operations, development, growth, or decay of any insect or fungus and also includes the condition known as bitter pit.'

COMPULSORY MARKING OF TRUIT CASES FOR EXPORT.

Cases containing fruit intended for export must be marked 'apples' (or such description as the contents may warrant) together with the net weight or quantity, the name of the State where grown additional to the country of origin 'Australia,' and the name of the exporter or his registered brand. It is also recommended that the old-established practice of marking the variety—as well as the circumference in inches—of the fruit be adhered to. A case of apples marked as suggested would contain the inscription upon one end as follows:—

J.O. 2 $\frac{1}{2}$ in.
 Apples
 JOHN SMITH
 Victoria
 Australia.

 1 bushel net.

(The 'J.O.' being a contraction for 'Jonathan' apples, and the '2½ in.' indicates that no fruit less than that circumference is packed). The branding of the name of the grower, shipper or the trade mark of either upon the case is considered an important feature for the reason that it identifies the shipper with the fruit exported, hence if the fruit is inferior it reflects upon the brand. In the reverse way the shipper's name upon the cases of good fruit causes his brand to be sought after and thus an incentive to export only the best qualities is established.

APPLES NOT COOLED BEFORE SHIPMENT.

In former years, a proportion of apples, &c., was graded and chilled before shipment at Melbourne, but, when stowed in the steamer's hold with a much greater bulk of fruit that was not chilled, a rise in the temperature was brought about, which was more injurious than if the fruit had not been cooled. It was decided to abandon chilling until whole cargoes can be cooled prior to shipment. Naturally the transit of fruit from Australia to England, occupying from five to six weeks, frequently longer—is fraught with considerable risk so far as the refrigeration is concerned. On the one hand there is the danger of freezing the cargo, and on the other over-ripeness through not reducing the temperature quickly enough.

EXPORTING PEARS FROM AUSTRALIA.

The export of pears is conducted under the same regulations as apples and all other fruit shipped from Australia to oversea ports. The cases used for packing pears are usually made up of trays cleated together, but each tray must show the weight or number of the contents, or—as an alternative—the case (made up of trays) may be marked 'one bushel.' If the pears are packed in the Australian patent (Farrah Thomas) fruit cases (as described in Monthly Report for April, 1906, p. 1784), the number of fruit is marked thereon.

GRADING APPLES FOR EXPORT IN MELBOURNE.

Accompanied by the Victorian superintendent of exports, I recently witnessed the grading of apples for export in the stores of a leading firm of Melbourne fruit shippers. Extreme care was taken in the grading by rejecting as unfit for oversea trade any small, immature or inferior fruit concerning which there was the slightest element of doubt.

Fruit as near to one size as possible was packed in each case. The responsibility thrown upon the exporter by the Commonwealth Commerce Act in regard to the quality and correct description of all fruit to be exported (by reason of heavy penalties) will undoubtedly raise the standard of exports from Australia.

AUSTRALIAN DRIED FRUITS.

The raisin, sultana and currant growers of Victoria and South Australia have been in conference recently in Melbourne with a view of improving their commercial prospects, and ultimately a basis of co-operation was arrived at for the ensuing three years. At the Mildura irrigation settlement in this State there is now about 10,000 acres of land under cultivation, and the most remarkable development in the last year or two is the increase of acreage devoted to the production of sultanas and in a lesser degree to currants. There is a marked falling off in wine grapes, and the cultivation of citrous fruits is decreasing rapidly. The present season promises to yield an abundant harvest, and orders are looked for from Vancouver and other points in Western Canada as a result of samples and special quotations sent from Melbourne which should reach the principal wholesale grocers in Canada during this week.

AUSTRALIAN EXPORTS OF EGGS.

Encouraged by the success of the trial shipment of eggs sent by the produce department of the State of South Australia to the United Kingdom, further experiments are being made in a similar direction. The South Australian commercial agent, in a detailed report on this statement, stated that the method of packing was successful; the percentage of cracks and broken infinitesimal; the chaff packing turning out excellently and the whole shipment being the best and most evenly packed lot ever put upon the London market and superior in every way to any other foreign imports. Eggs less than the minimum of 2 oz. adopted by the department were rejected from shipment, but it is understood that if the small eggs are fresh and clear they can be sold at a reduced price. The standard Canadian egg export case has been recommended by the Victorian superintendent of exports. It is claimed that the Canadian case—with a capacity for 360 eggs—is very strong and the fillers appears to be of excellent quality and quite odourless. The eggs were carried at a temperature varying from 33 to 38 degrees Fahrenheit. Arrangements have been made for shipments of eggs next season to leave Melbourne and Adelaide in October, followed by consignments in November and December.

PAPER 'FILLERS' FOR EGG AND FRUIT CASES.

There is a good demand in Australia for paper compartments—or fillers—suitable for egg and fruit cases. It is essential that the paper used in their construction must be free from odour, Canadian manufacturers of this line are requested to forward full particulars to this Commercial Agency. Upon receipt of f.o.b. New York quotations for large quantities, representations will be made to the principal dealers and to the superintendents of the government cool stores in Melbourne and Adelaide, under whose supervision the exports of eggs and fruit are shipped.

AUSTRALIA'S RABBIT EXPORT.

While experiments are being made in one of the States with the object of annihilating the execrated rabbit—they are not, at least, in some directions—being looked upon with great favour. The Victorian inspector of exports has prepared a return showing that in the export of frozen rabbits, there is a valuable asset to the country. It is estimated that in 1906 over £600,000 was paid to Australian exporters for their rabbits, besides which about £39,000 was spent in labour and materials for the crates in which they were packed. Upwards of £90,000 was expended in shipping freights to London. Further benefits were derived in the freight paid to the various Australian railways for transportation of rabbits to the ports of shipment. The number of crates exported from Australia in 1906 was 944,573, each crate containing 24 rabbits which were inspected, graded and frozen—so far as Victoria is concerned—under government supervision.

AUSTRALIAN IRON DEVELOPMENT.

In Monthly Report for May, 1906, p. 1937—I reviewed the Heskett-Moore automatic iron process for converting the raw material into malleable iron or steel by a continuous system. Further exhaustive tests have recently been made in Melbourne, at the works of the patentees, by practical ironmasters and metallurgists with the result, it is now announced, that a new company is being registered with ample capital to erect works in a neighbouring State, where there is stated to be unlimited quantities of iron, coal, limestone, &c. Considerable adverse as well as favourable criticism has been devoted to the Heskett-Moore process, hence great interest is being taken in the proposals of the new company to establish an iron and steel industry capable of ultimately supplying the bulk of the requirements of the Commonwealth.

FAVOURABLE DECISION ON A CANADIAN'S PATENT.

A patent case, which had been before the Australian commissioner of patents for some months, was finally disposed of recently. The application was made by Mr. David Poe, for a patent relating to linotype machines, and opposition was taken by Mr. W. H. Thomas, of Sydney,, principally upon the grounds that an identical machine had been brought out from Canada in the same steamer that carried the mail in which the patent documents were mailed. It was proved that there had been no publication of the machine in the Commonwealth, and the commissioner disallowed the opposition with costs.

AUSTRALIAN ONIONS FOR VANCOUVER.

A large shipment of Victorian onions has been made by the *Mona* sailing to-day from Sydney to Vancouver. This shipment would have been considerably augmented had there been sufficient space available. The April steamer, however, will take forward to Vancouver likely the largest shipment of onions ever exported from Australia to an oversea port. The quality of the onions this season is undoubtedly better than any hitherto shipped to Canada.

CANADIAN MOTOR CARS.

One line of distinctly high grade Canadian motor cars is now finding an excellent and increasing sale throughout Australia and New Zealand. These cars have undergone exhaustive long distance tests, and their speed has been found to exceed some imported cars which advertise a much higher horse power. Local stocks have been exhausted and shipments to arrive are anxiously waited for. Were supplies recently available considerable extra business could have been secured, but the results attained by expert Australasian representation has exceeded the anticipations of the manufacturers.

CANADIAN TRADE NOTES.

From special inquiries made in Melbourne, Adelaide and Perth in regard to importations of Canadian goods and products, I have secured undoubted proof that considerable expansion has recently taken place despite the fact that, in several leading lines, there has been an advance in manufacturers' export prices. Orders sent from the cities named to Canada during the last three months have—in most instances—trebled in value the orders forwarded during the similar period of last year. The increase is general and not confined to any special class of goods. Owing to seasonable conditions there has been a temporary falling off in the demand for a few commodities which will likely be remedied by later mails. In every case the increase in the indents sent for Canadian goods has been caused by excellent local representation, which is indispensable in meeting competition from other sources of supplies and also in introducing new lines of manufactures.

D. H. ROSS.
